Editorial assistance is provided by the staff of Nature

Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Professor R. S. Stacey, St. Thomas's Hospital Medical School, London S.E.1. Authors should consult the suggestions inside the back cover.

Subscriptions. Three volumes of the journal are published annually, each volume containing four numbers. The annual subscription rate is £15 15s. in the United Kingdom and Republic of Ireland; \$48.50 U.S.A. and \$52.50 Canada (by air freight; second class postage paid at New York, N.Y.); £16 10s. all other overseas countries. Subscriptions should be sent to: Subscriptions Department, Macmillan (Journals) Ltd., Brunel Road, Basingstoke, Hampshire, England. Alternatively, the journal can be ordered through a subscription agent or bookseller.

Advertisements: Applications for advertising space and rates should be sent to: The Advertisement Department, *British Journal of Pharmacology*, T. G. Scott and Son Ltd., 1 Clement's Inn, London, WC2A 2ED, England. Tel: 01-242 6264; 01-405 4743. Grams: Textualist London W.C.2.

BRITISH JOURNAL OF PHARMACOLOGY

THE INTERNATIONAL SYSTEM OF UNITS (SI)

From February 1970 the British Journal of Pharmacology will use the **symbols** recommended in the SI (Système Internationale) (see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society: price 7s.)). It is the policy of the Editorial Board to adopt SI **units**, although the use of certain non-SI units will for the time being be permitted. Full details of the changes involved will be published in a forthcoming "Instructions to Authors". The following is a list (a) of some of the commoner units with their recommended symbols, (b) of some non-SI units which may still be used, and (c) of units which will no longer be acceptable.

(a) SI units with recommended symbols

Unit	Correct symbol
kilogramme	kg
second, millisecond	s ms
mole, millimole, micromole, nanomole, picomole	mol mmol μ mol nmol pmol
metre, centimetre, millimetre, micrometre	m cm mm μ m
Hertz	Hz

(b) Some permitted non-SI units

ångström	Å($=10^{-10}$ m= 0.1 nm)
gramme	g
minute	min
hour	h
molarity (mol/litre)	M
calorie	cal (4.184 J) (Conversion factor to be given as a footnote at first citation or in Methods)
millimetre of mercury	mmHg (1.333 mbar) (Conversion factor to be given as a footnote at first citation or in Methods)
millibar	mbar
poise	P
curie	Ci
litre	l. (where there is danger of confusion between the numeral '1' and the letter 'l', 'litre' should be written in full, and always at the end of a sentence)
millilitre, microlitre	ml μ l
degree Celsius	°C

(c) Units no longer acceptable

Inch, foot, pound, pound per square inch, °F.

Expressions such as cycles per second (c/s) will no longer be accepted. Frequencies should be expressed in the appropriate approved symbols: thus a stimulation frequency should be given in Hz (frequency of irregular or occasional events should be given per unit time, s^{-1} , h^{-1} etc.).

Instructions to Authors

1. **Manuscripts** (2 copies) should be typed in double spacing on one side of paper not larger than foolscap (33×20.5 cm). There should be a separate title page giving the names and addresses of the authors in alphabetical order.
2. A **short summary of results and conclusions** (arranged in numbered paragraphs), **tables and legends to figures** should be typed on separate sheets of paper.
3. **References** should be collected at the end of the paper. They should include the author's names, year of publication, title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.
4. **Figures** should NOT BE LARGER THAN FOOLSCAP (33×20.5 cm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided and both ordinates and abscissae should be calibrated.
5. **Lettering** on figures should be inserted in PENCIL. Symbols which are to appear in figures or legends should be chosen from the following:

× + ● ■ ○ □ △ ▲ ▽ ▼ ◐ ◑ ◒
6. **Photographs and photomicrographs** should be printed on glossy paper and should be larger than the size required for reproduction.
7. **Tables** ideally should not have more than 84 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 130 characters to a line, unless absolutely unavoidable.
8. An **abstract** of about 100 words suitable for inclusion in *International Abstracts of Biological Sciences* should be typed on a separate sheet.

General remarks. A recent issue of the journal is a good guide to style. Papers are accepted only if accompanied by a statement that they have not and will not be published in whole or in part in any other Journal.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Fifty reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs.

NATIONAL INSTITUTES OF HEALTH

Systematic Pharmacology

- 261 ABEL, R. M., REIS, R. L. and STAROSCIK, R. N. The pharmacological basis of coronary and systemic vasodilator actions of diazepam (Valium). (SP1, DM2, AP1)
- 275 KAJIMOTO, N. and TODA, N. Modification by ouabain of the electrical and mechanical effects of acetylcholine in isolated rabbit atria. (SP1, DM1)
- 287 NOTT, M. W. The possible role of adenosine in the coronary dilator action of some pyrimidopyrimidines and pteridines. (SP1, DM1, DM2)
- 296 PARRATT, J. R. and WADSWORTH, R. M. The effect of "selective" β -adrenoceptor blocking drugs on the myocardial circulation. (SP1, AP1, DM2)
- 309 PENN, R. G. The effect of age, species and adrenaline on the recovery of isolated atria from anoxia. (SP1, AP1)
- 317 FINCH, L. and LEACH, G. D. H. The contribution of the sympathetic nervous system to the development and maintenance of experimental hypertension in the rat. (SP1, AP1, AP3)
- 325 STEVENSON, I. H. and TURNBULL, M. J. The sensitivity of the brain to barbiturate during chronic administration and withdrawal of barbitone sodium in the rat. (SP2, PK2, DM2)
- 334 CREMA, A., FRIGO, G. M. and LECCHINI, S. A pharmacological analysis of the peristaltic reflex in the isolated colon of the guinea-pig or cat. (SP3)
- 346 FRIGO, G. M. and LECCHINI, S. An improved method for studying the peristaltic reflex in the isolated colon. (SP3, AP1)

Autopharmacology

- 357 FINBERG, J. P. M. and PEART, W. S. Renal tubular flow dynamics during angiotensin diuresis in the rat. (AP3, SP3, SP1)
- 373 FINBERG, J. P. M. and PEART, W. S. Function of smooth muscle of the rat renal pelvis—response of the isolated pelvis muscle to angiotensin and some other substances. (AP1, AP3, SP3)
- 382 BERNEIS, K. H., PLETSCHER, A. and PRADA, M. DA. Phase separation in solutions of noradrenaline and adenosine triphosphate: influence of bivalent cations and drugs. (AP1, PK1, DM1)
- 390 SCHÜMANN, H. J., STARKE, K. and WERNER, U. Interactions of inhibitors of noradrenaline uptake and angiotensin on the sympathetic nerves of the isolated rabbit heart. (AP1, AP2, PK3)
- 398 KOSTERLITZ, H. W., LYDON, R. J. and WATT, A. J. The effects of adrenaline, noradrenaline and isoprenaline on inhibitory α - and β -adrenoceptors in the longitudinal muscle of the guinea-pig ileum. (AP1, PK3, DM2)
- 414 DAY, M. D. and OWEN, D. A. A. The effect of reserpine on the pressor responses to angiotensin in the conscious cat. (AP1, AP2, SP1)
- 428 COLLIER, B. and KATZ, H. S. The release of acetylcholine by acetylcholine in the cat's superior cervical ganglion. (AP1, PK3)

Pharmacokinetics

- 439 ACRED, P., BROWN, D. M., CLARK, B. F. and MIZEN, LINDA. The distribution of antibacterial agents between plasma and lymph in the dog. (PK1, CT)

Drug Mechanisms

- 447 GHOURI, M. S. K. and SHIBATA, S. β -adrenoceptor stimulating properties of *para*-dimethylaminobenzaldehyde. (DM2, AP1)

Toxicology

- 455 BHARGAVA, V. K., HORTON, R. W. and MELDRUM, B. S. Long-lasting convulsant effect on the cerebral cortex of *Naja naja* venom. (TX1, AP1, SP2)

Short Communication

- 462 FIRTH, H., LEWIS, S. A., OGUNREMI, O. O. & OSWALD, I. The effect of acute administration of (*meta* trifluoromethyl-phenyl)-1-(benzoyl oxy) ethyl amino-2-propane (780 SE) and fenfluramine on human sleep. (CP, SP2)
