

books received

The following books have been received by the Editor. Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.

book reviews

Works intended for this column should be sent direct to the Book-Review Editor, whose address appears in this issue. All reviews are also available from **Crystallography Journals Online**, supplemented where possible with direct links to the publisher's information.

Oxford handbook of nucleic acid structure. Edited by Stephen Neidle. Pp. xviii + 662. Oxford University Press, 1999. Price US\$140.00. ISBN 0-19-850038-6.

A review of this book, by Michal Sabat, has been published in the July issue of *Acta Cryst. Section D*, page 1052.

Nucleic acids: structures, properties and functions. By Victor A. Bloomfield, Donald M. Crothers and Ignacio Tinoco Jr. Pp. xii + 794. Sausalito: University Science Books, 2000. Price US\$79.20. ISBN 0-935702-49-0.

A review of this book, by Michal Sabat, has been published in the July issue of *Acta Cryst. Section D*, page 1052.
