

Announcement

New Trends in Molecular Electrochemistry and XII Meeting of the Portuguese Electrochemical Society, Lisbon, Portugal, September 16–20, 2003

The Academy of Sciences of Lisbon has recently decided to resume the “Frontiers of Knowledge” series (within the activity of its High Studies Institute) by organizing an international symposium aiming at the discussion of the state-of-the-art in the field of Molecular Electrochemistry, and by publishing a book under the same title with expected inaugural presentation at the symposium.

The regular meeting of the Portuguese Electrochemical Society will cover all fields of Electrochemistry.

A list of confirmed plenary lectures is available, and a number of invitations for keynote lectures are being addressed. If time allows, presenters of posters will be invited to make a very short outline (“flash presentation”) of the contents of their posters, if they wish. All contributors are invited to submit manuscripts (based on their presentations) for publication in a special issue of *Portugaliae Electrochimica Acta*.

1. Location

Both conferences will be held together at the Academy premises, the magnificent XVI–XVII century Convent of Jesus, close to the town centre of Lisbon.
