

## NOTICE TO CONTRIBUTORS

The JOURNAL, which appears quarterly, publishes original work in all branches of pharmacology and experimental chemotherapy, including the biochemical and pathological aspects of the subject. Provision is also made for short communications and for brief notes on technique. Papers submitted for publication should be addressed to the Secretary to the Editorial Board, Dr. G. S. Dawes, Nuffield Institute for Medical Research, 43, Woodstock Road, Oxford.

Papers submitted to the JOURNAL are accepted on the understanding that they have not been and will not be published in whole or in part in any other journal; they are subject to editorial revision.

MSS. and illustrations should bear the name and full address of the author to whom proofs are to be sent. Papers should be in double-spaced typing on one side only of quarto or foolscap sheets, with a margin of not less than  $1\frac{1}{4}$  in. Papers must be as concise as possible, and only recognized abbreviations should be used.

In stating the object of the research the author should refer to previous work only if it has a direct bearing on the subject of the paper; as a rule a complete historical review is unnecessary. A paper should conclude with a brief but self-explanatory summary giving in numbered paragraphs the results and conclusions described in the paper; it should not exceed 1-20th of the length of the paper.

TABLES.—Tables are to be typed on separate numbered sheets and referred to in the text by Roman numerals. Tables should be comprehensible without reference to the text.

ILLUSTRATIONS.—Illustrations are to be referred to in the text by Arabic numerals. Legends or captions are to be typed on separate sheets and numbered correspondingly; they should render the illustrations comprehensible without reference to the text. Line drawings and graphs, which should be about twice their intended final size, are to be carefully drawn in Indian ink on tracing linen, or Bristol board, or stout smooth white paper; blue-lined graph paper of good quality may be used for graphs. Letterings of drawings and graphs must be lightly written in pencil. Lettering on kymograph records should be large enough to be legible on photographic reproduction. When half-tone reproduction of x-ray or other illustrations is required the author is advised to send the original film unless he wishes to bring out special points in a print of his own choice. Photographs and photomicrographs should be printed on glossy paper, should be larger than the size desired for reproduction, and, if transmitted through the post in a tube, should be rolled with the picture outside.

REFERENCES.—References should be arranged according to the Harvard system. In the text the year of publication must follow the author's name, more than one paper in any one year being indicated by a small letter (a, b, c) after the date. At the end of the paper references should be arranged in the alphabetical order of the authors' names and should include: author's name, followed by initials; year of publication, in parentheses; title of publication, underlined, and abbreviated in accordance with the *World List of Scientific Periodicals*; volume number in Arabic numerals underlined with a wavy line to indicate bold type; the number of the first page in Arabic numerals, thus:

Barger, G., and Dale, H. H. (1910-11). *J. Physiol.*, 41, 19.

The BRITISH JOURNAL OF PHARMACOLOGY AND CHEMOTHERAPY should be referred to in the list of references as *Brit. J. Pharmacol.*

When reference is made to a book the author's name and the date should be followed by: title, underlined; edition, volume number (vol.), and page (p. or pp.); town of origin; and the publisher, thus:

Clark, A. J. (1940). *Applied Pharmacology*, 7th ed., p. 378. London: Churchill.

For further information on the preparation of MSS. authors are recommended to study the "Suggestions to Authors" in the *Journal of Physiology* (1952), 116, 1. For abbreviations and symbols, however, back numbers of this JOURNAL should be consulted.

PROOFS.—Contributors will receive one proof in page, but it will be assumed that all but verbal corrections have been made in the original MS.; an allowance at the rate of ten shillings per sheet of sixteen pages is made for alterations in the proof (printer's errors excepted), and contributors will be charged for any excess.

REPRINTS.—Twenty-five reprints of an article will, if desired, be given to an author or divided among the authors. A limited number of additional reprints at cost price can be supplied if application is made when the proofs are returned, and an estimate of costs can be obtained from the Publishing Manager, British Medical Association.

COPYRIGHT.—Papers which have been published become the property of the JOURNAL and permission to republish must be obtained from the Editors.

# INDEX TO VOLUME 10

## INDEX TO AUTHORS

### B

- BANGHAM, D. R.: Metabolism and excretion of  $^{14}\text{C}$ -labelled diethylcarbamazine, 397  
 — Mode of action of diethylcarbamazine investigated with  $^{14}\text{C}$ -labelled drug, 406  
 BARLOW, R. B.: Series of polymethylenebisacetoxymethyl-dimethylammonium salts, 168  
 — Blaschko, H., Himms, J. M., and Trendelenburg, U.: Observations on  $\Omega$ -aminopolymethylenetrimethylammonium compounds, 116  
 — and Himms, J. M.: Anticholinesterase activity of polymethylenebisquinolinium salts, 173

## SUBJECT INDEX

## A

- Acetoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462
- Acetylcholine, antagonism of, by (+)- and (-)-hyoscyamine, 354
- assay of, using isolated heart of *Mya arenaria*, 36
- ganglion-stimulant activity and phase-boundary potential of, 220
- presence of, in Malayan Jack-fruit, 247
- Adrenaline, action of, on excised human myometrium, 39
- inhibition of uterine contractions by, effect of various drugs on, 186
- stabilization mechanism in adrenal gland, 163
- Alkyltin compounds, toxicity of, 16
- Allobarbitone sodium, action of, on isolated muscle preparations, 133
- Allyl iodide and isothiocyanate, *in vitro* anthelmintic activity of, 7
- Amethocaine, action of, on epilepsy, in cats and monkeys, 288
- local anaesthetic activity of, 240.
- Amidines, inhibition of amine oxidase and spermine oxidase by, 451
- Amine oxidase, inhibition of, by amidines, 451
- Amino-acids, and formaldehyde derivatives, *in ovo* antiviral activity of, 56
- 2-Amino-5-nitrothiazole, *in vitro* anthelmintic activity of, 7
- $\Omega$ -Amino polymethylenetrimethylammonium compounds, biological activities and oxidation of, 116
- p-Aminosalicylic acid, *in vitro* antithyroid activity determination and mode of action of, 1
- Anaesthetics, local, action of, on epilepsy, in cats and monkeys, 288
- comparison of testing methods in man, 240
- Analgesics, action of, on cough reflex, 418
- Antazoline hydrochloride, action of, on bronchial musculature, 230
- Antergan hydrochloride, action of, on bronchial musculature, 230
- Anthelmintic activity and chemical structure relations in phenothiazine analogues, 340
- Anthelmintics, *in vitro* testing of, 7
- Anthisan: *see* Mepyramine maleate
- Anti-anaphylactic drugs, evaluation of, 160

- Anti-cholera drugs, evaluation of, 153
- Anticholinesterases, action of, on isolated rabbit duodenum, 26
- — on rat blood pressure, 12
- neuromuscular block due to, reversal by oximes, 490
- Anticonvulsants, local anaesthetics as, 288
- Antifungal activities of polymethylene-bisquinolinium and -bisisoquinolinium salts, 343
- Antihistaminics, action of, on bronchial musculature, 230
- activity-structure relations in, 270
- Antimalarial drugs, mode of action of, 208
- Antistin: *see* Antazoline hydrochloride
- Antithyroid drugs, *in vitro* potency determination and mode of action of, 1
- Antitubercular agents, sulphones and sulfoxides as, in guinea-pigs, 113
- — surface-active polyoxyethylene ethers as, 73
- Antrycide: *see* Quinapyramine
- Artemisia maritima*, essential oil from, *in vitro* anthelmintic activity of, 7
- Artocarpus integra*, presence of acetylcholine in, 247
- Ascaris lumbricoides*, *in vitro* tests of compounds on, 7
- Ascorbic acid, anti-anaphylactic action of, 160
- Assays, multiple slope-ratio, nomograms for, 296
- Aureomycin, vibriocidal activity of, 153

## B

- BDHB: *see* Butyl 4-hydroxy-3:5-di-iodobenzoate
- Bacillary infections, treatment of, with quinoxaline 1:4-di-N-oxide, in mice, 394
- Banthine: *see* Methantheline bromide
- Barbitone sodium, action of, on isolated muscle preparations, 133
- Barbiturates, action of, on isolated muscle preparations, 133
- Barium chloride, anti-anaphylactic action of, 160
- Benadryl: *see* Diphenhydramine hydrochloride
- Benzamine, enzymic hydrolysis of, 442
- Benzhexol, optical isomers of, pharmacological properties of, 383
- Benzhydroxamic acid, reactivation by, of organophosphate-inhibited cholinesterase, 462
- Benzilic acid esters, derivatives of, spasmolytic activities of, 95

- Benzoylcholine, ganglion-stimulant activity and phase-boundary potential of, 220
- 5-Benzoyloxygramine, effect of, on response of rat uterus to adrenaline and isoprenaline, 186
- 1: 4-Bis(benzo-1: 4-dioxan-2-ylmethyl)piperazine, effect of, on response of rat uterus to adrenaline, 186
- Blood circulation, action of succinylcholine chloride on, 265
- — — peripheral, action on, of 5-hydroxytryptamine, 445
- glucose, action of sodium salicylate on, in rats, 110
- $\alpha$ -Bromo-*p*-nitrocinnamaldehyde, vibriocidal activity of, 153
- Bulbocapnine, intraventricular, catatonia production by, in cats, 371
- Buscopan: *see* *N*-Butylhyoscine bromide
- Butacaine, local anaesthetic activity of, 240
- Butazolidin: *see* Phenylbutazone
- Butethamine, action of, on epilepsy, in cats and monkeys, 288
- Butobarbitone sodium, action of, on isolated muscle preparations, 133
- Butyl 4-hydroxy-3: 5-di-iodobenzoate, *in vitro* antithyroid activity determination and mode of action of, 1
- Butylamines, substituted, histamine release by, 254
- N*-Butylhyoscine bromide, anti-anaphylactic action of, 160
- Butyrylcholine, stimulant activity of, on skeletal muscle, 466
- iso*Butyrylcholine, ganglion-stimulant activity and phase-boundary potential of, 220
- stimulant activity of, on skeletal muscle, 466

## C

- Caffeine, anti-anaphylactic action of, 160
- Capillary permeability, effect on, of polyvidone, in dogs, 223
- Capsaicin, and analogues, pharmacological actions of, 175
- Carbachol, ganglion-stimulant activity and phase-boundary potential of, 220
- Carbimazole, *in vitro* antithyroid activity determination and mode of action of, 1
- Carbon tetrabromide, *in vitro* anthelmintic activity of, 7
- tetrachloride, *in vitro* anthelmintic activity of, 7
- Carbromal, action of, on isolated muscle preparations, 133
- Catatonia, production of, by bulbocapnine, in cats, 371
- Chloral hydrate, action of, on isolated muscle preparations, 133
- — — anti-anaphylactic action of, 160
- Chloralose, action of, on isolated muscle preparations, 133
- Chloramphenicol, vibriocidal activity of, 153
- Chlorbutol, action of, on isolated muscle preparations, 133
- Chlorcyclizine hydrochloride, action of, on bronchial musculature, 230
- — — — on response of rat uterus to adrenaline, 186
- o*-Chlorobenzaldoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462
- 2'-Chloroethylethylfluoren-9-ylamine hydrochloride, effect of, on response of rat uterus to adrenaline, 186
- Chlorpyrilene citrate, action of, on bronchial musculature, 230
- Chlorothen: *see* Chlorpyrilene citrate
- Chlorpromazine, action of, on adrenocortical activity in stress, 336

- Chlorpromazine, action of, on response of rat uterus to adrenaline, 186
- anti-anaphylactic action of, 160
- side effects of, 429
- Chlorpropenpyridamine maleate, action of, on bronchial musculature, 230
- — — — on response of rat uterus to adrenaline, 186
- Chlortetracycline: *see* Aureomycin
- Chlortrimeton: *see* Chlorpropenpyridamine maleate
- Cholera, experimental, production in infant rabbits, 153
- Choline esters and ethers, ganglion-stimulant activities and phase-boundary potentials of, 220
- — — — stimulant activity of, on skeletal muscle, 466
- Cholinesterases, inhibition of, correlation between muscle tone and, in rabbit duodenum, 26
- mammalian, action of lysergic acid diethylamide on, 61
- organophosphate-inhibited, reactivation of, by nicotinhydroxamic acid methiodide, 356
- — — — by oximes and hydroxamic acids, 462
- Cinchocaine, local anaesthetic activity of, 240
- Cocaine, enzymic hydrolysis of, 442
- local anaesthetic activity of, 240
- $\alpha$ -Cocaine, enzymic hydrolysis of, 442
- local anaesthetic and other effects of, 436
- Codeine, action of, on cough reflex, 418
- Compound 48/80, action of, on ganglionic transmission, 103
- — — — on mammalian skeletal muscle, 413
- Conessine hydrochloride, *in vitro* anthelmintic activity of, 7
- Cortisone, with and without isoniazid, action of, in corneal tuberculosis, in mice, 387
- Cough reflex, effect on, of analgesics and nalorphine, 418
- Cyanocobalamin, anti-anaphylactic action of, 160

## D

- Dextran, histamine release by, in rabbit blood, 87
- Dextran sulphate, *in vitro* and *in vivo* anticoagulant activity of, 317
- — — histamine release by, in rabbit blood, 87
- Diacetylmonoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462
- Diamidines, inhibition of amine oxidase and spermine oxidase by, 451
- 4:6-Diamino-1-*p*-chlorophenyl-1: 2-dihydro-2: 2-dimethyl-1: 3: 5-triazine, action of, on neuromuscular and synaptic transmission, 147
- Di(aminophenoxy)alkanes, symmetrical, and their derivatives, schistosomicidal activities of, 191
- Diatrin: *see* Methapheniline hydrochloride
- Dibenamine hydrochloride, action of, on response of rat uterus to adrenaline, 186
- Dibenzylamine, anti-anaphylactic action of, 160
- action of, on response of rat uterus to adrenaline and isoprenaline, 186
- Dibozane: *see* 1: 4-Bis(benzo-1: 4-dioxan-2-ylmethyl)piperazine
- 2-Diethanolamino-5-nitropyridine, amoebicidal activity of, 434
- Diethoxine: *see* Parethoxycaine
- Diethyl *p*-nitrophenyl phosphate, action of, on rat blood pressure, 12
- 2-Diethylaminomethylbenzo-1: 4-dioxan hydrochloride, action of, on response of rat uterus to adrenaline, 186
- Diethylcarbamazine,  $^{14}\text{C}$ -labelled, metabolism and excretion of, 397
- mode of action of, investigated with  $^{14}\text{C}$ -labelled drug, 406

- Diethyl-2-thymoxyethylamine hydrochloride, action of, on response of rat uterus to adrenaline, 186
- Dihydroergotamine, action of, on excised human myometrium, 39
- — — on response of rat uterus to adrenaline and isoprenaline, 186
- 2:3-Dihydro-3-ketobenzo-1:4-thiazine, derivatives of, *in vitro* anthelmintic activities of, 7
- 5-Dimethylamino-3-ethyl-2-methylindole, action of, on response of rat uterus to adrenaline and isoprenaline, 186
- Diisopropyl phosphorofluoridate: *see* Dyflos
- Dyflos, action of, on isolated rabbit duodenum, 26
- — — on rat blood pressure, 12
- neuromuscular block due to, reversal by oximes, 490

## E

- E.600: *see* Diethyl *p*-nitrophenyl phosphate
- Enheptin-T: *see* 2-Amino-5-nitrothiazole
- Ephedrine hydrochloride, action of, on response of rat uterus to adrenaline, 186
- Epilepsy, effect of local anaesthetics on, in cats and monkeys, 288
- Ergot alkaloids, action of, on mammalian esterases, 61
- Eserine: *see* Physostigmine
- Esterases, mammalian, action of lysergic acid diethylamide and ergot alkaloids on, 61
- Ethyl pyrophosphate, action of, on rat blood pressure, 12
- — — neuromuscular block due to, reversal by oximes, 490
- Ethylenediamine, derivatives of, enzymic oxidation of, 314
- $\beta$ -Eucaine: *see* Benzamine

## F

- Fasciola hepatica*, *in vitro* tests of compounds on, 7
- Formaldehyde sulphathiazole, vibriocidal activity of, 153
- Formaldehyde-tyrosine derivative, mode of action of, against influenza A virus *in ovo*, 56
- Formo-Cibazol: *see* Formaldehyde sulphathiazole
- Formo-sulphathiazole: *see* Formaldehyde sulphathiazole
- Furohydroxamic acid, reactivation by, of organophosphate-inhibited cholinesterase, 462

## G

- Gamma benzene hexachloride, *in vitro* anthelmintic activity of, 7
- Ganglion-stimulant activity and phase-boundary potentials, 220
- Glycyrrhetic acid, action of, on salt and water metabolism, 305
- Glyoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462

## H

- Hearts, molluscan, for 5-hydroxytryptamine assay, 474
- Heparin, anti-anaphylactic action of, 160
- *in vitro* and *in vivo* anticoagulant activity of, 317
- Hexobarbitone sodium, action of, on isolated muscle preparations, 133
- Histadyl: *see* Methapyrilene hydrochloride
- Histamine, release of, and "stress" phenomenon, 51
- — — by dextran and dextran sulphate, in rabbit blood, 87
- — — by L 1935, compared with compound 48/80, 254
- — — by polymyxin B and E, 215
- Histamine-induced itching and pain, 183
- Histanin: *see* Chlorcyclizine hydrochloride
- Hydroxamic acids, reactivation by, of organophosphate-inhibited cholinesterase, 462
- 5-Hydroxytryptamine, action of, on peripheral blood vessels, 445
- assay of, in admixture with histamine and acetylcholine, 326
- — — using molluscan hearts, 474
- cardiovascular and respiratory actions of, in cats, 66
- (+)- and (-)-Hyoscyamine, antagonism of acetylcholine by, 354
- Hypnotics, action of, on isolated muscle preparations, 133

## I

- Imferon, pharmacology of, 375
- Influenza A virus, action of formaldehyde-tyrosine derivative against, *in ovo*, 56
- Iodothiouracil, *in vitro* antithyroid activity determination and mode of action of, 1
- Iproniazid, action of, on response of rat uterus to adrenaline, 186
- Iron-dextran preparation, pharmacology of, 375
- Isatin- $\beta$ -oxime, reactivation by, of organophosphate-inhibited cholinesterase, 462
- Isoniazid, *in vitro* antithyroid activity determination and mode of action of, 1

## K

- Khellin, anti-anaphylactic action of, 160

## L

- L 1935, histamine release by, compared with compound 48/80, 254
- Largactil: *see* Chlorpromazine hydrochloride
- Lidocaine: *see* Lignocaine
- Lignocaine, action of, on epilepsy, in cats and monkeys, 288
- local anaesthetic activity of, 240
- 2:6-Lutidine, *in vitro* anthelmintic activity of, 7
- Lysergic acid diethylamide, action of, on mammalian esterases, 61
- — — — on response of rat uterus to adrenaline and isoprenaline, 186

## M

- Marsilid: *see* Iproniazid
- Medmain: *see* 5-Dimethylamino-3-ethyl-2-methylindole
- Mepyramine maleate, action of, on bronchial musculature, 230
- Mercuric chloride, *in vitro* anthelmintic activity of, 7
- Mercury, organic derivatives of, *in vitro* anthelmintic activity of, 7
- Metabolism, salt and water, action of glycyrrhetic acid on, 305

- Methacholine, ganglion-stimulant activity and phase-boundary potential of, 220  
 Methadone, action of, on cough reflex, 418  
 — mechanism of pituitary-adrenal activation by, 260  
 Methantheline bromide, anti-anaphylactic action of, 160  
 Methapheniline hydrochloride, action of, on bronchial musculature, 230  
 Methapyrilene hydrochloride, action of, on bronchial musculature, 230  
 Methimazole, *in vitro* antithyroid activity determination and mode of action of, 1  
 Methonium compounds, development of tolerance and cross-tolerance to, in laboratory animals, 279  
*p*-Methoxyisonitrosoacetophenone, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Methylglyoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Methylpentynol, action of, on isolated muscle preparations, 133  
 Monocaine: *see* Butethamine  
 Monoisonitrosoacetone, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 — reversal by, of neuromuscular block due to anticholinesterases, 490  
 Morphine, action of, on cough reflex, 418  
 — anti-anaphylactic action of, 160  
 — antidiuretic action of, effect of nalorphine on, in rats and men, 45  
 — mechanism of pituitary-adrenal activation by, 260  
 — paralyzing action of, on guinea-pig ileum, 456  
 Muscle, bronchial, effect on, of antihistaminics, 230  
 — skeletal, effect on, of compound 48/80, 413  
 — — — of hypnotics, 133  
 — — — of quaternary ammonium compounds, 466  
 — — — of thiopentone sodium, 141  
 — — mechanism of after-discharges caused by veratrine in, 363  
 Muscle tone, correlation between cholinesterase inhibition and, in rabbit duodenum, 26  
 Myometrium, excised human, effect of adrenaline, noradrenaline and dihydroergotamine on, 39

## N

- Nalorphine, action of, on antidiuretic action of morphine, in rats and men, 45  
 — — — on cough reflex and on antitussive action of morphine-like analgesics, 418  
 Narcotine, action of, on cough reflex, 418  
 Neo-Synephrine: *see* Phenylephrine  
 Neuromuscular transmission, effect of proguanil and its metabolite on, 147  
 Nicotine, ganglion-stimulant activity and phase-boundary potential of, 220  
 — stimulant activity of, on skeletal muscle, 466  
 Nicotinic hydroxamic acid methiodide, action of, on organophosphate-inhibited cholinesterase, 356  
 — — — reactivation by, of organophosphate-inhibited cholinesterase, 462  
*o*- and *p*-Nitrophenols, *in vitro* anthelmintic activities of, 7  
*iso*Nitrosoacetophenone, reactivation by, of organophosphate-inhibited cholinesterase, 462  
*iso*Nitrosoacetylacetone, reactivation by, of organophosphate-inhibited cholinesterase, 462  
*iso*Nitrosoacetylurea, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Nomograms for multiple slope-ratio assays, 296  
 Noradrenaline, action of, on excised human myometrium 39

## O

- Oximes, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 — reversal by, of neuromuscular block due to anticholinesterases, 490  
 Oxytetracycline, vibriocidal activity of, 153  
 Oxytocic activity, assay of, effect of acidity changes on, isolated rat uterus in, 424

## P

- Paludrine: *see* Proguanil  
 Paraldehyde, action of, on isolated muscle preparations, 133  
 Parethoxycaine, action of, on epilepsy, in cats and monkeys, 288  
 Pentobarbitone sodium, action of, on isolated muscle preparations, 133  
 Perchlorate, *in vitro* antithyroid activity determination, 1  
 Pethidine, action of, on cough reflex, 418  
 — anti-anaphylactic action of, 160  
 Phenacetylcholine, ganglion-stimulant activity and phase-boundary potential of, 220  
 Phenergan: *see* Promethazine hydrochloride  
 Phenindamine tartrate, action of, on bronchial musculature, 230  
 — — — on response of rat uterus to adrenaline, 186  
 Phenobarbitone, anti-anaphylactic action of, 160  
 Phenobarbitone sodium, action of, on isolated muscle preparations, 133  
 Phenothiazine, cyclic analogues of, anthelmintic activity and structure relations in, 340  
 — derivatives of, *in vitro* anthelmintic activities of, 7  
 Phenoxazine, anthelmintic activity of, 340  
 Phentolamine, action of, on response of rat uterus to adrenaline, 186  
 Phenylbutazone, anti-anaphylactic action of, 160  
 Phenylephrine, anti-anaphylactic action of, 160  
 Phenylglyoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Pholcodine, action of, on cough reflex, 418  
 Physostigmine, action of, on isolated rabbit duodenum, 26  
 — — — rat blood pressure, 12, 349  
 — — — response of rat uterus to adrenaline, 186  
 Picolines, *in vitro* anthelmintic activities of, 7  
 Picolinhydroxamic acid, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Piperidylamidone, action of, on cough reflex, 418  
 Piperoxane hydrochloride, action of, on response of rat uterus to adrenaline, 186  
 Pituitary-adrenal axis, mechanism of stimulation by morphine and methadone, 260  
*Plasmodium gallinaceum*, mode of action of proguanil-pyrimethamine and sulphonamides on, 208  
 Polymethylenebis(2-acetoxy ethyl dimethyl ammonium) salts, pharmacological activity of, 168  
 Polymethylenebis[4-(4-alkyl)morpholinium] salts, ganglion-blocking activities of, 124  
 Polymethylenebis[1-(1-alkyl)piperidinium] salts, ganglion-blocking activities of, 124  
 Polymethylenebis[1-(1-alkyl)pyrrolidinium] salts, ganglion-blocking activities of, 124  
 Polymethylenebis(2-hydroxy ethyl dimethyl ammonium) salts, pharmacological activity of, 168  
 Polymethylenebisquinolinium salts, anticholinesterase activity of, 173  
 — — antifungal activities of, 343

Polymethylenebisquinolinium salts, antifungal activities of, 343  
 Polymyxin B and E, histamine release by, 215  
 Polyoxyethylene ethers, surface-active, antitubercular activities of, 73  
 Polyvidone, action of, on capillary permeability in dogs, 223  
 Polyvinylpyrrolidone: *see* Polyvidone  
 Prisol: *see* Tolazoline hydrochloride  
 Probanthine: *see* Propantheline bromide  
 Procaine, action of, on epilepsy, in cats and monkeys, 288  
 Procyclidine, optical isomers of, pharmacological properties of, 383  
 Proguanil, and its metabolite, action of, on neuromuscular and synaptic transmission, 147  
 — pyrimethamine and sulphonamides, cross-resistance, potentiation and antagonism in *Plasmodium gallinaceum*, 208  
 Promethazine hydrochloride, action of, on bronchial musculature, 230  
 Propantheline bromide, anti-anaphylactic action of, 160  
 Propionylcholine, ganglion-stimulant activity and phase-boundary potential of, 220  
 — stimulant activity of, on skeletal muscle, 466  
 2-Propoxyprocaine, local anaesthetic activity of, 240  
 isoPropyl methylphosphonofluoridate: *see* Sarin  
 Pumpkin seed extract, *in vitro* anthelmintic activity of, 7  
 Pyribenzamine: *see* Tripelethamine hydrochloride  
 Pyridine, *in vitro* anthelmintic activity of, 7  
 Pyridine-2-aldoxime methiodide, reversal by, of neuromuscular block due to anticholinesterases, 490  
 Pyridine-2-, -3- and -4-aldoxime methiodide, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Pyrimethamine, proguanil and sulphonamides, cross-resistance, potentiation and antagonism in *Plasmodium gallinaceum*, 208  
 Pyrimidine-2-hydroxamic acid, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Pyrogallalldoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462

Q

Quaternary ammonium compounds, stimulant activities of, on skeletal muscle, 466  
 Quinapyramine, *in vitro* trypanocidal activity of, 454  
 Quinine hydrochloride, *in vitro* antithyroid activity determination, 1  
 Quinoline, *in vitro* anthelmintic activity of, 7  
 isoQuinoline, *in vitro* anthelmintic activity of, 7  
 Quinoxaline 1:4-di-N-oxide, treatment with, of bacillary infections, in mice, 394

R

Ravocaine: *see* 2-Propoxyprocaine  
 Resorcinol, *in vitro* antithyroid activity determination and mode of action of, 1  
 Rhodanine, derivatives of, *in vitro* anthelmintic activities of, 7  
 Rogitine: *see* Phentolamine

S

SKF 501: *see* 2'-Chloroethylethylfluoren-9-ylamine hydrochloride  
 SKF 688A: *see* Dibenzylamine  
 Salicylalldoxime, reactivation by, of organophosphate-inhibited cholinesterase, 462

Salicylate, action of, on blood glucose, in rats, 110  
 — excretion of, 484  
 Salicylhydroxamic acid, reactivation by, of organophosphate-inhibited cholinesterase, 462  
 Salicylic acid, anti-anaphylactic action of, 160  
 Sarin, action of, on rat blood pressure, 12  
 — neuromuscular block due to, reversal by oximes, 490  
 Schistosomicidal activity of symmetrical di(amino-phenoxy)alkanes and their derivatives, 191  
 Shock, anaphylactic, protection against, by various substances, 160  
 Sodium azide, *in vitro* anthelmintic activity of, 7  
 — cyanate, anti-anaphylactic action of, 160  
 — fluoride, action of, on response of rat uterus to adrenaline, 186  
 Spasmolytics, derivatives of benzoic and thiobenzoic acid esters as, 95  
 Spermine oxidase, inhibition of, by amidines, 451  
 Stress, adrenocortical activity in, effect of chlorpromazine on, 336  
 Stress phenomenon, and histamine release, 51  
 Succinylcholine chloride: *see* Suxamethonium chloride  
 Sulphaguanidine, vibriocidal activity of, 153  
 Sulphathiazole sodium, *in vitro* antithyroid activity determination and mode of action of, 1  
 Sulphonamides, proguanil and pyrimethamine, cross-resistance, potentiation and antagonism in *Plasmodium gallinaceum*, 208  
 Sulphones, antitubercular activity of, in guinea-pigs, 113  
 Sulphoxides, antitubercular activities of, in guinea-pigs, 113  
 Superfusion, as method for study of drug antagonism, 326  
 Suxamethonium chloride, action of, on blood circulation, 265  
 Synaptic transmission, effect of proguanil and its metabolite on, 147

T

TEPP: *see* Ethyl pyrophosphate  
 Terramycin: *see* Oxytetracycline  
 $\beta$ -Tetra: *see* Tetrahydro- $\beta$ -naphthylamine carbonate  
 Tetracaine: *see* Amethocaine  
 Tetrahydro- $\beta$ -naphthylamine carbonate, action of, on response of rat uterus to adrenaline and isoprenaline, 186  
 Thephorin: *see* Phenindamine tartrate  
 Thiambutene, action of, on cough reflex, 418  
 Thiobenzoic acid esters, and related compounds, spasmolytic activities of, 95  
 Thiocyanate, *in vitro* antithyroid activity determination and mode of action of, 1  
 pseudoThiohydantoin, *in vitro* anthelmintic activity of, 7  
 Thiopentone sodium, action of, on isolated muscle preparations, 133, 141  
 Thiouracil, *in vitro* antithyroid activity determination and mode of action of, 1  
 L-Thyroxine, *in vitro* antithyroid activity determination and mode of action of, 1  
 Tolazoline hydrochloride, action of, on response of rat uterus to adrenaline, 186  
 Tricyclamol, optical isomers of, pharmacological properties of, 383  
 Triethylenephosphoramidate, metabolism of, in relation to antitumour activity, 321  
 Trimethylacetylcholine, ganglion-stimulant activity and phase-boundary potential of, 220  
 — stimulant activity of, on skeletal muscle, 466

- Triisnitrosopropane, reactivation by, of organophosphate-inhibited cholinesterase, 462  
— reversal by, of neuromuscular block due to anti-cholinesterases, 490  
Tripelennamine hydrochloride, action of, on bronchial musculature, 230  
Tuberculosis, corneal, effect on, of cortisone, with and without isoniazid, in mice, 387
- U
- Urethane, action of, on isolated muscle preparations, 133  
Urine, human, plain-muscle-stimulating substance in, 200
- V
- Valerylcholine, stimulant activity of, on skeletal muscle, 466  
*N*-Vanillylacetamide, pharmacological actions of, 175  
Vanillylamine, pharmacological actions of, 175  
*N*-Vanillyldecanamide, pharmacological actions of, 175
- Veratramine, action of, on response of rat uterus to adrenaline, 186  
Veratrine, mechanism of after-discharges due to, in skeletal muscle, 363  
Veratrum alkaloids, action of, on response of rat uterus to adrenaline, 186
- X
- Xylocaine: *see* Lignocaine
- Y
- Yohimbine hydrochloride, action of, on response of rat uterus to adrenaline, 186
- 883 F: *see* 2-Diethylaminomethylbenzo-1:4-dioxan hydrochloride  
929 F: *see* Diethyl-2-thymoxyethylamine hydrochloride  
933 F: *see* Piperoxane hydrochloride
