

Publisher's Note

Elsevier is pleased to announce that online submission should be available for Antiviral Research by mid-September 2005 via the Elsevier Editorial System (EES) at <http://ees.elsevier.com/avr/>.

EES is a tool that enables Authors to submit articles online, Reviewers to referee online and Editors to manage the peer-review process via an online submission and editorial system.

The Elsevier Editorial System is an Internet-based tool that can be accessed from anywhere in the world and works on multiple platforms. Available 24/7, the online submission system uploads files directly from your pc, and allows you to track the progress of your paper through the peer-review process. Online submission and peer-review speeds up the whole publication process.

All authors and reviewers will be encouraged to submit their manuscripts and reviews online. According to current forecasts a link to online submission will be available on the Author Gateway by mid-September 2005 at <http://authors.elsevier.com>. By this time you should also be able to access the online submission site directly at <http://ees.elsevier.com/avr/>. Online Submission: A Guide for Authors is available at: www.elsevier.com/locate/eesauthorsguide. Reviewers should go to: www.elsevier.com/locate/eesreviewersguide to view Elsevier Editorial System: A Guide for Reviewers.

We welcome your feedback on the online submission site and value your continuing contributions to Antiviral Research as an author and as a reviewer.
