The effect of ethanol on the formation of *N*2-ethylidene-dG adducts in mice: implications for alcohol-related carcinogenicity of the oral cavity and esophagus; Hsu-Sheng Yu, Tsunehiro Oyama, Tomonari Matsuda, Toyohi Isse, Tetsunosuke Yamaguchi, Masayuki Tanaka, Mayumi Tsuji, and Toshihiro Kawamoto, *Biomarkers*, 2012; 17(3): 269–274.

The publishers would like to apologise as Figure 4 in the print issue was published as a repeat of Figure 5. The correct Figure 4 should have appeared as below:

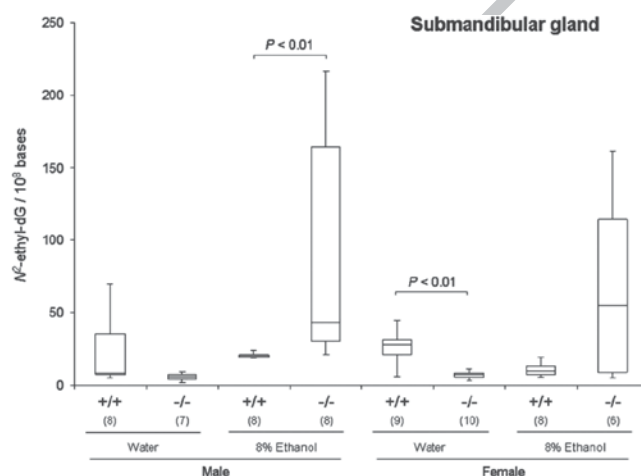

Figure 4. *N*2-ethyl-dG levels in submandibular gland in *Aldh2*^{+/+} and *Aldh2*^{-/-} mice. Each number in parentheses indicates the number of samples.
