Editorial assistance is provided by the staff of Nature

Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr. S. E. Smith, St. Thomas's Hospital Medical School, London S.E.1. Authors should consult the suggestions inside the back cover.

Subscriptions. Three volumes of the journal are published annually, each volume containing four numbers. The annual subscription rate is £18.50 in the United Kingdom and Republic of Ireland; \$53.00 U.S.A. and \$57.50 Canada (by air freight; second class postage paid at New York, N.Y.); £16.65 all other overseas countries. Subscriptions should be sent to: Subscriptions Department, Macmillan Journals Ltd., Brunel Road, Basingstoke, Hampshire, England. Alternatively, the journal can be ordered through a subscription agent or bookseller.

Advertisements: Applications for advertising space and rates should be sent to: J. Ashley-Brown, Advertisement Manager, *British Journal of Pharmacology*, Macmillan Journals Ltd., 4 Little Essex Street, London, WC2R 3LF, England. Tel: 01-836 6633.

Copyright © 1971 by the *British Journal of Pharmacology*. All rights of reproduction are reserved in respect of all papers, articles, illustrations, etc., published in this journal in all countries of the world.

BRITISH JOURNAL OF PHARMACOLOGY

The following are some of the manuscripts which will be published in future issues:

ALLEN, J. D., SHANKS, R. G. and ZAIDI, S. A.: Effects of lignocaine and propranolol on experimental cardiac arrhythmias

BARLOW, R. B. and FRANKS, FIONA: Specificity of some ganglion stimulants

BREESE, G. R. and TAYLOR, T. D.: Depletion of brain noradrenaline and dopamine by 6-hydroxydopamine

FINCH, L.: Cardiovascular reactivity in the experimental hypertensive rat

GINSBORG, B. L. and HIRST, G. D. S.: Prostaglandin E₁ and noradrenaline at the neuromuscular junction

HAMILTON, T. C.: Modification of the vascular response to isoprenaline by cholinomimetic drugs

KNOLL, J. and VIZI, E. S.: Effect of stimulation frequency on the inhibition by noradrenaline of the acetylcholine output from parasympathetic nerve terminals

MARKLEY, K., SMALLMAN, ELIZABETH and THORNTON, S. W.: Protection against burn, tourniquet and endotoxin shock by histamine, 5-hydroxytryptamine and 5-hydroxytryptamine derivatives

PARSONS, J. A. and SUMMERS, R. J.: Cat assay for the emetic action of digitalis and related glycosides (digitoxin, digoxin, lanatoside C, ouabain and calactin)

SIMMONDS, M. A.: Inhibition by atropine of the increased turnover of noradrenaline in the hypothalamus of rats exposed to cold

Essentials of Pharmacology in Clinical Nursing

Frances N. Douglas RN, BSEd, MSN

This book is designed to provide the essentials of pharmacology as useful in nursing practice and to present the content in an easily readable and understandable manner. It can be used as a textbook or as a ready reference source, as well as for core pharmacology content in curricula that do not include pharmacology as a separate course.

Carbenoxolone Sodium—1970

Edited by J. H. Baron and F. M. Sullivan

Original Papers and Discussion of a group Meeting at the 4th World Conference of Gastroenterology, Copenhagen, July 14th 1970.

This interesting new drug in the form of Biogastrone tablets has rapidly become the established ambulant therapy for promoting the healing of gastric ulcers and is being increasingly used in Duogastrone capsules for the treatment of duodenal ulcer.

0 407 12801 8 188 pages illustrated 1971 **£3.50**

BRITISH JOURNAL OF PHARMACOLOGY

Short Communications

Papers for consideration should be marked "Short Communication", and be submitted in duplicate to the Secretary of the Editorial Board. They must be less than 1,200 words in length and may contain one figure or one table. To reduce publication delay to a minimum (about 6 weeks), correspondence between author and editor must be avoided. Manuscripts should therefore be prepared with great care and the customary form used in the Journal strictly observed (see instructions on the inside covers of a recent issue of the Journal). Short Communications will be accepted on the understanding that if authors' proofs are not returned before the journal goes to press, the Communication will be published with the Press Editor's corrections only. Communications not accepted for publication will be returned in approximately 2 weeks.

INDEX TO VOLUME 41

AUTHOR INDEX

A

- ABSOLON, K. B., BASHOUR, F. A. and GEUMEI, AIDA. Effect of temperature on the intra-hepatic vasculature, 710
- AL TAI, SUHAILA A. and GRAHAM, J. D. P. Response to acetylcholine and nicotine of the perfused vessels of the rabbit ear, 500
- AMURE, B. O. and OMOLE, A. Comparative study of antral gastrin activity in some mammals, 629
- ANGUS, J. A., COBBIN, L. B., EINSTEIN, ROSEMARIE and MAGUIRE, M. H. Cardiovascular actions of substituted adenosine analogues, 592
- ANLEZARK, G. M., ARBUTHNOTT, G. W., CHRISTIE, J. E. and CROW, T. J. Role of cerebral dopamine in the action of psychotropic drugs, 406P
- ARBAB, A. G., BONN, J. A. and HICKS, DEBORAH. Effect of propranolol on lactate induced phenomena in normal subjects, 430P
- ARBUTHNOTT, G. W. *See* ANLEZARK, G. M., 406P

SUBJECT INDEX

A

- Acetylcholine**, effect of iontophoretic application to guinea-pig pelvic ganglia, 26
 —, effects of β -adrenoceptor antagonists on effects of, on human isolated smooth muscle, 426P
 —, release by rat cerebral cortex *in vitro*, stimulating action of atropine on, 600
 —, release from cat cerebral cortex, effects of septal lesions on, 399P
 —, release from rat brain slices, effects of morphine, levorphanol, nalorphine and naloxine on, 398P
 —, release from the guinea-pig isolated ileum, effect of oxotremorine on, 19
 —, response of the perfused vessels of the rabbit ear to, 500
 —, responses of guinea-pig ileum to, effect of pyrrolizidine alkaloids on, 684
Adenosine, and substituted analogues of, cardiovascular actions of, 592
Adenosine triphosphatase, Na^+ and K^+ activated, possible participation in transport of metaraminol by rabbit ventricular slices, 65
Adrenalectomy, effect of, on rat heart enzymes, 392P
Adrenaline, bioassay of, use of rat superfused aortic strip for, 711
 —, cardiovascular responses to, effects of progesterone on, in the pithe rat, 187
 —, effect of, on extracellular fluid volume and contents, 302
 —, effect of, on nerve terminals in the superior cervical ganglion of the rabbit, 331
 —, relaxations of the rat colon induced by, effect of oxprenolol on, 361
Adrenoceptors, involvement in motor and inhibitory effects of sympathomimetic amines on guinea-pig isolated stomach muscle, 227
 α -Adrenoceptors, a fine-structural and electron autoradiographic study using ^3H -phenoxybenzamine and smooth muscle from the cat and guinea-pig, 278
 —, blocking agents of, myocardial and haemodynamic effects of low doses of phentolamine, 437
 —, excitatory, evidence for presence in the intestine, 361
 β -Adrenoceptors, antagonist activity of 3-methoxyisoprenaline, 113
 —, antagonists, effect of, on the effects of isoprenaline and acetylcholine on human isolated smooth muscle, 426P
 —, classification of those mediating metabolic responses in the dog, 387P
 —, effect of blocking agents of, on the chronotropic and inotropic actions of isoprenaline on the acutely denervated dog heart, 387P
 —, effect of blocking agents of, on coronary vasodilatation induced by hypoxia, 387P
 —, effect of blocking agents of, on isoprenaline induced changes in regional blood flow in the rat, 171
 —, effect of blocking agents of, on the response to bronchoconstrictor drugs in the guinea-pig air overflow preparation, 122
 —, effect of blocking agents of, on the response of the cardiovascular system of the dog to prostaglandin $\text{F}_{2\alpha}$, 454
 —, stimulants of, resistance to and death from bronchial asthma, 410P
 α and β -Adrenoceptors, agonists and antagonists of, actions on brain stem neurones of the cat, 462

 α and β -Adrenoceptors (contd.)

- , blockade of, effect of, on the response to catecholamines and angiotensin of extracellular water and cation movements, 302
 —, in the human foetal small intestine, 567
 —, presence of, in the uteri of immature and mature rabbits, 391P
Air overflow method, a new modification, 128
Alkaloids, pyrrolizidine, actions on muscarinic receptors in the guinea-pig ileum, 684
2-Alkyladenosines, cardiovascular actions of, 592
Alprenolol, effects of, on effects of isoprenaline and acetylcholine on human isolated smooth muscle, 426P
Amiloride, similar effects to those of triamterene, on active sodium transport mechanisms in isolated frog skin, 552
Amines, biogenic, in the rat brain, effects of amphetamines on, 198
 —, cardiovascular responses to, effects of progesterone on, in the pithe rat, 187
 γ -Aminobutyric acid, rate of turnover of, in various brain regions, 396P
Aminoguanidine, effect on gastric secretion and ulceration in the Shay rat, 167
Aminopyrine, clearance by the gastric mucosa, compared with clearance of aniline, 384P
Amphetamine, actions on brain stem neurones of the cat, 462
 —, some neurochemical effects of, in the rat, 198
(+)-Amphetamine, actions on brain amine stores compared with those of fenfluramine, 57
Amphetamines, central actions of, after unilateral lesions of dopamine neurones, 405P
 —, role of cerebral dopamine in the action of, 406P
Amylase, secretion of salivary, from rabbit parotid gland, effects of nicotine on, 285
Amylobarbitone, influence of pH on aggregation and protein binding of, 76
Angina pectoris, log dose-response curve to assess the effects of propranolol in, 408P
Angiotensin, effect of, on extracellular fluid and cation movements, and the effect of α and β -adrenoceptor blockade, 302
 —, effects of, on discharge frequency in fibres of cervical sympathetic nerve in cats and dogs, 675
 —, enhancement of transmitter release by, during sympathetic nerve stimulation, 239
 —, pressor response to, central components involved in, 177
Aniline, radioactive, clearance from canine gastric pouches for the measurement of gastric mucosal blood flow, 384P
Anorexic agent, potential risk of disturbance to the central nervous system caused by using fenfluramine as, 57
Antibiotics, inhibition of clearance of organic dyes by a polypeptide antifungal antibiotic, Saramycin, 140
Anticholinesterase, effect of, on primary and secondary contractions of intestinal smooth muscle, 213
Anticonvulsants, method of studying properties in man, 429P
Antidepressants, tricyclic, effect of, on monoamine responses of single cortical neurones, 394P
Anti-inflammatory drugs, factors influencing the inhibitory action of, on carrageenin induced oedema, 132

- Antipyresis**, induced by salicylates, influence of the duration of experimental fever on, 344
- Antrum**, gastric activity in, comparison between, carnivores, herbivores and omnivores, 629
- Aspirin**, factors influencing the inhibitory activity of, on carrageenin induced oedema, 132
- Asthma**, metabolic formation of 3-methoxyisoprenaline from isoprenaline aerosol sprays, importance in, 113
- Atropine**, effect of, on secondary excitation of intestinal smooth muscle, 213
- , selective vasoconstrictor effect of, on the parametrial arteries in the pregnant guinea-pig (T), 407P
- , stimulating action of, on the release of acetylcholine by rat cerebral cortex *in vitro*, 600
- Autonomic nervous system**, mediation of the cardiovascular effects of prostaglandin $F_{2\alpha}$ in the dog, 454
- Autoradiography**, high resolution, use in an attempt to locate the α -adrenoceptor, 278

B

- Barbitone**, endocrinological aspects of dependence on, in hypophysectomized and intact rats, 317
- Barbiturates**, influence of pH on aggregation and protein binding of, 76
- , hangover effects of in man, 412P
- , stimulation of metabolism, by chronic administration of centrally active drugs, 383P
- , tolerance of, methods for investigating, 422P
- Barbituric acid**, influence of pH on aggregation and protein binding of, 76
- Betamethasone**, effects of, on the production of corticosterone by the rat adrenal gland *in vitro*, 640
- Bethanidine**, hypotensive action from combination of propranolol and, 408P
- Bioassay**, of noradrenaline and adrenaline, use of rat superfused aortic strip for, 711
- Blood flow**, systemic and regional in the rat, effect of β -adrenoceptor blocking compounds on isoprenaline induced changes in, 171
- Bovine serum albumin**, influence of pH on binding of amylolbarbitone and barbituric acid to, 76
- Bretylum tosylate**, effects on neuromuscular transmission in the rat phrenic nerve diaphragm preparation, 607
- British Pharmacological Society**, Proceedings of, 379P
- , working party to investigate the training in pharmacology of overseas graduates, 433
- p-Bromomethylamphetamine**, some neurochemical effects of, in the rat, 198
- Bronchoconstrictor drugs**, in the guinea-pig air over-flow preparation, effect of β -adrenoceptive blocking agents on response to, 122
- Bronchodilators**, comparison of the cardiorespiratory effects of isoprenaline and salbutamol, 445

C

- Cadmium ions**, spasmolytic effects of, on guinea-pig isolated ileum preparation, 488
- Cannabidiol**, some actions of, at cholinergic junctions, 379P
- Carbachol**, assay of urogastrone by its effect in reducing gastric acid secretion induced by, 8
- Cardiotoxins**, isolated from the cnidarian *Chironex fleckeri* Southcott, 154
- Cardiovascular system**, central autonomic effects of prostaglandin $F_{2\alpha}$ on, in dogs, 454
- , comparison of the effects of isoprenaline and salbutamol in dogs, 445

Cardiovascular system (contd.)

- , effects of phentolamine on, 437
- , effects of substituted adenosine analogues on, 592
- Carrageenin**, factors influencing the inhibitory action of anti-inflammatory drugs on oedema induced by, 132
- , irritant properties compared with those of inflammatory exudate, 480
- Catecholamines**, actions of 3,4-dimethoxy phenylethylamine in relation to the effects of, on brainstem neurones, 395P
- , bioassay of, use of rat superfused aortic strip for, 711
- , brain, and exploratory activity in rats, effects of tetrabenazine and α -methyl-*m*-tyrosine on, 691
- , cardiovascular effects of, compared with those of phentolamine, 437
- , effect of depletion in rat brain, on spontaneous locomotor activity, 701
- , effect of, on extracellular water and cation movements and the effect of α - and β -adrenoceptor blockade, 302
- , effects of, on the uteri of adult, immature and ovariectomized rabbits, 391P
- , effects of noradrenaline on discharge frequency in fibres of the cervical sympathetic nerve in cats and dogs, compared with those of angiotensin, 675
- , effect of prostaglandin $F_{2\alpha}$ on the responses of dog spleen to, 1
- , in plasma, changes after administration of ketamine, 441P
- , in the rat brain and heart, depletion by fenfluramine, 57
- , involvement in the action of nicotine on salivary amylase secretion, 285
- , neuronal uptake mechanisms, 571
- , stimulating action of, on isolated preparations of the rat colon and human and rabbit taenia coli, 361
- , uptake and metabolism of by the isolated perfused rat heart, effect of pretreatment with 6-hydroxydopamine on, 270
- Catecholamine synthesis**, effect of inhibition, on central catecholamine-containing neurones in the developing albino rat, 41
- Catechol-O-methyl transferase**, changes in activity, in the rat submaxillary gland after surgical and pharmacological procedures, 393P
- Centrally active drugs**, stimulation of barbiturate metabolism by chronic administration of, 383P
- Central nervous system**, of the developing rat, effect of inhibition of tyrosine hydroxylase on the intraneuronal content of catecholamine-containing neurones in, 41
- Chironex fleckeri* Southcott, a cnidarian, cardiovascular effects of toxins isolated from, 154
- 2-Chloroadenosine**, cardiovascular actions of, 592
- Chlorpromazine**, effect on gastric secretion and ulceration in the Shay rat, 167
- , pharmacology of, clinical studies, 431P
- , pharmacology of, analysis, concentrations in plasma in man, and excretion of metabolites in man (T), 432P
- , pharmacology of, relevance of investigations of absorption, distribution and metabolism in animals to clinical studies (T), 432P
- Choline acetyltransferase**, levels in the caudate nucleus of the rat, effects of morphine on, 84
- Choline aryl ethers**, conformations and biological activities of cyclic analogues of, 381P

- Cholinergic agonists**, effect of iontophoretic application to guinea-pig pelvic ganglia, 26
- Cholinergic antagonists**, effect of iontophoretic application to guinea-pig pelvic ganglia, 26
- Cholinergic nerves**, contribution to secondary contractions of smooth muscle insignificant, 213
- Cholinergic sites**, effects of Δ^1 -tetrahydrocannabinol and cannabidiol at, 379P
- Cholinergic system**, relationship with morphine in rat brain, 84
- Computer programme**, to process liquid scintillation counting data (T), 432P
- Controlled environment chamber**, a (T), 432P
- Cotinine**, radiochemical assay of metabolism of small multiple doses in the cat, 521
- Corticosterone**, production by the rat adrenal gland *in vitro*, effects of stress and betamethasone on, 640
- Cyanides**, toxicity of, given by intramuscular injection, 423P

D

- Decarboxylases**, of histidine and ornithine, in chick embryo, 294
- Dependence**, on morphine in rats, an implanted reservoir of morphine solution for rapid induction of, 558
- 4-Deoxypyridoxine**, convulsive effects of, in photosensitive baboons (*Papio papio*), 403P
- Desipramine**, concentrations of, in the rat vas deferens and potentiation of noradrenaline response, 390P
- Diazepam**, method of studying anticonvulsant effects in man, 429P
- Dichloroisoprenaline**, actions on brain stem neurones of the cat, 462
- Diet**, comparative study of antral gastrin activity in herbivores, carnivores and omnivores, 629
- Diffusion**, of labelled substances through isolated rat diaphragm, 367
- Digitoxin**, tritiated, metabolism of in the isolated perfused guinea-pig liver, 661
- , tritiated, plasma concentration, uptake by liver and biliary excretion of, in the isolated perfused guinea-pig liver, 648
- Digoxin**, tritiated, metabolism of, in the isolated perfused guinea-pig liver, 661
- , tritiated, plasma concentration, uptake by liver, and biliary excretion of, in the isolated perfused guinea-pig liver, 648
- Dihydroergotamine**, actions on brain stem neurones of the cat, 462
- (\pm) **Dihydroxy ephedrine**, effect of, on adrenergic transmission in mesenteric arteries, 352
- (\pm) **Dihydroxy pseudoephedrine**, effect of, on adrenergic transmission in mesenteric arteries, 352
- 3,4-Dimethoxyphenylethylamine**, actions of, in relation to the effects of catecholamines on brain-stem neurones, 395P
- Diphenylhydantoin**, explanation for the discrepancy in reported cardiac electrophysiological actions of, 385P
- Diuretics**, effects of, on active sodium transport mechanisms in isolated frog skin, 552
- Dopamine**, actions of 3,4-dimethoxyphenylethylamine in relation to the effects of, on brainstem neurones, 395P
- , actions on brain stem neurones of the cat, 462
- , cerebral, role of in the action of psychotropic drugs, 406P
- , concentrations in rat tissues, effect of fenfluramine on, 57

Dopamine (contd.)

- , effect of brain content of, on spontaneous locomotor activity in rats, 691
- , effect of depletion in the rat brain, on spontaneous locomotor activity, 701
- , unilateral lesions of central neurones, effects of amphetamines and ephedrines on, 405P
- , uptake and metabolism by the isolated perfused rat heart, effect of pretreatment with 6-hydroxydopamine on, 270
- , uptake kinetics and metabolism of, in the isolated perfused rat heart, 256
- Drug metabolism**, stimulation of, by centrally active drugs, 383P
- Drug-protein binding**, influence of pH on, 76

E

- Eczema**, human allergic contact, recovery of prostaglandin-like fatty acids from, 416P
- Electrical stimulation**, contractile response of guinea-pig smooth muscle to, effect of cadmium and zinc ions on, 488
- , contractile response of guinea-pig smooth muscle to, inhibition by indomethacin, 540
- Embryo**, chick, histidine and ornithine decarboxylases in, 294
- Enzymes**, changes in catechol-O-methyl transferase activity in the rat submaxillary gland after surgical and pharmacological procedures, 393P
- , in rat heart, effect of adrenalectomy on, 329P
- , interactions of monoamine oxidase inhibition and sympathomimetic amines on the human iris, 428P
- Enzyme activity**, effects of morphine on, in the caudate nucleus of the rat, 84
- Ephedrine**, actions on brain stem neurones of the cat, 462
- , central actions of, after unilateral lesions of dopamine neurones, 405P
- 2-Ethylaminoadenosine**, cardiovascular actions of, 592
- Extracellular fluid**, effect of catecholamines and angiotensin on, and the effect of α - and β -adrenoceptor blockade, 302
- Exudate**, inflammatory, relationship between the anti-inflammatory and irritant properties of, 480

F

- Fatty acids**, prostaglandin-like, recovery from human allergic contact eczema using a skin perfusion method, 416P
- Fenfluramine**, action on monoamine stores of rat tissues, 57
- , 'S992', a derivative of, effects in man, 416P
- Fluorescence**, induced by formaldehyde in catecholamine containing neurones of the rat central nervous system, depletion by tyrosine hydroxylase inhibition, 41
- Fetus**, small intestine of the human, presence of α and β adrenoceptors in, 567
- Folate**, in serum and red cells, acute effect of phenytoin on, 414P

G

- Gaddum Memorial Lecture**, Third, 571
- Gallamine**, rate of onset and offset of neuromuscular blockade in the isolated rat diaphragm by, 339
- Ganglion cells**, guinea-pig pelvic, measurement of electrical activity after iontophoretic application of cholinergic drugs, 26
- Gastric acid**, preparation and assay of urogastrone, an inhibitor of secretion, 8

Gastric acid (contd.)

- , effect of aminoguanidine, chlorpromazine and NSD-1055 on, in the Shay rat, 167
- , histamine induced secretion of, in dogs, effect of isoprenaline on, 384P
- Gastric mucosa**, blood flow in, measurement by estimation of radioactive aniline clearance from canine gastric pouches, 384P
- Gastrin**, comparative study of antral activity in some mammals, 629
- Glutathione**, conjugation of sulphobromophthalein to in liver, inhibited by Saramycetin, 140
- Glycosides**, tritiated cardiac, metabolism of, in the isolated perfused guinea-pig liver, 661
- , tritiated cardiac, plasma concentration, uptake by liver and biliary excretion of, in the isolated perfused guinea-pig liver, 648
- Graduates**, overseas, training of, in pharmacology, 433

H

- Hexamethonium**, an anticurare effect of, at the mammalian neuromuscular junction, 380P
- , effect of, on salivary amylase secretion caused by nicotine, 285
- Histamine**, actions on the microvasculature of the rat, effect of prostaglandins E and F on, 507
- , content in the developing chick embryo, 294
- , contractile response of guinea-pig smooth muscle to, effect of cadmium and zinc ions on, 488
- , contractile response of guinea-pig smooth muscle to, inhibition by indomethacin, 540
- , effect of propranolol on the bronchoconstrictor response to, in the guinea-pig air overflow preparation, 122
- , gastric acid secretion in dogs induced by, effect of isoprenaline on, 384P
- , releasing action of prostaglandin E₂, 507
- , responses of guinea-pig ileum to, effect of pyrrolizidine alkaloids on, 684
- Histidine decarboxylase**, in chick embryo, 294
- Hormones**, changes occurring in rats dependent on barbiturates, 317
- , comparative study of antral gastrin activity in some mammals, 629
- Hydroxyamphetamine**, interaction with monoamine oxidase inhibitors on the human iris, 428P
- 6-Hydroxydopamine**, effect of pretreatment with, on uptake and metabolism of catecholamines by the isolated perfused rat heart, 270
- β -Hydroxyphenylethylamine**, actions on brain stem neurones of the cat, 462
- 5-Hydroxytryptamine**, cardiovascular responses to, effect of progesterone on, in the pithed rat, 187
- , in the rat brain, depletion by fenfluramine, 57
- , responses of cortical neurones to, effect of tricyclic anti-depressants on, 394P
- 5-Hydroxytryptamine-O-glucuronide**, a metabolite of endogenous 5-hydroxytryptamine, estimation in sheep urine, 530
- Hyoscine**, effect of, on secondary excitation of intestinal smooth muscle, 213
- Hypnotics**, hangover effects of, in man, 412P
- Hypotensive drugs**, hypotensive action from combination with propranolol, 408P
- Hypothalamo-pituitary-adrenal activity**, *in vitro* corticosteroidogenesis as an index of, 640

I

- Ileum**, guinea-pig isolated, investigation of the mechanism of action of oxotremorine on, 19

- Indomethacin**, factors influencing the inhibitory activity of, on carrageenin induced oedema, 132
- , mechanism of the inhibitory action of, on smooth muscle, 540
- Inflammation**, interaction between prostaglandins E and F given intradermally in the rat, 507
- , mechanism of the inhibitory action of indomethacin, an anti-inflammatory drug, on smooth muscle, 540
- , relationship between the anti-inflammatory and irritant properties of inflammatory exudate, 480
- Intestine**, evidence for excitatory α -adrenoceptors in, 361
- , in the rat, measurement of the absorption of practolol, 513
- Isoprenaline**, actions on brain stem neurones of the cat, 462
- , changes in regional blood flow in the rat induced by, effect of β -adrenoceptor blocking compounds on, 171
- , chronotropic and inotropic actions of, on the acutely denervated dog heart, effects of β -adrenoceptor blocking agents on, 387P
- , effect of, on adrenergic transmission in mesenteric arteries, 352
- , effect of, on extracellular fluid volume and contents, 302
- , effect of, on histamine induced gastric acid secretion in dogs, 384P
- , effects of β -adrenoceptor antagonists on effects of, on human isolated smooth muscle, 426P
- , effect of infusion on cardiac output and on regional blood flow in the rat, 171
- , intravenous, cardiorespiratory effects of, in dogs, 445
- , resistance to, and death from bronchial asthma, 410P
- , the O-methylated metabolite of, 3-methoxy-isoprenaline, 113

J

- Jellyfish**, *Chironex fleckeri* Southcott, cardiovascular effects of toxins isolated from, 154

K

- K⁺**, effects on the uptake of metaraminol by rabbit ventricular slices, 65
- Ketamine**, some cardiovascular effects of, in man, 411P
- Kinetics**, distribution, and intestinal absorption of practolol in the rat, 513
- , uptake, of dopamine in the isolated perfused rat heart, 256

L

- LB 46**, effect of, on isoprenaline induced changes in regional blood flow in the rat, 171
- Lactate**, effect of propranolol on unpleasant effects produced by infusion in normal subjects, 430P
- Levorphanol**, effects of, on the release of acetylcholine from rat brain slices, 398P
- Lignocaine**, explanation for the discrepancy in reported cardiac electrophysiological actions of, 385P
- Liquid scintillation counting data**, computer programme to process (T), 432P
- Liver**, guinea-pig perfused, process of uptake of cardiac glycosides in, 648
- , guinea-pig perfused, metabolism of cardiac glycosides in, 661
- , in man, inhibition of clearance of sulphobromophthalein from by Saramycetin, 140

- Locomotor activity**, in rats, effect of brain catecholamine content on, 691
 —, spontaneous importance of noradrenaline found in a functional pool in maintaining, in rats, 701
 (+)-**Lysergic acid diethylamide**, alterations in sleep/wakefulness cycle in rats following treatment with, 402P

M

- Mast cells**, interaction between prostaglandins E and F given intradermally in the rat, 507
Mast cell amines, releasing action of prostaglandin E₂, 49
Membranes, a possible role for nucleosideprotein complexes in, 419P
 —, structural comparisons of native and reaggregated, 382P
 —, synaptosomal, some effects of phenobarbitone on, 400P
Mersalyl, effects of, on active sodium transport mechanisms in isolated frog skin, 552
Metabolism, in the dog, study of adrenoceptors mediating, 387P
 —, of cardiac glycosides, studied in the isolated perfused guinea-pig liver, 661
 —, of dopamine in the isolated perfused rat heart, 256
 —, of endogenous 5-hydroxytryptamine in sheep, 530
 —, of serum folate, disturbed by acute administration of phenytoin, 414P
 —, of small multiple doses of (¹⁴C) nicotine in the cat, 521
 —, of tyramine, studied in migrainous patients, 413P
Metaraminol, actions on brain stem neurones of the cat, 462
 —, substitution for catecholamines in rat brain, effect on spontaneous locomotor activity, 701
 —, uptake by rabbit ventricular slices, effects of Na⁺ and K⁺ on, 65
Methacholine, contractile response of guinea-pig smooth muscle to, effect of cadmium and zinc ions on, 488
 —, effect of propranolol on the bronchoconstrictor response to, in guinea-pig air overflow preparation, 122
 —, inhibition of the stimulating action of atropine on acetylcholine release by rat brain, 600
2-Methoxyadenosine, cardiovascular actions of, 592
Methoxyisoprenaline, β -adrenoceptor antagonist activity of, 113
Methylamphetamine, some neurochemical effects of, in the rat, 198
N⁶-Methylated adenosines, cardiovascular actions of, 592
Methyldopa, hypotensive action from combination of propranolol and, 408P
 α -**Methylnoradrenaline**, actions on brain stem neurones of the cat, 462
 α -**Methyl-m-tyrosine**, effect of, on exploratory activity and brain catecholamines in rats, 691
 α -**Methyl-p-tyrosine**, effect of inhibition of tyrosine hydroxylase by, in the central nervous system of the developing rat, 41
Migraine, reduction of excretion of conjugated tyramine in, 413P
Mipaflox, effect of, on log dose-response curves to acetylcholine and oxotremorine in the guinea-pig isolated ileum, 19
Monoamine oxidase, effect of inhibition of, on catecholamine synthesis in the rat, 41

Monoamine oxidase (contd.)

- , inhibition of, interactions with sympathomimetic amines on the human iris, 428P
 —, in rat heart, effect of adrenalectomy on, 392P
Monoamines, concentrations in rat brain, effect of fenfluramine on, 57
 —, effect of intraventricular injection of, on activities of narcotic and narcotic antagonist analgesics, 401P
 —, responses of single cortical neurones to, effect of tricyclic antidepressants on, 393P
Morphine, activities of, after intra-ventricular injection of monoamines and cholinergic substances, 401P
 —, an implanted reservoir of solution, for rapid induction of physical dependence in rats, 558
 —, effects of, on choline acetyltransferase levels in the caudate nucleus of the rat, 84
 —, effects of, on the release of acetylcholine from rat brain slices, 398P
 —, quantitation of withdrawal jumping in the rat, 424P
Muscarinic receptors, in mammalian ganglia, lack of evidence for, 26
Muscle, intestinal smooth, basis for secondary excitation of, 213
 —, splenic vascular and capsular smooth in the dog, actions of prostaglandin F_{2 α} on, 1
 —, strips from guinea-pig stomach, inhibitory and excitatory effects of sympathomimetic amines on, 227

N

- Na⁺, effects on the uptake of metaraminol by rabbit ventricular slices, 65
Nalorphine, effects of, on the release of acetylcholine from rat brain slices, 398P
Naloxone, effects of, on the release of acetylcholine from rat brain slices, 398P
 —, morphine withdrawal effects in the rat precipitated by, jumping after, 424P
Narcotics, activities of analgesics, and activities of narcotic antagonist analgesics, after intraventricular injection of monoamines and cholinergic substances, 401P
 —, effects of, and effects of narcotic antagonists on the release of acetylcholine from rat brain slices, 398P
 —, effect of morphine on choline acetyltransferase levels in the caudate nucleus of the rat, 84
Nerve terminals, effects of adrenaline on, in the superior cervical ganglion of the rabbit, 331
Neural transmission, possible action of prostaglandin F_{2 α} at cardioregulatory and vasomotor centres in the hind brain, 454
Neuromuscular blockade, comparison of the action of (+)-tubocurarine and piperazine in the leech, frog, rat and cat, 421P
 —, dynamics of, determination of parameters for diffusion through muscle interspaces, 367
 —, rate of onset and offset, in the isolated rat diaphragm, 339
Neuromuscular transmission, effects of bretylium tosylate, 607
 —, effects of procaine in rat phrenic nerve diaphragm preparation, 94
Neurotransmission, synaptic, role of transmitter uptake mechanisms in, 571
Nicotine, effect of iontophoretic application to guinea-pig pelvic ganglia, 26
 —, effects of, on salivary amylase secretion from rabbit parotid gland, 285

Nicotine (contd.)

- , radiochemical assay of metabolism of small multiple doses in the cat, 521
- , response of the perfused vessels of the rabbit ear to, 500

Nitrazepam, hangover effects of in man, 412P

- , method of studying anti-convulsant effects in man, 429P

Noradrenaline, actions of 3,4-dimethoxyphenylethylamine in relation to the effects of, on brainstem neurones, 395P

- , actions on brainstem neurones of the cat, 462
- , bioassay of, use of rat superfused aortic strip for, 711
- , cardiovascular responses to, effects of progesterone on, in the pithed rat, 187
- , concentrations in rat tissues, effect of fenfluramine on, 57
- , effect of, on extracellular fluid volume and contents, 302
- , effect of brain content of, on spontaneous locomotor activity in rats, 691
- , effects on discharge frequency in fibres of cervical sympathetic nerve in cats and dogs, compared with those of angiotensin, 675
- , evidence that angiotensin enhances release of, during sympathetic nerve stimulation, 239
- , found in a functional pool, importance of, for maintaining spontaneous locomotor activity in rates, 701
- , possible involvement in determining the activity of catechol-O-methyl transferase in rat submaxillary gland, 393P
- , relaxations of the rat colon induced by, effect of oxprenolol on, 361
- , response to in the rat vas deferens, effect of desipramine on, 390P
- , responses of cortical neurones to, effect of tricyclic anti-depressants on, 394P
- , uptake and metabolism by the isolated perfused rat heart, effect of pretreatment with 6-hydroxydopamine on, 270

NSD-1055, effect on gastric secretion and ulceration in the Shay rat, 167**Nucleoside-protein complexes**, in membrane, a possible role for, 419P

O

Ornithine decarboxylase, in chick embryo, 294

- **Ouabain**, tritiated, metabolism of, in the isolated perfused guinea-pig liver, 661
- , tritiated, plasma concentration, uptake by liver, and biliary excretion of, in the isolated perfused guinea-pig liver, 648

Oxotremorine, inhibition of the stimulating action of atropine on acetylcholine release by rat brain, 600

- , investigation of the mechanism of action on the guinea-pig isolated ileum preparation, 19

Oxprenolol, effect of blockade of β -adrenoceptors in rat colon by, on the relaxations induced by catecholamines, 361

- , effects of, on effects of isoprenaline and acetylcholine on human isolated smooth muscle, 426P

P

Paracetamol, metabolism of, and excretion in paracetamol overdose complicated by hepatic necrosis (T), 418P**Parachlorophenylalanine**, effect of, on the behaviour of castrated male rats, 404P**Paralysis**, neuromuscular, produced by procaine, 94**Peptides**, comparison of ranatensin with bradykinin, angiotensin and eledoisin-like peptides, 622**pH**, influence on aggregation and protein binding of barbituric acid and amylobarbitone, 76**Phenobarbitone**, some effects of, on the properties of synaptosomes, 400P**Phenoxybenzamine**, actions on brain stem neurones of the cat, 462

- , effect of blocking doses on splenic vascular resistance in the dog produced by low arterial concentrations of prostaglandin $F_{2\alpha}$, 1
- , tritiated, use in an attempt to locate the α -adrenoceptor, 278

Phentolamine, actions on brain stem neurones of the cat, 462

- , effect of, on response of extracellular fluid volume and content to catecholamines and angiotensin, 302
- , effect of, on response of guinea-pig stomach preparation to sympathomimetic amines, 227
- , myocardial and haemodynamic effects of, 437

Phenylbutazone, factors influencing the inhibitory activity of, on carrageenin induced oedema, 132**Phenylephrine**, actions on brain stem neurones of the cat, 462

- , interaction with monoamineoxidase inhibitors on the human iris, 428P

Phenylethylamines, comparison of their effects on biogenic amines and their precursor amino-acids in rat brain, 198**Phenytol**, acute effect of, on serum folate concentration, 414P**Photosensitivity**, in baboons, enhancement by low doses of 4-deoxy pyridoxine, 403P**Piperazine**, and (+)-tubocurarine, comparison of the neuromuscular blocking action of, in leech, frog, rat and cat, 421P**Polypeptide**, effects of ranatensin on isolated smooth muscle, 622**Potassium ions**, contractile response of guinea-pig smooth muscle to, effect of cadmium and zinc ions on, 488**Potentials**, cardiac action, effects of diphenylhydantoin and lignocaine on, 385P

- , endplate, effect of hexamethonium on, after blockade by tubocurarine, 380P

- , endplate, effect of procaine on, in rat phrenic nerve-diaphragm preparation, 94, 105

- , excitatory postsynaptic, mechanism of the effect of adrenaline on, 331

- , ganglionic action, in rabbit, blockade by cyclic analogues of choline aryl ethers, 381P

- , in the rat phrenic nerve diaphragm preparation, effects of bretylium, 607

Practolol, distribution kinetics and intestinal absorption of, in the rat, 513

- , effect of, on effects of isoprenaline and acetylcholine on human isolated smooth muscle, 426P
- , effect of, on isoprenaline induced changes in regional blood flow in the rat, 171

- , effect of, on the response to bronchoconstrictors drugs in the guinea-pig air overflow preparation, 122

Pressor response, to angiotensin II, effect of spinal section and stellate ganglionectomy on, 177**Prinidolol**, effects of, on effects of isoprenaline and acetylcholine on human isolated smooth muscle, 426P**Procaine**, changes in the time course of transmitter action produced by, 105

- , neuromuscular paralysis produced by, in the rat phrenic nerve-diaphragm preparation, 94

- Progesterone**, effects of, on cardiovascular responses to amines and to sympathetic stimulation in the pithed rat, 187
- Propranolol**, actions on brain stem neurones of the cat, 462
- , and other hypotensive drugs, hypotensive action from combination of, 408P
 - , effect of, on effects of isoprenaline and acetylcholine on human isolated smooth muscle, 426P
 - , effect of, on hypoxia induced myocardial vasodilatation, 387P
 - , effect of, on isoprenaline induced changes in regional blood flow in the rat, 171
 - , effect of, on lactate induced phenomena in normal subjects, 430P
 - , effect of, on the inhibitory action of (\pm) dihydroxy ephedrine and (\pm) dihydroxy pseudoephedrine on the vasoconstrictor responses of mesenteric arteries, 352
 - , effect of, on the response of the cardiovascular system of the dog to prostaglandin $F_{2\alpha}$, 454
 - , effect of, on the response of guinea-pig stomach preparations to sympathomimetic amines, 227
 - , effect of, on the response to bronchoconstrictor drugs in the guinea-pig air overflow preparation, 122
 - , effects in angina pectoris, log dose-response curve to assess the effects, 408P
- Prostaglandin**, E and F, given intradermally in the rat, interaction between, 507
- , $F_{2\alpha}$, actions on the splenic vascular and capillary smooth muscle in the dog, 1
 - , $F_{2\alpha}$, central autonomic effects of, on the cardiovascular system of the dog, 454
- Prostaglandins**, intradermal, cutaneous reactions to, 49
- Pyresis**, experimental, influence of the duration on salicylate antipyresis in the rabbit, 344
- Pyrogallol**, effect of, on cardiovascular responses to amines and to sympathetic stimulation in the pithed rat, 187
- Pyrogen**, endogenous, fever induced by, antipyretic effect of salicylate treatment at various times during, 344
- Pyrrolizidine alkaloids**, actions on muscarinic receptors in the guinea-pig ileum, 684
- R**
- Ranatensin**, a polypeptide from frog skin, effects of, on isolated smooth muscle, 622
- Receptors**, muscarinic, in the guinea-pig ileum, effects of pyrrolizidine alkaloids on, 684
- Renin-angiotensin system**, central components of the, 177
- S**
- 'S992'**, a derivative of fenfluramine, effects in man, 416P
- Salbutamol**, intravenous, cardiorespiratory effects of, in dogs, 445
- Salicylates**, antipyretic effect of, influence of the duration of experimental fever on, 344
- Saliva**, secretion of amylase in, effect of nicotine on, 285
- Saramycetin**, inhibition of clearance of organic dyes by, 140
- Sexual behaviour**, increased in castrated male rats treated with parachlorophenylalanine, 404P
- Skin**, effect of intradermal injection of prostaglandins in rat and man, 49
- Sleep/wakefulness cycle**, alterations in rats, following treatment with (+)-lysergic acid diethylamide, 402P
- Smoking**, metabolism and distribution of small multiple doses of nicotine in the cat, 521
- Smooth muscle**, isolated, effects of ranatensin on, 622
- , mechanism of the inhibitory action of indomethacin on, 540
 - , of the cat, a fine-structural study, of the number of pinocytotic vesicles present at surface opposite terminal areas of adrenergic axons, 278
 - , spasmolytic effects of cadmium and zinc ions on, 488
- Sodium transport**, in isolated frog skin, effects of the diuretics triamterene and mersalyl on active mechanisms, 552
- Sorbitol**, comparison of distribution in guinea-pig smooth muscle with that of cadmium and zinc ions, 488
- Sotalol**, effect of, on response of guinea-pig stomach preparation to sympathomimetic amines, 227
- Spleen**, isolated blood perfused of the dog, actions of prostaglandin $F_{2\alpha}$ in, 1
- Statistical techniques**, multivariate, applied to pharmacological research, 425P
- Stomach**, anaesthetized rat, quantitative wash-out of, 419P
- Stress**, effects of, on the production of corticosterone by the rat adrenal gland *in vitro*, 640
- 2-Substituted adenosine analogues**, cardiovascular actions of, 592
- Sulphobromophthalein**, inhibition of clearance in man by Saramycetin, 140
- Sympathetic nerve**, in cats and dogs, effects of angiotensin and noradrenaline on discharge frequency in fibre preparations of, 675
- , stimulation of, effects of progesterone on cardiovascular responses to, in the pithed rat, 187
 - , stimulation of, effect of prostaglandin $F_{2\alpha}$ on the responses of dog spleen to, 1
 - , stimulation of, evidence that angiotensin enhances transmitter release during, 239
- Sympathomimetic amines**, and antagonists, actions of, on brain stem neurones of the cat, 462
- , inhibitory and excitatory effects of, on muscle strips from the guinea-pig stomach, 227
 - , interaction with monoamine oxidase inhibitors on the human iris, 428P
 - , used to show the presence of α and β -adrenoceptors in the human foetal small intestine, 567
- T**
- Temperature**, effect of, on the actions of acetylcholine and related drugs in the perfused rabbit ear, 500
- , effect of, on the inhibitory action of anti-inflammatory drugs on carrageenin induced oedema, 132
 - , effect of, on the intra-hepatic vasculature, 710
- Tetrazepam**, effect of, on exploratory activity and brain catecholamines in rats, 691
- Δ^1 -**Tetrahydrocannabinol**, some actions of, at cholinergic junctions, 379P
- Thiopentone sodium**, method of studying anticonvulsant effects in man, 429P
- Tortuosity factor**, for the diffusion of neuromuscular blocking agents in rat isolated diaphragm, 339
- , for the diffusion of (14 C) sucrose in rat isolated diaphragm, 367
- Toxicity**, of cyanides, given by intramuscular injection, 423P
- Toxins**, isolated from the cnidarian *Chironex fleckeri* Southcott, cardiovascular effects of, 154
- Trace metals**, spasmolytic effects of cadmium and zinc ions on guinea-pig isolated ileum preparation, 488

Training, of overseas graduates in pharmacology, 433

Transmission, adrenergic, effect of (\pm) dihydroxyephedrine and (\pm) dihydroxy pseudoephedrine on, in mesenteric arteries, 352

—, neuromuscular, effects of procaine in the rat phrenic nerve-diaphragm preparation, 94

Transmitter, release of, mechanism of the decrease of, by adrenaline, 331

Transmitter substances, neuronal uptake mechanisms, 571

Triamterene, effects of, on active sodium transport mechanisms in isolated frog skin, 552

Tryptophan, concentrations in rat tissue, effect of fenfluramine on, 57

Tubocurarine, comparison of effect on neuromuscular transmission in rat with that of procaine, 94

—, effect of hexamethonium on endplate potentials blocked by, 380P

—, rate of onset and offset of neuromuscular blockade in the isolated rat diaphragm by, 339

(+)-**Tubocurarine**, and piperazine, comparison of the neuromuscular blocking action of, in leech, frog, rat and cat, 421P

Tyramine, cardiovascular responses to, effect of progesterone on, in the pithed rat, 187

—, interaction with monoamine oxidase inhibitors on the human iris, 428P

—, metabolism of, and migraine: a metabolic defect, 413P

p-**Tyramine**, actions on brain stem neurones of the cat, 462

Tyrosine, concentrations in rat tissues, effect of fenfluramine on, 57

Tyrosine hydroxylase, effect of inhibition, on catecholamine-containing neurones in rats, 41

U

Ulceration, gastric, effect of aminoguanidine, chlorpromazine and NSD-1055 on, in the Shay rat, 167

Uptake, of catecholamines by the isolated, perfused rat heart, effect of pretreatment with 6-hydroxydopamine on, 270

—, of dopamine, two mechanisms for, in the isolated perfused rat heart, 256

Urine, human, extraction of urogastrone from, 8

Urogastrone, an inhibitor of gastric acid secretion, preparation and assay of, 8

V

Vasculature, intra-hepatic, effect of temperature on, 710

Vasodilatation, myocardial induced by hypoxia, effect of propranolol on, 387P

W

Wash-out, quantitative, of anaesthetized rat stomach, 419P

Withdrawal effects, of morphine, precipitated by naloxone, 424P

Withdrawal symptoms, ease of production in morphine-dependent rats, using the implanted reservoir method, 558

Z

Zeocarb, a cationic polystyrene resin, use in extraction of urogastrone from human urine, 8

Zinc ions, spasmolytic effects of, on guinea-pig isolated ileum preparation, 488

Instructions to Authors

1. **Manuscripts** (2 copies) should be typed in double spacing on one side of paper not larger than foolscap (33×20.5 cm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. A short title containing not more than 40 letters should also be suggested.
2. **A short summary of results and conclusions** (arranged in numbered paragraphs), **tables and legends to figures** should be typed on separate sheets of paper.
3. **References** should be collected at the end of the paper. They should include the authors' names, year of publication, title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.
4. **Figures** should NOT BE LARGER THAN FOOLSCAP (33×20.5 cm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided and both ordinates and abscissae should be calibrated.
5. **Lettering** on figures should be inserted in PENCIL. Symbols which are to appear in figures or legends should be chosen from the following:
 \times $+$ \bullet \blacksquare \circ \square \triangle \blacktriangle ∇ \blacktriangledown \odot \ominus \diamond
6. **Photographs and photomicrographs** should be printed on glossy paper and should be larger than the size required for reproduction.
7. **Tables** ideally should not have more than 84 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 130 characters to a line, unless absolutely unavoidable.
8. **An abstract** of about 100 words suitable for inclusion in *International Abstracts of Biological Sciences* should be typed on a separate sheet.

General remarks. A recent issue of the journal is a good guide to style. Papers are accepted only if accompanied by a statement that they have not and will not be published in whole or in part in any other Journal.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Fifty reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs.
