

Corrections

Binding of Fatty Acids and Peroxisome Proliferators to Orthologous Fatty Acid Binding Proteins from Human, Murine, and Bovine Liver, by Christian Wolfrum, Torsten Borchers, James C. Sacchettini, and Friedrich Spener*, Volume 39, Number 6, February 15, 2000, pages 1469–1474.

Page 1473. In column 1, the sentence beginning on line 12 should read as follows: Our values determined by ITC at 37 °C were in the same range (-38.3 and -29.1 kJ mol $^{-1}$ for myristic acid, -45.6 and -38.6 kJ mol $^{-1}$ for oleic acid binding to murine L-FABP), yet the relative differences between these values were exactly the same.

Also, Tables 1–3 in the Supporting Information have been corrected and replaced.
