

ANNOUNCEMENT

Second International Pharmacological Meeting

THIS meeting, under the auspices of the Section on Pharmacology of the International Union of Physiological Sciences, will be held in Prague on August 20–23, 1963.

Emphasis will be put on the physiological approaches to the study of drug action, and the following symposia will form the basis of the programme:

Pharmacological methods for the study of conditioning, learning and retention:

Neurophysiological and biochemical correlations of the behavioural effect of drugs:

Some aspects of the pharmacology of the autonomic nervous system:

Drugs and enzymes:

Pharmacology of cardiac function:

Evaluation of new drugs in man:

Recent advances in the pharmacology of toxins.

In addition short communications will be accepted, and there will be a number of lectures by prominent pharmacologists at the opening and closing sessions.

The deadline for applications, abstracts and accommodation will be February 1st, 1963. All enquiries should be directed to:

The Secretariat,
The Second International Pharmacological Meeting,
Albertov 4, Prague 2,
Czechoslovakia.
