
Letters to the editor

Letters received from readers in response to articles and ideas published in ANS are regularly featured, providing an opportunity for constructive critique, discussion, disagreements, and comments intended to stimulate the development of nursing science. Unless otherwise stated, we assume that letters addressed to the editor are

intended for publication with your name and affiliation. When space is limited and we cannot publish all letters received, we select letters reflecting the range of opinions and ideas received. If a letter merits a response from an ANS author, we will obtain a reply and publish both letters.
