An error was made in using the Butz-Cowan rules to generate the expressions for $V(x, s)$ used in Appendix A. Eqs. A2–A4 should read

$$\Delta_2 = \Delta_a(\cosh \gamma L_3 \sinh \gamma L_4 + \sinh \gamma L_3 \cosh \gamma L_4) + \Delta_b \cosh \gamma L_3 \cosh \gamma L_4 \quad \text{(A2)}$$

$$\Delta_a = \cosh \gamma L_0 \sinh \gamma L_1 + \sinh \gamma L_2 \cosh \gamma L_0 \cosh \gamma L_1 \cosh \gamma L_2$$
$$+ \sinh \gamma L_0 \sinh \gamma L_1 \cosh \gamma L_2 \quad \text{(A3)}$$

$$\Delta_b = \sinh \gamma L_0 \cosh \gamma L_1 \cosh \gamma L_2 + \sinh \gamma L_0 \sinh \gamma L_1 \sinh \gamma L_2$$
$$+ \cosh \gamma L_0 \cosh \gamma L_1 \sinh \gamma L_2. \quad \text{(A4)}$$

Page 188

Eq. A62 should read

$$\Delta_6 = \cosh \gamma L_0 \cosh \gamma L_1 \cosh \gamma L_2 \sinh \gamma L_3$$
$$+ \cosh \gamma L_0 \cosh \gamma L_1 \sinh \gamma L_2 \cosh \gamma L_3$$
$$+ \cosh \gamma L_0 \sinh \gamma L_1 \cosh \gamma L_2 \cosh \gamma L_3$$
$$+ \sinh \gamma L_0 \cosh \gamma L_1 \cosh \gamma L_2 \cosh \gamma L_3. \quad \text{(A62)}$$

Page 189

Eq. A72 should read

$$\Delta_7 = \sinh \gamma(L_0 - D) \cosh \gamma L_1 \cosh \gamma L_2 \sinh \gamma L_3$$
$$+ \sinh \gamma(L_0 - D) \cosh \gamma L_1 \sinh \gamma L_2 \cosh \gamma L_3$$
$$+ \sinh \gamma(L_0 - D) \sinh \gamma L_1 \cosh \gamma L_2 \cosh \gamma L_3$$
$$+ \cosh \gamma(L_0 - D) \cosh \gamma L_1 \cosh \gamma L_2 \cosh \gamma L_3. \quad \text{(A72)}$$

Unfortunately, as a result of these mistakes, many of the specific expressions for $F(G, s)$, $f(G, t)$, and in some cases, $A(D, s)$ and $a(D, t)$ in Appendix A are incorrect. The above corrections will allow a correct derivation to be made of all the specific expressions. A corrected list of the expressions is available from the author for interested readers. None of the conclusions reached in the article were affected by the errors.
