

## LETTER TO THE EDITOR

### *COMMENTS ON "A TRIBUTE TO KENNETH S. COLE"*

Dear Sir:

A recent Brief Communication,<sup>1</sup> contains a reference to me which can be interpreted in a misleading fashion. D. E. Goldman agrees that it would have been better to say:

"In 1941, Bartlett asked Cole how to establish voltage control of the iron wire. Cole showed him how to do it."

Thank you for correcting that misleading statement.

JAMES H. BARTLETT
