Disulfide Bonds and Protein Folding, by William J. Wedemeyer, Ervin Welker, Mahesh Narayan, and Harold A. Scheraga\*, Volume 39, Number 15, April 18, 2000, pages 4207–4216.

Page 4212. In column 1, the sentence beginning on line 35 should read as follows: These two observations cast doubt on “rugged funnel” models of protein folding (79); such models hypothesize that misfolded states populate the energy landscape densely and serve as kinetic traps for folding proteins.
