Editorial assistance is provided by the staff of Nature

Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Professor R. S. Stacey, St. Thomas's Hospital Medical School, London S.E.1. Authors should consult the suggestions inside the back cover.

Subscriptions. Three volumes of the journal are published annually, each volume containing four numbers. The annual subscription rate is £15 15s. in the United Kingdom and Republic of Ireland; \$48.50 U.S.A.; \$52.50 Canada; £16 10s. all other overseas countries. Subscriptions should be sent to: Subscriptions Department, Macmillan (Journals) Ltd., Brunel Road, Basingstoke, Hampshire, England. Alternatively, the journal can be ordered through a subscription agent or bookseller.

Advertisements. Applications for advertising space and rates should be sent to: The Advertisement Department, *British Journal of Pharmacology*, T. G. Scott and Son Ltd., 1 Clement's Inn, London, W.C.2, England. Tel: 01-242 6264; 01-405 4743. Grams: Textualist London W.C.2.

BRITISH JOURNAL OF PHARMACOLOGY

The following are some of the manuscripts which will be published in future issues:

FISHLOCK, D. J. and GUNN, A.: The action of angiotensin on the human colon *in vitro*

RAND, M. J. and VARMA, V.: The effects of cholinomimetic drugs on responses to sympathetic nerve stimulation and noradrenaline in the rabbit ear artery

ALLEN, D. J., GARG, K. N. and MARLEY, E.: [Mode of action of α -methyl-noradrenaline on temperature and oxygen consumption in young chickens

FOLLENFANT, M. J. and ROBSON, R. D.: The antagonism of adrenergic neurone blockade by amphetamine and dexamphetamine in the rat and guinea-pig

NUSTAD, K.: The relationship between kidney and urinary kininogenase

NUSTAD, K.: Localization of kininogenase in the rat kidney

LEVY, J. V.: Effect of organic nitrates on myocardial oxygen consumption *in vitro*

DAVIDSON, W. J. and INNES, I. R.: Dissociation of potentiation of isoprenaline by cocaine from inhibition of uptake in cat spleen

GILMORE, N. J. and VANE, J. R.: A sensitive and specific assay for vasopressin in the circulating blood

GREWAL, R. S. and KAUL, C. L.: Mechanism of the antagonism of the hypotensive action of guanethidine by propranolol

HOLMES, S. W.: The spontaneous release of prostaglandins into the cerebral ventricles of the dog and the effect of external factors on this release

BRITISH JOURNAL OF PHARMACOLOGY

THE INTERNATIONAL SYSTEM OF UNITS (SI)

From February 1970 the British Journal of Pharmacology will use the **symbols** recommended in the SI (Système Internationale) (see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society: price 7s.)). It is the policy of the Editorial Board to adopt SI **units**, although the use of certain non-SI units will for the time being be permitted. Full details of the changes involved will be published in a forthcoming "Instructions to Authors". The following is a list (a) of some of the commoner units with their recommended symbols, (b) of some non-SI units which may still be used, and (c) of units which will no longer be acceptable.

(a) SI units with recommended symbols

Unit	Correct symbol
kilogramme	kg
second, millisecond	s ms
mole, millimole, micromole,	mol mmol μ mol
nanomole, picomole	nmol pmol
metre, centimetre, millimetre,	m cm mm
micrometre	μ m
Hertz	Hz

(b) Some permitted non-SI units

ångström	Å (= 10^{-10} m = 0.1 nm)
gramme	g
minute	min
hour	h
molarity (mol/litre)	M
calorie	cal (4.184 J) (Conversion factor to be given as a footnote at first citation or in Methods)
millimetre of mercury	mmHg (1.333 mbar) (Conversion factor to be given as a footnote at first citation or in Methods)
millibar	mbar
poise	P
curie	Ci
litre	l. (where there is danger of confusion between the numeral '1' and the letter 'l', 'litre' should be written in full, and always at the end of a sentence)
millilitre, microlitre	ml μ l
degree Celsius	°C

(c) Units no longer acceptable

Inch, foot, pound, pound per square inch, °F.

Expressions such as cycles per second (c/s) will no longer be accepted. Frequencies should be expressed in the appropriate approved symbols: thus a stimulation frequency should be given in Hz (frequency of irregular or occasional events should be given per unit time, s⁻¹, h⁻¹ etc.).

Instructions to Authors

1. **Manuscripts** (2 copies) should be typed in double spacing on one side of paper not larger than foolscap (33×20.5 cm). There should be a separate title page giving the names and addresses of the authors in alphabetical order.
2. **A short summary of results and conclusions** (arranged in numbered paragraphs), **tables and legends to figures** should be typed on separate sheets of paper.
3. **References** should be collected at the end of the paper. They should include the authors' names, year of publication, title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.
4. **Figures** should NOT BE LARGER THAN FOOLSCAP (33×20.5 cm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided and both ordinates and abscissae should be calibrated.
5. **Lettering** on figures should be inserted in PENCIL. Symbols which are to appear in figures or legends should be chosen from the following:

\times + ● ■ ○ □ △ ▲ ▽ ▼ ◐ ◑ ◆
6. **Photographs and photomicrographs** should be printed on glossy paper and should be larger than the size required for reproduction.
7. **Tables** ideally should not have more than 84 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 130 characters to a line, unless absolutely unavoidable.
8. **An abstract** of about 100 words suitable for inclusion in *International Abstracts of Biological Sciences* should be typed on a separate sheet.

General remarks. A recent issue of the Journal is a good guide to style. Papers are accepted only if accompanied by a statement that they have not and will not be published in whole or in part in any other Journal.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Fifty reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs.
