

Influence of a Single Grain Boundary on Domain Wall Motion in Ferroelectrics

Daniel M. Marincel, Huairuo Zhang, Amit Kumar, Stephen Jesse, Sergei V. Kalinin, W. M. Rainforth, Ian M. Reaney, Clive A. Randall, and Susan Trolor-McKinstry*

Adv. Funct. Mater., **2014**, 24, 1409–1417

DOI: 10.1002/adfm.201302457

The authors regret that a funding source was given incorrectly in the acknowledgements to their manuscript. The complete and correct Acknowledgements section is provided here:

Support for this work was provided in part by the National Science Foundation Grant No. DMR-1005771 and by CNMS user Proposal No. CNMS2011–022 (DM and STM). H.R.Z., I.R., and W.M.R. would like to acknowledge funding from the Engineering and Physical Sciences Research Council EP/I038934/1. A portion of this research was conducted at the Center for Nanophase Materials Sciences, which is sponsored at Oak Ridge National Laboratory by the Scientific User Facilities Division, Office of Basic Energy Sciences, U.S. Department of Energy.
