

Acta Cryst. (1988). **B44**, 678

Structural studies of substituted 6,7-benzomorphan compounds. I, II and III. Erratum. By Y. G. GELDERS and C. J. DE RANTER, *Laboratorium voor Analytische Scheikunde, Instituut voor Farmaceutische Wetenschappen, KU Leuven, Van Evenstraat 4, B-3000 Leuven, Belgium*

(Received 26 May 1988; accepted 20 June 1988)

Abstract

According to the IUPAC sequence-rule preferences, the absolute configuration of the substituted 9,9-dimethyl-6,7-benzomorphan compounds [Gelders, De Ranter & Schenk (1979). *Acta Cryst.* **B35**, 699–703; Gelders, De Ranter & Overbeek (1979). *Acta Cryst.* **B35**, 1111–1116; Gelders &

De Ranter (1980). *Acta Cryst.* **B36**, 744–746] should be assigned (1*R*,5*S*)-configuration instead of the (1*R*,5*R*)-configuration reported in the original manuscripts.

All relevant information is given in the *Abstract*.

Acta A – a new look for 1989

From January 1989, *Acta Crystallographica* Section A will be published monthly. Additionally it will incorporate a new *Fast Communications* section. This section will include papers covering all aspects of crystallography on topics of current interest for which rapid publication is essential; these papers will be speedily refereed and prepared on a desktop publishing system in Chester for onward transmission to the printer as camera-ready copy. The average publication time from the receipt of a paper by a Co-editor until it appears in print will be about 3 months. In addition, Letters to the Editor will be considered for this new section along with reports of IUCr Commissions.

Call for papers for the New Fast Communications Section

Authors are therefore requested to submit suitable papers to any of the Co-editors of *Acta Crystallographica* or *Journal of Applied Crystallography*. Authors should follow the usual *Notes for Authors* for these journals, but additionally:

The topic should be of sufficient interest to merit special treatment and the letter accompanying the submission should identify the aspect which makes speedy publication essential;

The paper should not exceed two printed pages (about 2000 words or eight pages of double-spaced typescript including tables and figures);

Figures should be clearly lettered;

If the paper is available on 3.5 or 5.25" IBM PC-compatible or Macintosh diskettes it would be helpful if these could be sent with the manuscript together with details of the word-processing package used.

Papers submitted for the *Fast Communications* section but judged by the Co-editor *not* to merit rapid publication will be considered for publication in the appropriate section of *Acta Crystallographica* or in *Journal of Applied Crystallography*.

Prices of *Acta Crystallographica* and *Journal of Applied Crystallography*

The Executive Committee of the International Union of Crystallography is pleased that it has not been necessary to increase the subscription rates and the prices of back numbers for *Acta Crystallographica* and *Journal of Applied Crystallography* as from 1 January 1989. This is the sixth consecutive year for which prices have remained constant.

Acta Crystallographica

The following rates will apply for Volumes A45, B45 and C45 (1989). All subscription rates are fixed in Danish kroner. The US dollar equivalents are no longer given because of rapid fluctuations in exchange rates.

Complete volumes, regular price per volume

Sections A, B & C (combined subscription)	Dkr 5250
Section A only	Dkr 1275
Section B only	Dkr 1275
Section C only	Dkr 3000
