

Subject Index to Volume 99

α -Amino acids

Viscosity *B*-coefficient; Activation free energy; Aqueous sodium acetate solutions (Yan, Z. (99) 199)

β -galactosidase activity

Surface curvature; Enzyme–surface interaction; Vesicles; Micelles; Monomolecular layers (Sanchez, J.M. (99) 281)

a.c. Impedance

Cyclic voltammetry; Marker ions; Nisin; Supported bilayer lipid membrane (Huang, W. (99) 271)

Activation free energy

Aqueous sodium acetate solutions; α -Amino acids; Viscosity *B*-coefficient (Yan, Z. (99) 199)

Air–water interface

Cell wall; Plant physiology; Lignin model compound; DHP; Polymer; Langmuir film (Micic, M. (99) 55)

Alpha helix

Beta sheet; Specific interactions; Poly-L-lysine; Potential of mean force (Grigsby, J.J. (99) 107)

Antigen / antibody affinity

Resonant frequency; Impedance analysis; Equivalent circuit; Quartz crystal microbalances (Zhang, J. (99) 31)

Aqueous sodium acetate solutions

α -Amino acids; Viscosity *B*-coefficient; Activation free energy (Yan, Z. (99) 199)

Beta sheet

Specific interactions; Poly-L-lysine; Potential of mean force; Alpha helix (Grigsby, J.J. (99) 107)

Botulinum

Circular dichroism; FT-IR; Membrane channel; Neurotoxin; Translocation; Spectroscopy (Fu, F.-N. (99) 17)

Carotenoids

Doped liposomes; Three-dimensional light scattering; Fluorescence labelling (Socaciu, C. (99) 1)

Cell wall

Plant physiology; Lignin model compound; DHP; Polymer; Langmuir film; Air–water interface (Micic, M. (99) 55)

Cholesterol modulation

Erythrocyte membrane fluidity; EPR order parameter; Cyclodextrins; Liposomes; Rafts (Cassera, M.B. (99) 117)

Circular dichroism

FT-IR; Membrane channel; Neurotoxin; Translocation; Spectroscopy; Botulinum (Fu, F.-N. (99) 17)

Curvature models

Mycobacterial promoters; Transcription (Kalate, R.N. (99) 77)

Cyclic voltammetry

Electrochemical impedance spectroscopy; Surface plasmon resonance; Low-molecular-weight chitosan; Lipid bilayer; Interaction (Yang, F. (99) 99)

Cyclic voltammetry

Marker ions; Nisin; Supported bilayer lipid membrane; a.c. Impedance (Huang, W. (99) 271)

Cyclodextrins

Liposomes; Rafts; Cholesterol modulation; Erythrocyte membrane fluidity; EPR order parameter (Cassera, M.B. (99) 117)

DHP

Polymer; Langmuir film; Air–water interface; Cell wall; Plant physiology; Lignin model compound (Micic, M. (99) 55)

Distance estimation in membrane

Orientation factor; Resonance energy transfer (Domanov, Y.A. (99) 143)

Doped liposomes

Three-dimensional light scattering; Fluorescence labelling; Carotenoids (Socaciu, C. (99) 1)

Electrochemical impedance spectroscopy

Surface plasmon resonance; Low-molecular-weight chitosan; Lipid bilayer; Interaction; Cyclic voltammetry (Yang, F. (99) 99)

Elementary flux modes

Nucleoside diphosphokinase; Half-reaction; Multifunctional enzyme; Low-specificity enzyme (Schuster, S. (99) 63)

Enzyme-surface interaction

Vesicles; Micelles; Monomolecular layers; β -galactosidase activity; Surface curvature (Sanchez, J.M. (99) 281)

EPR

Spin label; Serum albumin; Haemoglobin (Cavalu, S. (99) 181)

EPR order parameter

Cyclodextrins; Liposomes; Rafts; Cholesterol modulation; Erythrocyte membrane fluidity (Cassera, M.B. (99) 117)

Equivalent circuit

Quartz crystal microbalances; Antigen/antibody affinity; Resonant frequency; Impedance analysis (Zhang, J. (99) 31)

Erythrocyte membrane fluidity

EPR order parameter; Cyclodextrins; Liposomes; Rafts; Cholesterol modulation (Cassera, M.B. (99) 117)

Fluorescence

Scattered light microscopy; Pulmonary surfactant; Lipid-protein interactions; Lipid monolayer phases (Krüger, P. (99) 209)

Fluorescence labelling

Carotenoids; Doped liposomes; Three-dimensional light scattering (Socaciu, C. (99) 1)

Folding/unfolding transition

Switching of conformation; Polyamine; Non-specific interaction; Single molecular-chain observation; Higher-order structure of DNA (Makita, N. (99) 43)

Folds

Medium-range contacts; Long-range contacts; Structural class (Kumarevel, T.S. (99) 189)

Fractals

Lysozyme; Small angle X-ray scattering; Rheology; Viscoelasticity; Protein networks (da Silva, M.A. (99) 169)

FT-IR

Membrane channel; Neurotoxin; Translocation; Spectroscopy; Botulinum; Circular dichroism (Fu, F.-N. (99) 17)

Haemoglobin

EPR; Spin label; Serum albumin (Cavalu, S. (99) 181)

Half-reaction

Multifunctional enzyme; Low-specificity enzyme; Elementary flux modes; Nucleoside diphosphokinase (Schuster, S. (99) 63)

Higher-order structure of DNA

Folding/unfolding transition; Switching of conformation; Polyamine; Non-specific interaction; Single molecular-chain observation (Makita, N. (99) 43)

Hydrated proton

Hydroxide hydration; Ion hydration; Ionic strength; Magnesium hydration; Phosphate hydration (Kiriukhin, M.Y. (99) 155)

Hydroxide hydration

Ion hydration; Ionic strength; Magnesium hydration; Phosphate hydration; Hydrated proton (Kiriukhin, M.Y. (99) 155)

Impedance analysis

Equivalent circuit; Quartz crystal microbalances; Antigen/antibody affinity; Resonant frequency (Zhang, J. (99) 31)

Interaction

Cyclic voltammetry; Electrochemical impedance spectroscopy; Surface plasmon resonance; Low-molecular-weight chitosan; Lipid bilayer (Yang, F. (99) 99)

Ion hydration

Ionic strength; Magnesium hydration; Phosphate hydration; Hydrated proton; Hydroxide hydration (Kiriukhin, M.Y. (99) 155)

Ionic strength

Magnesium hydration; Phosphate hydration; Hydrated proton; Hydroxide hydration; Ion hydration (Kiriukhin, M.Y. (99) 155)

Langmuir film

Air-water interface; Cell wall; Plant physiology; Lignin model compound; DHP; Polymer (Micic, M. (99) 55)

Lidocaine

Membrane; Nuclear magnetic resonance (Fernandes Fraceto, L. (99) 229)

Lignin model compound

DHP; Polymer; Langmuir film; Air–water interface; Cell wall; Plant physiology (Micic, M. (99) 55)

Lipid bilayer

Interaction; Cyclic voltammetry; Electrochemical impedance spectroscopy; Surface plasmon resonance; Low-molecular-weight chitosan (Yang, F. (99) 99)

Lipid monolayer phases

Fluorescence; Scattered light microscopy; Pulmonary surfactant; Lipid–protein interactions (Krüger, P. (99) 209)

Lipid–protein interactions

Lipid monolayer phases; Fluorescence; Scattered light microscopy; Pulmonary surfactant (Krüger, P. (99) 209)

Liposomes

Rafts; Cholesterol modulation; Erythrocyte membrane fluidity; EPR order parameter; Cyclodextrins (Cassera, M.B. (99) 117)

Long-range contacts

Structural class; Folds; Medium-range contacts (Kumarevel, T.S. (99) 189)

Low-molecular-weight chitosan

Lipid bilayer; Interaction; Cyclic voltammetry; Electrochemical impedance spectroscopy; Surface plasmon resonance (Yang, F. (99) 99)

Low-specificity enzyme

Elementary flux modes; Nucleoside diphosphokinase; Half-reaction; Multifunctional enzyme (Schuster, S. (99) 63)

Lysozyme

Tetramethylurea; Solvent effects; Viscoelasticity; Protein networks; Sol–gel transitions; Rheological properties (da Silva, M.A. (99) 129)

Lysozyme

Small angle X-ray scattering; Rheology; Viscoelasticity; Protein networks; Fractals (da Silva, M.A. (99) 169)

Magnesium hydration

Phosphate hydration; Hydrated proton; Hydroxide hydration; Ion hydration; Ionic strength (Kiriukhin, M.Y. (99) 155)

Marker ions

Nisin; Supported bilayer lipid membrane; a.c. Impedance; Cyclic voltammetry (Huang, W. (99) 271)

Medium-range contacts

Long-range contacts; Structural class; Folds (Kumarevel, T.S. (99) 189)

Membrane

Nuclear magnetic resonance; Lidocaine (Fernandes Fraceto, L. (99) 229)

Membrane channel

Neurotoxin; Translocation; Spectroscopy; Botulinum; Circular dichroism; FT-IR (Fu, F.-N. (99) 17)

Micelles

Monomolecular layers; β -galactosidase activity; Surface curvature; Enzyme–surface interaction; Vesicles (Sanchez, J.M. (99) 281)

Model

Simulation; Oscillation; Peroxidase–oxidase; Temperature compensation (Valeur, K.Rosendal. (99) 259)

Monomolecular layers

β -galactosidase activity; Surface curvature; Enzyme–surface interaction; Vesicles; Micelles (Sanchez, J.M. (99) 281)

Multifunctional enzyme

Low-specificity enzyme; Elementary flux modes; Nucleoside diphosphokinase; Half-reaction (Schuster, S. (99) 63)

Mycobacterial promoters

Transcription; Curvature models (Kalate, R.N. (99) 77)

Neurotoxin

Translocation; Spectroscopy; Botulinum; Circular dichroism; FT-IR; Membrane channel (Fu, F.-N. (99) 17)

Nisin

Supported bilayer lipid membrane; a.c. Impedance; Cyclic voltammetry; Marker ions (Huang, W. (99) 271)

Non-specific interaction

Single molecular-chain observation; Higher-order structure of DNA; Folding/unfolding transition; Switching of conformation; Polyamine (Makita, N. (99) 43)

Nuclear magnetic resonance

Lidocaine; Membrane (Fernandes Fraceto, L. (99) 229)

Nucleoside diphosphokinase

Half-reaction; Multifunctional enzyme; Low-specificity enzyme; Elementary flux modes (Schuster, S. (99) 63)

Orientation factor

Resonance energy transfer; Distance estimation in membrane (Domanov, Y.A. (99) 143)

Oscillation

Peroxidase–oxidase; Temperature compensation; Model; Simulation (Valeur, K.Rosendal. (99) 259)

Osmotic pressure

Phospholipid; Transition temperature (Lai, A.Chi.-k. (99) 245)

Peroxidase–oxidase

Temperature compensation; Model; Simulation; Oscillation (Valeur, K.Rosendal. (99) 259)

Phosphate hydration

Hydrated proton; Hydroxide hydration; Ion hydration; Ionic strength; Magnesium hydration (Kiriukhin, M.Y. (99) 155)

Phospholipid

Transition temperature; Osmotic pressure (Lai, A.Chi.-k. (99) 245)

Plant physiology

Lignin model compound; DHP; Polymer; Langmuir film; Air–water interface; Cell wall (Micic, M. (99) 55)

Poly-L-lysine

Potential of mean force; Alpha helix; Beta sheet; Specific interactions (Grigsby, J.J. (99) 107)

Polyamine

Non-specific interaction; Single molecular-chain observation; Higher-order structure of DNA; Folding/unfolding transition; Switching of conformation (Makita, N. (99) 43)

Polymer

Langmuir film; Air–water interface; Cell wall; Plant physiology; Lignin model compound; DHP (Micic, M. (99) 55)

Potential of mean force

Alpha helix; Beta sheet; Specific interactions; Poly-L-lysine (Grigsby, J.J. (99) 107)

Protein networks

Sol–gel transitions; Rheological properties; Lysozyme; Tetramethylurea; Solvent effects; Viscoelasticity (da Silva, M.A. (99) 129)

Protein networks

Fractals; Lysozyme; Small angle X-ray scattering; Rheology; Viscoelasticity (da Silva, M.A. (99) 169)

Pulmonary surfactant

Lipid–protein interactions; Lipid monolayer phases; Fluorescence; Scattered light microscopy (Krüger, P. (99) 209)

Quartz crystal microbalances

Antigen/antibody affinity; Resonant frequency; Impedance analysis; Equivalent circuit (Zhang, J. (99) 31)

Rafts

Cholesterol modulation; Erythrocyte membrane fluidity; EPR order parameter; Cyclodextrins; Liposomes (Cassera, M.B. (99) 117)

Resonance energy transfer

Distance estimation in membrane; Orientation factor (Domanov, Y.A. (99) 143)

Resonant frequency

Impedance analysis; Equivalent circuit; Quartz crystal microbalances; Antigen/antibody affinity (Zhang, J. (99) 31)

Rheological properties

Lysozyme; Tetramethylurea; Solvent effects; Viscoelasticity; Protein networks; Sol–gel transitions (da Silva, M.A. (99) 129)

Rheology

Viscoelasticity; Protein networks; Fractals; Lysozyme; Small angle X-ray scattering (da Silva, M.A. (99) 169)

Scattered light microscopy

Pulmonary surfactant; Lipid–protein interactions; Lipid monolayer phases; Fluorescence (Krüger, P. (99) 209)

Serum albumin

Haemoglobin; EPR; Spin label (Cavalu, S. (99) 181)

Simulation

Oscillation; Peroxidase–oxidase; Temperature compensation; Model (Valeur, K.Rosendal. (99) 259)

Single molecular-chain observation

Higher-order structure of DNA; Folding/unfolding transition; Switching of conformation; Polyamine; Non-specific interaction (Makita, N. (99) 43)

Small angle X-ray scattering

Rheology; Viscoelasticity; Protein networks; Fractals; Lysozyme (da Silva, M.A. (99) 169)

Sol–gel transitions

Rheological properties; Lysozyme; Tetramethylurea; Solvent effects; Viscoelasticity; Protein networks (da Silva, M.A. (99) 129)

Solvent effects

Viscoelasticity; Protein networks; Sol–gel transitions; Rheological properties; Lysozyme; Tetramethylurea (da Silva, M.A. (99) 129)

Specific interactions

Poly-L-lysine; Potential of mean force; Alpha helix; Beta sheet (Grigsby, J.J. (99) 107)

Spectroscopy

Botulinum; Circular dichroism; FT-IR; Membrane channel; Neurotoxin; Translocation (Fu, F.-N. (99) 17)

Spin label

Serum albumin; Haemoglobin; EPR (Cavalu, S. (99) 181)

Structural class

Folds; Medium-range contacts; Long-range contacts (Kumarevel, T.S. (99) 189)

Supported bilayer lipid membrane

a.c. Impedance; Cyclic voltammetry; Marker ions; Nisin (Huang, W. (99) 271)

Surface curvature

Enzyme-surface interaction; Vesicles; Micelles; Monomolecular layers; β -galactosidase activity (Sanchez, J.M. (99) 281)

Surface plasmon resonance

Low-molecular-weight chitosan; Lipid bilayer; Interaction; Cyclic voltammetry; Electrochemical impedance spectroscopy (Yang, F. (99) 99)

Switching of conformation

Polyamine; Non-specific interaction; Single molecular-chain observation; Higher-order structure of DNA; Folding/unfolding transition (Makita, N. (99) 43)

Temperature compensation

Model; Simulation; Oscillation; Peroxidase-oxidase (Valeur, K.Rosendal. (99) 259)

Tetramethylurea

Solvent effects; Viscoelasticity; Protein networks; Sol-gel

transitions; Rheological properties; Lysozyme (da Silva, M.A. (99) 129)

Three-dimensional light scattering

Fluorescence labelling; Carotenoids; Doped liposomes (Socaciu, C. (99) 1)

Transcription

Curvature models; Mycobacterial promoters (Kalate, R.N. (99) 77)

Transition temperature

Osmotic pressure; Phospholipid (Lai, A.Chi.-k. (99) 245)

Translocation

Spectroscopy; Botulinum; Circular dichroism; FT-IR; Membrane channel; Neurotoxin (Fu, F.-N. (99) 17)

Vesicles

Micelles; Monomolecular layers; β -galactosidase activity; Surface curvature; Enzyme-surface interaction (Sanchez, J.M. (99) 281)

Viscoelasticity

Protein networks; Fractals; Lysozyme; Small angle X-ray scattering; Rheology (da Silva, M.A. (99) 169)

Viscoelasticity

Protein networks; Sol-gel transitions; Rheological properties; Lysozyme; Tetramethylurea; Solvent effects (da Silva, M.A. (99) 129)

Viscosity *B*-coefficient

Activation free energy; Aqueous sodium acetate solutions; α -Amino acids (Yan, Z. (99) 199)
