

ANNOUNCEMENT

“Stereochemistry of Enzymatic Reactions” is the general subject to be discussed at the Fifteenth Steenbock Symposium to be held on July 1–3, 1985, at the University of Wisconsin, Madison. Sessions are scheduled on the following topics: (a) stereospecificities of inhibitors, (b) stereochemistry of coenzymes, (c) enzymes in organic synthesis, (d) stereochemistry of substitution at phosphorus, (e) stereochemistry of metal-nucleotides, (f) stereochemistry of methyltransferases, and (g) racemases and epimerases. Those interested in attending should contact:

Perry A. Frey, Coordinator
Fifteenth Steenbock Symposium
