

ANNOUNCEMENT

EUROPEAN ASSOCIATION FOR VETERINARY PHARMACOLOGY AND TOXICOLOGY: THIRD CONGRESS

Ghent, 25–29 August 1985

The European Association for Veterinary Pharmacology and Toxicology will hold its 3rd Congress from 25 to 29 August 1985 on the University Campus of the State University of Ghent, Belgium.

The scientific programme will last 4 days and the following topics are selected:

Pharmacokinetics: drug delivery systems, comparative pharmacokinetic studies, drug biotransformation, animal models in pharmacokinetics.

Pharmacodynamics, Clinical pharmacology: anaesthesia, neuroleptanalgesia and sedation, smooth muscle pharmacology (vascular system, G.I. tract, reproductive and respiratory system, receptors and their locations), inflammation and anti-inflammatory drugs, opiates, endorphins, enkephalins and their antagonists, immunomodulation.

Toxicology: drug residue toxicology, clinical toxicology.

For all topics the *comparative* aspect is emphasized.

For oral presentations as well as for poster presentations an abstract in English is expected. Persons intending to present a communication are asked to send their addresses in order to obtain an abstract and registration form.

More information on the programme and submission of papers may be obtained from the organizing committee:
