

Subject Index to Volume 71

ABTS

- Voltammetric determination of catalytic reaction parameters of laccase based on electrooxidation of hydroquinone and ABTS (71) 2

Action potential

- Electrical signaling in *Aloe vera* induced by localized thermal stress (71) 192

Agarose gel

- Immobilization of *E. coli* bacteria in three-dimensional matrices for ISFET biosensor design (71) 118

D-alanine

- Enantioselective screen-printed amperometric biosensor for the determination of D-amino acids (71) 91

All-plastic ion-selective electrode

- Plastic reference electrodes and plastic potentiometric cells with dispersion cast poly(3,4-ethylenedioxythiophene) and poly(vinyl chloride) based membranes (71) 75

Aloe vera

- Electrical signaling in *Aloe vera* induced by localized thermal stress (71) 192

D-amino acids

- Enantioselective screen-printed amperometric biosensor for the determination of D-amino acids (71) 91

Amperometry

- Enantioselective screen-printed amperometric biosensor for the determination of D-amino acids (71) 91

Antibody–TiO₂ bioconjugate

- Photokilling cancer cells using highly cell-specific antibody–TiO₂ bioconjugates and electroporation (71) 217

Antioxidant

- Study of the adsorption and oxidation of antioxidant rutin by cyclic voltammetry–voltabsorptometry (71) 157

Arsenic

- Interaction of tin(II) and arsenic(III) with DNA at the nanostructure film modified electrodes (71) 33

Azocompound

- pH-tunable equilibria in azocrown ethers with histidine moieties (71) 99

Azocrown ether

- pH-tunable equilibria in azocrown ethers with histidine moieties (71) 99

B16F1

- Combined therapy of the antimetastatic compound NAMI-A and electroporation on B16F1 tumour cells in vitro (71) 113

Bacteria

- Immobilization of *E. coli* bacteria in three-dimensional matrices for ISFET biosensor design (71) 118

Biocathode

- Direct electrochemistry and bioelectrocatalysis of hemoglobin immobilized on carbon black (71) 180

Bioelectrocatalysis

- Hybrid bioelectrocatalyst for hydrogen peroxide reduction: Immobilization of enzyme within organic–inorganic film of structured Prussian Blue and PEDOT (71) 23

Biological membranes

- Effect of shape on the dielectric properties of biological cell suspensions (71) 149

Biophotonics

- Evidence for non-chemical, non-electrical intercellular signaling in intestinal epithelial cells (71) 142

Biosensor

- Immobilization of *E. coli* bacteria in three-dimensional matrices for ISFET biosensor design (71) 118
- Direct electrochemistry and electrocatalytic characteristic of heme proteins immobilized in a new sol–gel polymer film (71) 172
- Enzyme-functionalized gold nanowires for the fabrication of biosensors (71) 211
- Direct electrochemistry and electrocatalysis of hemoglobin on undoped nanocrystalline diamond modified glassy carbon electrode (71) 243

Biosensor optimization

- Parallel synthesis of libraries of anodic and cathodic functionalized electrodeposition paints as immobilization matrix for amperometric biosensors (71) 81

Calcium ion sensor

- Plastic reference electrodes and plastic potentiometric cells with dispersion cast poly(3,4-ethylenedioxythiophene) and poly(vinyl chloride) based membranes (71) 75

Ca–Mg competition

- Conducting polymers in modelling transient potential of biological membranes (71) 66

Carbon black

- Direct electrochemistry and bioelectrocatalysis of hemoglobin immobilized on carbon black (71) 180

Carbon fiber

- Nitric oxide sensor based on carbon fiber covered with nickel porphyrin layer deposited using optimized electropolymerization procedure (71) 46

Catalytic activity

- Voltammetric determination of catalytic reaction parameters of laccase based on electrooxidation of hydroquinone and ABTS (71) 2

Cell separation

- Feasibility study for cell electroporation detection and separation by means of dielectrophoresis (71) 164

Cell signaling

- Evidence for non-chemical, non-electrical intercellular signaling in intestinal epithelial cells (71) 142

Cell–cell communication

- Evidence for non-chemical, non-electrical intercellular signaling in intestinal epithelial cells (71) 142

Chiral sensors

- Enantioselective screen-printed amperometric biosensor for the determination of D-amino acids (71) 91

Chitosan

- Direct electrochemistry and electrocatalysis of hemoglobin entrapped in semi-interpenetrating polymer network hydrogel based on polyacrylamide and chitosan (71) 135

Cold stress

- Electrical signaling in *Aloe vera* induced by localized thermal stress (71) 192

- Composite film
Hybrid bioelectrocatalyst for hydrogen peroxide reduction: Immobilization of enzyme within organic–inorganic film of structured Prussian Blue and PEDOT (71) 23
- Computational modeling
Ion transport in tumors under electrochemical treatment: In vivo, in vitro and in silico modeling (71) 223
- Cyclic voltabsorptometry
Study of the adsorption and oxidation of antioxidant rutin by cyclic voltammetry–voltabsorptometry (71) 157
- Cyclic voltammetry
Study of the adsorption and oxidation of antioxidant rutin by cyclic voltammetry–voltabsorptometry (71) 157
- Dielectrophoresis
Feasibility study for cell electroporation detection and separation by means of dielectrophoresis (71) 164
- Direct electrochemical reaction
Direct electrochemistry and bioelectrocatalysis of hemoglobin immobilized on carbon black (71) 180
- Direct electrochemistry
Direct electrochemistry and electrocatalysis of hemoglobin entrapped in semi-interpenetrating polymer network hydrogel based on polyacrylamide and chitosan (71) 135
Direct electrochemistry and electrocatalytic characteristic of heme proteins immobilized in a new sol–gel polymer film (71) 172
Studies on direct electron transfer and biocatalytic properties of hemoglobin in polyacrylonitrile matrix (71) 198
Direct electrochemistry and electrocatalysis of hemoglobin on undoped nanocrystalline diamond modified glassy carbon electrode (71) 243
- Divalent cations
Effects of divalent cations on the formation and structure of solid supported lipid films (71) 54
- DNA
Electrochemical probe DNA design in PCR amplicon sequence for the optimum detection of microbiological diseases (71) 204
- DNA biosensor
Interaction of tin(II) and arsenic(III) with DNA at the nanostructure film modified electrodes (71) 33
- DNA damage
Interaction of tin(II) and arsenic(III) with DNA at the nanostructure film modified electrodes (71) 33
- DNA electrotransfer
Electric field-mediated transport of plasmid DNA in tumor interstitium in vivo (71) 233
- Electric field-mediated gene delivery
Electric field-mediated transport of plasmid DNA in tumor interstitium in vivo (71) 233
- Electrical signaling
Electrical signaling in *Aloe vera* induced by localized thermal stress (71) 192
- Electrocatalysis
Direct electrochemistry and electrocatalysis of hemoglobin entrapped in semi-interpenetrating polymer network hydrogel based on polyacrylamide and chitosan (71) 135
Direct electrochemistry and electrocatalytic characteristic of heme proteins immobilized in a new sol–gel polymer film (71) 172
Studies on direct electron transfer and biocatalytic properties of hemoglobin in polyacrylonitrile matrix (71) 198
- Electrochemical genosensor
Electrochemical probe DNA design in PCR amplicon sequence for the optimum detection of microbiological diseases (71) 204
- Electrochemical treatment
Ion transport in tumors under electrochemical treatment: In vivo, in vitro and in silico modeling (71) 223
- Electrochemotherapy
Combined therapy of the antimetastatic compound NAMI-A and electroporation on B16F1 tumour cells in vitro (71) 113
- Electrodeposition
Enzyme-functionalized gold nanowires for the fabrication of biosensors (71) 211
- Electrodeposition paints
Parallel synthesis of libraries of anodic and cathodic functionalized electrodeposition paints as immobilization matrix for amperometric biosensors (71) 81
- Electropolymerization
Nitric oxide sensor based on carbon fiber covered with nickel porphyrin layer deposited using optimized electropolymerization procedure (71) 46
- Electroporation
Combined therapy of the antimetastatic compound NAMI-A and electroporation on B16F1 tumour cells in vitro (71) 113
Feasibility study for cell electroporation detection and separation by means of dielectrophoresis (71) 164
Photokilling cancer cells using highly cell-specific antibody–TiO₂ bioconjugates and electroporation (71) 217
- Enzymatic
Enantioselective screen-printed amperometric biosensor for the determination of D-amino acids (71) 91
- Enzymatic kinetics
Voltammetric determination of catalytic reaction parameters of laccase based on electrooxidation of hydroquinone and ABTS (71) 2
- Enzyme
SECM characterization of immobilised enzymes by self-assembled monolayers on titanium dioxide surfaces (71) 186
Enzyme-functionalized gold nanowires for the fabrication of biosensors (71) 211
- Enzymes immobilization
Liquid photopolymerizable compositions as immobilized matrix of biosensors (71) 29
- Ethanol tolerance
Electrochemical insights into the ethanol tolerance of *Saccharomyces cerevisiae* (71) 107
- Film stability
Effects of divalent cations on the formation and structure of solid supported lipid films (71) 54
- Functionalization
Parallel synthesis of libraries of anodic and cathodic functionalized electrodeposition paints as immobilization matrix for amperometric biosensors (71) 81
Enzyme-functionalized gold nanowires for the fabrication of biosensors (71) 211
- Glucose
Liquid photopolymerizable compositions as immobilized matrix of biosensors (71) 29
- Glucose oxidase
Catalytic activity of oxidases hosted in lipidic cubic phases on electrodes (71) 8
- Gold nanowire
Enzyme-functionalized gold nanowires for the fabrication of biosensors (71) 211
- Heat stress
Electrical signaling in *Aloe vera* induced by localized thermal stress (71) 192
- Heavy metals
Heavy metal sorption in the lichen cationactive layer (71) 60
- Heme proteins
Direct electrochemistry and electrocatalytic characteristic of heme proteins immobilized in a new sol–gel polymer film (71) 172

Hemoglobin

Direct electrochemistry and electrocatalysis of hemoglobin entrapped in semi-interpenetrating polymer network hydrogel based on polyacrylamide and chitosan (71) 135

Direct electrochemistry and bioelectrocatalysis of hemoglobin immobilized on carbon black (71) 180

Studies on direct electron transfer and biocatalytic properties of hemoglobin in polyacrylonitrile matrix (71) 198

Direct electrochemistry and electrocatalysis of hemoglobin on undoped nanocrystalline diamond modified glassy carbon electrode (71) 243

Histidine derivative

pH-tunable equilibria in azocrown ethers with histidine moieties (71) 99

Horseradish peroxidase

Hybrid bioelectrocatalyst for hydrogen peroxide reduction: Immobilization of enzyme within organic-inorganic film of structured Prussian Blue and PEDOT (71) 23

Hydrogen peroxide

Direct electrochemistry and bioelectrocatalysis of hemoglobin immobilized on carbon black (71) 180

Hydroquinone

Voltammetric determination of catalytic reaction parameters of laccase based on electrooxidation of hydroquinone and ABTS (71) 2

Immobilization

Parallel synthesis of libraries of anodic and cathodic functionalized electrodeposition paints as immobilization matrix for amperometric biosensors (71) 81

Immobilization of *E. coli* bacteria in three-dimensional matrices for ISFET biosensor design (71) 118

Impedimetry

Effects of divalent cations on the formation and structure of solid supported lipid films (71) 54

In vitro

Combined therapy of the antimetastatic compound NAMI-A and electroporation on B16F1 tumour cells in vitro (71) 113

In vivo DNA electrophoresis

Electric field-mediated transport of plasmid DNA in tumor interstitium in vivo (71) 233

Intercellular communication

Evidence for non-chemical, non-electrical intercellular signaling in intestinal epithelial cells (71) 142

Interstitial transport

Electric field-mediated transport of plasmid DNA in tumor interstitium in vivo (71) 233

Ion release

Monitoring of titanium base alloys-biofluids interface (71) 126

Ion transport

Ion transport in tumors under electrochemical treatment: In vivo, in vitro and in silico modeling (71) 223

Ion-exchange kinetics

Conducting polymers in modelling transient potential of biological membranes (71) 66

ISFETs

Liquid photopolymerizable compositions as immobilized matrix of biosensors (71) 29

Immobilization of *E. coli* bacteria in three-dimensional matrices for ISFET biosensor design (71) 118

Laccase

Voltammetric determination of catalytic reaction parameters of laccase based on electrooxidation of hydroquinone and ABTS (71) 2

Catalytic activity of oxidases hosted in lipidic cubic phases on electrodes (71) 8

Laccase immobilization

Immobilization of laccase on gold, silver and indium tin oxide by zirconium-phosphonate-carboxylate (ZPC) coordination chemistry (71) 15

Layer-by-layer assembly

Direct electrochemistry and electrocatalysis of hemoglobin on undoped nanocrystalline diamond modified glassy carbon electrode (71) 243

Lead ion sensor

Plastic reference electrodes and plastic potentiometric cells with dispersion cast poly(3,4-ethylenedioxythiophene) and poly(vinyl chloride) based membranes (71) 75

Lichenoid indication

Heavy metal sorption in the lichen cationactive layer (71) 60

Lichens

Heavy metal sorption in the lichen cationactive layer (71) 60

Lipidic cubic phase

Catalytic activity of oxidases hosted in lipidic cubic phases on electrodes (71) 8

Liquid photopolymerizable composition

Liquid photopolymerizable compositions as immobilized matrix of biosensors (71) 29

Long-term behaviour

Monitoring of titanium base alloys-biofluids interface (71) 126

Lyotropic liquid crystals

Catalytic activity of oxidases hosted in lipidic cubic phases on electrodes (71) 8

Macrocyclic

pH-tunable equilibria in azocrown ethers with histidine moieties (71) 99

Maxwell-Wagner polarization

Effect of shape on the dielectric properties of biological cell suspensions (71) 149

Mediated electrochemical

Electrochemical insights into the ethanol tolerance of *Saccharomyces cerevisiae* (71) 107

Membrane permittivity

Feasibility study for cell electroporation detection and separation by means of dielectrophoresis (71) 164

Michaelis-Menten model

Voltammetric determination of catalytic reaction parameters of laccase based on electrooxidation of hydroquinone and ABTS (71) 2

Microbial biosensor

Electrical wiring of *Pseudomonas putida* and *Pseudomonas fluorescens* with osmium redox polymers (71) 38

Microelectrode

Voltammetric determination of catalytic reaction parameters of laccase based on electrooxidation of hydroquinone and ABTS (71) 2

Microelectrode voltammetric

Electrochemical insights into the ethanol tolerance of *Saccharomyces cerevisiae* (71) 107

MTT assay

Photokilling cancer cells using highly cell-specific antibody-TiO₂ bioconjugates and electroporation (71) 217

NAMI-A

Combined therapy of the antimetastatic compound NAMI-A and electroporation on B16F1 tumour cells in vitro (71) 113

NFκB

Evidence for non-chemical, non-electrical intercellular signaling in intestinal epithelial cells (71) 142

Nickel porphyrin

Nitric oxide sensor based on carbon fiber covered with nickel porphyrin layer deposited using optimized electropolymerization procedure (71) 46

Nitric oxide sensor

Nitric oxide sensor based on carbon fiber covered with nickel porphyrin layer deposited using optimized electropolymerization procedure (71) 46

Non-viral gene therapy

Electric field-mediated transport of plasmid DNA in tumor interstitium in vivo (71) 233

- Osmium redox polymers
Electrical wiring of *Pseudomonas putida* and *Pseudomonas fluorescens* with osmium redox polymers (71) 38
- Parallel synthesis
Parallel synthesis of libraries of anodic and cathodic functionalized electrodeposition paints as immobilization matrix for amperometric biosensors (71) 81
- Passive film composition
Monitoring of titanium base alloys–biofluids interface (71) 126
- PCR
Electrochemical probe DNA design in PCR amplicon sequence for the optimum detection of microbiological diseases (71) 204
- pH
Immobilization of *E. coli* bacteria in three-dimensional matrices for ISFET biosensor design (71) 118
- Plant electrophysiology
Electrical signaling in *Aloe vera* induced by localized thermal stress (71) 192
- PNM
Direct electrochemistry and electrocatalytic characteristic of heme proteins immobilized in a new sol–gel polymer film (71) 172
- Poly(3,4-ethylenedioxythiophene)
Hybrid bioelectrocatalyst for hydrogen peroxide reduction: Immobilization of enzyme within organic–inorganic film of structured Prussian Blue and PEDOT (71) 23
- Poly(3,4-ethylenedioxythiophene)
Plastic reference electrodes and plastic potentiometric cells with dispersion cast poly(3,4-ethylenedioxythiophene) and poly(vinyl chloride) based membranes (71) 75
- Polyacrylamide
Direct electrochemistry and electrocatalysis of hemoglobin entrapped in semi-interpenetrating polymer network hydrogel based on polyacrylamide and chitosan (71) 135
- Polyacrylonitrile
Studies on direct electron transfer and biocatalytic properties of hemoglobin in polyacrylonitrile matrix (71) 198
- Polymer library
Parallel synthesis of libraries of anodic and cathodic functionalized electrodeposition paints as immobilization matrix for amperometric biosensors (71) 81
- Poly(pyrrole)
Conducting polymers in modelling transient potential of biological membranes (71) 66
- Potential gradients
Monitoring of titanium base alloys–biofluids interface (71) 126
- Potential transients
Conducting polymers in modelling transient potential of biological membranes (71) 66
- Pretreatment
Nitric oxide sensor based on carbon fiber covered with nickel porphyrin layer deposited using optimized electropolymerization procedure (71) 46
- Pyranose oxidase
Catalytic activity of oxidases hosted in lipidic cubic phases on electrodes (71) 8
- 4(pyrrole-1-yl)-benzoic acid
Hybrid bioelectrocatalyst for hydrogen peroxide reduction: Immobilization of enzyme within organic–inorganic film of structured Prussian Blue and PEDOT (71) 23
- Reference electrode
Plastic reference electrodes and plastic potentiometric cells with dispersion cast poly(3,4-ethylenedioxythiophene) and poly(vinyl chloride) based membranes (71) 75
- Rutin
Study of the adsorption and oxidation of antioxidant rutin by cyclic voltammetry–voltabsorptometry (71) 157
- Screen-printed biosensor
Enantioselective screen-printed amperometric biosensor for the determination of D-amino acids (71) 91
- SECM
SECM characterization of immobilised enzymes by self-assembled monolayers on titanium dioxide surfaces (71) 186
- Self-assembled monolayers
SECM characterization of immobilised enzymes by self-assembled monolayers on titanium dioxide surfaces (71) 186
- Semi-interpenetrating polymer network hydrogel
Direct electrochemistry and electrocatalysis of hemoglobin entrapped in semi-interpenetrating polymer network hydrogel based on polyacrylamide and chitosan (71) 135
- Shape effect
Effect of shape on the dielectric properties of biological cell suspensions (71) 149
- Solid supported thin lipid films
Effects of divalent cations on the formation and structure of solid supported lipid films (71) 54
- Spectroelectrochemistry
Study of the adsorption and oxidation of antioxidant rutin by cyclic voltammetry–voltabsorptometry (71) 157
- Structured Prussian Blue film
Hybrid bioelectrocatalyst for hydrogen peroxide reduction: Immobilization of enzyme within organic–inorganic film of structured Prussian Blue and PEDOT (71) 23
- Surface topography
Monitoring of titanium base alloys–biofluids interface (71) 126
- Tautomeric equilibria
pH-tunable equilibria in azocrown ethers with histidine moieties (71) 99
- Tight junction
Evidence for non-chemical, non-electrical intercellular signaling in intestinal epithelial cells (71) 142
- Tin
Interaction of tin(II) and arsenic(III) with DNA at the nanostructure film modified electrodes (71) 33
- Titanium dioxide
SECM characterization of immobilised enzymes by self-assembled monolayers on titanium dioxide surfaces (71) 186
- Tumors
Ion transport in tumors under electrochemical treatment: In vivo, in vitro and in silico modeling (71) 223
- Undoped nanocrystalline diamond
Direct electrochemistry and electrocatalysis of hemoglobin on undoped nanocrystalline diamond modified glassy carbon electrode (71) 243
- Urea
Liquid photopolymerizable compositions as immobilized matrix of biosensors (71) 29
- Voltammetry
Interaction of tin(II) and arsenic(III) with DNA at the nanostructure film modified electrodes (71) 33
Effects of divalent cations on the formation and structure of solid supported lipid films (71) 54
pH-tunable equilibria in azocrown ethers with histidine moieties (71) 99
- Yeast
Electrochemical insights into the ethanol tolerance of *Saccharomyces cerevisiae* (71) 107
- Zirconium phosphonate/carboxylate
Immobilization of laccase on gold, silver and indium tin oxide by zirconium–phosphonate–carboxylate (ZPC) coordination chemistry (71) 15
