## Subject Index to Volume 106

### Acoustic wave biosensor

Binding kinetics; TAR–Tat; Neomycin (Tassew, N. (106) 241)

### Actin

ATPase activity; Binding; Human ventricular myosin light chain 1; Rat myosin S1 (Xie, B. (106) 57)

### Activation

Metabolism; Oscillations; Signal processing; Neutrophils; NAD(P)H (Albrecht, E. (106) 211)

### Activation energy profile

Membrane displacement friction; Non-linear displacement; Membrane soluble ions; Ion velocity distributions (Starzak, M.E. (106) 75)

### Aggregation

Kinetics; Nucleation; Luciferase (Wang, K. (106) 97)

### Allosteric effector

Cyclic voltammetry; Hemoglobin; ATP (Peng, W. (106) 267)

### Antibody binding

HSV gD-1 epitope; Cyclic peptides; Thioether bond; Solution conformation; NMR (Schlosser, G. (106) 155)

### Antioxidant

EPR spectroscopy; Free radical; Spin trap; DMPO; POBN; DPPH; TEMPOL; Ascorbic acid; Tea (Polovka, M. (106) 39)

### Ascorbic acid

Tea; Antioxidant; EPR spectroscopy; Free radical; Spin trap; DMPO; POBN; DPPH; TEMPOL (Polovka, M. (106) 39)

### ATP

Allosteric effector; Cyclic voltammetry; Hemoglobin (Peng, W. (106) 267)

### ATPase activity

Binding; Human ventricular myosin light chain 1; Rat myosin S1; Actin (Xie, B. (106) 57)

### Benzohydroxamic acid

Horseradish peroxidase; Trehalose; Sugar glass; Carbon-monoxide (Kaposi, A.D. (106) 1)

### Binding

Human ventricular myosin light chain 1; Rat myosin S1; Actin; ATPase activity (Xie, B. (106) 57)

### Binding kinetics

TAR–Tat; Neomycin; Acoustic wave biosensor (Tassew, N. (106) 241)

### Biochemical oscillations

*Saccharomyces cerevisiae*; Mathematical modelling; Metabolic control theory; Cellular systems; Temperature compensation; Glycolysis (Ruoff, P. (106) 179)

### Bioelectronic devices

MD simulation; Hybrid electron transfer systems (Bizzarri, A.R. (106) 111)

### Biomembrane

*l*- $\alpha$ -Phosphatidylcholine; Channel; Polyoxometalates; Supported bilayer lipid membrane (Wang, J. (106) 31)

### C or G content distributions

Correlation tables; DNA statistical mechanics; Helix free energy distributions; Distribution moments; Maximum-entropy method (Poland, D. (106) 275)

### Calcium oscillations

Fraction of glycogen phosphorylase; Frequency encoding (Rozi, A. (106) 193)

**Carbonmonoxide**

Benzohydroxamic acid; Horseradish peroxidase; Trehalose; Sugar glass (Kaposi, A.D. (106) 1)

**Catalytic and kinetic models compounds**

Quantum mixed spin state  $S = \frac{5}{2}$ ,  $S = \frac{3}{2}$  of iron(III); Peroxidase (Sánchez-Sandoval, A. (106) 253)

**Cellular systems**

Temperature compensation; Glycolysis; Biochemical oscillations; *Saccharomyces cerevisiae*; Mathematical modelling; Metabolic control theory (Ruoff, P. (106) 179)

**Channel**

Polyoxometalates; Supported bilayer lipid membrane; Biomembrane; *l*- $\alpha$ -Phosphatidylcholine (Wang, J. (106) 31)

**Charge-transfer excited state**

High frequency mode; Duschinsky rotation; Molecular dynamics simulation; Poplar plastocyanin; Ultrafast pump-probe spectroscopy (Cimei, T. (106) 221)

**Compressed cartilage**

Hydration; Two-compartment model; Fixed charge density; Extrafibrillar water; Exclusion volume (Nimer, E. (106) 125)

**Cooperativity**

Polymerase chain reaction; Master equation; Random jump; DNA renaturation (Murugan, R. (106) 173)

**Correlation tables**

DNA statistical mechanics; Helix free energy distributions; Distribution moments; Maximum-entropy method; C or G content distributions (Poland, D. (106) 275)

**Cyclic peptides**

Thioether bond; Solution conformation; NMR; Antibody binding; HSV gD-1 epitope (Schlosser, G. (106) 155)

**Cyclic voltammetry**

Hemoglobin; ATP; Allosteric effector (Peng, W. (106) 267)

**Delayed rectifier K<sup>+</sup> channels**

Reversal potential; Patch-voltage clamp; Rescaled range method; Rat dorsal root ganglion neurons (Lan, T.-H. (106) 67)

**Density**

Water; Electrostriction; Protein; Hydration (Danielewicz-Ferchmin, I. (106) 147)

**Dissociation**

Thiocyanate binding site; Hemoglobin (Kumar Sau, A. (106) 233)

**Distribution moments**

Maximum-entropy method; C or G content distributions; Correlation tables; DNA statistical mechanics; Helix free energy distributions (Poland, D. (106) 275)

**DMPO**

POBN; DPPH; TEMPOL; Ascorbic acid; Tea; Antioxidant; EPR spectroscopy; Free radical; Spin trap (Polovka, M. (106) 39)

**DNA condensation**

Higher-order structure of DNA; Spermine; Poly(ethylene glycol); Fluorescence microscopy; Transcriptional activity (Tsumoto, K. (106) 23)

**DNA renaturation**

Cooperativity; Polymerase chain reaction; Master equation; Random jump (Murugan, R. (106) 173)

**DNA statistical mechanics**

Helix free energy distributions; Distribution moments; Maximum-entropy method; C or G content distributions; Correlation tables (Poland, D. (106) 275)

**Dorsal root ganglion neurons**

Fractal model; Ion channel; Single channel recording; Potassium channel (Lan, T.-H. (106) 203)

**DPPH**

TEMPOL; Ascorbic acid; Tea; Antioxidant; EPR spectroscopy; Free radical; Spin trap; DMPO; POBN (Polovka, M. (106) 39)

**Duschinsky rotation**

Molecular dynamics simulation; Poplar plastocyanin; Ultrafast pump-probe spectroscopy; Charge-transfer excited state; High frequency mode (Cimei, T. (106) 221)

**Electrochemical balance**

Membrane potential; [K<sup>+</sup>] and [Na<sup>+</sup>] transport; Low extracellular potassium; Inward potassium rectifier (van Mil, H. (106) 15)

**Electrostriction**

Protein; Hydration; Density; Water (Danielewicz-Ferchmin, I. (106) 147)

**EPR spectroscopy**

Free radical; Spin trap; DMPO; POBN; DPPH; TEMPOL; Ascorbic acid; Tea; Antioxidant (Polovka, M. (106) 39)

**Exclusion volume**

Compressed cartilage; Hydration; Two-compartment model; Fixed charge density; Extrafibrillar water (Nimer, E. (106) 125)

**Extracellular water**

Exclusion volume; Compressed cartilage; Hydration; Two-compartment model; Fixed charge density (Nimer, E. (106) 125)

**Fixed charge density**

Extracellular water; Exclusion volume; Compressed cartilage; Hydration; Two-compartment model (Nimer, E. (106) 125)

**Fluorescence microscopy**

Transcriptional activity; DNA condensation; Higher-order structure of DNA; Spermine; Poly(ethylene glycol) (Tsumoto, K. (106) 23)

**Fractal model**

Ion channel; Single channel recording; Potassium channel; Dorsal root ganglion neurons (Lan, T.-H. (106) 203)

**Fraction of glycogen phosphorylase**

Frequency encoding; Calcium oscillations (Rozi, A. (106) 193)

**Free radical**

Spin trap; DMPO; POBN; DPPH; TEMPOL; Ascorbic acid; Tea; Antioxidant; EPR spectroscopy (Polovka, M. (106) 39)

**Frequency encoding**

Calcium oscillations; Fraction of glycogen phosphorylase (Rozi, A. (106) 193)

**Glycolysis**

Biochemical oscillations; *Saccharomyces cerevisiae*; Mathematical modelling; Metabolic control theory; Cellular systems; Temperature compensation (Ruoff, P. (106) 179)

**Helix free energy distributions**

Distribution moments; Maximum-entropy method; C or G content distributions; Correlation tables; DNA statistical mechanics (Poland, D. (106) 275)

**Hemoglobin**

Dissociation; Thiocyanate binding site (Kumar Sau, A. (106) 233)

**Hemoglobin**

ATP; Allosteric effector; Cyclic voltammetry (Peng, W. (106) 267)

**High frequency mode**

Duschinsky rotation; Molecular dynamics simulation; Poplar plastocyanin; Ultrafast pump-probe spectroscopy; Charge-transfer excited state (Cimei, T. (106) 221)

**Higher-order structure of DNA**

Spermine; Poly(ethylene glycol); Fluorescence microscopy; Transcriptional activity; DNA condensation (Tsumoto, K. (106) 23)

**Horseradish peroxidase**

Trehalose; Sugar glass; Carbonmonoxide; Benzohydroxamic acid (Kaposi, A.D. (106) 1)

**HSV gD-1 epitope**

Cyclic peptides; Thioether bond; Solution conformation; NMR; Antibody binding (Schlosser, G. (106) 155)

**Human ventricular myosin light chain 1**

Rat myosin S1; Actin; ATPase activity; Binding (Xie, B. (106) 57)

**Hybrid electron transfer systems**

Bioelectronic devices; MD simulation (Bizzarri, A.R. (106) 111)

**Hydration**

Two-compartment model; Fixed charge density; Extracellular water; Exclusion volume; Compressed cartilage (Nimer, E. (106) 125)

**Hydration**

Density; Water; Electrostriction; Protein (Danielewicz-Ferchmin, I. (106) 147)

**Interaction energies**

Protein folding; Solvation; Size effects; Lattice simulation (Leonhard, K. (106) 81)

**Inward potassium rectifier**

Electrochemical balance; Membrane potential;  $[K^+]$  and  $[Na^+]$  transport; Low extracellular potassium (van Mil, H. (106) 15)

**Ion channel**

Single channel recording; Potassium channel; Dorsal root ganglion neurons; Fractal model (Lan, T.-H. (106) 203)

**Ion velocity distributions**

Activation energy profile; Membrane displacement friction; Non-linear displacement; Membrane soluble ions (Starzak, M.E. (106) 75)

**Kinetics**

Nucleation; Luciferase; Aggregation (Wang, K. (106) 97)

 **$[K^+]$  and  $[Na^+]$  transport**

Low extracellular potassium; Inward potassium rectifier; Electrochemical balance; Membrane potential (van Mil, H. (106) 15)

**Lattice simulation**

Interaction energies; Protein folding; Solvation; Size effects (Leonhard, K. (106) 81)

**Low extracellular potassium**

Inward potassium rectifier; Electrochemical balance; Membrane potential;  $[K^+]$  and  $[Na^+]$  transport (van Mil, H. (106) 15)

**Luciferase**

Aggregation; Kinetics; Nucleation (Wang, K. (106) 97)

**Master equation**

Random jump; DNA renaturation; Cooperativity; Polymerase chain reaction (Murugan, R. (106) 173)

**Mathematical modelling**

Metabolic control theory; Cellular systems; Temperature compensation; Glycolysis; Biochemical oscillations; *Saccharomyces cerevisiae* (Ruoff, P. (106) 179)

**Maximum-entropy method**

C or G content distributions; Correlation tables; DNA statistical mechanics; Helix free energy distributions; Distribution moments (Poland, D. (106) 275)

**MD simulation**

Hybrid electron transfer systems; Bioelectronic devices (Bizzarri, A.R. (106) 111)

**Membrane displacement friction**

Non-linear displacement; Membrane soluble ions; Ion velocity distributions; Activation energy profile (Starzak, M.E. (106) 75)

**Membrane potential**

$[K^+]$  and  $[Na^+]$  transport; Low extracellular potassium; Inward potassium rectifier; Electrochemical balance (van Mil, H. (106) 15)

**Membrane soluble ions**

Ion velocity distributions; Activation energy profile; Membrane displacement friction; Non-linear displacement (Starzak, M.E. (106) 75)

**Metabolic control theory**

Cellular systems; Temperature compensation; Glycolysis; Biochemical oscillations; *Saccharomyces cerevisiae*; Mathematical modelling (Ruoff, P. (106) 179)

**Metabolism**

Oscillations; Signal processing; Neutrophils; NAD(P)H; Activation (Albrecht, E. (106) 211)

**Molecular dynamics simulation**

Poplar plastocyanin; Ultrafast pump-probe spectroscopy; Charge-transfer excited state; High frequency mode; Duschinsky rotation (Cimei, T. (106) 221)

**NAD(P)H**

Activation; Metabolism; Oscillations; Signal processing; Neutrophils (Albrecht, E. (106) 211)

**Neomycin**

Acoustic wave biosensor; Binding kinetics; TAR-Tat (Tassew, N. (106) 241)

**Neutrophils**

NAD(P)H; Activation; Metabolism; Oscillations; Signal processing (Albrecht, E. (106) 211)

**NMR**

Antibody binding; HSV gD-1 epitope; Cyclic peptides; Thioether bond; Solution conformation (Schlosser, G. (106) 155)

**Non-linear displacement**

Membrane soluble ions; Ion velocity distributions; Activation energy profile; Membrane displacement friction (Starzak, M.E. (106) 75)

**Nucleation**

Luciferase; Aggregation; Kinetics (Wang, K. (106) 97)

**Oscillations**

Signal processing; Neutrophils; NAD(P)H; Activation; Metabolism (Albrecht, E. (106) 211)

**Patch-voltage clamp**

Rescaled range method; Rat dorsal root ganglion neurons; Delayed rectifier  $K^+$  channels; Reversal potential (Lan, T.-H. (106) 67)

**Peroxidase**

Catalytic and kinetic models compounds; Quantum mixed spin state  $S = \frac{5}{2}$ ,  $S = \frac{3}{2}$  of iron(III) (Sánchez-Sandoval, A. (106) 253)

*l*- $\alpha$ -Phosphatidylcholine

Channel; Polyoxometalates; Supported bilayer lipid membrane; Biomembrane (Wang, J. (106) 31)

**POBN**

DPPH; TEMPOL; Ascorbic acid; Tea; Antioxidant; EPR spectroscopy; Free radical; Spin trap; DMPO (Polovka, M. (106) 39)

**Poly(ethylene glycol)**

Fluorescence microscopy; Transcriptional activity; DNA condensation; Higher-order structure of DNA; Spermine (Tsumoto, K. (106) 23)

**Polymerase chain reaction**

Master equation; Random jump; DNA renaturation; Cooperativity (Murugan, R. (106) 173)

**Polyoxometalates**

Supported bilayer lipid membrane; Biomembrane; *l*- $\alpha$ -Phosphatidylcholine; Channel (Wang, J. (106) 31)

**Poplar plastocyanin**

Ultrafast pump-probe spectroscopy; Charge-transfer excited state; High frequency mode; Duschinsky rotation; Molecular dynamics simulation (Cimei, T. (106) 221)

**Potassium channel**

Dorsal root ganglion neurons; Fractal model; Ion channel; Single channel recording (Lan, T.-H. (106) 203)

**Protein**

Hydration; Density; Water; Electrostriction (Danielewicz-Ferchmin, I. (106) 147)

**Protein folding**

Solvation; Size effects; Lattice simulation; Interaction energies (Leonhard, K. (106) 81)

**Quantum mixed spin state  $S = \frac{5}{2}$ ,  $S = \frac{3}{2}$  of iron(III)**

Peroxidase; Catalytic and kinetic models compounds (Sánchez-Sandoval, A. (106) 253)

**Random jump**

DNA renaturation; Cooperativity; Polymerase chain reaction; Master equation (Murugan, R. (106) 173)

**Rat dorsal root ganglion neurons**

Delayed rectifier  $K^+$  channels; Reversal potential; Patch-voltage clamp; Rescaled range method (Lan, T.-H. (106) 67)

**Rat myosin S1**

Actin; ATPase activity; Binding; Human ventricular myosin light chain 1 (Xie, B. (106) 57)

**Rescaled range method**

Rat dorsal root ganglion neurons; Delayed rectifier  $K^+$  channels; Reversal potential; Patch-voltage clamp (Lan, T.-H. (106) 67)

**Reversal potential**

Patch-voltage clamp; Rescaled range method; Rat dorsal root ganglion neurons; Delayed rectifier  $K^+$  channels (Lan, T.-H. (106) 67)

***Saccharomyces cerevisiae***

Mathematical modelling; Metabolic control theory; Cellular systems; Temperature compensation; Glycolysis; Biochemical oscillations (Ruoff, P. (106) 179)

**Signal processing**

Neutrophils; NAD(P)H; Activation; Metabolism; Oscillations (Albrecht, E. (106) 211)

**Single channel recording**

Potassium channel; Dorsal root ganglion neurons; Fractal model; Ion channel (Lan, T.-H. (106) 203)

**Size effects**

Lattice simulation; Interaction energies; Protein folding; Solvation (Leonhard, K. (106) 81)

**Solution conformation**

NMR; Antibody binding; HSV gD-1 epitope; Cyclic peptides; Thioether bond (Schlosser, G. (106) 155)

**Solvation**

Size effects; Lattice simulation; Interaction energies; Protein folding (Leonhard, K. (106) 81)

**Spermine**

Poly(ethylene glycol); Fluorescence microscopy; Transcriptional activity; DNA condensation; Higher-order structure of DNA (Tsumoto, K. (106) 23)

**Spin trap**

DMPO; POBN; DPPH; TEMPOL; Ascorbic acid; Tea; Antioxidant; EPR spectroscopy; Free radical (Polovka, M. (106) 39)

**Sugar glass**

Carbonmonoxide; Benzohydroxamic acid; Horseradish peroxidase; Trehalose (Kaposi, A.D. (106) 1)

**Supported bilayer lipid membrane**

Biomembrane; *l*- $\alpha$ -Phosphatidylcholine; Channel; Polyoxometalates (Wang, J. (106) 31)

**TAR-Tat**

Neomycin; Acoustic wave biosensor; Binding kinetics (Tassew, N. (106) 241)

**Tea**

Antioxidant; EPR spectroscopy; Free radical; Spin trap; DMPO; POBN; DPPH; TEMPOL; Ascorbic acid (Polovka, M. (106) 39)

**Temperature compensation**

Glycolysis; Biochemical oscillations; *Saccharomyces cerevisiae*; Mathematical modelling; Metabolic control theory; Cellular systems (Ruoff, P. (106) 179)

**TEMPOL**

Ascorbic acid; Tea; Antioxidant; EPR spectroscopy; Free radical; Spin trap; DMPO; POBN; DPPH (Polovka, M. (106) 39)

**Thiocyanate binding site**

Hemoglobin; Dissociation (Kumar Sau, A. (106) 233)

**Thioether bond**

Solution conformation; NMR; Antibody binding; HSV gD-1 epitope; Cyclic peptides (Schlosser, G. (106) 155)

**Transcriptional activity**

DNA condensation; Higher-order structure of DNA; Spermine; Poly(ethylene glycol); Fluorescence microscopy (Tsumoto, K. (106) 23)

**Trehalose**

Sugar glass; Carbonmonoxide; Benzohydroxamic acid; Horseradish peroxidase (Kaposi, A.D. (106) 1)

**Two-compartment model**

Fixed charge density; Extrafibrillar water; Exclusion volume; Compressed cartilage; Hydration (Nimer, E. (106) 125)

**Ultrafast pump-probe spectroscopy**

Charge-transfer excited state; High frequency mode; Duschinsky rotation; Molecular dynamics simulation; Poplar plastocyanin (Cimei, T. (106) 221)

**Water**

Electrostriction; Protein; Hydration; Density (Danielewicz-Ferchmin, I. (106) 147)
