Editorial assistance is provided by the staff of Nature

Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Professor R. S. Stacey, St. Thomas's Hospital Medical School, London S.E.1. Authors should consult the suggestions inside the back cover.

Subscriptions. Three volumes of the journal are published annually, each volume containing four numbers. The annual subscription rate is £15 15s. in the United Kingdom and Republic of Ireland; \$48.50 U.S.A. and \$52.50 Canada (by air freight; second class postage paid at New York, N.Y.); £16 10s. all other overseas countries. Subscriptions should be sent to: Subscriptions Department, Macmillan (Journals) Ltd., Brunel Road, Basingstoke, Hampshire, England. Alternatively, the journal can be ordered through a subscription agent or bookseller.

Advertisements: Applications for advertising space and rates should be sent to: The Advertisement Department, *British Journal of Pharmacology*, T. G. Scott and Son Ltd., 1 Clement's Inn, London, WC2A 2ED, England. Tel: 01-242 6264; 01-405 4743. Grams: Textualist London W.C.2.

Concise Antibiotic Treatment

W. Howard Hughes
(MD, BS, FRCPPath)

H. C. Stewart
(MD, PhD, FRCP, FFA RCS)

This portable reference book, to be used both in an emergency by the practising doctor and for quick revision by the student, fulfils an urgent need. It gives guidance on the drug and dosage most likely to be useful in the early stages of an infection, allowing for relative toxicity and cost of treatment, until advice on the organism present and its sensitivities can be obtained. There are also tables for easy reference to preparations, doses and routes of administration.

407 13880 3 146 pages 1970 **20s** (£1.00)

SUBJECT INDEX

A

- Acetylcholine**, and angiotensin, colon responses to, atropine, hexamethonium, procaine, and lidoflazine effects on, 36
 — action on colon, 35
 — bladder responses to, hemicholinium-3 strychnine, morphine, methylpentynol, paraldehyde, tetraethylammonium and procaine, effects on, 741
 —, brain content, paraoxon and obidoxime treated rats, 732
 —, cardiovascular responses to, anaesthetized rat, 61
 —, effect on action potential duration, before and after ouabain, paired analyses, atria, 284
 —, effect on sensitivity of isolated perfused heart, 49, 54
 —, effects on isolated tissue preparations, 45
 —, effect on transmitter release by nerve stimulation, superior cervical ganglion, 432
 —, electrical and mechanical effects, modification by ouabain, isolated rabbit atria, 275
 —, homologues, effects on blood pressure and nictitating membrane responses, anaesthetized cats, 46
 —, —, pharmacology, 40
 —, innervated and denervated vasa deferentia, comparison of sensitivity to, 748-752
 —, mechanical effect, before and after ouabain, paired analyses, atria, 279
 —, or electrical stimulation, ileum responses to, adrenaline and noradrenaline inhibitory effects comparison, 406
 —, release, acetylcholine effect on, superior cervical ganglion, cat, 428
 —, —, by acetylcholine, in superior cervical ganglion, cat, 428
 —, —, by nerve stimulation or by cholinergic drugs, superior cervical ganglion, 433
 —, —, carbachol effect on, superior cervical ganglion, cat, 428
 —, —, preganglionic nerve stimulation effect on, superior cervical ganglion, 428
 —, tension-frequency relationship changes caused by, atria, 277
 —, thyroxine effect on isolated ileum sensitivity to, 49, 56
 —, thyroxine effect on uterus sensitivity to, 49, 56
 — -induced response, calcium concentration variation effects on, rat uterus and guinea-pig ileum, 63
Acetylsalicylic acid, cross tolerance to in morphine-tolerant mice, 642
 —, effect as a conditioning drug, 643
Adenosine, role in pyrimidopyrimidines and pteridines coronary dilator action, 287
Adenosine triphosphate and noradrenaline mixture aggregation, bivalent cations, amphetamine, tyramine and dopamine, and reserpine, effect on, 383
Adrenaline, and noradrenaline, inhibitory effects on ileum responses to electrical stimulation or acetylcholine, comparison, 406
 —, concentration effect on accumulation of, and its metabolite, human platelets, 765
 —, depressant effects on longitudinal muscle responses to electrical stimulation, 401
 —, effect on heart rate, before and after propranolol or atropine administration, 151

Adrenaline (contd.)

- , —, conscious, halothane-anaesthetized and ether-anaesthetized horses, before and after propranolol, 152
 —, effect on melanophore stimulating hormone and theophylline-induced skin darkening, 163
 —, effect on pelvis muscle, 373
 —, effect on recovery from anoxia, atria, 309, 314
 —, effects on sphincter of Oddi, 619
 —, hyposensitivity to, induced by morphine and related compounds, 791
 —, innervated and denervated vasa deferentia comparison of sensitivity to, 748, 750
 —, propranolol action on effect of, on recovery from anoxia, atria, 309
 —, radioactivity uptake and intracellular metabolism, amine metabolism inhibitors effect on, 772
 —, —, (\pm)-propranolol, dibenzylamine, amitriptyline, chlorpromazine and prostaglandin E_1 effect on, 769
 —, thyroxine effect on aorta sensitivity to, 49, 60
 —, thyroxine effect on sensitivity of isolated perfused heart to, 49, 54
 —, thyroxine effect on uterus sensitivity to, 49, 56
 (—)-**adrenaline**, potency causing contractions, strips of saphenous vein, 465
[3H]-adrenaline, platelet uptake, metabolism and release, 765
Adrenals, dopamine content, carbon disulphide exposure effect on, 26
Adrenergic nerves, evidence that guanethidine does not block them by acting as a false transmitter, 186P
 —, stimulation, uterine response to, guinea-pig, 187P
Adrenergic neurone blockade, effect on responses to sympathetic nerve stimulation, cat heart, 228P
Adrenoceptors, in cat choledochoduodenal junction, *in situ*, 619
 —, isoprenaline effect on, saphenous vein, human, 465
Adrenoceptor blocking agents, effect on brain glycogen content, 18
 α -**adrenoceptor blockade**, by phenoxybenzamine, effect on catecholamine depression of ileum responses to electrical stimulation, 405
 —, effect on diazepam-induced vasodilation, 261, 264
 β -**Adrenoceptor**, stimulation by *p*-dimethyl aminobenzaldehyde, 447
 —, sub-division, in circulation, observations on, 184P
 —, antagonists, prejunctional actions in vas deferens, 12
 —, —, prejunctional blockade, reversal by dexamphetamine and cocaine, vas deferens, 128
 —, —, prejunctional effects in vas deferens, resemblance to adrenergic blocking agent action, guanethidine, 128
 —, blockade by USVC 6524, 139
 —, blockade effect on catecholamine and melanophore stimulating hormone-induced skin darkening, 163
 —, blockade, effect on diazepam-induced vasodilation, 261, 263

- β -adrenoceptor** (*contd.*)
 —, blocking activity of USVC 6524 in anaesthetized dog, isolated rat uterus and isolated guinea-pig tracheal strip, 140
 —, blocking agent, MJ199, antagonism of *p*-dimethylaminobenzaldehyde action by, 447
 —, chick rectum, and Ahlquist's classification, 817
- β -adrenoceptors**, mediation of amiodarone effects on heart rate, 669
- Aerosols, pressurized**, isoprenaline fate after administration by, 194P
- Age**, effect on recovery from anoxia, isolated atria, 309, 311
- AH 3473**, effect on heart rate and electrocardiogram anaesthetized guinea-pigs, 678
- AH 3474**, and MJ 1999, comparison of activities with procaine on sciatic nerve, frog, 677
 —, protection against ouabain-induced ventricular fibrillation, urethane-anaesthetized guinea-pigs, 675
- AH 6405**, 1,4,5,6-tetrahydro-5-phenoxy-pyrimidine, a new muscarinic agent, 191P
- Ahlquist's classification**, and adrenoceptors, 817
- Alcohol**, chlordiazepoxide interaction with, 200P
 —, dehydrogenase, inhibition by aminophenoxyalkanes: possible mechanism for retinotoxicity, 206P
 —, diazepam interaction with, 200P
 —, excretion, tyramine effect on, 202P
 —, formation, phenolic, promotion by reserpine and ethanol, 200P
 —, pentobarbitone interaction with, 200P
 —, promethazine interaction with, 200P
- Aldolase**, and chlorpromazine, evidence for interaction between, 248P
- Allergy**, allergic reactions, inhibition by sympathomimetic amines and methylxanthines, 212P
- N-allylbenzomorphane**, -induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791
- Amiloride**, effect on sodium pool and kinetics of sodium transport in frog skin, 99, 101
- Amino-acid receptor**, in ileum, guinea-pig, 213P
- α -aminobutyric acid**, effect on cerebral cortex electrical responses, 711
- Aminophenoxyalkanes**, alcohol dehydrogenase inhibition by: possible mechanism for retinotoxicity, 206P
- Amiodarone**, action potential prolongation, thyroxine effect on, 657
 —, and potassium iodide supplemented by thyroxine, effect on action potentials, ventricular fibres, 662
 —, cardiac actions compared with (\pm)-propranolol, 668
 —, effect on action potential ventricular fibres, rabbit, 662
 —, effect on body growth rate, 657
 —, effect on cardiac muscle, 657
 —, effect on chronotropic responses to glucagon, anaesthetized dogs, 670
 —, effects on heart rate, and contractions stimulated by glucagon, 670
 —, —, mediated by β -adrenoceptors, 669
 —, effect on ouabain toxicity, 660
 —, effect on thyroid weight, 662
 —, effects on ventricular pressure and cardiac output, 670
 —, heart rate changes after, 659
 —, protection against ouabain-induced ventricular fibrillation, anaesthetized guinea-pigs, 657
- Amitriptyline**, effect on adrenaline radio-activity uptake and intracellular metabolism, 769
- Amphetamine**, effect on exploratory behaviour, septal rats, 210P
 —, effect on noradrenaline and adenosine triphosphate aggregation, 383
 —, mechanism of reversal of guanethidine effect, 252P
 —, release of growth hormone and corticosteroids, propranolol and thymoxamine effect on, man, 196P
- Amphetamine-like drugs**, effect on brain glycogen content, 9, 17
- (\pm)-amphetamine**, blood pressure responses to, 49
 —, thyroxine potentiation of pressor responses to, 49
- Ampicillin**, concentration in plasma and lymph, dog, 444
- Amylobarbitone**, metabolism kinetics, male and female (T), 222P
 —, —, man, 564
- Analgesic assay**, mouse phenylbenzoquinone stretching test, 627
- Analgesics**, effect on brain glycogen content, 19
- Anaphylactic contraction**, sequence of events in, ileum, 551
- Anaphylaxis**, effect on respiratory and circulatory variables, paralysed and artificially ventilated guinea-pigs with vagi intact and with vagi cut, 729
 —, vagus nerves role in, 724
- (\pm)-, (+)- and (–)-alprenolol**, effect on unanaesthetized dogs with ventricular arrhythmias resulting from coronary artery ligation, 809
- Angina**, new anti-anginal drug, amiodarone effect on heart muscle, 657
- Angiotensin**, action on human colon, 34, 35
 —, and acetylcholine, colon responses to, atropine, hexamethonium, procaine and lidoflazine effects on, 36
 —, cocaine and pronethalol, interaction on noradrenaline output during sympathetic nerve stimulation, isolated rabbit hearts, 392
 —, diuresis, renal tubular flow dynamics during, rat, 357
 —, effect on pelvis muscle, 373
 —, hyposensitivity to, induced by morphine and related compounds, 791
 —, pressor response to, anti-angiotensin action of reserpine reversal effect on, 422
 —, —, (\pm)-dopa and noradrenaline infusions after tranlycypromine effect on, 423
 —, —, (\pm)-dopa effect on, 422
 —, —, α -methyl-dopa effect on, 424
 —, —, noradrenaline effect on, 422
 —, —, reserpine effect on, 419
 —, —, syrosingopine effect on, 420
 —, —, tetrabenazine effect on, 420
 —, —, tranlycypromine effect on, 422
- Angiotensin II**, effect on tubular volume and transit time during infusion, 365
 —, renal clearance of lissamine green during infusion of, 366
- Animal metabolism study unit**, with "fail safe" air supply, 238P
- Anoxia**, effect of age, species and adrenaline on recovery from, isolated atria, 309
- Antiarrhythmic agent**, screening method for, rat, 229P
- Antibacterial agents**, distribution between plasma and lymph, dog, 439
- Anticholinergic**, and antihistaminic properties, drugs with, correlation parameters between, 220P

- Anticholinesterases**, effect on responses to electrical stimulation, portal vein, 485
- Anticonvulsant agent**, new, Kö 1173, effect on cardiac arrhythmias, and comparison with phenytoin and procainamide, 183P
- Antidepressant**, imipramine mode of action as, man (T), 221P
- Antigen**, -induced histamine release, inhibition by isoprenaline, 213P
- Antihistaminic** and anticholinergic properties, drugs with, correlation parameters between, 220P
- Antimalaria**, compounds study, *in vitro*, 237P
- , effect of sulphonamides, potentiation by folic reductase inhibitors (T), 267P
- Antiserum**, to nerve growth factor, development and potentialities (T), 258P
- Antitussive test**, guinea-pigs, 225P
- Aortic flow**, phasic, integration and differentiation of, and continuous recording of peripheral vascular resistance, 232P
- Appetite, control**, and the ventromedial nucleus of the hypothalamus (T), 255P
- Arrhythmia**, antiarrhythmic agent, screening method for, 229P
- , daunomycin-induced, surgical procedures effects on, 505
- , —, sympathetic nervous system role in, 501
- , ventricular, (+)-propranolol, (±)-, (+)-, and (—)-alprenolol effects on, 809
- Arthritis**, rheumatoid, quantitative infrared studies of inflammation in, 251P
- Ascorbic acid**, deficiency, pituitary-adrenocortical activity in, guinea-pig, 193P
- Atropine**, administration, adrenaline effect on heart rate before and after, conscious horses, 151
- , effect on diazepam-induced vasodilation, 261, 264
- , effect on paraoxon effects on brain acetylcholine, 732
- , effect on peristaltic reflex, 338
- , hexamethonium, procaine and lidoflazine, effects on responses to angiotensin and acetylcholine of colon muscle, 36
- , sulphate, antagonistic effect on activity of some drugs in PBQ analgesic assay, 643
- , —, effect on brain glycogen content, 18
- , use in protection against sarin poisoning, 822
- Auerbach's plexus**, role in Schultz-Dale response, 547
- Automation**, in the evaluation of physiological recordings (T), 256P
- Autoradiography**, whole body (T), 255P

B

- Babesia rodhaini**, drug resistance, 239P
- Bacteria**, invasion of schistosomes (T), 258P
- Barbitone sodium**, administration, central nervous system tolerance development to barbiturate during, 325
- , brain sensitivity to barbiturate during chronic administration and withdrawal of, rat, 325
- Barbiturate**, brain sensitivity to, during barbitone sodium chronic administration and withdrawal, rat, 325
- , central nervous system tolerance development to, during barbitone sodium administration, 325
- Behaviour**, baseline, maintenance; recording evoked potentials in the conscious rat, 247
- , dose-related, persistence, 208P
- , exploratory, effect of septal lesions on hyoscine stimulatory effect, 209P
- Bemegride convulsions**, effect on brain glycogen content, 16
- , effect on cerebral cortex electrical responses, 716, 719
- , effect on sodium phenobarbitone central stimulants, 702
- N- α -benzoyl-L-arginine ethyl esterase activity**, rat urine, 78
- N- α -benzoyl-L-arginine ethyl ester esterase**, activity in kidney homogenates, 81
- Benzyl alcohol**, binding to erythrocyte membranes, 217P
- Betamethasone**, treatment, circadian rhythm in plasma corticosterone concentration and pituitary adrenocorticotrophic response to stress during, rat, 192P
- Bethanidine**, effects on responses to ergotamine and noradrenaline, 225P
- Biogenic amines**, muscle sensitivity to, thyroid hormones effect on, 49
- Biological fluids**, purines, pyrimidines, and pyrazolopyrimidines, separation and identification in (T), 258P
- Biologically active chemical series**, development (T), 256P
- Bivalent cations**, effect on noradrenaline and adenosine triphosphate solutions, 383
- Bladder**, responses to indirect stimulation and acetylcholine, hemicholinium-3 effect on, 741
- Blood, circulation**, cerebral blood flow, clonidine effect on, 194P
- , observations on the sub-division of β -adrenoceptors in, dog, 184P
- , —, integration and differentiation of phasic aortic flow and continuous recording of peripheral vascular resistance, 232P
- , plasma, corticosterone concentration circadian rhythm, betamethasone-treated rat, 192P
- , platelet, adrenaline, release by thrombin, 773
- , —, reserpine effect on, 774
- , —, [3 H]-adrenaline uptake metabolism and release by, 765
- , —, normal, dopamine uptake by, 779
- , pressure, and nictitating membrane responses, acetylcholines homologues effect, 46
- , —, arterial, responses to drugs and arterial variations in, aortic intubated hypertensive rats, 227P
- , —, reserpine effect on, 417
- , —, responses to (+)-amphetamine, potentiation, 49
- , —, responses to angiotensin, noradrenaline, tyramine, and McN-A-343, (±)-dopa effect on, 422
- , —, —, infusions of (±)-dopa and noradrenaline after tranlylcypromine effect on, 423
- , —, —, α -methyldopa effect on, 424
- , —, —, noradrenaline effect on, 422
- , —, —, reserpine effect on, 419
- , —, —, reversal of anti-angiotensin action of reserpine, 422
- , —, —, syrosingopine effect on, 420
- , —, —, tetrabenazine effect on, 420
- , —, —, tranlylcypromine effect on, 422
- , red blood cells, membranes, benzyl alcohol binding to, 217P
- , serum, cellulose sulphate effect on, 831
- , vessels, arterial pressure, effect of dimethothiazine on, 529
- , —, portal vein relaxation, induced by nicotine and electrical stimulation, 476
- , —, arterial pressure, prostaglandin F_{2 α} effect on, 513

Blood, vessels (contd.)

—, —, saphenous vein, adrenoceptors isoprenaline effect on, 465

Brain, cerebral blood flow, clonidine effect on, 194P

—, cerebral cortex, depressant drugs effects on, 707

—, —, *Naja naja* venom long-lasting convulsant effect on, 455

—, —, electrical responses, γ -aminobutyric acid effect on, 711

—, —, —, bemegride, picrotoxin, nikethamide, caffeine, strychnine and glutamate effects on, 716

—, —, —, γ -butyrolactone effect on, 711

—, —, —, chlorpromazine effect on, 711

—, —, —, diphenhydramine effect on, 711

—, —, —, γ -hydroxybutyrate, effect on, 711

—, —, —, hyoscine effect on, 711

—, —, —, meprobamate effect on, 711

—, —, —, pethidine effect on, 711

—, —, —, promethazine effect on, 711

—, cerebral evoked potential, nitrous oxide effect on reaction times and, 254P

—, 5-hydroxyindol-3-ylacetic acid release in, factors affecting, 1

—, 5-hydroxytryptamine content, and 5-hydroxyindoleacetic acid, rapid method for the determination of, 653

—, hypersensitivity to pentobarbitone, 325

—, hypothalamus ventromedial nucleus, and appetite control, rat (T), 255P

—, mid-brain raphe electrical stimulation effect on the 5-hydroxyindol-3-ylacetic acid content of forebrain, 1, 3

—, —, electrical stimulation effect on the 5-hydroxytryptamine content of forebrain, 1

—, optic nerve atrophy after drug treatment (T), 256P

—, sensitivity to barbiturate, during barbitone sodium chronic administration and withdrawal, rat, 325

—, septal lesions, effect on hyoscine stimulatory action on exploratory behaviour, 209P

Bronchoconstrictions, histamine-induced, role of vagus nerves in, 724

Butoxamine, action on isoprenaline cardiovascular effects, 305

—, effect on cardiovascular system, 296

—, effects on general and myocardial haemodynamics, 304

—, isoprenaline effects on general and myocardial haemodynamics before and after, 306

γ -**Butyrolactone**, effect on cerebral cortex electrical responses, 711

—, effect on sodium phenobarbitone ED50, 699

B.W. 501C67, 5-hydroxytryptamine, antagonism by, 233P

—, 5-hydroxytryptamine embryocidal effect antagonism, 224P

C

Caffeine, effect on cerebral cortex electrical responses, 716, 720

—, effect on sodium phenobarbitone ED50, 702

Calcium, and/or phosphorus deficient diets, effect on callus formation and growth rate, young rats, 188P

—, concentration, variation effects on acetylcholine-induced response of rat uterus and guinea-pig ileum, 63

Callus formation, calcium and/or phosphorus deficient diets effect on. young rats, 188P

Caramiphen, (and one of its analogues), use in protection against sarin poisoning, 522

Carbachol, effect on acetylcholine release, superior cervical ganglion, 428

Carbenicillin, concentration in plasma and lymph, dog, 444

Carbon disulphide, effect on brain tyrosine content, 26, 29

—, exposure, effect on adrenal dopamine content, 26

—, —, effect on brain catecholamines, 26

—, —, effect on brain dopamine content, action of reserpine pretreatment on, 26, 28

—, —, effect on brain monoamine oxidase, 26, 29

—, —, effect on brain noradrenaline content, 26, 28

Carbon tetrachloride, metabolism, sheep and *Fasciola hepatica*, 598

Carcinoma pain, trial of etorphine hydrochloride in, 252P

Cardiovascular responses, potentiation to noradrenaline by desmethylinipramine, 185P

Cardiovascular system, butoxamine effect on, 296, 304

—, isoprenaline effects, butoxamine action on, 305

—, isoprenaline effects on, 296

—, mean responses to noradrenaline and acetylcholine, anaesthetized rat, 61

Catecholamines, and brain glycogen metabolism, relation between, 9

Catecholamine, brain, carbon disulphide exposure effect, 26

—, concentration, effect on foetus atria recovery from anoxia, 309

—, depression of ileum responses to electrical stimulation, α -adrenoceptor blockade by phenoxybenzamine effect on, 405

—, —, phenoxybenzamine and propranolol combined effects on, 405

—, —, propranolol effect on, 404

—, distribution in nervous system, Octopoda mollusc, 240P

—, store depletion, effect on diazepam-induced vasodilation, 261, 263

Catecholamine-induced skin darkening, β -adrenoceptor blockade effect on, 163

Cations, bivalent, effect on noradrenaline and adenosine triphosphate aggregation, 383

Cellulose sulphate, effect on serum complement, 837

Central nervous system, classification of drugs acting on, based on their effect on cortical neurones, 722

—, mediation of prostaglandins cardiovascular effects, 511

—, tolerance development to barbiturate, during barbitone sodium administration, 325

Central stimulators, effects on brain glycogen content, 16

Centrally acting drugs, videotape recording of some methods used to evaluate (T), 258P

Chemotherapy, of helminthiasis, (T), 258P

—, *Trypanosoma cruzi*, drug effects against the crithidial stage (T), 257P

Chloramphenicol, concentration in plasma and lymph, dog, 444

Chlordiazepoxide, alcohol interaction with, 200P

Chlordiazepoxide-dexamphetamine mixture, persistence of dose-related behaviour after, 208P

Chlordiazepoxide hydrochloride, effect on brain glycogen content, 18

- Chlorothiazide**, tubular volume and transit changes produced by, during diuresis, 362
- Chlorpromazine**, and aldolase, evidence for interaction between, 248P
- , effect on adrenaline radioactivity uptake and intracellular metabolism, 769
- , effect on brain glycogen content, 18
- , effect on cerebral cortex electrical responses, 711
- , effect on sodium phenobarbitone ED50, 699
- Cholinergic agonists**, conformation, 219P
- Cholinergic and anticholinergic drugs**, effect on brain glycogen content, 18
- Cholinergic dilator nerves**, supplying uterine artery, circulating oestrogen effect on, 190P
- Cholinergic molecules**, crystallographic methods for conformation determination (T), 259P
- Cholinergic receptors**, a smooth muscle nerve preparation, expansor secundariorum, 245P
- Cholinesterases**, *Schistosoma mansoni* (T), 256P
- Ciba 39089-Ba**, prejunctional blocking effect, vas deferens, 128
- Circadian rhythm**, brain glycogen content, 9, 15
- , in plasma corticosterone concentration and pituitary adrenocorticotrophic response to stress, betamethasone-treated rats, 192P
- Classification**, centrally acting drugs, based on their action in intact mice, 702
- Clonidine**, effect on cerebral blood flow, 194P
- , effect on chronic administration on vascular smooth muscle (T), 221P
- Cloxacillin**, concentration in plasma and lymph, dog, 444
- Cobra venom**, long-lasting convulsant effect on cerebral cortex, 455
- Cocaine**, angiotensin and pronethalol, interaction on noradrenaline output during sympathetic nerve stimulation, isolated rabbit hearts, 392
- , dissociation of potentiation of isoprenaline by, from inhibition of uptake in cat spleen, 175
- , effects on nicotine action on portal vein, 480
- , effects on response to electrical stimulation, portal vein, 484
- , isoprenaline and noradrenaline potentiation by, 178
- , reversal of prejunctional blockade by β -adrenoceptor antagonists, vas deferens, 128
- Colon**, acetylcholine action on, 35
- , angiotensin action, on, 34, 35
- , peristaltic reflex, improved method for studying, 346
- Complement, serum**, cellulose sulphate effect on, 831
- Computing methods**, application to physico-chemical activity relationships (T), 257P
- Conditioning**, shock avoidance, to investigate drugs potentiating dexamphetamine, 256P
- Convulsion**, long-lasting, induced by *Naja naja* venom, on cerebral cortex, 455
- Corticosteroids**, and growth hormone, amphetamine release of, propranolol and thymoxamine effect on, man, 196P
- Corticosterone-induced hypertension**, 6-hydroxydopamine and immunosympathectomy effects on, 320
- , plasma concentration circadian rhythm, beta-methazine-treated rat, 192P
- Crithidial stage**, drug effects against, *Trypanosoma cruzi* chemotherapy (T), 257P
- Croton oil injury**, hind limb lymph composition, changes after, 798
- Crystallographic methods**, for cholinergic molecules conformation determination (T), 259P
- Cyclazocine**, naloxone antagonism of, 627
- Cyclizine**, alcohol interaction with, 200P
- , promethazine interaction with, 200P
- Cyproheptadine**, effect on food consumption, fasted rat, 229P
- D
- Daunomycin**, effect on daunomycin-induced arrhythmias, 505
- , -induced arrhythmias, pharmacological pre-treatment effect on, 505
- , —, sympathetic nervous system role in, 501
- , —, surgical procedures, effects on, 505
- Decamethonium**, saturation effects on skeletal muscle uptake of, 219P
- Depressant drugs**, effects on electrical responses, cerebral cortex, 707
- Desipramine**, protriptyline and pronethalol interaction on noradrenaline output during sympathetic nerve stimulation, isolated rabbit heart, 395
- Desmethylinipramine**, cardiovascular responses, potentiation to noradrenaline by, 185P
- Dexamphetamine**, initial response of locomotor stimulant response to rats exposed to a novel environment, 230P
- , reversal of prejunctional blockade by β -adrenoceptor antagonists, vas deferens, 128
- , chlordiazepoxide mixture, persistence of dose related behaviour after, 208P
- , -potentiating drugs, shock avoidance conditioning use in the investigation of, 256P
- Dextromoradmine**, -induced hyposensitivity to adrenaline noradrenaline and angiotensin, 791
- Dextrose**, tubular volume and transit time changes produced by, during diuresis, 362
- Diazepam**, alcohol interaction with, 200P
- , coronary and systemic vasodilator actions, pharmacological basis of, 261
- , effect on sodium phenobarbitone ED50, 699
- , -induced vasodilation, β -adrenoceptor blockade effect on, 261, 263
- , —, α -adrenoceptor blockade effect on, 261, 264
- , —, atropine effect on, 261, 264
- , —, catecholamine store depletion effect on, 261, 264
- , —, ganglionic blockade effect on, 261, 264
- , —, vagotomy effect on, 261, 264
- Dibenzylamine**, effect on adrenaline radioactivity uptake and intracellular metabolism, 769
- Dibutyl cyclic 3',5'-AMP**, skin darkening by, 163
- Diethylstilboestrol**, behaviour in simulated intestinal content, 189P
- Diets**, calcium and/or phosphorus deficient, effect on callus formation and growth rate, young rats, 188P
- Digoxin**, phrenic nerve diaphragm response to, 233P
- Dimethylsulphoxide injury**, hind limb lymph composition changes after, 798
- Dimethothiazine**, effect in arterial pressure, 529
- , effects on muscle spindle activity, decerebrate cat, 520
- , effects in spindle discharge, 523
- , reduction of decerebrate rigidity, and effect on spindle discharge, 529
- Dimethylaminoalkaloids**, pharmacology, 43
- p-Dimethylaminobenzaldehyde**, β -adrenoceptor stimulation by, 447

- p-dimethylaminobenzaldehyde** (*contd.*)
 —, antagonism β -adrenoceptor blocking agent MJ199, 447
 —, —, and MJ199 dose-response relationship study, 447
1-(2',6'-dimethyl-phenoxy)-2-aminopropane. See Kö 1173
Diphenhydramine, effect on sodium phenobarbitone ED50, 699
 —, effect on cerebral cortex electrical responses, 711
Diphenhydramine hydrochloride, effect on brain glycogen content, 18
Dipyridamole, effect on portal vein relaxation, 486
Disulphide bond, absence in an oxytocin analogue and thioglycerol, lack of antagonism between, 689
Diuresis, angiotensin, renal tubular flow dynamics during, rat, 357
 —, tubular volume and transit time changes produced by noradrenaline, dextrose and chlorothiazide, during, 362
L-dopa, effect on sympathetic nerve endings, man, 195P
 —, Parkinsonism treatment, interactions with other diseases and other drugs (T), 221P
(±)-dopa, effect on pressor responses to angiotensin, noradrenaline, tyramine, and McN-A-343, 422
Dopamine, accumulation by blood platelets from normal subjects and parkinsonian patients under treatment with L-dopa, 779
 —, adrenal content, carbon disulphide exposure effect, 26
 —, brain content, carbon disulphide exposure effect, action of reserpine pretreatment, 26, 28
 —, effect on noradrenaline and adenosine triphosphate aggregation, 383
 —, effect on sympathetic nerve endings, man, 195P
 —, innervated and denervated vasa deferentia comparison of sensitivity to, 748, 751
 —, nervous tissue concentration of, *Eledone cirrhosa*, 241P
 —, uptake by blood platelets from normal subjects and parkinsonian patients under treatment with L-dopa, 779
Drug analysis, isotope dilution in, 250P
Drug, effects on brain glycogen, 9, 16
 —, effects on vesicle population, ganglionic synapses, rat, 244P
 —, receptor, inactivation, a new kinetic model, 215P
 —, resistant, *Babesia rodhaini*, 239P
 —, treatment. Optic nerve atrophy after (T), 256P
 —, potentiating, dexamphetamine, shock avoidance conditioning use in the investigation of, 256P
 —, quantitative treatment of distribution after intravenous injection, 234P
Drug-induced, inhibition of tumour cell dissemination, 205P
Drugs, classification of those acting on central nervous system, based on their effect on cortical neurones, 722
 —, with anti-histaminic and anticholinergic properties, correlation parameters between, 220P

E

- Electrical stimulation**, induction of portal vein relaxation by, 476

- Eledone cirrhosa**, nervous tissue concentration of dopamine and noradrenaline, 241P
Embryocide, 5-hydroxytryptamine, antagonism by B.W. 501C67, B.W. 204C67 and xylamide, 224P
Endotoxin treatment, effect on atrial muscle response to noradrenaline and tyramine, guinea-pig, 690
Environmental, effects, initial suppression of locomotor stimulant response, to dexamphetamine in ratio exposed to a novel environment, 230P
Enzyme activity, relationships between amount in urine and kidney, 83
 —, levels, hind limb lymph after chemical injury, 801
Ephedrine, effect on noradrenaline release, intact spleen, cat, 533
Ergotamine, abolition of excitatory effects of nicotine, noradrenaline and transmural stimulation, portal vein, 481
 —, bethanidine effect on responses to, 225P
Erythrocyte, membranes, benzyl alcohol binding to, 217P
Eserine, effect on portal vein relaxation, 485
Ethanol, phenolic alcohol formation promotion by, 200P
Ether-anaesthesia, adrenaline, noradrenaline and isoprenaline influence on heart rate in, before and after propranolol administration, horse, 152
Ethylmorphine, -induced hyposensitivity to adrenaline, noradrenaline, and angiotensin, 791
Etonitazene, -induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791
Etorphine hydrochloride, trial in carcinoma pain, 252P
Evoked potentials, recording maintenance of a constant behavioural baseline, 247
Exercise-induced tachycardia, practolol graded dosage effect on, 193P
Expansor secundariorum: a smooth muscle-nerve preparation without cholinergic receptors, 245P
Eye, optic nerve atrophy after drug treatment (T), 256P

F

- Fasting**, cyproheptadine effect on food consumption, fasted rat, 229P
Fenfluramine, acute administration, effect on sleep, 462
 —, contractions, attempted blockage of, saphenous vein, 465
Foetus, atria, anoxia, endogenous catecholamine concentration effect on recovery from, 309
Folic reductase inhibitors, potentiation of sulphonamides antimalarial effect by (T), 267P
Food consumption, cyproheptadine effect on, fasted rat, 229P

G

- Gadgets**, pharmacological (T), 255P
Ganglion, blocking agents, effect on responses to electrical stimulation portal vein, 485
Ganglionic, blockade, effect on diazepam-induced vasodilation, 261, 264
 —, synapses, vesicle population, drug effects on, rat, 244P
Gas-liquid radiochromatography-mass spectrometry, use in biochemical pharmacology, 236P
GD 131, effect on noradrenaline output, spleen, 537
Glucagon, heart rate and contractions stimulated by, amiodarone effect on, 670
D-glucose-induced hyperglycaemia, effect on brain glycogen content, 9, 13

Glutamate, effect on cerebral cortex electrical responses, 716, 721

Glycogen, brain content, adrenoceptor blocking agents, 18

—, —, amphetamine-like drugs effect on, 9, 17

—, —, analgesics effect on, 19

—, —, atropine sulphate effect, 18

—, —, bemegride convulsions, effect on, 16

—, —, central stimulators, effect on, 16

—, —, chlordiazepoxide hydrochloride, effect on, 18

—, —, chlorpromazine hydrochloride effect, 18

—, —, cholinergic and anticholinergic drugs, effect on, 18

—, —, circadian rhythm, 9, 15

—, —, diphenhydramine hydrochloride effect, 18

—, —, drug effects on, 9, 16

—, —, D-glucose-induced hyperglycaemia effect on, 9, 13

—, —, haloperidol effect on, 18

—, —, imipramine hydrochloride effect on, 18

—, —, killing method effect on, 9, 12

—, —, meprobamate effect on, 18

—, —, mepyrmine maleate effect, 18

—, —, mescaline hydrochloride, effect on, 18

—, —, monoamine oxidase inhibitors effect on, 17

—, —, morphine hydrochloride effect, 18

—, —, neuroleptic drugs effect on, 18

—, —, pentazocine effect, 18

—, —, pethidine hydrochloride effect, 18

—, —, phenobarbitone sodium effect, 18

—, —, phenoxybenzamine hydrochloride, effect, 18

—, —, phentolamine mesylate effect, 18

—, —, phenylbutazone sodium effect on, 18

—, —, phenytoin sodium effect, 18

—, —, physiological and drug-induced changes in, 9

—, —, physostigmine sulphate effect on, 18

—, —, propranolol hydrochloride effect, 18

—, —, pyrogallol effect on, 18

—, —, reserpine effect on, 18

—, —, temperature effects on, 9, 14

—, —, tremorine hydrochloride effect on, 18

—, brain metabolism, and catecholamines relation between, 9

Glycolic acid esters, use in protection against sarin poisoning, 822

Growth, hormone and corticosteroids, amphetamine release of, propranolol and thymoxamine effect on, man, 196P

—, rate, calcium and/or phosphorus deficient diets, effect on, young rats, 188P

—, —, body amiodarone effect on, 657

Guanethidine, effect on daunomycin-induced arrhythmias, 505

—, effect on oxotremorine-induced hypertension, 496

—, effect on responses to electrical stimulation, portal vein, 484

—, evidence that it does not block adrenergic nerves by acting as a false transmitter, 186P

—, hypotensive action, mechanism of antagonism by propranolol (T), 221P

—, mechanism of amphetamine reversal of, 253P

—, resemblance to β -adrenoceptor antagonists prejunctional effect in vas deferens, 128

H

β -haloalkylamines, effect on noradrenaline release, intact spleen, cat, 533

Haloperidol, effect on brain glycogen content, 18

Halothane anaesthesia, adrenaline effect on heart rate in, horse, 151

—, adrenaline, noradrenaline and isoprenaline influence on heart rate in, before and after propranolol administration, horse, 152

—, isoprenaline effect on heart rate in, horse, 151

—, noradrenaline effect on heart rate in, horse, 151

Heart, adrenergic neurone blockade effect on response to sympathetic nerve stimulation, cat, 228P

—, β -adrenoceptor blocking drugs, effect on myocardial circulation, 296

—, angiotensin, cocaine and pronethalol interaction on noradrenaline output from, during sympathetic nerve stimulation, 392

—, cardiac arrhythmias, effect of new anticonvulsant agent, K \ddot{o} 1173, on, and its comparison with phenytoin and procainamide, 183P

—, atria, anoxia, effect on age, species and adrenaline on recovery from, 309

—, —, modification by ouabain of electrical and mechanical effects of acetylcholine in, 275

—, —, tension-frequency relationship changes caused by, 277

—, cardiac actions of amiodarone, comparison with (\pm)-propranolol, 668

—, cardiac depressant effects of USVC 6524, 139

—, cardiac nerve stimulation, noradrenaline output during, 391

—, cardiovascular effects of prostaglandins, mediated by the central nervous system, dog, 511

—, coronary artery ligation, effects of (\pm)-propranolol, (\pm), (+)- and (–)-alprenolol on, 809

—, coronary dilator action, of some pyrimido-pyrimidines and pteridines, adenosine possible role in, 287

—, coronary dilator activity of dipyrimadole compounds, due to endogenous adenosine potentiation, 287

—, ouabain induced ventricular fibrillation, amiodarone protection against, anaesthetized guinea-pigs, 657

—, rate, β -adrenoceptors mediation of amiodarone effect on, 669

—, —, amiodarone effects on, 659

—, —, and contractions, glucagon-stimulated, amiodarone effect on, 670

—, —, MJ 1999 effect on, anaesthetized guinea-pigs, 678

—, —, halothane effect on, horse, 149

—, —, and rhythm, halothane and catecholamines influence, 151

—, —, reserpine effect on, 417

—, —, transmitters, inexpensive, in groups of unrestrained rats (T), 258P

—, sympathetic nerves, noradrenaline uptake inhibitors and angiotensin interaction on, 390

—, ventricular fibres, action potential, amiodarone effect on, 662

—, —, effect of potassium iodide and amiodarone supplemented by thyroxine on, 662

Helminthiases, chemotherapy of (T), 258P

Hemicholinium-3, influences on bladder responses to indirect electrical stimulation and to acetylcholine, 741

- Hexamethonium**, effect on daunomycin-induced arrhythmias, 505
 —, effect on peristaltic reflex, 336
 —, procaine, lidoflazine and atropine, effects on responses to angiotensin and acetylcholine of colon muscle, 36
- Histamine**, acid phosphate, respiratory and cardiovascular responses to, vagotomy effect on, 727, 729
 —, effects in malaria, 755
 —, effect on untreated, reserpine-treated and decentralized vas deferens, 110
 —, -induced bronchoconstrictions, vagus nerves role in, 724
 —, isoprenaline inhibition of antigen-induced release of, 213P
 —, release, morphological and electrical changes accompanying, methods for measuring, isolated cells (T), 259P
 —, thyroxine effect on, aorta sensitivity to, 49, 60
 —, —, isolated ileum sensitivity to, 49, 36
 —, —, sensitivity of isolated perfused heart to, 49, 54
 —, —, uterus sensitivity to, 49, 56
- γ-Hydroxybutyrate**, effect on cerebral cortex electrical responses, 711
 —, effect on sodium phenobarbitone ED50, 699
- 6-Hydroxydopamine**, and immunosympathectomy, effect on corticosterone-induced hypertension, 320
 —, —, experimental renal hypertension, development of, 318
 —, effects on resting systolic blood pressures of chronic hypertensive and normotensive rats, comparison, 320
- 5-Hydroxyindoleacetic acid**, brain content, rapid method for determination of, 653
- 5-Hydroxyindol-3-ylacetic acid**, release in forebrain, effect of electrical stimulation of mid-brain raphe on, 1
 —, —, effect of stimulation of peripheral sensory nerves on, 1, 3
 —, —, factors affecting, 1
 —, —, probenecid effect on, 1, 4
- 3-Hydroxymorphinan**, -induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791
- 8-Hydroxyquinoline**, effect on adrenaline radioactivity uptake and intracellular metabolism, 772
- 5-Hydroxytryptamine**, antagonism by B.W. 501C67, 223P
 —, antagonism by methergolin, 223P
 —, antagonism by xylamidine, 223P
 —, brain content, rapid method for determination of, 653
 —, contractions, blockage by phentolamine and thymoxamine, saphenous vein, 465
 —, evaluation of peripheral and central antagonistic activities against, by some new agents, 223P
 —, oxidation, preferentially affected by monoamine oxidase inhibitor, relationship between the pharmacological and biochemical properties, 207P
 —, thyroxine effect on isolated ileum sensitivity to, 49, 56
 —, thyroxine effect on aorta sensitivity to, 49, 60
 —, thyroxine effect on uterus sensitivity to, 49, 56
- Hyoscine**, convulsant doses interaction with phenobarbitone, 699
- Hyoscine (contd.)**
 —, effect on cerebral cortex electrical responses, 711
 —, effect on exploratory behaviour, septal rats, 210P
 —, effect on responses to electrical stimulation, portal vein, 485
 —, effect on sodium phenobarbitone ED50, 699
 —, stimulatory effect on exploratory behaviour, septal lesions action on, 209P
 —, use in protection against sarin poisoning, 822
- Hyperbilirubinaemia**, unconjugated, pathogenesis, barbiturate use in investigation of, 203P
- Hyperglycaemia**, D-glucose-induced, effect on brain glycogen content, 9, 13
- Hypertension**, corticosterone-induced, 6-hydroxydopamine and immunosympathectomy effect on, 320
 —, experimental, sympathetic nervous system contribution to the development and maintenance of, 17
 —, oxotremorine-induced, anaesthetized rat, 490
 —, responses to drugs and diurnal variations in arterial blood pressure in, 227P
- Hyposensitivity**, to drugs, induced by morphine and some related substances in cat, 789
- Hypotensive action**, of guanethidine, mechanism of antagonism by propranolol (T), 221P
- Hypothalamus**, ventromedial nucleus, and appetite control in the rat (T), 255P

I

- Ileum**, amino-acid receptor in, guinea-pig, 213P
 —, responses to electrical stimulation, catecholamine depression of, phenoxybenzamine α -adrenoceptor blockade effect on, 405
 —, —, —, propranolol effect on, 404
 —, —, phenoxybenzamine, and propranolol combined effect on, 405
 —, —, or acetylcholine, comparison of noradrenaline and adrenaline inhibitory effects on, 406
- Inflammation**, relationship between the anti-inflammatory and irritant properties of inflammatory exudate, 211P
- Inflammatory exudate**, irritant and anti-inflammatory properties, relationship between, 211P
- Imipramine**, antidepressant action mode, man (T), 221P
 —, hydrochloride, effect on brain glycogen content, 18
- Immunosympathectomy**, and 6-hydroxydopamine, effect on corticosterone-induced hypertension, 320
 —, —, effect on experimental renal hypertension development, 318
- Inflammation**, in rheumatoid arthritis, quantitative infrared studies of, 251P
- Injection gun**, simple and accurate for repetitive dosing (T), 255P
- INPEA**, effects on electrical stimulation action on portal vein, 481
- Intestine**, simulated intestinal content, behaviour of diethylstilboestrol in, 189P
- Ions**, active on frog rectus and guinea-pig ileum, estimates of size in solution (T), 222P
- Ion distribution**, vas deferens, reserpine-treatment and decentralization effect on, guinea-pig, 121
- Isoprenaline**, and noradrenaline, inactivation, dog, 573
 —, antagonism by propranolol and phentolamine, 818

Isoprenaline (*contd.*)

- , cardiovascular effects, butoxamine action on, 305
- , —, practolol action on, 296, 299
- , —, USVC 6524 effect on, 140
- , contractions, competitive α -adrenoceptor blocking drugs effect on saphenous vein, 465
- , depressant effects on longitudinal muscle responses to electrical stimulation, 401
- , effect on adrenoceptors, human saphenous vein, 465
- , effect on cardiovascular system, 296
- , effect on general and myocardial haemodynamics, before and after butoxamine, 306
- , effect on heart rate, conscious, halothane-anaesthetized and ether-anaesthetized horses, before and after propranolol, 152
- , effect on myocardial haemodynamics, before and after practolol, 300
- , effect on sensitivity of isolated perfused heart to, 49, 54
- , effects on sphincter of Oddi, 619
- , fate after administration by pressurized aerosols, 194P
- , -induced tachycardia, practolol graded doses effect on, 193P
- , -induced vasopression, practolol effect on, 296
- , infusions, appearance of uncharacterized substance after, 581
- , inhibition of antigen-induced histamine release, 213P
- , potentiation by cocaine, 178
- , potentiation dissociation by cocaine, from inhibition of uptake in cat spleen, 175
- , removal by different vascular beds, phenoxybenzamine effect on, 577
- , removal from circulation by different vascular beds, 577
- , thyroxine effect on uterus sensitivity to, 49, 56
- , uptake by cat spleen, 178
- (\pm)-isoprenaline, potency causing saphenous vein strip contraction, 465
- 1-Isopropylamino-3-(4-indanoxy)-2-propanol HCl**, See USVC 6524, 139
- Isotope**, dilution, in drug analysis, 250P

K

- Kidney**, and urinary kininogenase, relationship between, 73
- , and urine, enzyme activity amounts relationship between, 83
- , homogenates, *N*- α -benzoyl-L-arginine ethyl ester esterase activity in, 81
- , —, kininogenase activity in, 80
- , localization in rat, of kininogenase in, 87
- , renal hypertension development, experimental, 6-hydroxydopamine and immunosympathectomy effect on, 319
- Killing method**, effect on brain glycogen content, 9, 12
- Kininogenase**, activity kidney homogenates, 80
- , activity of rat urine, 77
- , localization in rat kidney, 87
- , urinary, and kidney, relationship between, 73
- Kö 1173**, new anticonvulsant agent, effect on cardiac arrhythmias, and comparison with phenytoin and procainamide, 183P
- Kynuramine**, as a substrate for monoamine oxidase inhibitor, 27, 29

L

- Lacrimal gland**, parasympathetic innervation, cat, 242P
- Learning**, avoidance, effects on (-)-nicotine on, 650
- Levallorphan**, induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791
- Levorphanol tartrate**, analgesic effects, naloxone antagonism of, 627
- Lidoflazine**, atropine, hexamethonium and procaine, effects on responses to angiotensin and acetylcholine, of colon muscle, 36
- Lymph**, croton oil injury effects on composition, hind limb, 798
- , dimethylsulphoxide injury effects on composition, hind limb, 798
- Lipid-soluble drugs**, diethyl stilboestrol, behaviour in simulated intestinal content, 189P
- Liver fluke**, carbon tetrachloride metabolism in, 598
- Locke solution**, normal and altered, papaverine in, effects on taenia coli, 610
- Locomotor**, activity, measuring devices, anaesthetized or unanaesthetized animals, 243P
- , stimulant response, initial response to dexamphetamine, rats exposed to a novel environment, 230P
- Lysergic acid diethylamide**, effect on 5-hydroxyindol-3-ylacetic acid release in the forebrain, 1

M

- Malaria**, antimalaria compounds study *in vitro*, 237P
- , histamine effects in, 755
- Mannitol**, tubular volume and transit time changes produced by, rat with low initial urine flow, 362
- Marsilid**, effect on adrenaline radioactivity uptake and intracellular metabolism, 772
- Mast cell**, distribution in guinea-pig ileum, and the Schultz-Dale reaction of the longitudinal muscle strip (T), 259P
- , role in Schultz-Dale response, 548
- McN-A-343**, pressor response to, antihypertensive action of reserpine effect on, 422
- , —, (\pm)-dopa effect on, 422
- , —, (\pm)-dopa and noradrenaline infusions after tranlylcypromine effect on, 423
- , —, α -methyldopa effect on, 423
- , —, noradrenaline effect on, 422
- , —, reserpine effect on, 419
- , —, syringopine effect on, 420
- , —, tetrabenazine effect on, 420
- , —, tranlylcypromine effect on, 422
- Mebanazine**, effect on adrenaline radioactivity uptake and intracellular metabolism, 772
- Mecamylamine**, effect on daunomycin-induced arrhythmia, 505
- Melanophore**, responses, control, *Anolis carolinensis*, 160
- Melanophore**, stimulating hormone, skin darkening by, 163
- , —, —, adrenaline effect on, 163
- , —, -induced skin darkening, β -adrenoceptor blockade effect on, 163
- Membrane potential**, parenchymal cells, noradrenaline effect on, guinea-pig liver *in vitro* (T), 259P
- Meprobamate**, effect on brain glycogen content, 18
- , effect on cerebral cortex electrical responses, 711

Meprobamate (*contd.*)

—, effect on sodium phenobarbitone ED50, 699

Mepyramine maleate, effect on brain glycogen content, 18

Mescaline hydrochloride, effect on brain glycogen content, 18

Metabolism, studies, meter for measuring activity of small animals in (T), 255P

Metaraminol, α -methyl-*m*-tyrosine conversion to noradrenaline synthesis rate effect on, 167

Meter, for measuring activity of small animals in metabolic studies (T), 255P

Methadone, hydrochloride, analgesic effects, naloxone antagonism of, 627

—, -induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791

Methergoline, 5-hydroxytryptamine antagonism by, 223P

Methiodides, pharmacology, 43

Methisazone, laboratory and clinical experience with, (T), 257P

α -methyl-dopa, effect on oxotremorine-induced hypertension, 496

Methylfurmethide, effect on untreated, reserpine-treated and decentralized vas deferens, 110

α -methyl-*m*-tyrosine, conversion to metaraminol, noradrenaline synthesis rate effect on, 167

α -methylparatyrosine, effect on oxotremorine-induced hypertension, 496

Methylpentynol, effect on bladder responses to indirect electrical stimulation and to acetylcholine, 743

N-methyl pyridinium-2-aldoxime methanesulphonate (P2S), use in conjunction with anticholinergic drugs in sarin poisoning, 822

Methylsergide, antagonism by methysergide, 223P

Methylxanthine, allergic reaction inhibition by, 212P

—, skin darkening by, 163

Methysergide, 5-hydroxytryptamine antagonism by, 223P

Microsomes, liver, spectrophotometer measurement of drug binding to (T), 257P

MJ 1999, antagonism of *p*-dimethylaminobenzaldehyde by, 447

—, effects on heart rate and electrocardiogram, anaesthetized guinea-pigs, 678

MJ 1999 and **AH 3474** comparison of activities with procaine on sciatic nerve, frog, 677

—, and *p*-dimethylaminobenzaldehyde, dose-response relationship study, 447

—, effect on intracellular potentials, and contractions, papillary muscles, cat, 682, 3

—, prejunctional blocking effect, vas deferens, 128

—, protection against ouabain-induced ventricular fibrillation, urethane-anaesthetized guinea-pigs, 675

Model, new, kinetic, of drug receptor inactivation, 215P

Mollusc, catecholamine distribution in the nervous system, 240P

Monoamine oxidase, brain content, carbon disulphide exposure effect on, 26, 29

—, inhibitors, effect on brain glycogen content, 17

—, —, preferentially affecting 5-hydroxytryptamine oxidation, relationship between pharmacological and biochemical properties, 207P

Morphine, effect on bladder responses to indirect electrical stimulation and to acetylcholine, 743
—, effect on portal vein relaxation, 486

Morphine (*contd.*)

—, hydrochloride, effect on brain glycogen content, 18

—, -induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 789

—, sulphate, analgesic effects, naloxone antagonism of, 627

—, -tolerant mice, cross-tolerance to acetylsalicylic acid and physostigmine sulphate in, 642

—, —, cross-tolerance to other narcotic and narcotic antagonist analgesics in, 642

Motor activity, effects of drugs acting alone and in combination, intact mice, 696

Muscarinic agent, new, 1,4,5,6-tetrahydro-5-phenoxypyrimidine (AH6405), 191P

—, agonists, conformation, 219P

—, receptors, interaction of agonists and fast and slow acting antagonists with muscarinic receptors in guinea-pig ileum (T), 222P

Muscle, atrial, noradrenaline and tyramine effect on, endotoxin-treated guinea-pigs, 690

—, cardiac and smooth, sensitivity to biogenic amines, thyroid hormones effect on, 49

—, circular and longitudinal, colon, effects of atropine, hexamethonium procaine and lidoflazine on the responses to acetylcholine and angiotensin of, 36

—, expander secundariorum, a smooth muscle-nerve preparation, without cholinergic receptors, 245P

—, longitudinal, adrenaline, noradrenaline, and isoprenaline, depressant effects on responses to electrical stimulation, 401

—, —, adrenaline noradrenaline and isoprenaline depressant effects on responses to electrical stimulation, 401

—, —, muscle strip preparation, guinea-pig ileum, 542

—, —, Schultz-Dale reaction of, and the mast cell distribution of guinea-pig ileum (T), 259P

—, papillary, MJ 1999 effect on intracellular potentials and contractions of, 683

—, pelvis, angiotensin, adrenaline and noradrenaline effect on, 373

—, phrenic nerve diaphragm, response to digoxin and ouabain, 233P

—, skeletal, decamethonium uptake, saturation effects on, 219P

—, smooth, isolated, servo-mechanism for readjusting the initial tension of, 246

—, —, muscle actions, antagonism of prostaglandins in, by polyphloretin phosphate, 556

—, sphincter of Oddi, adrenaline, noradrenaline, isoprenaline, and terbutaline effects on, 619

—, spindle, dimethothiazine effects on, decerebrate cat, 520

—, taenia coli, papaverine effects on, in the presence and absence of various ions, 608

—, vascular smooth, Clonidine chronic administration effect on (T), 221P

Myocardial circulation, "selective" β -adrenoceptor blocking drugs effect on, 296

Myocardial haemodynamics, butoxamine effects on, 304

—, isoprenaline effects on, before and after butoxamine, 306

—, —, before and after practolol, 300

Myxoviruses, structure, (T), 257P

N

Nalorphine hydrochloride, naloxone antagonism of, 627

Nalorphine hydrochloride (contd.)

—, induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791

Naloxone, antagonism of analgesic effects of morphine sulphate, levorphanol tartrate, methadone hydrochloride, pentazocine, cyclazocine, and nalorphine hydrochloride, 625

—, hydrochloride, antagonistic effect on activity of some drugs in the PQB analgesic assay, 643

Nematode, *Toxocara canis*, larvae, studies of (T), 275P

Nerve, growth factor, antiserum, development and potentialities, 258P

—, —, *in vitro* and *in vivo* effects (T), 258P

—, parasympathetic innervation, lacrimal gland, cat, 242P

—, peripheral sensory nerve stimulation, effect on release of 5-hydroxyindol-3ylacetic acid in the forebrain, 1, 3

—, sympathetic, stimulation, adrenergic neurone blockade effect on response to cat heart, 228P

—, vagus, role in anaphylaxis and histamine-induced bronchoconstrictions in guinea-pigs, 724

Nervous system, catecholamine distribution in, *Octopoda mollusc*, 240P

—, superior cervical ganglion, acetylcholine release in, acetylcholine, carbachol or pre-ganglionic nerve stimulation effect on, 428

Nervous tissue, dopamine and noradrenaline concentration in, *Eledone cirrhosa*, 241P

Neuroleptic drugs, effect on brain glycogen content, 18

(-)-**nicotine**, effects on avoidance learning, 650

Nicotine, induction of portal vein relaxation by, 476

—, -related compounds, central effects in mice, 647

Nicotinic receptors, relationships between antagonism and desensitization at (T), 222P

Nictitating membrane, responses, and blood-pressure, acetylcholine homologues effect, 46

Nikethamide, effect on cerebral cortex electrical responses, 716, 720

—, effect on sodium phenobarbitone ED50, 702

Nitrous oxide, effect on reaction time and cerebral evoked potential, 254P

Noradrenaline, and adenosine triphosphate mixture aggregation, bivalent cations, amphetamine, tyramine and dopamine and reserpine effect on, 383

—, and adrenaline, inhibitory effects on ileum responses to electrical stimulation or acetylcholine, comparison, 406

—, and isoprenaline, inactivation, dog, 573

—, and metaraminol, interrelationship between the syntheses of, 167

—, antagonism by propranolol and phentolamine, 818

—, bethanidine effect on responses to, 255P

—, brain content, carbon disulphide exposure effect, 26, 28

—, cardiovascular responses to anaesthetized rat, 61

—, cardiovascular responses potentiation to, by desmethylinipramine, 185P

—, contractions, competitive α -adrenoceptors blocking drugs effect on saphenous vein, 465

—, depressant effects on longitudinal muscle responses to electrical stimulation, 401

—, effect on atrial muscle, endotoxin-treated guinea-pigs, 688, 690

Noradrenaline (contd.)

—, effect on heart rate, conscious, halothane-anaesthetized and ether-anaesthetized horses, before and after propranolol, 152

—, effects on parenchymal cells membrane potential, guinea-pig liver *in vitro* (T), 259P

—, effect on pelvis muscle, 373

—, effect on pressor responses to angiotensin, noradrenaline, tyramine and McN-A-343, 422

—, effects on sphincter of Oddi, 619

—, effect on untreated, reserpine-treated and decentralized vas deferens, 110

—, hyposensitivity to, induced by morphine and related compounds, 791

—, innervated and denervated vasa deferentia comparison of sensitivity to, 233, 748, 751

—, nervous tissue concentration of, *Eledone cirrhosa*, 241P

—, output, angiotensin, cocaine and pronethalol interaction on, during sympathetic nerve stimulation, isolated rabbit heart, 392

—, —, desipramine, protriptyline and pronethalol interaction on, during sympathetic nerve stimulation, isolated rabbit heart, 395

—, —, during cardiac nerve stimulation, 391

—, —, SY 28 effect on, spleen, 534

—, —, PBZ effect on, spleen, 534

—, —, GD131 effect on, spleen, 537

—, —, potentiation by cocaine, 178

—, —, pressor response to, antiangiotensin action of reserpine reversal effect on, 422

—, —, (\pm)-dopa and noradrenaline infusion after tranlycypromine effect on, 423

—, —, (\pm)-dopa effect on, 422

—, —, α -methyldopa effect on, 424

—, —, noradrenaline effect on, 422

—, —, reserpine effect on, 419

—, —, syrosingopine effect on, 420

—, —, tetrabenazine effect on, 420

—, —, tranlycypromine effect on, 422

—, release, ephedrine effect on, intact spleen cat, 533

—, —, β -haloalkylamines effect on, spleen, 533

—, removal by different vascular beds, phenoxybenzamine effect on, 577

—, removal from circulation by different vascular beds, 577

—, synthesis rate effect on α -methyl-m-tyrosine conversion to metaraminol, 167

—, thyroxine effect on, sensitivity of isolated perfused heart, 49, 54

—, —, uterus sensitivity to, 49, 56

—, —, aorta sensitivity to, 49, 60

—, tubular volume and transit times changes produced by, during diuresis, 362

—, —, rats with low initial urine flow, 362

—, uptake by cat spleen, 179

—, uptake inhibitors, interaction with angiotensin on heart sympathetic nerves, 390

(-)-**noradrenaline**, potency causing saphenous vein strip contraction, 465

Normophine, -induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791

Nucleic acid, nucleotide and protein metabolism, methods for study, 237P

Nucleotide, nucleic acid and protein metabolism, methods for study, 237P

O

Obidoxime, effect on paraoxon-induced rise in brain acetylcholine, 732

Octopoda, mollusc, catecholamine distribution in the nervous system of, 240P

- Oestrogen**, circulating, effect on cholinergic dilator nerves supplying uterine artery, guinea-pig, 190P
- Ouabain**, acetylcholine effect on action potential before and after, paired analyses, atria, 284
 —, acetylcholine mechanical effect before and after, paired analyses, atria, 279
 —, -induced ventricular fibrillation, amiodarone protection against, anaesthetized guinea-pigs, 657
 —, modification of electrical and mechanical effects of acetylcholine by, isolated rabbit atria, 275
 —, phrenic nerve diaphragm response to, 233P
 —, toxicity, amiodarone effect on, 660
- Oxotremorine**-induced hypertension, effect of agonists of sympathetic nerve function on, 496
 —, -induced hypertension in anaesthetized rat, 490
- Oxymetazoline**, innervated and denervated vasa deferentia, comparison of sensitivity to, 748, 752
- Oxytocin**, analogue not containing a disulphide bond, and thioglycerol, lack of antagonism between, 69
- Oxytocin analogues**, change from agonism to antagonism in the action of, interpretation by a receptor model, 217P

P

- Papaverine**, effects on electrical and mechanical activity, guinea-pig taenia coli, 608
 —, in calcium-free Locke solution, effects on taenia coli, 614
 —, in excess calcium solution, effects on taenia coli, 614
 —, in excess magnesium, effects on taenia coli, 625
 —, in excess potassium solution, effects on taenia coli, 612
 —, in low sodium Locke solution, effects on taenia coli, 613
 —, in normal Locke solution, effects on taenia coli, 609
- Paraldehyde**, effect on bladder responses to indirect electrical stimulation and to acetylcholine, 743
- Paraoxon**, induced rise in brain acetylcholine, atropine effect on, 732
 —, —, obidoxime effect on, 732
- Parasympathetic innervation**, peripheral, lacrimal gland, cat, 242P
- Parenchymal**, cells membrane potential, noradrenaline effects on, guinea-pig liver, *in vitro* (T), 259P
- Pargyline**, effect on daunomycin-induced arrhythmia, 505
- Parkinsonian patients**, under treatment with L-dopa, and normal subjects, dopamine accumulation by blood platelets from, 779
- Parkinsonism**, L-dopa treated, interactions with other diseases and other drugs (T), 221P
- Pelvic nerve**, stimulation, effect on peristaltic reflex, 339
- Pelvis muscle**, angiotensin, adrenaline and noradrenaline effect on, 373
- Penicillin G**, concentration in plasma and lymph, dog, 444
- Penicillin V**, concentration in plasma and lymph, dog, 444
- Pentazocine**, effect on brain glycogen content, 18
 —, naloxone antagonism of, 627
- Pentobarbitone**, alcohol interaction with, 200P
 —, brain hypersensitivity to, 325
- Pentolinium**, effect on oxotremorine-induced hypertension, 496
- Peptide synthesis**, automated apparatus for, demonstration (T), 256P
- Peristaltic reflex**, atropine effect on, 338
 —, hexamethonium effect on, 336
 —, nervous stimulation effect on, 352
 —, of the colon, improved method for studying, 346
 —, pelvic nerve stimulation effect on, 339
 —, temperature effects on, 352
- Pethidine**, effect on cerebral cortex electrical responses, 711
 —, effect on sodium phenobarbitone ED50, 699
 —, hydrochloride, effect on brain glycogen content, 18
 —, -induced hyposensitivity to adrenaline, noradrenaline and angiotensin, 791
- Pharmacological gadgets (T)**, 255P
- Pharmacology**, biochemical, gas-liquid radiochromatography-mass spectrometry use in, 236P
 —, television as a teaching aid in (T), 258P
- Phase separation**, in noradrenaline and adenosine triphosphate solutions: bivalent cations and amphetamine, tyramine and dopamine influence on, 382
- Phenethicillin**, concentration in plasma and lymph, dog, 444
- Phenobarbitone**, interaction with central stimulants, 701
 —, interaction with hyoscine convulsant doses, 699
 —, sodium, effect on brain glycogen content, 18
 —, use in investigation of unconjugated hyperbilirubinaemia pathogenesis, 203P
- Phenolic**, acid, excretion, tyramine effect on, 202P
 —, alcohol formation, ethanol promotion of, 200P
 —, —, reserpine promotion of, 200P
- Phenoxybenzamine**, α -adrenoceptor blockade, effect on catecholamine depression of ileum responses to electrical stimulation, 405
 —, and propranolol, combined effects on catecholamine depression of ileum responses to electrical stimulation, 405
 —, blockage of noradrenaline and isoprenaline contractions by, saphenous vein, 465
 —, effect on daunomycin-induced arrhythmias, 505
 —, effect on noradrenaline and isoprenaline removal by different vascular beds, 577
 —, effect on noradrenaline output, spleen, 534
 —, hydrochloride, effect on brain glycogen content, 18
- Phentolamine**, abolition of excitatory effects of nicotine, noradrenaline and transmural stimulation, portal vein, 481
 —, a blockage of 5-hydroxytryptamine contractions by, saphenous vein, 465
 —, and propranolol, antagonism of isoprenaline, noradrenaline and phenylephrine, 818
 —, blockage of noradrenaline and isoprenaline contractions by, saphenous vein, 465
 —, effect on adrenaline radioactivity uptake and intracellular metabolism, 772
 —, effect on oxotremorine-induced hypertension, 496
 —, mesylate, effect on brain glycogen content, 18

- Phenylbenzoquinone**, analgesic assay, studies on the receptors involved in the action of various agents in, 639
- , stretching test, analgesic assay, 627
- Phenylbutazone**, sodium, effect on brain glycogen content, 18
- Phenylephrine**, antagonism by propranolol and phenolamine, 818
- (-)-**phenylephrine**, potency, causing saphenous vein strip contraction, 465
- Phenytoin**, and procainamide, comparison with Kö 1173, a new anticonvulsant agent, effect on cardiac arrhythmias, 183P
- , sodium, effect on brain glycogen content, 18
- Phosphomonoesterases**, histochemical localization, *Schistosoma mansoni* (T), 256P
- Phosphorus**, and/or calcium deficient diets, effect on callus formation and growth rate, young rats, 188P
- Photo-copying**, thin-layer plates by ultraviolet light (T), 256P
- Phrenic nerve diaphragm**, response to digoxin and ouabain, 233P
- Physico-chemical**, activity relationships, application of computing methods to, (T), 257P
- Physiological recordings**, partial automation in the evaluation of, (T), 256P
- Physostigmine**, cross tolerance to in morphine tolerant mice, 642
- , sulphate, effect as a conditioning drug, 643
- , —, effect on brain glycogen content, 18
- Picrotoxin**, effect on cerebral cortex electrical responses, 716, 719
- , effect on sodium phenobarbitone ED50, 702
- PINN**, effects on sphincter of Oddi, 619
- Pituitary**, adrenocortical activity ascorbic acid demethasone-treated rat, 192P
- , adrenocorticotrophic response to stress, beta-methazone-treated rat, 192P
- Plasma**, and lymph, antibacterial agents distribution between, dog, 439
- Platelets**, concentration effect of added adrenaline on adrenaline and its metabolite accumulation, 768
- Polyphloretin phosphate**, antagonism of prostaglandin smooth muscle actions by, 556
- Potassium**, effect on untreated reserpine-treated and decentralized vas deferens, 110
- , iodide and amiodarone supplemented by thyroxine, effect on action potentials, ventricular fibres, 662
- Practolol**, action on isoprenaline cardiovascular effects, 296, 299
- , effect on isoprenaline induced vasodepression, 296
- , graded doses effect on isoprenaline, Valsalva's manoeuvre and exercise-induced tachycardia, 193P
- , isoprenaline effect on myocardial haemodynamics before and after, 300
- Preganglionic nerve stimulation**, effect on acetylcholine release, superior cervical ganglion, 428
- Probenecid**, effect on 5-hydroxyindol-3-ylacetic acid release in the forebrain, 1, 4
- Procainamide**, and phenytoin, comparison with Kö 1173, a new anticonvulsant agent, effect on cardiac arrhythmias, 183P
- Procaine**, action on sciatic nerve, comparison with MJ 1999 and AH 3474, frog, 677
- , effect on bladder responses to indirect electrical stimulation and to acetylcholine, 743
- Procaine** (contd.)
- , lidoflazine, atropine and hexamethonium, effects on responses to angiotensin and acetylcholine of colon muscle, 36
- Promethazine**, alcohol interaction with, 200P
- , effect on cerebral cortex electrical responses, 711
- , effect on sodium phenobarbitone ED50, 699
- Pronethalol**, cocaine and angiotensin, interaction on noradrenaline output during sympathetic nerve stimulation, isolated rabbit heart, 392
- , desipramine and protriptyline, interaction on noradrenaline output, during sympathetic nerve stimulation, isolated rabbit heart, 395
- , prejunctional blocking effect, vas deferens, 128
- Propranolol**, action on adrenaline effect on recovery from anoxia, atria, 309
- , administration, adrenaline effect on heart rate before and after, conscious horses, 151
- , administration, adrenaline, noradrenaline and isoprenaline effect on heart rate, conscious, halothane-anaesthetized and ether-anaesthetized horses, before and after, 152
- , and phenolamine, antagonism of isoprenaline, noradrenaline and phenylephrine, 818
- , and phenoxybenzamine, combined effects on catecholamine depression of ileum responses to electrical stimulation, 405
- , effect on amphetamine release of growth hormone and corticosteroids, man, 196P
- , effect on catecholamine depression of ileum responses to electrical stimulation, 404
- , effect on electrical stimulation action on portal vein, 481
- , effect on oxotremorine-induced hypertension, 496
- , guanethidine hypotensive action antagonism mechanism (T), 221P
- , hydrochloride, effect on brain glycogen content, 18
- , potency as a β -adrenoceptor antagonist as compared to USVC 6524, 139
- , prejunctional blocking effects, vas deferens, 121
- (±)-**Propranolol**, effect on unanaesthetized dogs with amiodarone, 668
- , effect on adrenaline radioactivity uptake and intracellular metabolism, 769
- , effect on daunomycin-induced arrhythmias, 505
- (+)-**Propranolol**, effect on unanaesthetized dogs with ventricular arrhythmias resulting from coronary artery ligation, 809
- , effect on daunomycin-induced arrhythmia, 505
- Prostaglandin**, cardiovascular effects, mediated by the central nervous system, dog, 511
- , effect on portal vein relaxation, 486
- , smooth muscle actions of, antagonism by polyphloretin sulphate, 556
- , uptake and metabolism, perfused rat liver, 585
- Prostaglandin A₁**, cardiovascular effects, 516
- Prostaglandin E₁**, cardiovascular effects, 515
- , effect on adrenaline radioactivity uptake and intracellular metabolism, 769
- , labelled, radioactivity distribution in solvent extracts of liver following recirculation of, 595
- Prostaglandin F_{1α}**, cardiovascular effects, 515
- Prostaglandin F_{2α}**, cardiovascular effects, 513
- , effect on arterial pressure, 513

Prostaglandin F_{2α} (contd.)

- , effect on cardiac output and peripheral resistance, 514
- , effect on heart rate and central venous pressure, 514
- , effect on vertebral artery blood flow, 514

Protein, metabolism, nucleic acid and nucleotide, methods for study, 237P

Protriptyline, desipramine and pronethalol interaction on noradrenaline output, during sympathetic nerve stimulation, isolated rabbit heart, 395

Psychopharmacology, laboratory experiments suitable for practical classes in, 246P

Pteridine, derivatives and pyrimidopyrimidines, ability to potentiate adenosine produced heart block, investigation, 287

Purines, pyrimidines and pyrazolopyrimidines, separation and identification in biological fluids, (T), 258P

Pyrazolopyrimidines, pyrimidines and purines, separation and identification in biological fluids (T), 258P

Pyridoxine, effect on sympathetic nerve endings, man, 195P

Pyrimethamine, in urine, fluorescent measurement (T), 256P

Pyrimidines, pyrazolopyrimidines and purines, separation and identification in biological fluids (T), 258P

Pyrimidopyrimidines, and pteridine derivatives ability to potentiate adenosine produced heart block, investigation, 287

Pyrogallol, effect on adrenaline radioactivity uptake and intracellular metabolism, 772

—, effect on brain glycogen content, 18

R

Radiorespiration, study device, 238P

Receptor, length of stay of molecule on: explanation of a paradox, 215P

—, model, interpretation of oxytocin analogue action change from agonism to antagonism, 217P

Reserpine, and decentralization, effect on ion distribution, vas deferens, guinea-pig, 121

—, effect on blood pressure and heart rate, 417

—, effect on brain glycogen content, 18

—, effect on daunomycin-induced arrhythmia, 505

—, effect on noradrenaline and adenosine triphosphate phase separation, 385

—, effect on oxotremorine-induced hypertension, 496

—, effect on platelet adrenaline, 774

—, effect on pressor responses to angiotensin, conscious rat, 414

—, —, noradrenaline, tyramine and McN-A-343, 419

—, effect on resting systolic blood pressure of chronic hypertensive and normotensive rats, 321

—, phenolic alcohol formation promotion by, 200P

—, pretreatment, effect on portal vein responses to nicotine, 485

—, reversal of anti-angiotensin action effect on pressor responses to angiotensin, noradrenaline, tyramine and McN-A-343, 420

—, reversal of anti-angiotensin action of, effect on pressor responses to angiotensin, noradrenaline, tyramine and McN-A-343, 422

Reserpine (contd.)

—, treatment, and decentralization, vas deferens nonspecific supersensitivity produced by, guinea-pig, 110

—, —, effect on carbon disulphide exposure action on brain dopamine content, 26, 28

Respiration, study device, 238P

Retinotoxicity, possible mechanism: aminophenoxyalkanes inhibition of alcohol dehydrogenase, 206P

Russell viper venom, and mouse salivary gland nerve growth factors isolated from, *in vivo* and *in vitro* effects (T), 258P

S

Saline solutions, bicarbonate-buffered physiological, pH control in, 257P

Salivary gland, mouse, and venom, Russell viper, nerve growth factors isolated from *in vitro* and *in vivo* effects (T), 258P

Sarin poisoning, anticholinergic drugs protective actions in, 822

Saturation, effects on decamethonium uptake by skeletal muscle, 219P

Schistosomes, bacterial invasion of (T), 258P

Schultz-Dale response, Auerbach's plexus role in, 547

—, longitudinal muscle strip, and the mast cell distribution in guinea-pig ileum (T), 259P

—, longitudinal muscle strip preparation, guinea-pig ileum, 542

—, mast cells role in, 548

780SE, acute administration effect on sleep, 462

Sedatives, alcohol interaction with, 199P

Servo-mechanism, for readjusting the initial tension of isolated smooth muscle, 246

Sheep, carbon tetrachloride metabolism in, 598

Skin darkening, by melanophore stimulating hormone, dibutyryl cyclic 3',5'-AMP and methylxanthines, 163

—, compounds causing, 160

Sleep, fenfluramine acute administration effect on, 462

—, 780SE acute administration effect on, 462

—, (*m*-trifluoro methyl-phenyl)-1-(benzoyl oxy) ethyl amino-2-propane (780SE) acute administration effect on, 462

Snails, aquatic and amphibious, maintenance as intermediate hosts of trematodes (T), 258P

Sodium phenobarbitone, ED50 effect of diphenhydramine, promethazine, chlorpromazine, γ -hydroxybutyrate, γ -butyrolactone, hyoscine, pethidine, meprobamate and diazepam, 699

Sodium pool, amiloride effect on, frog skin, 99, 101

Sodium transport, kinetics, amiloride effect on frog skin, 99, 101

—, pool, active, estimation, frog skin, 100

Species, effect on recovery from anoxia, atria, 309, 311

Spleen, isoprenaline and noradrenaline uptake by, 178

Spinal cord, subarachnoid space and central canal perfusion, mammals (T), 259P

Stress, pituitary adrenocorticotrophic response to, betamethazone-treated rat, 192P

Strychnine, effects on bladder responses to indirect electrical stimulation and to acetylcholine, 743

—, effect on cerebral cortex electrical responses, 716, 721

—, effect on sodium phenobarbitone ED50, 702

Sulphadiazine, concentration in plasma and lymph, dog, 444

- Sulphonamides**, and trimethoprim, synergy (T), 256P
 —, antimalarial effect, potentiation, by folic reductase inhibitors (T), 267P
- Surgical procedures**, effects on daunomycin-induced arrhythmias, 505
- SY 28**, effect on noradrenaline output, spleen, 534
- Sympathetic nerve**, endings, dopamine, L-dopa, L-tyrosine and pyridoxine effects on, man, 195P
- Sympathetic nervous system**, contribution to development and maintenance of experimental hypertension, rat, 317
 —, role in daunomycin-induced arrhythmia, monkey, 501
- Sympathomimetic amines**, allergic reaction inhibition by, 212P
- Syneprhine**, mean pressor responses to, pithed rats, 60
- Syrosingopine**, effect on pressor response to angiotensin, noradrenaline, tyramine and McN-A-343, 420
- T
- Tachycardia**, isoprenaline, Valsalva's manoeuvre and exercise-induced, practolol graded doses effect on, 193P
- Taloximine**, human pharmacology of, 249P
- Teaching aid**, television as, in pharmacology (T), 258P
- Television**, as a teaching aid in pharmacology (T), 258P
- Temperature effects**, brain glycogen content, 9, 14
 —, on peristaltic reflex, 352
- Terbutaline**, effects on sphincter of Oddi, 619
- Tetrabenazine**, effect on pressor responses to angiotensin, noradrenaline, tyramine and McN-A-343, 420
- Tetraethylammonium**, effect on bladder responses to indirect electrical stimulation and to acetylcholine, 743
- 1,4,5,6-tetrahydro-5-phenoxy pyrimidine**, (AH 6405), a new muscarinic agent, 191P
- Tetrodotoxin**, effects on nicotine action on portal vein, 480
 —, effects on responses to electrical stimulation, portal vein, 484
- Theophylline**, induced skin darkening, adrenaline effect on, 163
- Therapeutic trials**, assessing reports of, 204P
- Thin-layer plates**, photocopying by ultraviolet light (T), 256P
- Thioglycerol**, and oxytocin analogue not containing a disulphide bond, lack of antagonism between, 69
- Thrombin**, platelet adrenaline release by, 773
- Thymoxamine**, blockage of 5-hydroxytryptamine contractions by, saphenous vein, 465
 —, blockage of noradrenaline and isoprenaline contractions by, saphenous vein, 465
 —, effect on amiodarone action potential prolongation, 657
 —, effect on amphetamine release of growth hormone and corticosteroids, man, 196P
- Thyroid**, hormones, influence on sensitivity of cardiac and smooth muscle to biogenic amines and other drugs, 49
 —, weight, amiodarone effect on, 662
- Thyroxine**, effect on isolated aorta sensitivity to noradrenaline, adrenaline, histamine and 5-hydroxytryptamine, 49, 60
 —, effect on isolated ileum sensitivity to acetylcholine, histamine and 5-hydroxytryptamine, 49, 56
- Thyroxine (contd.)**
 —, effect on isolated perfused heart, sensitivity to noradrenaline, adrenaline, isoprenaline, acetylcholine and histamine, 49, 54
 —, effect on isolated rat uterus, sensitivity to noradrenaline, adrenaline, isoprenaline, acetylcholine, histamine and 5-hydroxytryptamine, 49, 56
 —, potentiation of pressor responses to (+)-amphetamine, 49
 —, -supplemented potassium iodide and amiodarone, effect on action potentials, ventricular fibres, 662
- Tolazoline**, blockage of noradrenaline and isoprenaline contractions by, saphenous vein, 465
- Toxocara canis**, larvae, studies on (T), 257P
- Tranquillizers**, alcohol interaction with, 199P
- Tranlycypromine**, (\pm)-dopa and noradrenaline infusions after, effect on pressor responses to angiotensin, noradrenaline, tyramine and McN-A-343, 422
 —, effect on pressor responses to angiotensin, noradrenaline, tyramine and McN-A-343, 422
- Trematodes**, aquatic and amphibious snails, maintenance as intermediate hosts of (T), 258P
- Tremorine hydrochloride**, effect on brain glycogen content, 18
- Trials**, assessing reports of, 204P
- (*m*-trifluoro methyl-phenyl)-1-(benzoyl oxy) ethyl amino-2-propane**, acute administration effect on sleep, 462
- Trimethoprim**, and sulphonamides, synergy (T), 256P
- Tropolone 4-acetamide**, effect on adrenaline radioactivity uptake and intracellular metabolism, 772
- Tropolone**, effect on adrenaline radioactivity uptake and intracellular metabolism, 772
- Trypanosoma cruzi**, chemotherapy, effect of drugs against the crithidial stage (T), 257P
 —, —, maintenance of the intracellular stage and effect of drugs (T), 257P
 —, —, treatment of mouse infections (T), 257P
- Tumour cell**, dissemination, drug-induced inhibition, of, 205P
- Tyramine**, effect on atrial muscle, endotoxin-treated guinea-pigs, 688, 690
 —, effect on noradrenaline and adenosine triphosphate aggregation, 383
 —, effect on phenolic acid and alcohol excretion, man, 202P
 —, pressor response to, anti-angiotensin action of reserpine reversal effect on, 422
 —, —, (\pm)-dopa and noradrenaline infusions after tranlycypromine effect on, 423
 —, —, (\pm)-dopa effect on, 422
 —, —, α -methyldopa effect on, 423
 —, —, noradrenaline effect on, 422
 —, —, reserpine effect on, 419
 —, —, syrosingopine effect on, 420
 —, —, tetrabenazine effect on, 420
 —, —, tranlycypromine effect on, 422
- Tyrosine**, brain content, carbon disulphide exposure effect, 26, 29
- L-tyrosine**, effect on sympathetic nerve endings, man, 195P

U

Ultraviolet light, thin-layer plates photocopying by (T), 256P

- Urinary kininogenase**, and kidney, relationship between, 73
- Urine**, and kidney, enzyme activity amounts relationship between, 83
- , *N*- α -benzoyl-L-arginine esterase activity in, rat, 78
- , kininogenase activity, rat, 77
- , pyrimethamine in, fluorescent measurement, (T), 256P
- Urogastone**, extraction and assay (T), 221P
- USVC 6524**, β -adrenoceptor blockade by, 139
- , β -adrenoceptor blocking activity in anaesthetized dog, isolated rat uterus and isolated guinea-pig tracheal strip, 140
- , cardiac depressant effects, 139
- , effect on isoprenaline cardiovascular responses, 140
- , potency as a β -adrenoceptor antagonist compared to propranolol, 139
- Uterus**, response to adrenergic nerve stimulation, guinea-pig, 187P
- Uterus**, uterine artery, circulating oestrogen effects on function of the cholinergic dilator nerves supplying, guinea-pig, 190P

V

- Vagotomy**, effect on diazepam-induced vasodilation, 261, 264
- , effect on respiratory and cardiovascular responses to histamine acid phosphate, 727-9
- Valium**. *See* Diazepam
- Valsalva's manoeuvre**, induced tachycardia, practolol graded dosage effect on, 193P
- Vas deferens**, innervated and denervated, comparison to sensitivities to agonist drugs, 748
- , ion distribution, reserpine treatment and decentralization effect on, guinea-pig, 121
- , prejunctional action of β -adrenoceptor antagonists in, 128
- Vas deferens (contd.)**
- , nonspecific supersensitivity produced by decentralization and reserpine treatment, guinea-pig, 110
- , prejunctional blockade by β -adrenoceptor antagonists, reversal by dexamphetamine and cocaine, 128
- , propranolol, prejunctional blocking effect, pronethalol, MJ 1999 and Ciba 39089-Ba, 128
- , untreated, reserpine-treated and decentralized, noradrenaline, methylfurmethide, histamine and potassium, effect on, 110
- Vascular resistance**, peripheral, integration and differentiation of phasic aortic flow and continuous recording of, 232P
- Vasodilator actions**, coronary and systemic, of diazepam, pharmacological basis of, 261
- Vasopression**, isoprenaline-induced, practolol effect on, 296
- Venom**, *Naja naja*, long-lasting convulsant effect on cerebral cortex, 455
- , Russell viper, and salivary gland, mouse, nerve growth factors isolated from, *in vivo* and *in vitro* effects (T), 258P
- Ventromedial nucleus**, of the hypothalamus, and appetite control, (T), 255P
- Veretidine**, effects on nicotine action on portal vein, 480
- Vesicle**, population, ganglionic synapses, drug effects on, rat, 244P
- Videotape recording**, of some methods used to evaluate potential centrally acting drugs (T), 258P

X

- Xylamidine**, 5-hydroxytryptamine antagonism by, 233P
- , 5-hydroxytryptamine embryocidal effect antagonism, 224P

Instructions to Authors

1. **Manuscripts** (2 copies) should be typed in double spacing on one side of paper not larger than foolscap (33×20.5 cm). There should be a separate title page giving the names and addresses of the authors in alphabetical order.

2. A **short summary of results and conclusions** (arranged in numbered paragraphs), **tables and legends to figures** should be typed on separate sheets of paper.

3. **References** should be collected at the end of the paper. They should include the author's names, year of publication, title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

4. **Figures** should NOT BE LARGER THAN FOOLSCAP (33×20.5 cm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided and both ordinates and abscissae should be calibrated.

5. **Lettering** on figures should be inserted in PENCIL. Symbols which are to appear in figures or legends should be chosen from the following:

× + ● ■ ○ □ △ ▲ ▽ ▼ ○ ● ◇

6. **Photographs and photomicrographs** should be printed on glossy paper and should be larger than the size required for reproduction.

7. **Tables** ideally should not have more than 84 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 130 characters to a line, unless absolutely unavoidable.

8. An **abstract** of about 100 words suitable for inclusion in *International Abstracts of Biological Sciences* should be typed on a separate sheet.

General remarks. A recent issue of the journal is a good guide to style. Papers are accepted only if accompanied by a statement that they have not and will not be published in whole or in part in any other Journal.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Fifty reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs.

- 707 FRANK, G. B. and JHAMANDAS, K. Effects of general depressant drugs on the electrical responses of isolated slabs of cat's cerebral cortex. (SP2, DM2)
- 716 FRANK, G. B. and JHAMANDAS, K. Effects of general stimulant drugs on the electrical responses of isolated slabs of cat's cerebral cortex. (SP2, DM2)
- 724 MILLS, JANET E. and WIDDICOMBE, J. G. Role of the vagus nerves in anaphylaxis and histamine-induced bronchoconstrictions in guinea-pigs. (SP3, SP1, AP2)

Autopharmacology

- 732 MILOŠEVIĆ, M. P. Acetylcholine content in the brain of rats treated with paraoxon and obidoxime. (AP1, SP2)
- 738 DHATTIWALA, A. S., JINDAL, M. N. and KELKAR, V. V. Effects of some drugs on the responses of the rat isolated, innervated urinary bladder to indirect electrical stimulation. (AP1)
- 748 BIRMINGHAM, A. T., PATERSON, G. and WÓJCICKI, J. A comparison of the sensitivities of innervated and denervated rat vasa deferentia to agonist drugs. (AP1, PK3, DM2)
- 755 MAEGRAITH, B. G. and ONABANJO, A. O. The effects of histamine in malaria. (AP2, TX)

Pharmacokinetics

- 765 BORN, G. V. R. and SMITH, J. B. Uptake, metabolism and release of [³H]-adrenaline by human platelets. (PK3)
- 779 BOULLIN, D. J. and O'BRIEN, R. A. Accumulation of dopamine by blood platelets from normal subjects and parkinsonian patients under treatment with L-DOPA. (PK3, CP)
- 789 CONTRERAS, E. and HUIDOBRO, F. Hyposensitivity to drugs induced by morphine and some related substances in the cat. (PK3)

Drug Mechanisms

- 798 BOYLES, SUSAN, LEWIS, G. P. and WESTCOTT, BARBARA. Changes in the composition of hind limb lymph after chemical injury. (DM1)
- 809 DUCE, B. R., GARBERG, L. and SMITH, E. R. Effects of (±)-propranolol, (±)-, (+)-, and (—)-alprenolol on unanaesthetized dogs with ventricular arrhythmias resulting from coronary artery ligation. (DM2, SP1)
- 817 BARTLET, A. L. and HASSAN, T. Adrenoceptors of the chick rectum. (DM2)

Clinical Pharmacology, Experimental Therapy

- 822 BRIMBLECOMBE, R. W., GREEN, D. M., STRATTON, JUNE A. and THOMPSON, PAMELA B. J. The protective actions of some anticholinergic drugs in sarin poisoning. (CP, DM2)

SHORT COMMUNICATION

- 831 EISEN, V. and LOVEDAY, C. Effect of cellulose sulphate on serum complement. (AP2, M)
- 834 Index to Volume 39

Systematic Pharmacology

Cardiovascular system SP1
Central nervous system SP2
Other physiological systems SP3

Pharmacokinetics

Storage, distribution, fate PK1
Synthesis, metabolism PK2
Uptake, release PK3

Clinical Pharmacology, Experimental Therapy

Chemotherapy CT
Miscellaneous M

Autopharmacology

Adrenergic, cholinergic transmission AP1
Histamine, kinins, prostaglandins, etc. AP2
Hormones AP3

Drug Mechanisms

Molecular, cellular, biochemical, biophysical DM1
Receptors, antagonism, potentiation, tolerance DM2

Pharmacometrics

PM
Psychopharmacology PP
Toxicology TX
