

Biomembranes Cumulative Contents

Regular papers

- | | | | |
|--|----|--|-----|
| A spectroscopic study of the membrane interaction of tuberoindubular peptide of 39 residues (TIP39)
<i>A.J. Mason, J.J. Lopez, M. Beyermann and C. Glaubit</i> | 1 | Structure–affinity relationship in the interactions of human organic anion transporter 1 with caffeine, theophylline, theobromine and their metabolites
<i>M. Sugawara, T. Mochizuki, Y. Takekuma and K. Miyazaki</i> | 85 |
| Charge patch attraction and reentrant condensation in DNA–liposome complexes
<i>S. Sennato, F. Bordi, C. Cametti, M. Diociaiuti and P. Malaspina</i> | 11 | Study of the surface morphology of a cholesterol tethering system for lipidic bilayers
<i>L. Blasi, D. Pisignano, F. Di Benedetto, G. Maruccio, G. Ciccarella, A. Maffei, G. Vasapollo, R. Cingolani and R. Rinaldi</i> | 93 |
| Regulation of erythrocyte Na–K–2Cl cotransport by threonine phosphorylation
<i>I. Matskevich, K.L. Hegney and P.W. Flatman</i> | 25 | Membrane interaction of neuropeptide Y detected by EPR and NMR spectroscopy
<i>L. Thomas, H.A. Scheidt, A. Bettio, D. Huster, A.G. Beck-Sickinger, K. Arnold and O. Zschörnig</i> | 103 |
| Cholesterol modulates the antagonist-binding function of hippocampal serotonin _{1A} receptors
<i>T.J. Pucadyil and A. Chattopadhyay</i> | 35 | Quantification and distribution of big conductance Ca ²⁺ -activated K ⁺ channels in kidney epithelia
<i>M. Grunnet, A. Hay-Schmidt and D.A. Klaerke</i> | 114 |
| Monitoring the organization and dynamics of bovine hippocampal membranes utilizing Laurdan generalized polarization
<i>S. Mukherjee and A. Chattopadhyay</i> | 43 | Resveratrol inhibits polyphosphoinositide metabolism in activated platelets
<i>B. Olas, B. Wachowicz, H. Holmsen and M.H. Fukami</i> | 125 |
| Calmodulin-dependent protein kinases phosphorylate gp130 at the serine-based dileucine internalization motif
<i>R.M. Gibson, G.S. Laszlo and N.M. Nathanson</i> | 56 | Mechanism of inhibition of proton: Dipeptide co-transport during chronic enteritis in the mammalian small intestine
<i>U. Sundaram, S. Wisel and S. Coon</i> | 134 |
| Lipid transfer between cationic vesicles and lipid–DNA lipoplexes: Effect of serum
<i>R. Koynova and R.C. MacDonald</i> | 63 | Electron paramagnetic resonance studies of magnetically aligned phospholipid bilayers utilizing a phospholipid spin label: The effect of cholesterol
<i>P.C. Dave, N.A. Nusair, J.J. Inbaraj and G.A. Lorigan</i> | 141 |
| Effect of “helper lipid” on lipoplex electrostatics
<i>D. Hirsch-Lerner, M. Zhang, H. Eliyahu, M.E. Ferrari, C.J. Wheeler and Y. Barenholz</i> | 71 | <i>Cumulative Contents</i> | 152 |
