

Publisher's note

We are pleased to announce that *Bioelectrochemistry* has implemented a system for electronic handling of research papers during the submission and peer review process.

This Elsevier Editorial System (EES) is a web-based system with full online submission, review and status update capabilities. EES allows you to upload files directly from your computer. The new system will help us handling the manuscripts submitted to the journal more efficiently by streamlining the editorial process. It will also facilitate communication among editors, reviewers, and authors.

As of now all authors are invited to submit their new manuscripts electronically. Reviews for these new submissions will also be dealt with electronically. We strongly encourage all authors and reviewers to use EES when submitting new materials to *Bioelectrochemistry*. To avoid any misunderstanding: current submissions to the journal, already under review will still be processed by the old system.

EES can be reached via the Online Submission link on the journal's Author Gateway page, <http://authors.elsevier.com/journal/bioelechem>, or directly at <http://ees.elsevier.com/bioelechem>. The submission website contains all further details of EES including its Guide for Authors for manuscript submission.

We welcome your feedback on EES and value your continuing contributions to *Bioelectrochemistry* as an author and as a reviewer.
