The article by Lee *et al.* (2005) [*Acta Cryst. F* **61**, 669–672] is corrected.

Fig. 1 of the article by Lee *et al.* (2005) was labelled incorrectly. The first component should be reductase and the second ferredoxin. A correct version of Fig. 1 is given below.

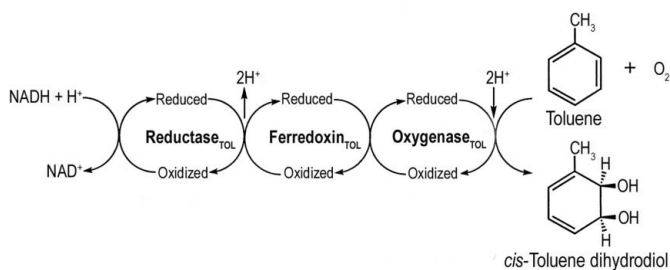

Figure 1
 Dihydroxylation of toluene to *cis*-toluene dihydrodiol catalyzed by the three-component toluene dioxygenase enzyme system.
