

Highlights

Total Synthesis

K. J. Hale and S. Manaviazar

Total Synthesis of Bryostatin 1: A Short Route

Catalytic Processes

C. Palomo et al.

Towards Direct Mukaiyama-Type Reactions Catalytic in Silicon

Minireviews

Clicking Biomacromolecules

E. Fernandez-Megia et al.

Reliable and Efficient Procedures for the Conjugation of Biomolecules through Huisgen Azide–Alkyne Cycloadditions

Reviews

Staudinger Ligation

J. C. M. van Hest et al.

Staudinger Ligation as a Method for Bioconjugation

Communications

Natural Products Synthesis

S. B. Herzon et al.

1 Efficient Entry to the Hasubanan Alkaloids: First Enantioselective Total Syntheses of (–)-Hasubanone, (–)-Runanine, (–)-Delavayine, and (+)-Periglaucine B (Cover Picture)

Electrical Conductance

X. Guo, M. Shionoya et al.

2 Direct Conductance Measurement of Individual Metallo-DNA Duplexes within Single-Molecule Break Junctions (Inside Cover)

Polyazides

R. Haiges, K. O. Christe et al.

3 Preparation and Characterization of the Binary Group 13 Azides $M(N_3)_3$ and $M(N_3)_3 \cdot CH_3CN$ ($M = Ga, In, Tl$), $[Ga(N_3)_5]^{2-}$, and $[M(N_3)_6]^{3-}$ ($M = In, Tl$) (Frontispiece)

Engineering DNA Turnover

J. M. Gibbs-Davis et al.

4 Tuning DNA Stability To Achieve Turnover in Template for an Enzymatic Ligation Reaction (Back Cover)

Fluorination in Flow

S. L. Buchwald et al.

Accelerating Palladium-Catalyzed C–F Bond Formation: Use of a Microflow Packed-Bed Reactor
