

the provision of self-binders for *Acta Crystallographica*. The binders are designed to carry the twelve parts of two successive volumes which are held without damage by steel wires. They may be used either for temporary or for semi-permanent binding and are accordingly supplied in two styles:

- (1) Lettered with title only.
- (2) Lettered with title, volume numbers and years (e.g. Vols. 1 & 2, 1948-9).

The price of the binder is 12s. 6d. post free throughout the world. Orders should be placed direct with Messrs Easibind Ltd. stating clearly which style is required.

Acta Crystallographica

1. From 1 October 1949 the permanent address of the Editor will be:

P. P. EWALD,
Polytechnic Institute of Brooklyn
99 Livingston Street,
Brooklyn 2, N.Y., U.S.A.

2. A further very generous contribution towards the cost of producing this journal has been received from the General Motors Corporation, Detroit, Michigan, U.S.A.

Crystallographic Society of America Memoirs

The Crystallographic Society of America announces the publication of Memoir No. 1, *Memoir on the Systems formed by Points regularly distributed on a Plane or in Space* by A. Bravais, being a translation by Amos J. Shaler of the Massachusetts Institute of Technology from the original in *Journal de l'École Polytechnique*, Cahier 33, Tome 19, pp. 1-128 (1850).

It is a well-known fact that there are fourteen space-lattice types, but very few people know just why there are fourteen. It is in this classical memoir that these results were first developed. Here, also, the polar lattice (now known as the 'reciprocal lattice') was first presented. In other words, this is the source work on lattices. The development of the subject is easy to understand and requires no knowledge of advanced mathematics.

The original is published in French in a journal which is available in only a few of the larger libraries. It has been considered of such importance that it has been translated into other languages. The present publication makes this classic work available, for the first time, to English-speaking crystallographers.

Copies may be obtained at \$3.90 each from William Parrish, Philips Laboratories, Inc., Irvington-on-Hudson, N.Y., U.S.A.
