

## Subject index

- acquired immune deficiency syndrome (AIDS)**, homosexuals, interferon, NK activity, synthetase E, 229
- acute respiratory disease**, common cold, rhinovirus, virucide, nasal tissues, 103
- acycloguanosine**, methoxymethyldeoxyuridine, trifluorothymidine, phosphonoformate, chemotherapy, herpes simplex virus, 13
- acyclovir**, antiviral, herpes viruses, BWB759U, 145
- acyclovir**, antiviral combinations, herpes simplex virus, interferon, vidarabine, vidarabine 5'-monophosphate, 325
- acyclovir**, channel catfish virus, antiviral activity, 269
- acyclovir**, DHPG, Ara-A, FIAC, FMAU, herpesvirus inhibition, 259
- acyclovir**, herpes simplex virus, nude mouse, immunocompromised host, antibody, 83
- acyclovir**, herpes simplex virus type 1, nucleoside pools, high-performance liquid chromatography, 75
- acyclovir**, pseudorabies, Aujeszky's disease, bromovinyldeoxyuridine, dihydroxypropoxymethylguanine, chemotherapy, herpes, 157
- adoptive immunization**, lymphocytic choriomeningitis virus, Pichinde virus, cytotoxic T lymphocytes, 299
- animal model** genital herpes, butylated hydroxytoluene, herpes simplex virus, recurrent disease, 281
- antibody**, acyclovir, herpes simplex virus, nude mouse, immunocompromised host, 83
- antiviral**, chelation, coordination, enzyme, inhibition, metals, 193
- antiviral**, herpes viruses, acyclovir, BWB759U, 145
- antiviral activity**, channel catfish virus, acyclovir, 269
- antiviral activity**, glycoalkaloids, herpes simplex virus, 335
- antiviral activity**, muramylpeptide, interferon, augmentation, 345
- antiviral combinations**, acyclovir, herpes simplex virus, interferon, vidarabine, vidarabine 5'-monophosphate, 325
- antivirals**, vaccines, immunoglobulins, 307
- aphidicolin**, cell proliferation, DNA polymerase  $\alpha$ , tissue distribution, 93
- ara-A**, DHPG, acyclovir, FIAC, FMAU, herpesvirus inhibition, 259
- augmentation**, muramyl dipeptide, interferon, antiviral activity, 345
- Aujeszky's disease**, pseudorabies, acyclovir, bromovinyldeoxyuridine, dihydroxypropoxymethylguanine, chemotherapy, herpes, 157
- azathioprine**, interferon- $\gamma$ , cyclosporin A, 49
- b-proteins**, *Nicotiana* sp., TMV, TNV, polyacrylic acid, salicylic acid, induced resistance, 355
- bisthiopyrophosphate**, influenza, inhibition, monothiopyrophosphate, transcriptase, 67
- bromovinyldeoxyuridine**, pseudorabies, Aujeszky's disease, acyclovir, dihydroxypropoxymethylguanine, chemotherapy, herpes, 157
- butylated hydroxytoluene**, genital herpes, animal model, herpes simplex virus, recurrent disease, 281
- BWB759U**, antiviral, herpes viruses, acyclovir, 145
- cell proliferation**, aphidicolin, DNA polymerase  $\alpha$ , tissue distribution, 93
- C3H mice**, LPS gene, interferon, HSV infection, NK cells, 55
- channel catfish virus**, acyclovir, antiviral activity, 269
- chelation**, antiviral, coordination, enzyme, inhibition, metals, 193
- chemotherapy**, methoxymethyldeoxyuridine, trifluorothymidine, phosphonoformate, acycloguanosine, herpes simplex virus, 13
- chemotherapy**, pseudorabies, Aujeszky's disease, acyclovir, bromovinyldeoxyuridine, dihydroxypropoxymethylguanine, herpes, 157
- chlorite-oxidized oxyamylose**, polyacrylic acid, tobacco mosaic virus, potato virus X, red clover mottle virus, 291
- common cold**, rhinovirus, virucide, acute respiratory disease, nasal tissues, 103
- coordination**, antiviral, chelation, enzyme, inhibition, metals, 193
- Corynebacterium parvum***, interferon, 117

- cyclic GMP**, interferon, 127
- cyclosporin A**, interferon- $\gamma$ , azathioprine, 49
- cytotoxic T lymphocytes**, lymphocytic choriomeningitis virus, Pichinde virus, adoptive immunization, 299
- DHPG**, acyclovir, Ara-A, FIAC, FMAU, herpes-virus inhibition, 259
- DHPG**, 9-(1,3-dihydroxy-2-propoxymethyl)guanine, interferon- $\gamma$ , synergy, herpes simplex virus, 137
- dihydroxypropoxymethylguanine**, pseudorabies, Aujeszky's disease, acyclovir, bromovinyldeoxyuridine, chemotherapy, herpes, 157
- DNA polymerase  $\alpha$** , aphidicolin, cell proliferation, tissue distribution, 93
- DNA polymerases**, HSV-1, EBV, 1
- drug targeting**, liposomes, macrophage activation, 179
- (E)-5-(2-Bromovinyl)-2'-deoxyuridine**, herpes simplex virus, topical antiviral therapy, percutaneous drug absorption, guinea pigs, 169
- EBV**, DNA polymerases, HSV-1, 1
- encephalomyocarditis virus**, interferon, macrophages, natural antiviral activity, 217
- enzyme**, antiviral, chelation, coordination, inhibition, metals, 193
- feline calicivirus**, subunit vaccine, 241
- FIAC**, DHPG, acyclovir, Ara-A, FMAU, herpes-virus inhibition, 259
- FMAU**, DHPG, acyclovir, Ara-A, FIAC, herpes-virus inhibition, 259
- genital herpes**, butylated hydroxytoluene, animal model, herpes simplex virus, recurrent disease, 281
- glycoalkaoids**, antiviral activity, herpes simplex virus, 335
- 9-(1,3-dihydroxy-2-propoxymethyl)guanine**, DHPG, interferon- $\gamma$ , synergy, herpes simplex virus, 137
- guinea pigs**, herpes simplex virus, topical antiviral therapy, (E)-5-(2-bromovinyl)-2'-deoxyuridine, percutaneous drug therapy, 169
- herpes**, pseudorabies, Aujeszky's disease, acyclovir, bromovinyldeoxyuridine, dihydroxypropoxymethylguanine, chemotherapy, 157
- herpes simplex virus**, acyclovir, antiviral combinations, interferon, vidarabine, vidarabine 5'-monophosphate, 325
- herpes simplex virus**, acyclovir, nude mouse, immunocomprised host, antibody, 83
- herpes simplex virus**, genital herpes, butylated hydroxytoluene, animal model, recurrent disease, 281
- herpes simplex virus**, glycoalkaloids, antiviral activity, 335
- herpes simplex virus**, 9-(1,3-dihydroxy-2-propoxymethyl)guanine, DHPG, interferon- $\gamma$ , synergy, 137
- herpes simplex virus**, methoxymethyldeoxyuridine, trifluorothymidine, phosphonoformate, acycloguanosine, chemotherapy, 13
- herpes simplex virus**, muramyl dipeptide, vaccinia virus, macrophages, non-specific resistance, 207
- herpes simplex virus**, topical antiviral therapy, (E)-5-(2-bromovinyl)-2'-deoxyuridine, percutaneous drug absorption, guinea pigs, 169
- herpes simplex virus type 1**, acyclovir, nucleoside pools, high-performance liquid chromatography, 75
- herpes viruses**, antiviral, acyclovir, BWB759U, 145
- herpesvirus inhibition**, DHPG, acyclovir, Ara-A, FIAC, FMAU, 259
- high-performance liquid chromatography**, acyclovir, herpes simplex virus type 1, nucleoside pools, 75
- homosexuals**, interferon, acquired immune deficiency syndrome (AIDS), NK activity, synthetase E, 229
- HSV-1**, DNA polymerases, EBV, 1
- HSV infection**, C3H mice, LPS gene, interferon, NK cells, 55
- immunocomprised host**, acyclovir, herpes simplex virus, nude mouse, antibody, 83
- immunoglobulins**, antivirals, vaccines, 307
- induced resistance**, *Nicotiana* sp., TMV, TNV, b-proteins, polyacrylic acid, salicylic acid, 355
- influenza**, inhibition, monothiopyrophosphate, bithiopyrophosphate, transcriptase, 67
- influenza virus**, ribonucleoprotein synthesis, nucleotide pools, ribavirin, 29
- influenza virus transcription**, ribavirin triphosphate, 39
- inhibition**, antiviral, chelation, coordination, enzyme, metals, 193
- Inhibition**, influenza, monothiopyrophosphate, bithiopyrophosphate, transcriptase, 67
- interferon**, acyclovir, antiviral combinations, herpes simplex virus, vidarabine, vidarabine 5'-monophosphate, 325
- interferon**, C3H mice, LPS gene, HSV infection, NK cells, 55
- interferon**, *Corynebacterium parvum*, 117
- interferon**, cyclic GMP, 127
- interferon**, encephalomyocarditis virus, macrophages, natural antiviral activity, 217

- interferon**, homosexuals, acquired immune deficiency syndrome (AIDS), NK activity, synthetase E, 229
- interferon**, muramylpeptide, antiviral activity, augmentation, 345
- interferon**, topical administration, tolerance, respiratory infection, 111
- interferon- $\gamma$** , azathioprine, cyclosporin A, 49
- interferon- $\gamma$** , 9-(1,3-dihydroxy-2-propoxymethyl)-guanine, DHPG, synergy, herpes simplex virus, 137
- liposomes**, macrophage activation, drug targeting, 179
- LPS gene**, C3H mice, interferon, HSV infection, NC cells, 55
- lymphocytic choriomeningitis virus**, Pichinde virus, adoptive immunization, cytotoxic T lymphocytes, 299
- macrophage activation**, liposomes, drug targeting, 179
- macrophages**, encephalomyocarditis virus, interferon, natural antiviral activity, 217
- macrophages**, muramyl dipeptide, vaccinia virus, herpes simplex virus, non-specific resistance, 207
- metals**, antiviral, chelation, coordination, enzyme, inhibition, 193
- methoxymethyldeoxyuridine**, trifluorothymidine, phosphonoformate, acycloguanosine, chemotherapy, herpes simplex virus, 13
- monothiopyrophosphate**, influenza, inhibition, bis-thiopyrophosphate, transcriptase, 67
- muramyl dipeptide**, interferon, antiviral activity, augmentation, 345
- muramyl dipeptide**, vaccinia virus, herpes simplex virus, macrophages, non-specific resistance, 207
- murine leukemia virus**, protein synthesis, RNA synthesis, thiosemicarbazone derivative, 249
- nasal tissues**, common cold, rhinovirus, virucide, acute respiratory disease, 103
- natural antiviral activity**, encephalomyocarditis virus, interferon, macrophages, 217
- Nicotiana* sp.**, TMV, TNV, b-proteins, polyacrylic acid, salicylic acid, induced resistance, 355
- NK activity**, homosexuals, interferon, acquired immune deficiency syndrome (AIDS), synthetase E, 229
- NK cells**, C3H mice, LPS gene, interferon, HSV infection, 55
- non-specific resistance**, muramyl dipeptide, vaccinia virus, herpes simplex virus, macrophages, 207
- nucleoside pools**, acyclovir, herpes simplex virus type 1, high-performance liquid chromatography, 75
- nucleotide pools**, influenza virus, ribonucleoprotein, ribavirin, 29
- nude mouse**, acyclovir, herpes simplex virus, immunocompromised host, antibody, 83
- percutaneous drug absorption**, herpes simplex virus, topical antiviral therapy, (*E*)-5-(2-bromovinyl)-2'-deoxyuridine, guinea pigs, 169
- phosphonoformate**, methoxymethyldeoxyuridine, trifluorothymidine, acycloguanosine, chemotherapy, herpes simplex virus, 13
- pichinde virus**, lymphocytic choriomeningitis virus, adoptive immunization, cytotoxic T lymphocytes, 299
- polyacrylic acid**, chlorite-oxidized oxyamyllose, tobacco mosaic virus, potato virus X, red clover mottle virus, 291
- polyacrylic acid**, *Nicotiana* sp., TMV, TNV, b-proteins, salicylic acid, induced resistance, 355
- potato virus X**, chlorite-oxidized oxyamyllose, polyacrylic acid, tobacco mosaic virus, red clover mottle virus, 291
- protein synthesis**, murine leukemia virus, RNA synthesis, thiosemicarbazone derivative, 249
- pseudorabies**, Aujeszky's disease, acyclovir, bromovinyldeoxyuridine, dihydroxypropoxymethylguanine, chemotherapy, herpes, 157
- recurrent disease**, genital herpes, butylated hydroxytoluene, animal model, herpes simplex virus, 281
- red clover mottle virus**, chlorite-oxidized oxyamyllose, polyacrylic acid, tobacco mosaic virus, potato virus X, 291
- respiratory infection**, interferon, topical administration, tolerance, 111
- rhinovirus**, common cold, virucide, acute respiratory disease, nasal tissues, 103
- ribavirin**, influenza virus, ribonucleoprotein synthesis, nucleotide pools, 29
- ribavirin triphosphate**, influenza virus transcription, 39
- ribonucleoprotein synthesis**, influenza virus, nucleotide pools, ribavirin, 29
- RNA synthesis**, murine leukemia virus, protein synthesis, thiosemicarbazone derivative, 249
- salicylic acid**, *Nicotiana* sp., TMV, TNV, b-proteins, polyacrylic acid, induced resistance, 355
- subunit vaccine**, feline calicivirus, 241
- synergy**, 9-(1,3-dihydroxy-2-propoxymethyl)guanine, DHPG, interferon- $\gamma$ , herpes simplex virus, 137

**synthetase E**, homosexuals, interferon, acquired immune deficiency syndrome (AIDS), NK activity, 229

**thiosemicarbazone derivative**, murine leukemia virus, protein synthesis, RNA synthesis, 249

**tissue distribution**, aphidicolin, cell proliferation, DNA polymerase  $\alpha$ , 93

**TMV**, *Nicotiana* sp., TNV, b-proteins, polyacrylic acid salicyclic acid, induced resistance, 355

**TNV**, *Nicotiana* sp., TMV, b-proteins, polyacrylic acid, salicyclic acid, induced resistance, 355

**tobacco mosaic virus**, chlorite-oxidized oxyamylose, polyacrylic acid, potato virus X, red clover mottle virus, 291

**tolerance**, interferon, topical administration, respiratory infection, 111

**topical administration**, interferon, tolerance, respiratory infection, 111

**topical antiviral therapy**, herpes simplex virus, (*E*)-5-(2-bromovinyl)-2'-deoxyuridine, percutaneous drug absorption, guinea pigs, 169

**transcriptase**, influenza, inhibition, monothiopyrophosphate, bistihiopyrophosphate, 67

**trifluorothymidine**, methoxymethyldeoxyuridine, phosphonoformate, acycloguanosine, chemotherapy, herpes simplex virus, 13

**vaccines**, antivirals, immunoglobulins, 307

**vaccinia virus**, muramyldipeptide, herpes simplex virus, macrophages, non-specific resistance, 207

**vidarabine**, acyclovir, antiviral combinations, herpes simplex virus, interferon, vidarabine 5'-monophosphate, 325

**vidarabine 5'-monophosphate**, acyclovir, antiviral combinations, herpes simplex virus, interferon, vidarabine, 325

**virucide**, common cold, rhinovirus, acute respiratory disease, nasal tissues, 103
