

**Correction to Redox Characterization of the FeS Protein MitoNEET and Impact of Thiazolidinedione Drug Binding**

[(2009) *Biochemistry* *48*, 10193. DOI: 10.1021/bi9016445].  
Daniel W. Bak, John A. Zuris, Mark L. Paddock,  
Patricia A. Jennings, and Sean J. Elliott\*

Page 10193. We acknowledge the support of National Institutes of Health Grant 5T32DK007233.

Also, the second sentence of the abstract should read,  
“MitoNEET also binds a unique three-Cys- and one-His-ligated  
[2Fe-2S] cluster.”
