ADVANCED FUNCTIONAL MATERIALS

The cover features a large circular inset showing a 3D model of a porous material with a hexagonal lattice structure. Inside the pores, several DNA double helix structures are depicted, some standing upright and others lying down. A bright blue light source at the top of the circle creates a strong radial glow, illuminating the interior of the pores. The background of the cover is a dark blue gradient with abstract, glowing yellow and orange shapes, suggesting a high-tech or scientific environment.
