Subject Index to Volume 98

Activation parameters

Conformational change; Driving force; Pathway; Pulse radiolysis; Reorganization (Farver, O. (98) 27)

Allosteric effectors

Oxygen equilibrium curves; Bohr effect; Root effect; Human adult hemoglobin; Allostery (Tsuneshige, A. (98) 49)

Allostery

Hemoglobin; Quaternary structure; Oxygen binding; Cooperative binding; Conformational kinetics; Conformational substates; Stretched exponential kinetics (Henry, E.R. (98) 149)

Allostery

Allosteric effectors; Oxygen equilibrium curves; Bohr effect; Root effect; Human adult hemoglobin (Tsuneshige, A. (98) 49)

Allostery plot

Monod–Wyman–Changeux allosteric model; Global allosteric model; Hemoglobin oxygenation; Universal solution condition; Structural constraint (Imai, K. (98) 79)

Antifolate resistance

Homology modeling; Docking; Malaria; *Plasmodium falciparum*; Dihydrofolate reductase (Delfino, R.Teixeira. (98) 287)

Autoxidation

Low intrinsic oxygen affinity; Heme transfer; Circular dichroism; Recombinant hemoglobin; Bovine hemoglobin (Fronticelli, C. (98) 115)

Blood substitutes

Mb engineering; Heme proteins (Dou, Y. (98) 127)

Bohr effect

Root effect; Human adult hemoglobin; Allostery; Allosteric effectors; Oxygen equilibrium curves (Tsuneshige, A. (98) 49)

Bovine hemoglobin

Autoxidation; Low intrinsic oxygen affinity; Heme transfer; Circular dichroism; Recombinant hemoglobin (Fronticelli, C. (98) 115)

Cell volume

Entropy buffer; Non-ideality; Cytoskeleton (Hall, D. (98) 233)

Cetyltrimethyl ammonium bromide

Gelatin; Lysozyme; DNA; Microcalorimetry; Sodium dodecyl sulfate (Chatterjee, A. (98) 313)

Circular dichroism

Recombinant hemoglobin; Bovine hemoglobin; Autoxidation; Low intrinsic oxygen affinity; Heme transfer (Fronticelli, C. (98) 115)

CO

UV resonance Raman; Hemoglobin; M Boston; Quarterly structure; Resonance Raman; EPR (Nagatomo, S. (98) 217)

Conformational change

Driving force; Pathway; Pulse radiolysis; Reorganization; Activation parameters (Farver, O. (98) 27)

Conformational kinetics

Conformational substates; Stretched exponential kinetics; Allostery; Hemoglobin; Quaternary structure; Oxygen binding; Cooperative binding (Henry, E.R. (98) 149)

Conformational substates

Stretched exponential kinetics; Allostery; Hemoglobin; Quaternary structure; Oxygen binding; Cooperative binding; Conformational kinetics (Henry, E.R. (98) 149)

Cooperative binding

Conformational kinetics; Conformational substates; Stretched exponential kinetics; Allostery; Hemoglobin; Quaternary structure; Oxygen binding (Henry, E.R. (98) 149)

Cross-linked hemoglobins

Sodium dodecyl sulfate; Human native (Kumar Sau, A. (98) 267)

Cytoskeleton

Cell volume; Entropy buffer; Non-ideality (Hall, D. (98) 233)

Dehydroalanine

Molecular dynamics; Force-field; Extended conformation; Helical conformation; GIAO calculations (Zanuy, D. (98) 301)

Dihydrofolate reductase

Antifolate resistance; Homology modeling; Docking; Malaria; *Plasmodium falciparum* (Delfino, R.Teixeira. (98) 287)

DNA

Microcalorimetry; Sodium dodecyl sulfate; Cetyltrimethyl ammonium bromide; Gelatin; Lysozyme (Chatterjee, A. (98) 313)

Docking

Malaria; *Plasmodium falciparum*; Dihydrofolate reductase; Antifolate resistance; Homology modeling (Delfino, R.Teixeira. (98) 287)

Driving force

Pathway; Pulse radiolysis; Reorganization; Activation parameters; Conformational change (Farver, O. (98) 27)

DSC

Fluorescence spectroscopy; ESR; Phenothiazine derivative; Lipid bilayer fluidity; MDR reversal (Hendrich, A.B. (98) 275)

Electron transfer

Gating; Respiration; Kinetics; Rhodobacter sphaeroides; Proton transfer (Gilderson, G. (98) 105)

Electron transfer

Flash photolysis; Yeast cytochrome *c*; Quantum yield (Silkstone, G. (98) 65)

Entropy buffer

Non-ideality; Cytoskeleton; Cell volume (Hall, D. (98) 233)

EPR

CO; UV resonance Raman; Hemoglobin; M Boston; Quarterly structure; Resonance Raman (Nagatomo, S. (98) 217)

ESR

Phenothiazine derivative; Lipid bilayer fluidity; MDR reversal; DSC; Fluorescence spectroscopy (Hendrich, A.B. (98) 275)

Excluded volume

Thermodynamic nonideality; Protein assembly; Macromolecular crowding (Hall, D. (98) 93)

Extended conformation

Helical conformation; GIAO calculations; Dehydroalanine; Molecular dynamics; Force-field (Zanuy, D. (98) 301)

Flash photolysis

Yeast cytochrome *c*; Quantum yield; Electron transfer (Silkstone, G. (98) 65)

Fluorescence spectroscopy

ESR; Phenothiazine derivative; Lipid bilayer fluidity; MDR reversal; DSC (Hendrich, A.B. (98) 275)

Force-field

Extended conformation; Helical conformation; GIAO calculations; Dehydroalanine; Molecular dynamics (Zanuy, D. (98) 301)

Gating

Respiration; Kinetics; Rhodobacter sphaeroides; Proton transfer; Electron transfer (Gilderson, G. (98) 105)

Gelatin

Lysozyme; DNA; Microcalorimetry; Sodium dodecyl sulfate; Cetyltrimethyl ammonium bromide (Chatterjee, A. (98) 313)

GIAO calculations

Dehydroalanine; Molecular dynamics; Force-field; Extended conformation; Helical conformation (Zanuy, D. (98) 301)

Global allostery model

Hemoglobin oxygenation; Universal solution condition; Structural constraint; Allostery plot; Monod–Wyman–Changeux allosteric model (Imai, K. (98) 79)

Helical conformation

GIAO calculations; Dehydroalanine; Molecular dynamics; Force-field; Extended conformation (Zanuy, D. (98) 301)

Heme proteins

Blood substitutes; Mb engineering (Dou, Y. (98) 127)

Heme transfer

Circular dichroism; Recombinant hemoglobin; Bovine hemoglobin; Autoxidation; Low intrinsic oxygen affinity (Fronticelli, C. (98) 115)

Hemoglobin

Quaternary structure; Oxygen binding; Cooperative binding; Conformational kinetics; Conformational substates; Stretched exponential kinetics; Allostery (Henry, E.R. (98) 149)

Hemoglobin

M Boston; Quarterly structure; Resonance Raman; EPR; CO; UV resonance Raman (Nagatomo, S. (98) 217)

Hemoglobin nitrosation

Scapharca dimeric hemoglobin; Nitric oxide (Boffi, A. (98) 209)

Hemoglobin oxygenation

Universal solution condition; Structural constraint; Allosteric plot; Monod–Wyman–Changeux allosteric model; Global allostery model (Imai, K. (98) 79)

High cooperativity

Nuclear magnetic resonance; Recombinant hemoglobin; Low oxygen affinity (Tsai, C.-H. (98) 15)

Homology modeling

Docking; Malaria; *Plasmodium falciparum*; Dihydrofolate reductase; Antifolate resistance (Delfino, R.Teixeira. (98) 287)

Human adult hemoglobin

Allostery; Allosteric effectors; Oxygen equilibrium curves; Bohr effect; Root effect (Tsuneshige, A. (98) 49)

Human native

Cross-linked hemoglobins; Sodium dodecyl sulfate (Kumar Sau, A. (98) 267)

Hydration

Trehalose; Myoglobin; Protein dynamics; Protein function; Solvent influence (Frauenfelder, H. (98) 35)

Hydrophobic effect

Intermolecular interactions; Potentials of mean force; Lysozyme; Salting-out; Salts (Curtis, R.A. (98) 249)

Intermolecular interactions

Potentials of mean force; Lysozyme; Salting-out; Salts; Hydrophobic effect (Curtis, R.A. (98) 249)

Kinetics

Rhodobacter sphaeroides; Proton transfer; Electron transfer; Gating; Respiration (Gilderson, G. (98) 105)

Lipid bilayer fluidity

MDR reversal; DSC; Fluorescence spectroscopy; ESR; Phenothiazine derivative (Hendrich, A.B. (98) 275)

Low intrinsic oxygen affinity

Heme transfer; Circular dichroism; Recombinant hemoglobin; Bovine hemoglobin; Autoxidation (Fronticelli, C. (98) 115)

Low oxygen affinity

High cooperativity; Nuclear magnetic resonance; Recombinant hemoglobin (Tsai, C.-H. (98) 15)

Lysozyme

Salting-out; Salts; Hydrophobic effect; Intermolecular interactions; Potentials of mean force (Curtis, R.A. (98) 249)

Lysozyme

DNA; Microcalorimetry; Sodium dodecyl sulfate; Cetyltrimethyl ammonium bromide; Gelatin (Chatterjee, A. (98) 313)

M Boston

Quarterly structure; Resonance Raman; EPR; CO; UV resonance Raman; Hemoglobin (Nagatomo, S. (98) 217)

Macromolecular crowding

Excluded volume; Thermodynamic nonideality; Protein assembly (Hall, D. (98) 93)

Malaria

Plasmodium falciparum; Dihydrofolate reductase; Antifolate resistance; Homology modeling; Docking (Delfino, R.Teixeira. (98) 287)

Mb engineering

Heme proteins; Blood substitutes (Dou, Y. (98) 127)

MDR reversal

DSC; Fluorescence spectroscopy; ESR; Phenothiazine derivative; Lipid bilayer fluidity (Hendrich, A.B. (98) 275)

Metal chelator

SNO-Hb; Oxidation potential; Nitrosation; Sickle cell (Bonaventura, C. (98) 165)

Microcalorimetry

Sodium dodecyl sulfate; Cetyltrimethyl ammonium bromide; Gelatin; Lysozyme; DNA (Chatterjee, A. (98) 313)

Molecular dynamics

Force-field; Extended conformation; Helical conformation; GIAO calculations; Dehydroalanine (Zanuy, D. (98) 301)

Monod–Wyman–Changeux allosteric model

Global allostery model; Hemoglobin oxygenation; Universal solution condition; Structural constraint; Allosteric plot (Imai, K. (98) 79)

Myoglobin

Protein dynamics; Protein function; Solvent influence; Hydration; Trehalose (Frauenfelder, H. (98) 35)

Myoglobin

Rebinding reaction; Reactive molecular dynamics (Meuwly, M. (98) 183)

Nitric oxide

Hemoglobin nitrosation; *Scapharca* dimeric hemoglobin (Boffi, A. (98) 209)

Nitrosation

Sickle cell; Metal chelator; SNO-Hb; Oxidation potential (Bonaventura, C. (98) 165)

Non-ideality

Cytoskeleton; Cell volume; Entropy buffer (Hall, D. (98) 233)

Nuclear magnetic resonance

Recombinant hemoglobin; Low oxygen affinity; High cooperativity (Tsai, C.-H. (98) 15)

Oxidation potential

Nitrosation; Sickle cell; Metal chelator; SNO-Hb (Bonaventura, C. (98) 165)

Oxygen binding

Cooperative binding; Conformational kinetics; Conformational substates; Stretched exponential kinetics; Allostery; Hemoglobin; Quaternary structure (Henry, E.R. (98) 149)

Oxygen equilibrium curves

Bohr effect; Root effect; Human adult hemoglobin; Allostery; Allosteric effectors (Tsuneshige, A. (98) 49)

Pathway

Pulse radiolysis; Reorganization; Activation parameters; Conformational change; Driving force (Farver, O. (98) 27)

Phenothiazine derivative

Lipid bilayer fluidity; MDR reversal; DSC; Fluorescence spectroscopy; ESR (Hendrich, A.B. (98) 275)

Plasmodium falciparum

Dihydrofolate reductase; Antifolate resistance; Homology modeling; Docking; Malaria (Delfino, R.Teixeira. (98) 287)

Potentials of mean force

Lysozyme; Salting-out; Salts; Hydrophobic effect; Intermolecular interactions (Curtis, R.A. (98) 249)

Protein assembly

Macromolecular crowding; Excluded volume; Thermodynamic nonideality (Hall, D. (98) 93)

Protein dynamics

Protein function; Solvent influence; Hydration; Trehalose; Myoglobin (Frauenfelder, H. (98) 35)

Protein function

Solvent influence; Hydration; Trehalose; Myoglobin; Protein dynamics (Frauenfelder, H. (98) 35)

Proton transfer

Electron transfer; Gating; Respiration; Kinetics; *Rhodobacter sphaeroides* (Gilderson, G. (98) 105)

Pulse radiolysis

Reorganization; Activation parameters; Conformational change; Driving force; Pathway (Farver, O. (98) 27)

Quantum yield

Electron transfer; Flash photolysis; Yeast cytochrome *c* (Silkstone, G. (98) 65)

Quarterly structure

Resonance Raman; EPR; CO; UV resonance Raman; Hemoglobin; M Boston (Nagatomo, S. (98) 217)

Quaternary structure

Oxygen binding; Cooperative binding; Conformational kinetics; Conformational substates; Stretched exponential kinetics; Allostery; Hemoglobin (Henry, E.R. (98) 149)

Reactive molecular dynamics

Myoglobin; Rebinding reaction (Meuwly, M. (98) 183)

Rebinding reaction

Reactive molecular dynamics; Myoglobin (Meuwly, M. (98) 183)

Recombinant hemoglobin

Bovine hemoglobin; Autoxidation; Low intrinsic oxygen affinity; Heme transfer; Circular dichroism (Fronticelli, C. (98) 115)

Recombinant hemoglobin

Low oxygen affinity; High cooperativity; Nuclear magnetic resonance (Tsai, C.-H. (98) 15)

Reorganization

Activation parameters; Conformational change; Driving force; Pathway; Pulse radiolysis (Farver, O. (98) 27)

Resonance Raman

EPR; CO; UV resonance Raman; Hemoglobin; M Boston; Quarterly structure (Nagatomo, S. (98) 217)

Respiration

Kinetics; *Rhodobacter sphaeroides*; Proton transfer; Electron transfer; Gating (Gilderson, G. (98) 105)

Rhodobacter sphaeroides

Proton transfer; Electron transfer; Gating; Respiration; Kinetics (Gilderson, G. (98) 105)

Root effect

Human adult hemoglobin; Allostery; Allosteric effectors; Oxygen equilibrium curves; Bohr effect (Tsuneshige, A. (98) 49)

Salting-out

Salts; Hydrophobic effect; Intermolecular interactions; Potentials of mean force; Lysozyme (Curtis, R.A. (98) 249)

Salts

Hydrophobic effect; Intermolecular interactions; Potentials of mean force; Lysozyme; Salting-out (Curtis, R.A. (98) 249)

***Scapharca* dimeric hemoglobin**

Nitric oxide; Hemoglobin nitrosation (Boffi, A. (98) 209)

Sickle cell

Metal chelator; SNO-Hb; Oxidation potential; Nitrosation (Bonaventura, C. (98) 165)

SNO-Hb

Oxidation potential; Nitrosation; Sickle cell; Metal chelator (Bonaventura, C. (98) 165)

Sodium dodecyl sulfate

Cetyltrimethyl ammonium bromide; Gelatin; Lysozyme; DNA; Microcalorimetry (Chatterjee, A. (98) 313)

Sodium dodecyl sulfate

Human native; Cross-linked hemoglobins (Kumar Sau, A. (98) 267)

Solvent influence

Hydration; Trehalose; Myoglobin; Protein dynamics; Protein function (Frauenfelder, H. (98) 35)

Stretched exponential kinetics

Allostery; Hemoglobin; Quaternary structure; Oxygen binding; Cooperative binding; Conformational kinetics; Conformational substates (Henry, E.R. (98) 149)

Structural constraint

Allostery plot; Monod–Wyman–Changeux allosteric model; Global allosteric model; Hemoglobin oxygenation; Universal solution condition (Imai, K. (98) 79)

Thermodynamic nonideality

Protein assembly; Macromolecular crowding; Excluded volume (Hall, D. (98) 93)

Trehalose

Myoglobin; Protein dynamics; Protein function; Solvent influence; Hydration (Frauenfelder, H. (98) 35)

Universal solution condition

Structural constraint; Allostery plot; Monod–Wyman–Changeux allosteric model; Global allosteric model; Hemoglobin oxygenation (Imai, K. (98) 79)

UV resonance Raman

Hemoglobin; M Boston; Quarterly structure; Resonance Raman; EPR; CO (Nagatomo, S. (98) 217)

Yeast cytochrome *c*

Quantum yield; Electron transfer; Flash photolysis (Silkstone, G. (98) 65)
