

Subject Index to Volume 74

α -Crystallin

Membrane; Secondary structure; Thermotropic transition; Reflectance FT-IR/DSC microspectroscopy; Thermal stability; Reversibility (Lin, S.-Y. (74) 1)

α -Helix

Melanocyte stimulating hormone; Trifluoroethanol; Fluorescence; Circular dichroism; Singular value decomposition (Mukhopadhyay, K. (74) 175)

β -Lactoglobulin

Retinol; Binding site; Fluorescence resonance energy transfer (FRET); Lipocalin (Lange, D.C. (74) 45)

χ parameter

Poor solvent; Gel phase; Phospholipid; Intermembrane distance; Undulation motion (Kinoshita, K. (74) 237)

Aliphatic hydrocarbons

Hydrophobicity; Aromatic hydrocarbons; Thermodynamic transfer functions; Hydrogen bonding (Costas, M. (74) 83)

Amyloid fibril

Non-cooperative aggregation; Segregated β -strands (Jacchieri, S.G. (74) 23)

Antibiotic

Vancomycin; Eremomycin; Glycopeptide; Computer program (Yan, H. (74) 107)

Aromatic hydrocarbons

Hydrophobicity; Aliphatic hydrocarbons; Thermodynamic transfer functions; Hydrogen bonding (Costas, M. (74) 83)

Association equilibria

Haemoglobin; Electrophoresis (Matejec, R. (74) 99)

Base specificity

Norfloxacin; Quinolone; DNA; Polynucleotide; Optical spectroscopy (Son, G.-S. (74) 225)

Binding site

β -Lactoglobulin; Retinol; Fluorescence resonance energy transfer (FRET); Lipocalin (Lange, D.C. (74) 45)

Binding sites

Local anesthetics; Biomembranes; Spin labels (Louro, S.R.W. (74) 35)

Biomembranes

Local anesthetics; Spin labels; Binding sites (Louro, S.R.W. (74) 35)

Biopolymer folding

Coarse resolution; Variational principle; Pseudoknot (Fernández, A. (74) 89)

Birhythmicity

Excitability; Oscillations; Reaction-diffusion; Waves (Pérez-Iratxeta, C. (74) 197)

Buriedness

Glycosaminoglycans; Solvent accessibility; Conformational change (Kaliannan, P. (74) 11)

Circular dichroism

Melanocyte stimulating hormone; Trifluoroethanol; Fluorescence; Singular value decomposition; α -Helix (Mukhopadhyay, K. (74) 175)

Coarse resolution

Biopolymer folding; Variational principle; Pseudoknot (Fernández, A. (74) 89)

Computer program

Vancomycin; Eremomycin; Antibiotic; Glycopeptide (Yan, H. (74) 107)

Conformation of myosin heads

Effect of ADP binding; Effects of ADP and phosphate analogs;

X-ray diffraction; Synchrotron radiation (Wakabayashi, K. (74) 71)

Conformational change

Glycosaminoglycans; Solvent accessibility; Buriedness (Kalianan, P. (74) 11)

Counterion condensation theory

Ionic strength; Polyelectrolyte; Stability; Kinked and branched DNA; Electrostatic; Three- and four-way junction (Fenley, M.O. (74) 135)

DNA recognition

DNA-bending; DNA-binding; DNA structure; Dynamics of DNA conformation; Protein-DNA interaction (Jeltsch, A. (74) 53)

DNA structure

DNA-bending; DNA-binding; DNA recognition; Dynamics of DNA conformation; Protein-DNA interaction (Jeltsch, A. (74) 53)

DNA-bending

DNA-binding; DNA recognition; DNA structure; Dynamics of DNA conformation; Protein-DNA interaction (Jeltsch, A. (74) 53)

DNA-binding

DNA-bending; DNA recognition; DNA structure; Dynamics of DNA conformation; Protein-DNA interaction (Jeltsch, A. (74) 53)

DNA

Norfloxacin; Quinolone; Base specificity; Polynucleotide; Optical spectroscopy (Son, G.-S. (74) 225)

DSC

Enthalpy fluctuations; Heat capacity; Small systems; Enthalpy shifts and population changes; Unfolding stoichiometries (Rösgen, J. (74) 153)

Decoding mechanisms

Non-linear oscillators; Enzyme kinetics; Magnetic field effects; Radical pair mechanism (Eichwald, C. (74) 209)

Dynamics of DNA conformation

DNA-bending; DNA-binding; DNA recognition; DNA structure; Protein-DNA interaction (Jeltsch, A. (74) 53)

Effect of ADP binding

Effects of ADP and phosphate analogs; Conformation of myosin heads; X-ray diffraction; Synchrotron radiation (Wakabayashi, K. (74) 71)

Effects of ADP and phosphate analogs

Effect of ADP binding; Conformation of myosin heads; X-ray

diffraction; Synchrotron radiation (Wakabayashi, K. (74) 71)

Electrophoresis

Association equilibria; Haemoglobin (Matejec, R. (74) 99)

Electrophoretic mobility

Streptococci; Surface structures; Softness of polymer layer (Bos, R. (74) 251)

Electrostatic

Ionic strength; Polyelectrolyte; Counterion condensation theory; Stability; Kinked and branched DNA; Three- and four-way junction (Fenley, M.O. (74) 135)

Enthalpy fluctuations

Heat capacity; DSC; Small systems; Enthalpy shifts and population changes; Unfolding stoichiometries (Rösgen, J. (74) 153)

Enthalpy shifts and population changes

Enthalpy fluctuations; Heat capacity; DSC; Small systems; Unfolding stoichiometries (Rösgen, J. (74) 153)

Enzyme kinetics

Non-linear oscillators; Decoding mechanisms; Magnetic field effects; Radical pair mechanism (Eichwald, C. (74) 209)

Eremomycin

Vancomycin; Antibiotic; Glycopeptide; Computer program (Yan, H. (74) 107)

Excitability

Oscillations; Birhythmicity; Reaction-diffusion; Waves (Pérez-Iratxeta, C. (74) 197)

Fluorescence resonance energy transfer (FRET)

β -Lactoglobulin; Retinol; Binding site; Lipocalin (Lange, D.C. (74) 45)

Fluorescence

Melanocyte stimulating hormone; Trifluoroethanol; Circular dichroism; Singular value decomposition; α -Helix (Mukhopadhyay, K. (74) 175)

Gel phase

χ parameter; Poor solvent; Phospholipid; Intermembrane distance; Undulation motion (Kinoshita, K. (74) 237)

Glycine

Molar volume; Isentropic compressibility; Refractive index; NaCl (Soto, A. (74) 165)

Glycopeptide

Vancomycin; Eremomycin; Antibiotic; Computer program (Yan, H. (74) 107)

Glycosaminoglycans

Solvent accessibility; Buriedness; Conformational change (Kaliannan, P. (74) 11)

Haemoglobin

Association equilibria; Electrophoresis (Matejec, R. (74) 99)

Heat capacity

Enthalpy fluctuations; DSC; Small systems; Enthalpy shifts and population changes; Unfolding stoichiometries (Rösger, J. (74) 153)

Hydrogen bonding

Hydrophobicity; Aromatic hydrocarbons; Aliphatic hydrocarbons; Thermodynamic transfer functions (Costas, M. (74) 83)

Hydrophobicity

Aromatic hydrocarbons; Aliphatic hydrocarbons; Thermodynamic transfer functions; Hydrogen bonding (Costas, M. (74) 83)

Information theory

Negentropy; Second law of thermodynamics; Photoreception; Photoisomerization; Molecular orbital theory (Ito, E. (74) 59)

Intermembrane distance

χ parameter; Poor solvent; Gel phase; Phospholipid; Undulation motion (Kinoshita, K. (74) 237)

Ionic strength

Polyelectrolyte; Counterion condensation theory; Stability; Kinked and branched DNA; Electrostatic; Three- and four-way junction (Fenley, M.O. (74) 135)

Isentropic compressibility

Molar volume; Refractive index; Glycine; NaCl (Soto, A. (74) 165)

Kinked and branched DNA

Ionic strength; Polyelectrolyte; Counterion condensation theory; Stability; Electrostatic; Three- and four-way junction (Fenley, M.O. (74) 135)

Lifetimes

SW myoglobin; Recombinant; Single tryptophan (Gryczynski, Z. (74) 187)

Linear alcohols

Partial molar heat capacities; N-substituted amides (Lopez, M.M. (74) 117)

Lipocalin

β -Lactoglobulin; Retinol; Binding site; Fluorescence resonance energy transfer (FRET) (Lange, D.C. (74) 45)

Local anesthetics

Biomembranes; Spin labels; Binding sites (Louro, S.R.W. (74) 35)

Magnetic field effects

Non-linear oscillators; Enzyme kinetics; Decoding mechanisms; Radical pair mechanism (Eichwald, C. (74) 209)

Melanocyte stimulating hormone

Trifluoroethanol; Fluorescence; Circular dichroism; Singular value decomposition; α -Helix (Mukhopadhyay, K. (74) 175)

Membrane

α -Crystallin; Secondary structure; Thermotropic transition; Reflectance FT-IR/DSC microspectroscopy; Thermal stability; Reversibility (Lin, S.-Y. (74) 1)

Molar volume

Isentropic compressibility; Refractive index; Glycine; NaCl (Soto, A. (74) 165)

Molecular orbital theory

Negentropy; Second law of thermodynamics; Photoreception; Photoisomerization; Information theory (Ito, E. (74) 59)

N-substituted amides

Partial molar heat capacities; Linear alcohols (Lopez, M.M. (74) 117)

NaCl

Molar volume; Isentropic compressibility; Refractive index; Glycine (Soto, A. (74) 165)

Negentropy

Second law of thermodynamics; Photoreception; Photoisomerization; Molecular orbital theory; Information theory (Ito, E. (74) 59)

Non-cooperative aggregation

Amyloid fibril; Segregated β -strands (Jacchieri, S.G. (74) 23)

Non-linear oscillators

Enzyme kinetics; Decoding mechanisms; Magnetic field effects; Radical pair mechanism (Eichwald, E. (74) 209)

Norfloxacin

Quinolone; DNA; Base specificity; Polynucleotide; Optical spectroscopy (Son, G.-S. (74) 225)

Optical spectroscopy

Norfloxacin; Quinolone; DNA; Base specificity; Polynucleotide (Son, G.-S. (74) 225)

Oscillations

Excitability; Birhythmicity; Reaction-diffusion; Waves (Pérez-Iratxeta, C. (74) 197)

Partial molar heat capacities

Linear alcohols; N-substituted amides (Lopez, M.M. (74) 117)

Phospholipid

χ parameter; Poor solvent; Gel phase; Intermembrane distance; Undulation motion (Kinoshita, K. (74) 237)

Photoisomerization

Negentropy; Second law of thermodynamics; Photoreception; Molecular orbital theory; Information theory (Ito, E. (74) 59)

Photoreception

Negentropy; Second law of thermodynamics; Photoisomerization; Molecular orbital theory; Information theory (Ito, E. (74) 59)

Polyelectrolyte

Ionic strength; Counterion condensation theory; Stability; Kinked and branched DNA; Electrostatic; Three- and four-way junction (Fenley, M.O. (74) 135)

Polynucleotide

Norfloxacin; Quinolone; DNA; Base specificity; Optical spectroscopy (Son, G.-S. (74) 225)

Poor solvent

χ parameter; Gel phase; Phospholipid; Intermembrane distance; Undulation motion (Kinoshita, K. (74) 237)

Protein–DNA interaction

DNA-bending; DNA-binding; DNA recognition; DNA structure; Dynamics of DNA conformation (Jeltsch, A. (74) 53)

Pseudoknot

Biopolymer folding; Coarse resolution; Variational principle (Fernández, A. (74) 89)

Quinolone

Norfloxacin; DNA; Base specificity; Polynucleotide; Optical spectroscopy (Son, G.-S. (74) 225)

Radical pair mechanism

Non-linear oscillators; Enzyme kinetics; Decoding mechanisms; Magnetic field effects (Eichwald, C. (74) 209)

Reaction-diffusion

Excitability; Oscillations; Birhythmicity; Waves (Pérez-Iratxeta, C. (74) 197)

Recombinant

SW myoglobin; Single tryptophan; Lifetimes (Gryczynski, Z. (74) 187)

Reflectance FT-IR/DSC microspectroscopy

α -Crystallin; Membrane; Secondary structure; Thermotropic transition; Thermal stability; Reversibility (Lin, S.-Y. (74) 1)

Refractive index

Molar volume; Isentropic compressibility; Glycine; NaCl (Soto, A. (74) 165)

Retinol

β -Lactoglobulin; Binding site; Fluorescence resonance energy transfer (FRET); Lipocalin (Lange, D.C. (74) 45)

Reversibility

α -Crystallin; Membrane; Secondary structure; Thermotropic transition; Reflectance FT-IR/DSC microspectroscopy; Thermal stability (Lin, S.-Y. (74) 1)

SW myoglobin

Recombinant; Single tryptophan; Lifetimes (Gryczynski, Z. (74) 187)

Second law of thermodynamics

Negentropy; Photoreception; Photoisomerization; Molecular orbital theory; Information theory (Ito, E. (74) 59)

Secondary structure

α -Crystallin; Membrane; Thermotropic transition; Reflectance FT-IR/DSC microspectroscopy; Thermal stability; Reversibility (Lin, S.-Y. (74) 1)

Segregated β -strands

Amyloid fibril; Non-cooperative aggregation (Jacchieri, S.G. (74) 23)

Single tryptophan

SW myoglobin; Recombinant; Lifetimes (Gryczynski, Z. (74) 187)

Singular value decomposition

Melanocyte stimulating hormone; Trifluoroethanol; Fluorescence; Circular dichroism; α -Helix (Mukhopadhyay, K. (74) 175)

Small systems

Enthalpy fluctuations; Heat capacity; DSC; Enthalpy shifts and population changes; Unfolding stoichiometries (Rösgen, J. (74) 153)

Softness of polymer layer

Electrophoretic mobility; Streptococci; Surface structures (Bos, R. (74) 251)

Solvent accessibility

Glycosaminoglycans; Buriedness; Conformational change (Kaliannan, P. (74) 11)

Spin labels

Local anesthetics; Biomembranes; Binding sites (Louro, S.R.W. (74) 35)

Stability

Ionic strength; Polyelectrolyte; Counterion condensation theory; Kinked and branched DNA; Electrostatic; Three- and four-way junction (Fenley, M.O. (74) 135)

Streptococci

Electrophoretic mobility; Surface structures; Softness of polymer layer (Bos, R. (74) 251)

Surface structures

Electrophoretic mobility; Streptococci; Softness of polymer layer (Bos, R. (74) 251)

Synchrotron radiation

Effect of ADP binding; Effects of ADP and phosphate analogs; Conformation of myosin heads; X-ray diffraction (Wakabayashi, K. (74) 71)

Thermal stability

α -Crystallin; Membrane; Secondary structure; Thermotropic transition; Reflectance FT-IR/DSC microspectroscopy; Reversibility (Lin, S.-Y. (74) 1)

Thermodynamic transfer functions

Hydrophobicity; Aromatic hydrocarbons; Aliphatic hydrocarbons; Hydrogen bonding (Costas, M. (74) 83)

Thermotropic transition

α -Crystallin; Membrane; Secondary structure; Reflectance FT-IR/DSC microspectroscopy; Thermal stability; Reversibility (Lin, S.-Y. (74) 1)

Three- and four-way junction

Ionic strength; Polyelectrolyte; Counterion condensation theory; Stability; Kinked and branched DNA; Electrostatic (Fenley, M.O. (74) 135)

Trifluoroethanol

Melanocyte stimulating hormone; Fluorescence; Circular dichroism; Singular value decomposition; α -Helix (Mukhopadhyay, K. (74) 175)

Undulation motion

χ parameter; Poor solvent; Gel phase; Phospholipid; Intermembrane distance (Kinoshita, K. (74) 237)

Unfolding stoichiometries

Enthalpy fluctuations; Heat capacity; DSC; Small systems; Enthalpy shifts and population changes (Rösgen, J. (74) 153)

Vancomycin

Eremomycin; Antibiotic; Glycopeptide; Computer program (Yan, H. (74) 107)

Variational principle

Biopolymer folding; Coarse resolution; Pseudoknot (Fernández, A. (74) 89)

Waves

Excitability; Oscillations; Birhythmicity; Reaction-diffusion (Pérez-Iratxeta, C. (74) 197)

X-ray diffraction

Effect of ADP binding; Effects of ADP and phosphate analogs; Conformation of myosin heads; Synchrotron radiation (Wakabayashi, K. (74) 71)
