

ERRATA

Volume 77, Number 1, July 11, 1977

In "Unified Control of Chemotaxis and cAMP Mediated cGMP Accumulation by cAMP in Dictyostelium discoideum," by Jose M. Mato, Frans A. Krens, Peter J. M. van Haastert, and Theo M. Konijn, pp. 399-402, on page 401 lines 6 through 7 should read: These data were calculated taking into account aspecific cAMP binding, about 4%, by adding a large excess of unlabeled cAMP.

Volume 77, Number 1, July 11, 1977

In "Bovine Homologue of β_2 -Microglobulin Isolated from Milk," by M. L. Groves and R. Greenberg, pp. 320-327, on page 323, through a typographical error, Figure 2 was printed reversed. The correct figure follows.

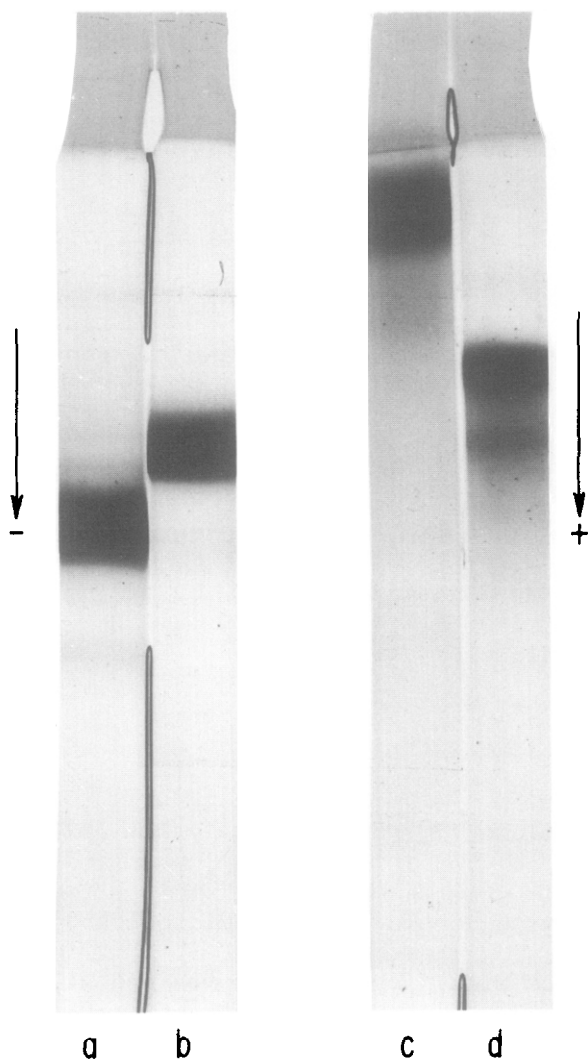

Figure 2. Disc gel electrophoretic patterns of lactollin a,c and SCM-lactollin b,d. Gels at pH 4.3 and 8 M urea are a and b and gels at pH 9.6, 4 M urea are c and d.
