

Highlights

Bakterieller Dioxinabbau

K.-H. van Pée

Dehalogenierung polyhalogener Dioxine

Kurzaufsätze

Carbonylmetall-Pharmazeutika

B. E. Mann, R. Motterlini et al.

1 Carbonylmetallkomplexe – eine neue Klasse von Pharmazeutika?

Aufsätze

Lichtsammelnde Systeme

G. Calzaferri et al.

2 Wirt-Gast-Antennenmaterialien

Zuschriften

Selbstorganisation durch Polymere

J. L. Hedrick, R. D. Miller et al.

3 Templating of Silsesquioxane Cross-Linking Using Unimolecular Self-Organizing Polymers (Titelbild)

Hysteresis in Fe-CN-Ag/Au-Netzwerken

J. A. Real et al.

4 Crystalline-State Reaction with Allosteric Effect in Spin-Crossover, Interpenetrated Networks with Magnetic and Optical Bistability

Alkaloid-Totalsynthese

N. Toyooka, H. Nemoto et al.

The First Total Synthesis of the Antipode of Alkaloid 205 B

Aerobe Oxidation von Alkoholen

M. S. Sigman et al.

A Well-Defined Complex for Palladium-Catalyzed Aerobic Oxidation of Alcohols: Design, Synthesis, and Mechanistic Considerations

Polyedrische Borane

R. Hoffmann und M. M. Balakrishnarajan

Polyhedral Boranes with Exo Multiple Bonds: Three-Dimensional Inorganic Analogues of Quinones

Asymmetrische Photochemie

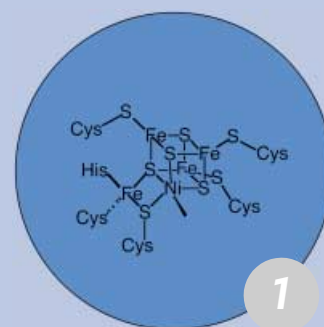

J. R. Scheffer et al.

Preorganization of Achiral Molecules for Asymmetric Synthesis through Crystallization-Induced Immobilization in Homochiral Conformations

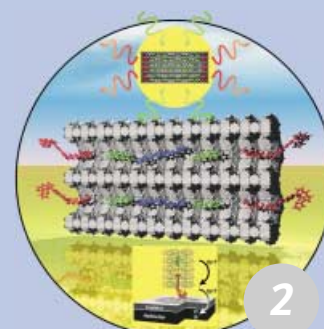

Eisen(III)-phosphonat-Käfigkomplexe

R. E. P. Winpenny et al.

Synthesis and Characterization of Iron(III) Phosphonate Cage Complexes
