

Subject Index to Volume 92

18A peptides

Phosphatidylcholine vesicles; Bilayer location of tryptophan; Resonance energy transfer (Gorbenko, G. (92) 155)

Activity coefficients

Ion selective electrodes; Peptide; Glycylglycine; Electrolytes (Chung, Y.-M. (92) 77)

Allosteric enzyme regulation

Fast reaction techniques; Phosphoenolpyruvate carboxylase (PEPC); Kinetics of phosphoenolpyruvate binding; Enzyme kinetics (Frank, J. (92) 53)

Allosteric regulation

Glycogen phosphorylase *b*; Kinetic mechanism (Klinov, S.V. (92) 89)

Amoeboid movement

Optimization; *Physarum*; Maze; Morphogenesis; Oscillation (Nakagaki, T. (92) 47)

Artificial capillary

Diffusive oxygen transport; Blood substitutes (McCarthy, M.R. (92) 103)

Bilayer location of tryptophan

Resonance energy transfer; 18A peptides; Phosphatidylcholine vesicles (Gorbenko, G. (92) 155)

Binding

Fluorescent modification; Microtubule; Turkey tubulin; NCD (Highsmith, S. (92) 127)

Blood substitutes

Artificial capillary; Diffusive oxygen transport (McCarthy, M.R. (92) 103)

Cationic emulsion

Oligonucleotide delivery; Stearylamine; DSPE-PEG; FRET; Surface tension (Teixeira, H. (92) 169)

Cell cycle

Fission yeast; Stochastic model; Computational simulation; Size control; Nucleocytoplasmic ratio (Sveicz, A. (92) 1)

Circular dichroism

DNA; Synthetic polynucleotides; Porphyrin (Lee, S. (92) 35)

Compressibility

Heterocyclic bases; Nucleosides; Hydration; Volume; Expansibility (Lee, A. (92) 209)

Computational simulation

Size control; Nucleocytoplasmic ratio; Cell cycle; Fission yeast; Stochastic model (Sveicz, A. (92) 1)

Computer model

Energy metabolism; Mitochondrial respiration (Korzeniewski, B. (92) 17)

Curcumin

Tryptophan radical; Lysozyme; Electron transfer; Pulse radiolysis; Antioxidant (Kapoor, S. (92) 119)

Cutinase

Lipase; Protein stability; Protein unfolding; Surfactants; Differential scanning calorimetry (DSC) (Crevel, L.D. (92) 65)

Differential scanning calorimetry (DSC)

Cutinase; Lipase; Protein stability; Protein unfolding; Surfactants (Crevel, L.D. (92) 65)

Diffusive oxygen transport

Blood substitutes; Artificial capillary (McCarthy, M.R. (92) 103)

Disulphide bond

Poplar plastocyanin; Molecular dynamics; Essential dynamics (Arcangeli, C. (92) 183)

DNA

Synthetic polynucleotides; Porphyrin; Circular dichroism (Lee, S. (92) 35)

Drug micelles

Drug-protein interaction; Human serum albumin; Penicillins (Ruso, J.M. (92) 141)

Drug-protein interaction

Human serum albumin; Penicillins; Drug micelles (Ruso, J.M. (92) 141)

DSPE-PEG

FRET; Surface tension; Cationic emulsion; Oligonucleotide delivery; Stearylamine (Teixeira, H. (92) 169)

Electrolytes

Activity coefficients; Ion selective electrodes; Peptide; Glycylglycine (Chung, Y.-M. (92) 77)

Electron transfer

Pulse radiolysis, Antioxidant; Curcumin; Tryptophan radical; Lysozyme (Kapoor, S. (92) 119)

Energy metabolism

Mitochondrial respiration; Computer model (Korzeniewski, B. (92) 17)

Enzyme kinetics

Allosteric enzyme regulation; Fast reaction techniques; Phosphoenolpyruvate carboxylase (PEPC); Kinetics of phosphoenolpyruvate binding (Frank, J. (92) 53)

Essential dynamics

Disulphide bond; Poplar plastocyanin; Molecular dynamics (Arcangeli, C. (92) 183)

Expansibility

Compressibility; Heterocyclic bases; Nucleosides; Hydration; Volume (Lee, A. (92) 209)

F-actin

Tensile strength; Rhodamine; Phalloidin (Cintio, O. (92) 201)

Fast reaction techniques

Phosphoenolpyruvate carboxylase (PEPC); Kinetics of phosphoenolpyruvate binding; Enzyme kinetics; Allosteric enzyme regulation (Frank, J. (92) 53)

Fission yeast

Stochastic model; Computational simulation; Size control; Nucleocytoplasmic ratio; Cell cycle (Sveczer, A. (92) 1)

Fluorescent modification

Microtubule; Turkey tubulin; NCD; Binding (Highsmith, S. (92) 127)

FRET

Surface tension; Cationic emulsion; Oligonucleotide delivery; Stearylamine; DSPE-PEG (Teixeira, H. (92) 169)

Glycogen phosphorylase *b*

Kinetic mechanism; Allosteric regulation (Klinov, S.V. (92) 89)

Glycylglycine

Electrolytes; Activity coefficients; Ion selective electrodes; Peptide (Chung, Y.-M. (92) 77)

Heterocyclic bases

Nucleosides; Hydration; Volume; Expansibility; Compressibility (Lee, A. (92) 209)

Human serum albumin

Penicillins; Drug micelles; Drug-protein interaction (Ruso, J.M. (92) 141)

Hydration

Volume; Expansibility; Compressibility; Heterocyclic bases; Nucleosides (Lee, A. (92) 209)

Ion selective electrodes

Peptide; Glycylglycine; Electrolytes; Activity coefficients (Chung, Y.-M. (92) 77)

Kinetic mechanism

Allosteric regulation; Glycogen phosphorylase *b* (Klinov, S.V. (92) 89)

Kinetics of phosphoenolpyruvate binding

Enzyme kinetics; Allosteric enzyme regulation; Fast reaction techniques; Phosphoenolpyruvate carboxylase (PEPC) (Frank, J. (92) 53)

Lipase

Protein stability; Protein unfolding; Surfactants; Differential scanning calorimetry (DSC); Cutinase (Creveld, L.D. (92) 65)

Lysozyme

Electron transfer; Pulse radiolysis, Antioxidant; Curcumin; Tryptophan radical (Kapoor, S. (92) 119)

Maze

Morphogenesis; Oscillation; Amoeboid movement; Optimization; *Physarum* (Nakagaki, T. (92) 47)

Microtubule

Turkey tubulin; NCD; Binding; Fluorescent modification (Highsmith, S. (92) 127)

Mitochondrial respiration

Computer model; Energy metabolism (Korzeniewski, B. (92) 17)

Molecular dynamics

Essential dynamics; Disulphide bond; Poplar plastocyanin (Arcangeli, C. (92) 183)

Morphogenesis

Oscillation; Amoeboid movement; Optimization; *Physarum*; Maze (Nakagaki, T. (92) 47)

NCD

Binding; Fluorescent modification; Microtubule; Turkey tubulin (Highsmith, S. (92) 127)

Nucleocytoplasmic ratio

Cell cycle; Fission yeast; Stochastic model; Computational simulation; Size control (Sveiczer, A. (92) 1)

Nucleosides

Hydration; Volume; Expansibility; Compressibility; Heterocyclic bases (Lee, A. (92) 209)

Oligonucleotide delivery

Stearylamine; DSPE-PEG; FRET; Surface tension; Cationic emulsion (Teixeira, H. (92) 169)

Optimization

Physarum; Maze; Morphogenesis; Oscillation; Amoeboid movement (Nakagaki, T. (92) 47)

Oscillation

Amoeboid movement; Optimization; *Physarum*; Maze; Morphogenesis (Nakagaki, T. (92) 47)

Penicillins

Drug micelles; Drug-protein interaction; Human serum albumin (Ruso, J.M. (92) 141)

Peptide

Glycylglycine; Electrolytes; Activity coefficients; Ion selective electrodes (Chung, Y.-M. (92) 77)

Phalloidin

F-actin; Tensile strength; Rhodamine (Cintio, O. (92) 201)

Phosphatidylcholine vesicles

Bilayer location of tryptophan; Resonance energy transfer; 18A peptides (Gorbenko, G. (92) 155)

Phosphoenolpyruvate carboxylase (PEPC)

Kinetics of phosphoenolpyruvate binding; Enzyme kinetics;

Allosteric enzyme regulation; Fast reaction techniques (Frank, J. (92) 53)

Physarum

Maze; Morphogenesis; Oscillation; Amoeboid movement; Optimization (Nakagaki, T. (92) 47)

Poplar plastocyanin

Molecular dynamics; Essential dynamics; Disulphide bond (Arcangeli, C. (92) 183)

Porphyrin

Circular dichroism; DNA; Synthetic polynucleotides (Lee, S. (92) 35)

Protein stability

Protein unfolding; Surfactants; Differential scanning calorimetry (DSC); Cutinase; Lipase (Crevelde, L.D. (92) 65)

Protein unfolding

Surfactants; Differential scanning calorimetry (DSC); Cutinase; Lipase; Protein stability (Crevelde, L.D. (92) 65)

Pulse radiolysis, Antioxidant

Curcumin; Tryptophan radical; Lysozyme; Electron transfer (Kapoor, S. (92) 119)

Resonance energy transfer

18A peptides; Phosphatidylcholine vesicles; Bilayer location of tryptophan (Gorbenko, G. (92) 155)

Rhodamine

Phalloidin; F-actin; Tensile strength (Cintio, O. (92) 201)

Size control

Nucleocytoplasmic ratio; Cell cycle; Fission yeast; Stochastic model; Computational simulation (Sveiczer, A. (92) 1)

Stearylamine

DSPE-PEG; FRET; Surface tension; Cationic emulsion; Oligonucleotide delivery (Teixeira, H. (92) 169)

Stochastic model

Computational simulation; Size control; Nucleocytoplasmic ratio; Cell cycle; Fission yeast (Sveiczer, A. (92) 1)

Surface tension

Cationic emulsion; Oligonucleotide delivery; Stearylamine; DSPE-PEG; FRET (Teixeira, H. (92) 169)

Surfactants

Differential scanning calorimetry (DSC); Cutinase; Lipase; Protein stability; Protein unfolding (Crevelde, L.D. (92) 65)

Synthetic polynucleotides

Porphyrin; Circular dichroism; DNA (Lee, S. (92) 35)

Tensile strength

Rhodamine; Phalloidin; F-actin (Cintio, O. (92) 201)

Tryptophan radical

Lysozyme; Electron transfer; Pulse radiolysis, Antioxidant; Curcumin (Kapoor, S. (92) 119)

Turkey tubulin

NCD; Binding; Fluorescent modification; Microtubule (Highsmith, S. (92) 127)

Volume

Expansibility; Compressibility; Heterocyclic bases; Nucleosides; Hydration (Lee, A. (92) 209)
