

SUBJECT INDEX

- α -Actinin-induced increase
 - Nucleotide and cation specificity of the ——— in actomyosin nucleoside triphosphate phosphohydrolase activity (Temple, Goll) (205) 121
- α -Actinin-like protein
 - Low-temperature extraction of ——— from the I-Z-I brush of striated muscle (Briskey, Fukazawa) (205) 317
- Actomyosin fibers
 - Ca^{2+} -dependent contraction and relaxation of ——— (Wideman et al.) (205) 523
- Actomyosin nucleoside triphosphate phosphohydrolase activity
 - Nucleotide and cation specificity of the α -actinin-induced increase in ——— (Temple, Goll) (205) 121
- Adenine nucleotides
 - Exchange of ——— in digitonin-treated mitochondria (Meisner) (205) 27
- Ammonia
 - Regulatory effects of ——— on carbon metabolism in photosynthesizing *Chlorella pyrenoidosa* (Kanazawa et al.) (205) 401
- Antibiotics
 - Effect of ammonium salts, amines and ——— on proton uptake and photophosphorylation in *Rhodospirillum rubrum* chromatophores (Briller, Gromet-Elhanan) (205) 263
- Ascites tumour cells
 - Effect of valinomycin on mitochondrial ultrastructure and function of intact Ehrlich ——— (Gordon, Bernstein) (205) 464
- Ascorbate oxidase system
 - Membrane-bound ——— of *Halobacterium halobium* (Cheah) (205) 148
- ATPase
 - Characterization of dog cardiac microsomes: Use of zonal centrifugation to fractionate fragmented sarcoplasmic reticulum, ($\text{Na}^+ + \text{K}^+$)-activated ——— and mitochondrial fragments (Katz et al.) (205) 473
- ATPase
 - Oxidative phosphorylation in yeast. VI. ——— activity and protein synthesis in mitochondria isolated from nuclear mutants deficient in cytochromes (Šubík et al.) (205) 513
- ATPase
 - Reaction of myosin with salicylaldehyde. II. Effect of salicylation on the ——— activity of myosin (Mühlrad et al.) (205) 355
- ATPase inhibitor
 - Possible regulatory function of a mitochondrial ——— in respiratory chain-linked energy transfer (Asami et al.) (205) 307
- ATP content
 - Circadian variation in ——— in the chloroplast of *Acetabularia mediterranea* (Vanden Driessche) (205) 526
- Bioluminescence
 - Studies in ———. III. The *Pholas dactylus* system (Henry et al.) (205) 437
- Bioluminescence
 - Studies in ———. IV. Properties of luciferin from *Pholas dactylus* (Henry, Michelson) (205) 451
- Calcium-dependent contraction
 - and relaxation of actomyosin fibers (Wideman et al.) (205) 523
- Calcium metabolism
 - in yeast cells and mitochondria (Carafoli et al.) (205) 18
- Carbon metabolism
 - Regulatory effects of ammonia on ——— in photosynthesizing *Chlorella pyrenoidosa* (Kanazawa et al.) (205) 401
- Cation transport
 - Coupling of respiration to ——— in slices of rat liver (Van Rossum) (205) 7
- Chemiluminescence
 - Xanthine oxidase. Study of the enzyme-catalyzed oxidation of hypoxanthine through the ——— of luminol (Oyamburo et al.) (205) 190
- Chlorella
 - Fluorescence spectra of ——— in the 295–77°K range (Cho, Govindjee) (205) 371
- Chlorella
 - Regulatory effects of ammonia on carbon metabolism in photosynthesizing ——— *pyrenoidosa* (Kanazawa et al.) (205) 401
- Chlorophyll a
 - Control of excitation transfer in photosynthesis. IV. Kinetics of ——— fluorescence in *Porphyr a yezoensis* (Murata) (205) 379
- Chlorophyll a_{11}
 - Active ——— in suspensions of lyophilized and Tris-washed chloroplasts (Govindjee et al.) (205) 303
- Chlorophyll b
 - Study of ——— in vivo (Thomas, Bretschneider) (205) 390
- Chloroplasts
 - Active chlorophyll a_{11} in suspensions of lyophilized and Tris-washed ——— (Govindjee et al.) (205) 303
- Chloroplast
 - Circadian variation in ATP content in the ——— of *Acetabularia mediterranea* (Vanden Driessche) (205) 526

Chloroplasts

Comparative study of photosynthetic electron transport in algal cells and spinach ——— (Rurainski et al.) (205) 254

Chloroplasts

Effect on ferredoxin on electron transfer and photophosphorylation of spinach and bean ——— under air (Mathieu et al.) (205) 95

Chloroplasts

Fluorescence characteristics of lyophilized maize ——— suspended in buffer (Govindjee et al.) (205) 361

Chloroplasts

Mn²⁺ as ——— in isolated ——— (Ben-Hayyim, Avron) (205) 86

Chromatophores

Effect of ammonium salts, amines and antibiotics on proton uptake and photophosphorylation in *Rhodospirillum rubrum* ——— (Briller, Gromet-Elhanan) (205) 263

Chromatophores

Nature of photochemical reactions in ——— of Chromatium D. I. Effects of isooctane extraction on the photochemical reactions of P₈₉₀ and ubiquinone in chromatophores of Chromatium D (Takamiya, Takamiya) (205) 72

Copper

State of ——— in stellacyanin and laccase from the laquer tree *Rhus vernicifera* (Malmström et al.) (205) 48

Cyanide

Interaction of nitrogenase from *Klebsiella pneumoniae* with ATP or ——— (Biggins, Kelly) (205) 288

Cytochromes

Oxidative phosphorylation in yeast. VI. ATPase and protein synthesis in mitochondria isolated from nuclear mutants deficient in ——— (Šubík et al.) (205) 513

Cytochromes

Relations between the laser-induced oxidations of the high and low potential ——— (Seibert, DeVault) (205) 220

Cytochrome a₃

Inhibition of respiration and destruction of ——— by light in mitochondria and cytochrome oxidase from beef heart (Ninnemann et al.) (205) 507

Cytochrome b₈

Light-scattering studies on rabbit brain microsomes. III. Coupling of ——— and related oxidative activities with microsomal contraction (Kamino, Inouye) (205) 246

Cytochrome b-559

Studies of several electron carriers, particularly ——— and cytochrome C-553 in 3 non-photosynthetic mutants of *Chlamydomonas reinhardi* (Garnier, Maroc) (205) 205

Cytochrome C552

In Chromatium, a single photochemical reaction center oxidizes both ——— and (Parson, Case) (205) 232

Cytochrome oxidase

Inhibition of respiration and destruction of cytochrome a₃ by light in mitochondria and ——— from beef heart (Ninnemann et al.) (205) 507

Digitonin-treated mitochondria

Exchange of adenine nucleotides in ——— (Meisner) (205) 27

N¹-Dodecylnicotinamide chloride micelles

Studies of FAD and NADH in the presence of ——— (Anderson, Anderson) (205) 161

Electron carriers

Studies of several ———, particularly cytochromes b-559 and c-553 in three non-photosynthetic mutants of *Chlamydomonas reinhardi* (Garnier, Maroc) (205) 205

Electron donor

Mn²⁺ as ——— in isolated chloroplasts (Ben-Hayyim, Avron) (205) 86

Electron transfer

Effect of ferredoxin on ——— and photophosphorylation of spinach and bean chloroplasts under air (Mathieu et al.) (205) 95

Electron transfer

Photo-induced ——— from organic crystals to biologically interesting substances (Soma, Yamagishi) (205) 183

Electron transport

Comparative study of photosynthetic ——— in algal cells and spinach chloroplasts (Rurainski et al.) (205) 254

Energy transfer

Possible regulatory function of a mitochondrial ATPase inhibitor in respiratory chain-linked ——— (Asami et al.) (205) 307

Enzymatic activities

——— of matrix and inner membrane of pigeon-liver mitochondria (Landriscina et al.) (205) 136

Ethyl 1,2-dihydro-2-naphthoate

Oxidation of ——— by flavins and its stimulation by light (Carr, Metzler) (205) 63

Excitation transfer

Control of ——— in photosynthesis. IV. Kinetics of chlorophyll a fluorescence in *Porphyra yezoensis* (Murata) (205) 379

Fatty acid oxidation

Organization and regulation of ——— in mitochondria of brown adipose tissue (Drachota et al.) (205) 491

Ferredoxin

Effect of ——— on electron transfer and photophosphorylation of spinach and bean chloroplasts under air (Mathieu et al.) (205) 95

Flavins

Oxidation of ethyl 1,2-dihydro-2-naphthoate by ——— and its stimulation by light (Carr, Metzler) (205) 63

Flavin-adenine dinucleotide

Studies of ——— and NADH in the presence of N¹-dodecylnicotinamide chloride micelles (Anderson, Anderson) (205) 161

- Fluorescence characteristics**
 — of lyophilized maize chloroplasts suspended in buffer (Govindjee et al.) (205) 361
- Fluorescence spectra**
 — of *Chlorella* in the 295–77°K range (Cho, Govindjee) (205) 371
- Formate oxidase**
 Particulate — from *Nitrobacter agilis* (O'Kelley, Nason) (205) 426
- Glyceraldehyde phosphate dehydrogenase**
 Mechanism of the light-induced activation of the NADP-dependent — (Müller) (205) 102
- Hypoxanthine**
 Xanthine oxidase. Study of the enzyme-catalyzed oxidation of — through the chemiluminescence of luminol (Oyamburo et al.) (205) 190
- Iron-sulphur proteins**
 — of *Azotobacter vinelandii* (Shethna) (205) 58
- Isooctane extraction**
 Nature of photochemical reactions in chromatophores of *Chromatium D. I.* Effects of — on the photochemical reactions of P_{880} and ubiquinone in chromatophores of *Chromatium D* (Takamiya, Takamiya) (205) 72
- Laccase**
 Purification and properties of — and stellacyanin from *Rhus vernicifera* (Reinhammar) (205) 35
- Laccase**
 State of copper in stellacyanin and — from the laquer tree *Rhus vernicifera* (Malmström et al.) (205) 48
- Laser-induced oxidation**
 Relations between the — of the high and low potential cytochromes of *Chromatium D* (Seibert, DeVault) (205) 220
- Light**
 Inhibition of respiration in yeast by — (Ninnemann et al.) (205) 499
- Light**
 Oxidation of ethyl 1,2-dihydro-2-naphthoate by flavins and its stimulation by — (Carr, Metzler) (205) 63
- Light-induced activation**
 Mechanism of the — of the NADP-dependent glyceraldehyde phosphate dehydrogenase (Müller) (205) 102
- Light-induced reactions**
 — of photosynthetic bacteria. I. Reactions in whole cells and in cell-free extracts at liquid nitrogen temperatures (Kihara, Dutton) (205) 196
- Light saturation curve**
 — of photosynthesis (Herron, Mauze-rall) (205) 312
- Light-scattering studies**
 — on rabbit brain microsomes. III. Coupling of cytochrome b_5 and related oxidative activities with microsomal contraction (Kamino, Inouye) (205) 246
- Lipid membranes**
 Weak-acid uncouplers of oxidative phosphorylation: Mechanism of action on thin — (Finkelstein) (205) 1
- Luciferin**
 Studies in bioluminescence. IV. Properties of — from *Pholas dactylus* (Henry, Michelson) (205) 451
- Luminol**
 Xanthine oxidase. Study of the enzyme-catalyzed oxidation of hypoxanthine through the chemiluminescence of — (Oyamburo et al.) (205) 190
- L-Malate**
 Kinetics of tricarboxylate anion oxidation by rat liver mitochondria in relation to the availability of — (Robinson, Chappell) (205) 300
- Manganese**
 — as electron donor in isolated chloroplasts (Ben-Hayyim, Avron) (205) 86
- Membrane**
 Enzymatic activities of the matrix and inner — of pigeon-liver mitochondria (Landriscina et al.) (205) 136
- Membranes**
 Weak-acid uncouplers of oxidative phosphorylation: Mechanism of action on thin lipid — (Finkelstein) (205) 1
- Membrane-bound ascorbate oxidase system**
 — of *Halobacterium halobium* (Cheah) (205) 148
- Microsomal concentration**
 Light-scattering studies on rabbit brain microsomes. III. Coupling of cytochrome b_5 and related oxidative activities with — (Kamino, Inouye) (205) 246
- Microsomes**
 Characterization of dog cardiac —: Use of zonal centrifugation to fractionate fragmented sarcoplasmic reticulum, ($Na^+ + K^+$)-activated ATPase and mitochondrial fragments (Katz et al.) (205) 473
- Mitochondria**
 Ca^{2+} metabolism in yeast cells and — (Carafoli et al.) (205) 18
- Mitochondria**
 Enzymatic activities of the matrix and inner membrane of pigeon-liver — (Landriscina et al.) (205) 136
- Mitochondria**
 Exchange of adenine nucleotides in digitonin-treated — (Meisner) (205) 27
- Mitochondria**
 Inhibition of respiration and destruction of cytochrome a_3 by light in — and cytochrome oxidase from beef heart (Ninnemann et al.) (205) 507
- Mitochondria**
 Kinetics of tricarboxylate anion oxidation by rat liver — in relation to the availability of L-malate (Robinson, Chappell) (205) 300

- Mitochondria**
 Organization and regulation of fatty acid oxidation in — of brown adipose tissue (Drahota et al.) (205) 491
- Mitochondria**
 Oxidative phosphorylation in yeast. VI. ATPase activity and protein synthesis in mitochondria isolated from nuclear mutants deficient in cytochromes (Šubík et al.) (205) 513
- Mitochondrial ATPase inhibitor**
 Possible regulatory function of a — in respiratory chain-linked energy transfer (Asami et al.) (205) 307
- Mitochondrial fragments**
 Characterization of dog cardiac microsomes: Use of zonal centrifugation to fractionate fragmented sarcoplasmic reticulum, (Na^+ + K^+)-activated ATPase and — (Katz et al.) (205) 473
- Mitochondrial structure**
 Organization of — as revealed by freeze-etching (Wrigglesworth et al.) (205) 125
- Mitochondrial ultrastructure**
 Effect of valinomycin on — and function of intact Ehrlich ascites tumor cells (Gordon, Bernstein) (205) 464
- Myosin**
 Reaction of — with salicylaldehyde. I. The effect of salicylaldehyde on the physico-chemical properties of myosin (Mühlrad et al.) (205) 342
- Myosin**
 Reaction of — with salicylaldehyde. II. Effect of salicylation on the ATPase activity of myosin (Mühlrad et al.) (205) 355
- Myosin A**
 Purification and characterization of — from the myxomycete plasmodium (Hatano, Ohnuma) (205) 110
- Nicotinamide-adenine dinucleotide (reduced)**
 Studies of FAD and — (NADH) in the presence of N^1 -dodecyl nicotinamide chloride micelles (Anderson, Anderson) (205) 161
- Nitrate reductase**
 Properties of a — from *Pseudomonas denitrificans* (Radcliffe, Nicholas) (205) 273
- Nitrite oxidase**
 Characterization of the particulate — and its component activities from the chemoaerotroph *Nitrobacter agilis* (O'Kelley et al.) (205) 409
- Nitrogenase**
 Interaction of — from *Klebsiella pneumoniae* with ATP or cyanide (Biggins, Kelly) (205) 288
- Non-haeme iron proteins**
 — of *Azotobacter vinelandii* (Shethna) (205) 58
- Oligomycin**
 Oxidative phosphorylation in yeast. VII. Inhibition of oxidative phosphorylation and of respiratory enzyme synthesis by — in intact cells (Kováč et al.) (205) 520
- Oxidative phosphorylation**
 — in yeast. VI. ATPase activity and protein synthesis in mitochondria isolated from nuclear mutants deficient in cytochromes (Šubík et al.) (205) 513
- Oxidative phosphorylation**
 — in yeast. VII. Inhibition of oxidative phosphorylation and of respiratory enzyme synthesis by oligomycin in intact cells (Kováč et al.) (205) 520
- Oxidative phosphorylation**
 Studies of the efficiency of — in intact *Escherichia coli* (Hempfling) (205) 169
- Oxidative phosphorylation**
 Weak-acid uncouplers of —: Mechanism of action on thin lipid membranes (Finkelstein) (205) 1
- Pholas dactylus system**
 Studies in bioluminescence. III. The — (Henry et al.) (205) 437
- Phosphohydrolase activity**
 Nucleotide and cation specificity of the α -actinin-induced increase in actomyosin nucleoside triphosphate — (Temple, Goll) (205) 121
- Photochemical reaction**
 In Chromatium, a single — center oxidizes both cytochrome C552 and cytochrome C555 (Parson, Case) (205) 232
- Photochemical reactions**
 Nature of — in chromatophores of *Chromatium D.* I. Effects of isooctane extraction on the photochemical reactions of P_{890} and ubiquinone in chromatophores of *Chromatium D* (Takamiya, Takamiya) (205) 72
- Photo-induced electron transfer**
 — from organic crystals to biologically interesting substances (Soma, Yamagishi) (205) 183
- Photophosphorylation**
 Effect of ammonium salts, amines and — in *Rhodospirillum rubrum* chromatophores (Briller, Gromet-Elhanan) (205) 263
- Photophosphorylation**
 Effect of ferredoxin on electron transfer and — of spinach and bean chloroplasts under air (Mathieu et al.) (205) 95
- Photosynthesis**
 Control of excitation transfer in —. IV. Kinetics of chlorophyll a fluorescence in *Porphyra yezoensis* (Murata) (205) 379
- Photosynthesis**
 Light saturation curve of — (Herron, Mauzerall) (205) 312
- Photosynthesizing**
 Regulatory effects of ammonia on carbon metabolism in — *Chlorella pyrenoidosa* (Kanazawa et al.) (205) 401
- Photosynthetic bacteria**
 Light-induced reactions of —. I.

- Reactions in whole cells and in cell-free extracts at liquid nitrogen temperatures (Kihara, Dutton) (205) 196
- Photosynthetic electron transport
- Comparative study of — in algal cells and spinach chloroplasts (Rurainski et al.) (205) 254
- Protein
- Low-temperature extraction of α -actinin-like — from the I-Z-I brush of striated muscle (Briskey, Fukazawa) (205) 317
- Proteins
- Non-haeme iron (iron-sulphur) — of *Azotobacter vinelandii* (Shethna) (205) 58
- Protein synthesis
- Oxidative phosphorylation in yeast. VI. ATPase activity and — in mitochondria isolated from nuclear mutants deficient in cytochromes (Šubík et al.) (205) 513
- Proton uptake
- Effect of ammonium salts, amines and antibiotics on — and photophosphorylation in *Rhodospirillum rubrum* chromatophores (Briller, Gromet-Elhanan) (205) 263
- Regulatory effects
- of ammonia on carbon metabolism in photosynthesizing *Chlorella pyrenoidosa* (Kanazawa et al.) (205) 401
- Respiration
- Coupling of — to cation transport in slices of rat liver (Van Rossum) (205) 7
- Respiration
- Inhibition of — and destruction of cytochrome a_3 by light in mitochondria and cytochrome oxidase from beef heart (Ninnemann et al.) (205) 507
- Respiration
- Inhibition of — in yeast by light (Ninnemann et al.) (205) 499
- Respiratory enzyme synthesis
- Oxidative phosphorylation in yeast. VII. Inhibition of oxidative phosphorylation and of — by oligomycin in intact cells (Kováč et al.) (205) 520
- Retinal rods
- Na^+ and K^+ in outer segments of — (Etingof et al.) (205) 459
- Salicylaldehyde
- Reaction of myosin with —. I. The effect of salicylaldehyde on the physicochemical properties of myosin (Mühlrad et al.) (205) 342
- Salicylaldehyde
- Reaction of myosin with —. II. Effect of salicylation on the ATPase activity of myosin (Mühlrad et al.) (205) 355
- Sarcoplasmic reticulum
- Characterization of dog cardiac microsomes: Use of zonal centrifugation to fractionate fragmented —, $(\text{Na}^+ + \text{K}^+)$ -activated ATPase and mitochondrial fragments (Katz et al.) (205) 473
- Stellacyanin
- Purification and properties of laccase and — from *Rhus vernicifera* (Reinhammar) (205) 35
- Stellacyanin
- State of copper in — and laccase from the laquer tree *Rhus vernicifera* (Malmström et al.) (205) 48
- Tricarboxylate anion oxidation
- Kinetics of — by rat liver mitochondria in relation to the availability of L-malate (Robinson, Chappell) (205) 300
- Triphosphate phosphohydrolase activity
- Nucleotide and cation specificity of the α -actinin-induced increase in actomyosin nucleoside — (Temple, Goll) (205) 121
- Troponin-tropomyosin
- Exhaustive extraction of the — factor from the I-Z-I brush of striated muscle (Fukazawa, Briskey) (205) 328
- Ubiquinone
- Nature of photochemical reactions in chromatophores of *Chromatium D*. I. Effects of isooctane extraction on the photochemical reactions of P_{890} and — in chromatophores of *Chromatium D* (Takamiya, Takamiya) (205) 72
- Uncouplers
- Weak-acid — of oxidative phosphorylation: Mechanism of action on thin lipid membranes (Finkelstein) (205) 1
- Valinomycin
- Effect of — on mitochondrial ultrastructure and function of intact Ehrlich ascites tumor cells (Gordon, Bernstein) (205) 464
- Xanthine oxidase
- Study of the enzyme-catalyzed oxidation of hypoxanthine through the chemiluminescence of luminol (Oyamburo et al.) (205) 190
