

SUBJECT INDEX

- Acetylcholinesterase
Arylesterase and — in the erythrocytes of man, cow and pig (K.-B. Augustinsson et al.) (293) 424
- Acetyl-coenzyme A synthetase
Radioisotopic, chromatographic microassay for — and some preliminary studies in the rat brain enzyme (Tencati, Rosenberg) (293) 542
- N-Acetylglucosamine synthetase
Galactosyltransfer in mouse mastocytoma: Purification and properties of — (Helting, Erbing) (293) 94
- Acid hydrolases
Studies on human polymorphonuclear leukocyte enzymes. I. Assay of — and other enzymes (Avila, Convit) (293) 397
- Adenylate cyclase
— of heart sarcolemmal membranes (Sulakhe, Dhalla) (293) 379
- Aldehyde dehydrogenase
Horse liver 3 α ,7 α ,12 α -trihydroxy-5 β -cholestan-26-al dehydrogenase as a liver — (Okuda et al.) (293) 15
- δ -Aminolevulinic acid synthetase — from cold-stored potatoes
(Ramaswamy, Madhusudanan Nair) (293) 269
- AMP:pyrophosphate phosphoribosyltransferase
Immunohistochemical studies of — from normal and Lesch-Nyhan subjects (Yip et al.) (293) 359
- Angiotensin-converting enzyme
Inhibition of homogenous — of rabbit lung by synthetic venom peptides of *Bothrops jararaca* (Cheung, Cushman) (293) 451
- Arylesterase
— and acetylcholinesterase in the erythrocytes of man, cow and pig (K.-B. Augustinsson et al.) (293) 424
- Arylsulphatase
Purification and properties of an isoenzyme of — from *Aspergillus oryzae* (Rasburn, Wynn) (293) 191
- Arylsulphatase
Sulphatase of ox liver. XVI. Comparison of the — and cerebroside sulphatase activities of sulphatase A (Jerfy, Roy) (293) 178
- Aspartate transcarbamylase
Interaction between polypeptide chains within the catalytic subunit of — (Heyde) (293) 351
- Aspergillus niger*
Protein catabolism. II. Identification of neutral and acidic proteolytic enzymes in — (Bosmann) (293) 476
- ATP:L-arginine phosphotransferase
Multiple effects of ions on — and ATP: creatine phosphotransferase (Lacombe et al.) (293) 150
- ATPase
Studies on flagellar — from sea urchin spermatozoa. II. Effect of trypsin digestion on the enzyme (Ogawa) (293) 514
- ATP:creatine phosphotransferase
Multiple effects of ions on ATP:L-arginine phosphotransferase and — (Lacombe et al.) (293) 150
- Carboxypeptidase
Specificity and mode of action of acid — from *Aspergillus saitoi* (Ichishima, Arai) (293) 444
- Cathepsin B2
Histone hydrolase activity of rat liver lysosomal — (de Lumen, Tappel) (293) 217
- Cerebroside sulphatase
Sulphatase of ox liver. XVI. Comparison of the arylsulphatase and — activities of sulphatase A (Jerfy, Roy) (293) 178
- Ceruloplasmin
Ratio of type-1 and -2Cu (IIP in human — (Veldsema, van Gelder) (293) 322
- Chymotrypsin-catalyzed reactions
— of phenyl hippurate with alcohols. Kinetic evidence for a binding site for nucleophiles (Werber, Greenzaid) (293) 208
- 3-Deoxy-D-arabino-heptulosonate 7-phosphate synthetase
Allosteric inhibition of — by tyrosine, tryptophan and phenylpyruvate in *Pseudomonas aeruginosa* (Jensen et al.) (293) 256
- Desulfotomaculum nigrificans
Reactions of P582 from — with substrates, reducing agents and carbon monoxide (Trudinger, Chambers) (293) 26
- Dihydrofolate reductase
— induced by folic acid in cultured human cells (Hillcoat et al.) (293) 281
- 2,3-Diphosphoglycerate
Simulation of biphasic oxygen equilibrium curves of haemoglobin in the presence of small amounts of — (Imai, Tyuma) (293) 290
- 2,3-Diphosphoglycerate phosphatase
Characterization of — activity: electrophoretic study (Rosa et al.) (293) 285
- Enzyme assays
Coupled —: a general expression for the transient (Easterby) (293) 552
- Galactosyl transfer
— in mouse mastocytoma: Purification and properties of N-acetylglucosamine synthetase (Helting, Erbing) (293) 94
- Glucokinase
Microsomal — of rat liver. Localisation in a Golgi-rich fraction (Berthillier et al.) (293) 370
- Glycogen synthase I
Purification and properties of — from bovine heart: Two kinetic forms (Thomas, Larner) (293) 62

- Glycogen synthase I
Purification and properties of — from skeletal muscle: Two kinetic forms (Schlender, Lerner) (293) 73
- Glycogen synthase I
Specificity of activation of — from skeletal muscle and heart (Thomas et al.) (293) 84
- Haemoglobin
Simulation of biphasic oxygen equilibrium curves of — in the presence of small amounts of 2,3-diphosphoglycerate (Imai, Tyuma) (293) 290
- Hexosaminidase activity
— of cultured human skin fibroblasts (Kanfer, Spielvogel) (293) 203
- Histone hydrolase
— activity of rat liver lysosomal cathepsin B₂ (de Lumen, Tappel) (293) 217
- IMP pyrophosphorylase
Effect of purine analogues on — (Hagen) (293) 105
- Inositol dehydrogenase
— from the yeast *Cryptococcus melibiosum* (Vidal-Leiria, van Uden) (293) 295
- Iodotyrosine deiodinases
Specificity of thyroidal and hepatic microsomal — (Dumas et al.) (293) 36
- Isoamylase
Comparison of the kinetic parameters of *Pseudomonas* — and *Aerobacter pullulanase* (Yokobayashi et al.) (293) 197
- Lactate dehydrogenase X
Evidence for the existence of — in embryonic chick liver (Sheid, Chin) (293) 304
- Leucostoma peptidase A:
— a metalloprotease from snake venom (Spiekerman et al.) (293) 464
- Malate dehydrogenase
Function and regulation of — in *Euglena gracilis* Z (Peak et al.) (293) 312
- NADP pyrophosphatase
Purification and properties of — from *Proteus vulgaris* (Nakajima et al.) (293) 242
- Neuraminidase (sialidase)
Purification and properties of a mammalian — (Tallman, Brady) (293) 434
- Oxygen equilibrium
Simulation of biphasic — curves of haemoglobin in the presence of small amounts of 2,3-diphosphoglycerate (Imai, Tyuma) (293) 290
- Penicillinase (β -lactamase I)
Involvement of a carboxyl group in the active site of *Bacillus cereus* 569/H — (Patil, Day) (293) 490
- Peptidase A:
Leucostoma —: a metalloprotease from snake venom (Spiekerman et al.) (293) 464
- Phenylalanine hydroxylase
Demonstration of two forms of — in human liver obtained at autopsy (Connellan, Danks) (293) 48
- Phenylalanine hydroxylase
Some characteristics of partially purified human liver — (Friedman, Kaufman) (293) 56
- Phenyl hippurate
Chymotrypsin-catalyzed reactions of — with alcohols. Kinetic evidence for a binding site for nucleophiles (Werber, Greenzaid) (293) 208
- Phosphatases
Acid and alkaline —, inorganic pyrophosphatases and phosphoprotein phosphatase of bone. I. Characterization and assay (Lieberherr et al.) (293) 160
- Phosphatases
Acid and alkaline —, inorganic pyrophosphatases and phosphoprotein phosphatase of bone. II. Distribution in subcellular fractions of bone tissue homogenates and structure-linked latency (Vreven et al.) (293) 170
- Phosphoenolpyruvate carboxylase
Procedure for the electrophoretic analysis of — (Karn et al.) (293) 567
- Phosphoenolpyruvate:uridine diphosphate *N*-acetylglucosamine enolpyruvyl-transferase
Inhibition of — by uridine diphosphate *N*-acetylmuramyl peptides (Venkateswaren et al.) (293) 570
- Phosphoprotein phosphatase
Acid and alkaline phosphatases, inorganic pyrophosphatases and — of bone. I. Characterization and assay (Lieberherr et al.) (293) 160
- Phosphoprotein phosphatase
Acid and alkaline phosphatases, inorganic pyrophosphatases and — of bone. II. Distribution in subcellular fractions of bone tissue homogenates and structure-linked latency (Vreven et al.) (293) 170
- Phosvitin kinase
Calf brain —. II. Purification and characterization of three different fractions of phosvitin kinase (Wälinder) (293) 140
- Polymorphonuclear leukocyte enzymes
Studies on human —. I. Assay of acid hydrolases and other enzymes (Avila, Convit) (293) 397
- Polymorphonuclear leukocyte enzymes
Studies on human —. II. Comparative study of the physical properties of primary and specific granules (Avila, Convit) (293) 409
- Porphobilinogen deaminase
The enzymatic inactivation of — (Frydman, Frydman) (293) 506
- Proteinase A₂
Action of — of *Actinidia chinensis* on the B-chain of oxidized insulin (McDowall) (293) 226
- Protein catabolism
— II. Identification of neutral and acidic proteolytic enzymes in *Aspergillus niger* (Bosmann) (293) 476

Proteolytic enzymes

Protein catabolism. II. Identification of neutral and acidic — in *Aspergillus niger* (Bosmann) (293) 476

Pullulanase

Comparison of the kinetic parameters of *Pseudomonas isoamylase* and *Aerobacter* — (Yokobayashi et al.) (293) 197

Pyrophosphatase

Maize leaf inorganic —: Isozymes, specificity for substrates, inhibitors and divalent metal ions, and pH optima (Bennett et al.) (293) 232

Pyrophosphatases

Acid and alkaline phosphatases, inorganic — and phosphoprotein phosphatase of bone. I. Characterization and assay (Lieberherr et al.) (293) 160

Pyrophosphatases

Acid and alkaline phosphatases, inorganic — and phosphoprotein phosphatase of bone. II. Distribution in subcellular fractions of bone tissue homogenates and structure-linked latency (Vreven et al.) (293) 170

Pyruvate kinase

M-Type — of leucocytes: An allosteric enzyme (van Berkel, Koster) (293) 134

Pyruvate kinase

Stereoselective reduction of pyruvate by NaBH_4 catalyzed — (Phillips et al.) (293) 125

Pyruvate kinase

Two interconvertible forms of L-type — from rat liver (van Berkel et al.) (293) 118

Ribose 5-phosphate ketol isomerase

Partial purification and kinetic properties of — and ribulose 5-phosphate 3-epimerase from various sources (Kiely et al.) (293) 534

Ribulose 5-phosphate 3-epimerase

Partial purification and kinetic properties of ribose 5-phosphate ketol isomerase and — from various sources (Kiely et al.) (293) 534

Semidehydroascorbate reductase

Involvement of — in the oxidation of NADH by lipid peroxide in mitochondria and microsomes (Green, O'Brien) (293) 334

Sulphatase A

Sulphatase of ox liver. XVI. Comparison of the arylsulphatase and cerebroside sulphatase activities of — (Jerfy, Roy) (293) 178

Thiaminase I

Reversible inactivation of extracellular — in *Bacillus thiaminolyticus*. I. Inactivation by the primary substrate and reactivation by the secondary substrate (Suzuki, Ooba) (293) 111

3 α ,7 α ,12 α -Trihydroxy-5 β -cholestan-26-al dehydrogenase Horse liver — as a liver aldehyde dehydrogenase (Okuda et al.) (293) 15

Tryptophan hydroxylase

Factors affecting substrate cooperativity of rat liver — (Sullivan et al.) (293) 343

UDPapirose/UDPxylose synthase

Improved method for purification of — from cell cultures of parsley (Baron et al.) (293) 526

UDPG dehydrogenase

Inhibition of — by galactosamine 1-phosphate and UDPgalactosamine (Bauer, Reutter) (293) 11

UDPG dehydrogenase

Partial purification and properties of — from *Escherichia coli* (Schiller et al.) (293) 1

Urocanase

Inhibition of — by cupric ion (Hug, Roth) (293) 497
