	PAGE
BRITISH PHARMACOLOGICAL SOCIETY, PROGRAMME OF MEETING	217
ELLIOTT, R. C. AND QUILLIAM, J. P. SOME ACTIONS OF CENTRALLY ACTIVE AND OTHER DRUGS ON THE TRANSMISSION OF SINGLE NERVE IMPULSES THROUGH THE ISOLATED SUPERIOR CERVICAL GANGLION PREPARATION OF THE RABBIT	222
BROWN, D. A. AND QUILLIAM, J. P. THE EFFECTS OF SOME CENTRALLY ACTING DRUGS ON GANGLIONIC TRANSMISSION IN THE CAT	241
BROWN, D. A. AND QUILLIAM, J. P. OBSERVATIONS ON THE MODE OF ACTION OF SOME CENTRAL DEPRESSANT DRUGS ON TRANSMISSION THROUGH THE CAT SUPERIOR CERVICAL GANGLION	257
QUILLIAM, J. P. AND SHAND, D. G. THE SELECTIVITY OF DRUGS BLOCKING GANGLIONIC TRANSMISSION IN THE RAT	273
GRAHAM, J. D. P. DISTRIBUTION OF (2-BROMOETHYL)ETHYL(NAPHTH-1-YLMETHYL- [¹⁴ C])- AMINE HYDROBROMIDE IN THE RAT	285
BARON, R. L. AND JOHNSON, H. NEUROLOGICAL DISRUPTION PRODUCED IN HENS BY TWO ORGANOPHOSPHATE ESTERS	295
PAGET, G. E. AND THORPE, E. A TERATOGENIC EFFECT OF A SULPHONAMIDE IN EXPERI- MENTAL ANIMALS	305
CRAWFORD, J. M. AND CURTIS, D. R. THE EXCITATION AND DEPRESSION OF MAMMALIAN CORTICAL NEURONES BY AMINO ACIDS	313
HALLIWELL, G., QUINTON, R. M. AND WILLIAMS, FRANCES E. A COMPARISON OF IMIPRAMINE, CHLORPROMAZINE AND RELATED DRUGS IN VARIOUS TESTS INVOLVING AUTONOMIC FUNCTIONS AND ANTAGONISM OF RESERPINE	330
REGOLI, D. AND VANE, J. R. A SENSITIVE METHOD FOR THE ASSAY OF ANGIOTENSIN	351
VANE, J. R. THE USE OF ISOLATED ORGANS FOR DETECTING ACTIVE SUBSTANCES IN THE CIR- CULATING BLOOD	360
EAKINS, K. E. AND RYAN, S. J. THE ACTION OF SYMPATHOMIMETIC AMINES ON THE OUT- FLOW OF AQUEOUS HUMOUR FROM THE EYE	374
BHARGAVA, K. P., BHATTACHARYA, S. S. AND SRIMAL, R. C. CENTRAL CARDIO- VASCULAR ACTIONS OF γ -AMINO BUTYRIC ACID	383
BHARGAVA, K. P. AND SRIVASTAVA, R. K. NONSPECIFIC DEPRESSANT ACTION OF γ -AMINO BUTYRIC ACID ON SOMATIC REFLEXES	391
BENFEY, B. G. AND VARMA, D. R. INHIBITION OF SYMPATHOMIMETIC EFFECTS ON THE HEART	399
DAY, MARGARET AND STOCKBRIDGE, ANNE. THE EFFECTS OF DRUGS ON THE UPTAKE OF AMINES BY MAST CELLS	405
ROBINSON, B. V. AND ROBSON, J. M. PRODUCTION OF AN ANTI-INFLAMMATORY SUB- STANCE AT A SITE OF INFLAMMATION	420
