

Subject index

Volume 40 (1999)

-
- Acyclovir**; Duck Hepatitis B virus; Nucleotide; Prodrug **40**, 179
- Acyclovir**; Hepatitis B virus; Nucleotide; Prodrug; Synergy **40**, 167
- Acyclovir**; Herpesvirus; Mycophenolate mofetil (MFF); Cell-Cept®; Immunosuppression **40**, 540
- Acyclovir**; Penciclovir; Resistance; Sequence analysis; Thymidine kinase; Varicella-zoster virus **40**, 155
- Adenovirus type 2**; Protease; Cysteine; Papain; Inhibitors **40**, 45
- Animal models**; Papillomavirus; Cottontail rabbit papillomavirus; SCID; Antivirals **40**, 57
- Antiviral activity**; *n*-Docosanol; Fatty alcohol; Herpes simplex virus; Mechanism of action; Entry **40**, 85
- Antiviral agents**; Cytomegalovirus infections; Transplants; Immunoglobulins **40**, 115
- Antiviral compounds**; Benzimidazole ribonucleosides; Dot-blot method; Human herpesvirus 6; Human herpesvirus 7; Virus replication **40**, 740
- Antiviral drugs**; Antiviral sensitivity assay; Cytomegalovirus; ELISA **40**, 105
- Antiviral sensitivity assay**; Cytomegalovirus; ELISA; Antiviral drugs **40**, 105
- Antivirals**; Papillomavirus; Cottontail rabbit papillomavirus; SCID; Animal models **40**, 57
- Benzimidazole ribonucleosides**; Antiviral compounds; Dot-blot method; Human herpesvirus 6; Human herpesvirus 7; Virus replication **40**, 740
- Biological activities**; L-Nucleoside analogs; Mode of action **40**, 19
- CellCept®**; Acyclovir; Herpesvirus; Mycophenolate mofetil (MFF); Immunosuppression **40**, 540
- Cidofovir**; Ganciclovir; Phosphonoacetic acid; UL97 mutation **40**, 95
- Cottontail rabbit papillomavirus**; Papillomavirus; SCID; Animal models; Antivirals **40**, 57
- Cysteine**; Adenovirus type 2; Protease; Papain; Inhibitors **40**, 45
- Cytomegalovirus**; Antiviral sensitivity assay; ELISA; Antiviral drugs **40**, 105
- Cytomegalovirus infections**; Transplants; Immunoglobulins; Antiviral agents **40**, 115
- Dot-blot method**; Antiviral compounds; Benzimidazole ribonucleosides; Human herpesvirus 6; Human herpesvirus 7; Virus replication **40**, 740
- Duck Hepatitis B virus**; Acyclovir; Nucleotide; Prodrug **40**, 179
- ELISA**; Antiviral sensitivity assay; Cytomegalovirus; Antiviral drugs **40**, 105
- Entry**; *n*-Docosanol; Fatty alcohol; Herpes simplex virus; Antiviral activity; Mechanism of action **40**, 85
- Fatty alcohol**; *n*-Docosanol; Herpes simplex virus; Antiviral activity; Mechanism of action; Entry **40**, 85
- Ganciclovir**; Cidofovir; Phosphonoacetic acid; UL97 mutation **40**, 95
- Genital herpes**; Herpes simplex virus; Microbicides; Mice; Guinea pigs **40**, 1409

- Guinea pigs;** Herpes simplex virus; Microbicides; Genital herpes; Mice **40**, 1409
- Hepatitis B virus;** Acyclovir; Nucleotide; Prodrug; Synergy **40**, 167
- Hepatitis C;** Treatment; Protease activity **40**, 1
- Herpes simplex virus;** Microbicides; Genital herpes; Mice; Guinea pigs **40**, 1409
- Herpes simplex virus;** *n*-Docosanol; Fatty alcohol; Antiviral activity; Mechanism of action; Entry **40**, 85
- Herpesvirus;** Acyclovir; Mycophenolate mofetil (MFF); CellCept®; Immunosuppression **40**, 540
- Human herpesvirus 7;** Antiviral compounds; Benzimidazole ribonucleosides; Dot-blot method; Human herpesvirus 6; Virus replication **40**, 740
- Human herpesvirus 6;** Antiviral compounds; Benzimidazole ribonucleosides; Dot-blot method; Human herpesvirus 7; Virus replication **40**, 740
- Immunoglobulins;** Cytomegalovirus infections; Transplants; Antiviral agents **40**, 115
- Immunosuppression;** Acyclovir; Herpesvirus; Mycophenolate mofetil (MFF); CellCept® **40**, 540
- Inhibitors;** Adenovirus type 2; Protease; Cysteine; Papain **40**, 45
- Interferon- α/β ;** Stimulated gene expression; Transcriptional elements **40**, 145
- L-Nucleoside analogs;** Biological activities; Mode of action **40**, 19
- Mechanism of action;** *n*-Docosanol; Fatty alcohol; Herpes simplex virus; Antiviral activity; Entry **40**, 85
- Mice;** Herpes simplex virus; Microbicides; Genital herpes; Guinea pigs **40**, 1409
- Microbicides;** Herpes simplex virus; Genital herpes; Mice; Guinea pigs **40**, 1409
- Mode of action;** L-Nucleoside analogs; Biological activities **40**, 19
- Mycophenolate mofetil (MFF);** Acyclovir; Herpesvirus; CellCept®; Immunosuppression **40**, 540
- n*-Docosanol;** Fatty alcohol; Herpes simplex virus; Antiviral activity; Mechanism of action; Entry **40**, 85
- Nucleotide;** Acyclovir; Duck Hepatitis B virus; Prodrug **40**, 179
- Nucleotide;** Acyclovir; Hepatitis B virus; Prodrug; Synergy **40**, 167
- Papain;** Adenovirus type 2; Protease; Cysteine; Inhibitors **40**, 45
- Papillomavirus;** Cottontail rabbit papillomavirus; SCID; Animal models; Antivirals **40**, 57
- Penciclovir;** Acyclovir; Resistance; Sequence analysis; Thymidine kinase; Varicella-zoster virus **40**, 155
- Phosphonoacetic acid;** Ganciclovir; Cidofovir; UL97 mutation **40**, 95
- Prodrug;** Acyclovir; Duck Hepatitis B virus; Nucleotide **40**, 179
- Prodrug;** Acyclovir; Hepatitis B virus; Nucleotide; Synergy **40**, 167
- Protease activity;** Hepatitis C; Treatment **40**, 1
- Protease;** Adenovirus type 2; Cysteine; Papain; Inhibitors **40**, 45
- Resistance;** Acyclovir; Penciclovir; Sequence analysis; Thymidine kinase; Varicella-zoster virus **40**, 155
- SCID;** Papillomavirus; Cottontail rabbit papillomavirus; Animal models; Antivirals **40**, 57
- Sequence analysis;** Acyclovir; Penciclovir; Resistance; Thymidine kinase; Varicella-zoster virus **40**, 155
- Stimulated gene expression;** Interferon- α/β ; Transcriptional elements **40**, 145
- Synergy;** Acyclovir; Hepatitis B virus; Nucleotide; Prodrug **40**, 167
- Thymidine kinase;** Acyclovir; Penciclovir; Resistance; Sequence analysis; Varicella-zoster virus **40**, 155
- Transcriptional elements;** Interferon- α/β ; Stimulated gene expression **40**, 145
- Transplants;** Cytomegalovirus infections; Immunoglobulins; Antiviral agents **40**, 115
- Treatment;** Hepatitis C; Protease activity **40**, 1
- UL97 mutation;** Ganciclovir; Cidofovir; Phosphonoacetic acid **40**, 95
- Varicella-zoster virus;** Acyclovir; Penciclovir; Resistance; Sequence analysis; Thymidine kinase **40**, 155
- Virus replication;** Antiviral compounds; Benzimidazole ribonucleosides; Dot-blot method; Human herpesvirus 6; Human herpesvirus 7 **40**, 740
