

Subject index

- acyclovir**, (*E*)-5-(2-bromovinyl)-1- β -D-arabinofuranosyluracil, 5-vinyl-1- β -D-arabinofuranosyluracil, bromovinyldeoxyuridine, herpes simplex virus strains, HSV-1 encephalitis in mice, 83
- acyclovir**, genital herpes, intermittent therapy, 151
- acyclovir**, herpes simplex virus type 2, neonatal herpes, mice, pathogenesis, encephalitis, 189
- adenosine analogue**, ribavirin, vidarabine, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57
- S*-adenosylhomocysteine hydrolase**, adenosine analogues, ribavirin, vidarabine, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, 57
- adriamycin**, interferon, protein synthesis, 113
- (*RS*)-AHPA**, adenosine analogues, ribavirin, vidarabine, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57
- alphavirus**, replication, antiproteinase agents, antiviral agents, 255
- amantadine**, hepatitis A, arabinosylcytosine, ribavirin, 103
- aminonucleoside analog**, HSV-1, thymidine kinase, iododeoxyuridine, 69
- antiproteinase agent**, alphaviruses, replication, antiviral agents, 255
- antiviral**, rubella virus, cell culture, 49
- antiviral**, rhinovirus, interferon, synergy, dichloroflavan, enviroxime, 241
- antiviral**, selenazofurin, influenza A virus, 343
- antiviral activity**, phosphate analogs of DHPG, cytomegalovirus, 299
- antiviral agent**, alphaviruses, replication, antiproteinase agents, 255
- antiviral agent**, chemotherapy, viral targets, 311
- antiviral compound**, thiosemicarbazones, herpes simplex virus, in vitro testing, guinea pig model, topical therapy, 197
- antiviral substance**, EMC virus, interferon, baboons, 277
- ara-A**, genital herpes, methoxymethyl-2'-deoxyuridine, combination chemotherapy, 33
- arabinosylcytosine**, hepatitis A, amantadine, ribavirin, 103
- Avridine**, liposomes, foot-and-mouth disease, CP20961, interferon, 123
- baboon**, EMC virus, antiviral substances, interferon, 277
- p*-benzoylphenoxypyridine**, picornaviruses, enteroviruses, rhinoviruses, 355
- (*E*)-5-(2-bromovinyl)-1- β -D-arabinofuranosyluracil**, 5-vinyl-1- β -D-arabinofuranosyluracil, bromovinyldeoxyuridine, acyclovir, herpes simplex virus strains, HSV-1 encephalitis in mice, 83
- bromovinyldeoxyuridine**, (*E*)-5-(2-bromovinyl)-1- β -D-arabinofuranosyluracil, 5-vinyl-1- β -D-arabinofuranosyluracil, acyclovir, herpes simplex virus strains, HSV-1 encephalitis in mice, 83
- carbodine**, adenosine analogues, ribavirin, vidarabine, pyrazofurin, tubercidin, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57
- C-c³Ado**, adenosine analogues, ribavirin, vidarabine, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57
- cell culture**, antivirals, rubella virus, 49
- chemotherapy**, antiviral agents, viral targets, 311
- combination chemotherapy**, genital herpes, methoxymethyl-2'-deoxyuridine, ara-A, 33
- common cold**, interferon, respiratory infection, 171
- coumermycin**, DNA polymerases, topoisomerases, HSV, 19
- CP20961**, liposomes, Avridine, foot-and-mouth disease, interferon, 123
- cytomegalovirus**, phosphate analogs of DHPG, antiviral activity, 299
- 2-deoxy-D-glucose**, HSV-1, receptor expression, HEp-2 cells, 137
- (*S*)-DHPA**, adenosine analogues, ribavirin, vidarabine, pyrazofurin, tubercidin, carbodine, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57
- dichloroflavan**, rhinovirus, antivirals, interferon, synergy, enviroxime, 241
- DNA polymerases**, coumermycin, topoisomerases, HSV, 19
- EMC virus**, antiviral substances, interferon, baboons, 277
- encephalitis**, herpes simplex virus type 2, neonatal herpes, mice acyclovir, pathogenesis, 189
- enterovirus**, *p*-benzoylphenoxypyridines, picornaviruses, rhinoviruses, 355

enviroxime, rhinovirus, antivirals, interferon, synergy, dichloroflavan, 241

fibroblast, regulation, interferon- β , interferon, 267

foot-and-mouth disease, liposomes, Avridine, CP20961, interferon, 123

genital herpes, methoxymethyl-2'-deoxyuridine, ara-A, combination chemotherapy, 33

genital herpes, acyclovir, intermittent therapy, 151

guinea pig, herpes simplex virus, pyrethrins, 95

guinea pig model, thiosemicarbazones, antiviral compounds, herpes simplex virus, in vitro testing, topical therapy, 197

hemorrhagic fever, Rift Valley fever virus, ribavirin, interferon, immune serum, 285

HEp-2 cell, 2-deoxy-D-glucose, HSV-1, receptor expression, 137

hepatitis A, arabinosylcytosine, amantadine, ribavirin, 103

herpes simplex virus, pyrethrins, guinea pigs, 95

herpes simplex virus, interferon, macrophage, macrophage-like, 161

herpes simplex virus, thiosemicarbazones, antiviral compounds, in vitro testing, guinea pig model, topical therapy, 197

herpes simplex virus, monoclonal antibody, nude mice, 223

herpes simplex virus, oligopeptides, interferons, macrophages, 233

herpes simplex virus strain, (*E*)-5-(2-bromovinyl)-1- β -D-arabinofuranosyluracil, 5-vinyl-1- β -D-arabinofuranosyluracil, bromovinyldeoxyuridine, acyclovir, HSV-1 encephalitis in mice, 83

herpes simplex virus type 2, neonatal herpes, mice, acyclovir, pathogenesis, encephalitis, 189

HSV, coumermycin, DNA polymerases, topoisomerases, 19

HSV-1, thymidine kinase, iododeoxyuridine, aminonucleoside analogs, 69

HSV-1, 2-deoxy-D-glucose, receptor expression, HEp-2 cells, 137

HSV-1 encephalitis in mice, (*E*)-5-(2-bromovinyl)-1- β -D-arabinofuranosyluracil, 5-vinyl-1- β -D-arabinofuranosyluracil, bromovinyldeoxyuridine, acyclovir, herpes simplex virus strains, 83

HSV infection, 2'-nor-cyclicGMP, thymidine kinase, in vivo activity, 329

human rotavirus, adenosine analogues, ribavirin, vidarabine, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, *S*-adenosylhomocysteine hydrolase, 57

immune serum, Rift Valley fever virus, ribavirin, interferon, hemorrhagic fever, 285

influenza A virus, antiviral, selenazofurin, 343

interferon, adriamycin, protein synthesis, 113

interferon, liposomes, Avridine, foot-and-mouth disease, CP20961, 123

interferon, herpes simplex virus, macrophage, macrophage-like, 161

interferon, common cold, respiratory infection, 171

interferon, herpes simplex virus, oligopeptides, macrophages, 233

interferon, rhinovirus, antivirals, synergy, dichloroflavan, enviroxime, 241

interferon, fibroblasts, regulation, interferon- β , 267

interferon, EMC virus, antiviral substances, baboons, 277

interferon, Rift Valley fever virus, ribavirin, immune serum, hemorrhagic fever, 285

interferon- β , fibroblasts, regulation, interferon, 267

intermittent therapy, genital herpes, acyclovir, 151

in vitro testing, thiosemicarbazones, antiviral compounds, herpes simplex virus, guinea pig model, topical therapy, 197

in vivo activity, 2'-nor-cyclicGMP, thymidine kinase, HSV infections, 329

iododeoxyuridine, HSV-1, thymidine kinase, aminonucleoside analogs, 69

liposome, Avridine, foot-and-mouth disease, CP20961, interferon, 123

macrophage, herpes simplex virus, interferon, macrophage-like, 161

macrophage, herpes simplex virus, oligopeptides, interferons, 233

macrophage-like, herpes simplex virus, interferon, macrophage, 161

methoxymethyl-2'-deoxyuridine, genital herpes, ara-A, combination chemotherapy, 33

mice, herpes simplex virus type 2, neonatal herpes, acyclovir, pathogenesis, encephalitis, 189

monoclonal antibody, herpes simplex virus, nude mice, 223

neonatal herpes, herpes simplex virus type 2, mice, acyclovir, pathogenesis, encephalitis, 189

neplanocin A, adenosine analogues, ribavirin, vidarabine, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57
Nicotiana tabacum, PR protein, TMV, resistance, 177

2'-nor-cyclicGMP, thymidine kinase, HSV infections, in vivo activity, 329

nude mice, herpes simplex virus, monoclonal antibody, 223

oligopeptide, herpes simplex virus, interferons, macrophages, 233

pathogenesis, herpes simplex virus type 2, neonatal herpes, mice, acyclovir, encephalitis, 189

phosphate analogs of DHPG, antiviral activity, cytomegalovirus, 299

picornavirus, *p*-benzoylphenoxypyridines, enteroviruses, rhinoviruses, 355

PR protein, TMV, *Nicotiana tabacum*, resistance, 177

protein synthesis, interferon, adriamycin, 113

pyrazofurin, adenosine analogues, ribavirin, vidarabine, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57

pyrethrin, herpes simplex virus, guinea pigs, 95

receptor expression, 2-deoxy-D-glucose, HSV-1, HEP-2 cells, 137

regulation, fibroblasts, interferon- β , interferon, 267

replication, alphaviruses, antiproteinase agents, antiviral agents, 255

resistance, PR protein, TMV, *Nicotiana tabacum*, 177

respiratory infection, interferon, common cold, 171

rhinovirus, antivirals, interferon, synergy, dichloroflavan, enviroxime, 241

rhinovirus, *p*-benzoylphenoxypyridines, picornaviruses, enteroviruses, 355

ribavirin, adenosine analogues, vidarabine, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57

ribavirin, hepatitis A, arabinosylcystosine, amantadine, 103

ribavirin, Rift Valley fever virus, interferon, immune serum, hemorrhagic fever, 285

Rift Valley fever virus, ribavirin, interferon, immune serum, hemorrhagic fever, 285

rubella virus, antivirals, cell culture, 49

selenazofurin, antiviral, influenza A virus, 343

synergy, rhinovirus, antivirals, interferon, dichloroflavan, enviroxime, 241

thiosemicarbazone, antiviral compounds, herpes simplex virus, in vitro testing, guinea pig model, topical therapy, 197

thymidine kinase, HSV-1, iododeoxyuridine, aminonucleoside analogs, 69

thymidine kinase, 2'-nor-cyclicGMP, HSV infections, in vivo activity, 329

TMV, PR protein, *Nicotiana tabacum*, resistance, 177

topical therapy, thiosemicarbazones, antiviral compounds, herpes simplex virus, in vitro testing, guinea pig model, 197

topoisomerases, coumermycin, DNA polymerases, HSV, 19

tubercidin, adenosine analogues, ribavirin, vidarabine, carbodine, pyrazofurin, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57

vidarabine, adenosine analogues, ribavirin, pyrazofurin, tubercidin, carbodine, (*S*)-DHPA, C-c³Ado, (*RS*)-AHPA, neplanocin A, human rotavirus, *S*-adenosylhomocysteine hydrolase, 57

5-vinyl-1- β -D-arabinofuranosyluracil, (*E*)-5-(2-bromovinyl)-1- β -D-arabinofuranosyluracil, bromovinyldeoxyuridine, acyclovir, herpes simplex virus strains, HSV-1 encephalitis in mice, 83

viral target, antiviral agents, chemotherapy, 311
