R. H. White, P. G. Parsons, A. S. Prakash and D. J. Young, The *in vitro* cytotoxicity and DNA alkylating ability of the simplest functional analogues of the *seco* CC-1065 alkylating subunit, *Bioorganic & Medicinal Chemistry Letters*, **1995**, 5, 1869–1874, 0960-894X(95)00310-X.

On page 1872, the figure legend for Figure 3 should read:

"Autoradiogram of thermally-induced strand breaking pattern (heat treatment at neutral pH followed by heat treatment in 10 mM NaOH) following treatment of a 375-bp fragment of pBR322 plasmid DNA with 500 μ M of compounds **1** - **3** (1 hr, 37 °C, pH 6.7)."
