Abstract

The moiré topograph in Fig. 2 of Yoshimura [*Acta Cryst.* (1996), **A52**, 312–325] did not reproduce well. The figure is reprinted here after photographic reprocessing to improve clarity.

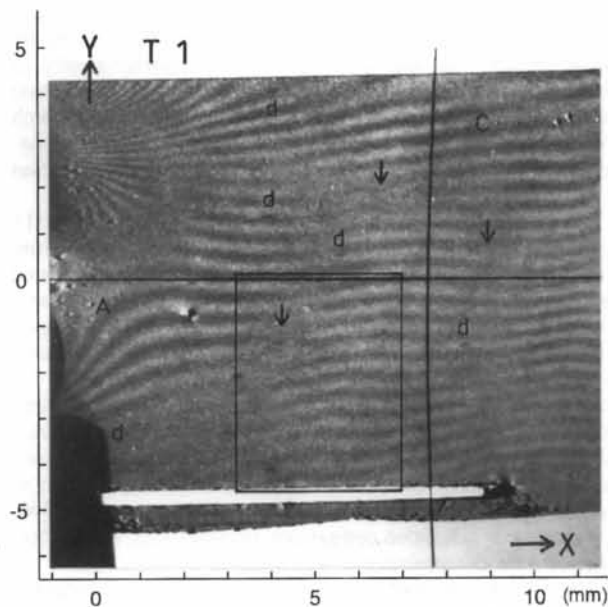

Fig. 2. An example of an experimental moiré topograph. *T* set no. 8, *T*₁ topograph. *O*-beam image. The diffraction vector is from left to right in the topograph. For details see text.
