A multicomponent reaction ...

... for the synthesis of highly functionalized 1,4,5-trisubstituted 1,2,3-triazoles from easily accessible starting materials, such as aldehydes, nitroalkanes, and organic azides, is described by W. Dehaen et al. in their Communication on page 10155 ff. The statue “Fonske” or “Fons Sapientiae” (Latin for “fountain of wisdom”) is located on the campus of the KU Leuven, Belgium, and depicts a university student who lets wisdom flow into his head while reading a book.
