F. Hobbiger	D. F. Sharman
J. R. Hodges	Hannah Steinberg
Margarethe Holzbauer	F. M. Sullivan
J. R. Vane	

Editorial assistance is provided by the staff of Nature

Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr. H. M. Adam, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the suggestions inside the back cover.

Subscriptions. Three volumes of the journal are published annually, each volume containing four numbers. The annual subscription rate is £18.50 in the United Kingdom and Republic of Ireland; \$55.50 U.S.A. and Canada (by air freight; second class postage paid at New York, N.Y.); £18.50 all other overseas countries. Subscriptions should be sent to: Subscriptions Department, Macmillan Journals Ltd., Brunel Road, Basingstoke, Hampshire, England. Alternatively, the journal can be ordered through a subscription agent or bookseller.

Advertisements: Applications for advertising space and rates should be sent to: J. Ashley-Brown, Advertisement Manager, *British Journal of Pharmacology*, Macmillan Journals Ltd., 4 Little Essex Street, London, WC2R 3LF, England. Tel: 01-836 6633. Direct line: 01-405 3013.

BRITISH JOURNAL OF PHARMACOLOGY

The following are some of the manuscripts which will be published in future issues:

BARBER, H. E. and BOURNE, G. R.: Determination of the renal clearance of inulin in rats: lowered values at low urine flow rates.

BEGENT, NICOLA A. and BORN, G. V. R.: Comparison of the effects of drugs on the aggregation of hamster platelets *in vivo* and *in vitro*.

CHRISTIE, JANICE E. and CROW, T. J.: Turning behaviour as an index of the action of amphetamines and ephedrine on central dopamine-containing neurones.

DHAWAN, B. N. and DUA, P. R.: Evidence for the presence of α -adrenoceptors in the central thermoregulatory mechanism of rabbits.

EVANS, M. J.: Saxitoxin, tetrodotoxin and the frog motor end-plate.

FELDBERG, W. and SAXENA, P. N.: Effects of adrenoceptor blocking agents on body temperature.

HOLZBAUER, MARGARETHE: *In vivo* production of steroids with central depressant actions by the ovary of the rat.

PARRATT, J. R. and WINSLOW, EILEEN: Actions of quazodine (MJ 1988) on smooth muscle.

RAND, M. J. and VARMA, B.: Effects of the muscarinic agonist McN-A-343 on responses to sympathetic nerve stimulation in rabbit ear artery.

SINGH, B. N. and VAUGHAN WILLIAMS, E. M.: Investigations of the mode of action of a new antidysrhythmic drug, Kö1173.

BRITISH JOURNAL OF PHARMACOLOGY

[THE] INTERNATIONAL SYSTEM OF UNITS (SI)

The British Journal of Pharmacology uses the **symbols** recommended in the SI (Système Internationale) (see *Symbols, Signs and Abbreviations Recommended for British Scientific Publications* (1969) (London: The Royal Society: price 35p.)). It is the policy of the Editorial Board to adopt SI **units**, although the use of certain non-SI units will for the time being be permitted. Full details of the changes involved will be published in a forthcoming "Instructions to Authors". The following is a list (a) of some of the commoner units with their recommended symbols, (b) of some non-SI units which may still be used, and (c) of units which will no longer be acceptable.

(a) SI units with recommended symbols

Unit	Correct symbol
kilogramme	kg
second, millisecond	s ms
mole, millimole, micromole,	mol mmol μ mol
nanomole, picomole	nmol pmol
metre, centimetre, millimetre,	m cm mm
micrometre	μ m
Hertz	Hz

(b) Some permitted non-Si units

ångström	Å (= 10^{-10} m = 0.1 nm)
gramme	g
minute	min
hour	h
molarity (mol/litre)	M
calorie	cal (4.184 J) (Conversion factor to be given as a footnote at first citation or in Methods)
millimetre of mercury	mmHg (1.333 mbar) (Conversion factor to be given as a footnote at first citation or in Methods)
millibar	mbar
poise	P
curie	Ci
litre	l. (where there is danger of confusion between the numeral '1' and the letter 'l', 'litre' should be written in full, and always at the end of a sentence)
millilitre, microlitre	ml μ l
degree Celsius	°C

(c) Units no longer acceptable

inch, foot, pound, pound per square inch, °F.

Expressions such as cycles per second (c/s) will no longer be accepted. Frequencies should be expressed in the appropriate approved symbols: thus a stimulation frequency should be given in Hz (irregular or occasional events should be given per unit time, e.g. s⁻¹, h⁻¹). When there is more than one solidus in an expression, parentheses should be used to eliminate ambiguity, e.g. (mg/kg)/day.

Instructions to Authors

1. **Manuscripts** (2 copies) should be typed in double spacing on one side of paper not larger than foolscap (33×20·5 cm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. A short title containing not more than 40 letters should also be suggested.
2. **A short summary of results and conclusions** (arranged in numbered paragraphs), **tables and legends to figures** should be typed on separate sheets of paper.
3. **References** should be collected at the end of the paper. They should include the authors' names, year of publication, title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.
4. **Figures** should NOT BE LARGER THAN FOOLSCAP (33×20·5 cm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided and both ordinates and abscissae should be calibrated.
5. **Lettering** on figures should be inserted in PENCIL. Symbols which are to appear in figures or legends should be chosen from the following:
× + ● ■ ○ □ △ ▲ ▽ ▼ ⊙ ⊖ ⊞
6. **Photographs and photomicrographs** should be printed on glossy paper and should be larger than the size required for reproduction.
7. **Tables** ideally should not have more than 84 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 130 characters to a line, unless absolutely unavoidable.
8. **An abstract** of about 100 words suitable for inclusion in *International Abstracts of Biological Sciences* should be typed on a separate sheet, giving the author's name and address and the title of the paper.

General remarks. A recent issue of the journal is a good guide to style. Papers are accepted only if accompanied by a statement that they have not and will not be published in whole or in part in any other Journal.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs.

BRITISH JOURNAL OF PHARMACOLOGY

October 1971 Volume 43 Number 2

page

Systematic Pharmacology

- 259 GREENWAY, C. V. and MURTHY, V. S. Mesenteric vasoconstriction after endotoxin administration in cats pretreated with aspirin. (SP1)
 270 CHERNOFF, N. and GRABOWSKI, C. T. Responses of the rat foetus to maternal injections of adrenaline and vasopressin. (SP1, AP3)
 279 MADAN, B. R. Effect of glucagon on ventricular arrhythmias after coronary artery occlusion and on ventricular automaticity in the dog. (SP1, AP3)

Autopharmacology

- 287 ELIASH, SARAH and WEINSTOCK, MARTA. Role of adrenergic neurone blockade in the hypotensive action of propranolol. (AP1, DM2)
 295 BURNSTOCK, G., EVANS, BARBARA, GANNON, B. J., HEATH, J. W. and JAMES, VICKI. New method of destroying adrenergic nerves in adult animals using guanethidine. (AP2)
 302 EYRE, P. Pharmacology of bovine pulmonary vein anaphylaxis *in vitro*. (AP2)

Pharmacokinetics

- 312 MCQUEEN, E. G. and WARDELL, W. M. Drug displacement from protein binding: isolation of a redistributional drug interaction *in vivo*. (PK1)
 325 WARDELL, W. M. Drug displacement from protein binding: source of the sulphadoxine liberated by phenylbutazone. (PK1)
 335 OLATUNDE, I. A. Chloroquine concentrations in the skin of rabbits and man. (PK1, CP)
 341 HOBBIER, F. and PECK, A. W. Relative importance of the enzymic hydrolysis of suxamethonium in plasma and tissues: studies in cats. (PK2, PK1)
 349 REILLY, MARGARET A. and SCHAYER, R. W. Further studies on histamine catabolism *in vivo*. (PK2, PK1, AP2)
 359 KIRPEKAR, S. M. and PUIG, MARGARITA. Effect of flow-stop on noradrenaline release from normal spleens and spleens treated with cocaine, phentolamine or phenoxybenzamine. (PK3, AP1)

Drug Mechanisms

- 370 GREEN, A. L. and MARSHALL, I. G. Nicotinic stimulant action of some tolyl and xylol analogues of 1,1-dimethyl-4-phenylpiperazinium (DMPP). (DM1, DM2, AP1)
 379 KALSNER, S. Mechanism of potentiation of contractor responses to catecholamines by methylxanthines in aortic strips. (DM2, DM1, PK2)

Clinical Pharmacology, Experimental Therapy

- 389 CONOLLY, M. E., DAVIES, D. S., DOLLERY, C. T. and GEORGE, C. F. Resistance to β -adrenoceptor stimulants (a possible explanation for the rise in asthma deaths). (CP, AP1)

Chemotherapy

- 403 EVANS, D. P., HOSSACK, MARGARET and THOMSON, D. S. Inhibition of contact sensitivity in the mouse by topical application of corticosteroids. (CT)

SHORT COMMUNICATIONS

- 409 GAGNON, D., PARK, W. K. and REGOLI, D. Specific antagonists for the myotropic action of angiotensin II and angiotensin I on the isolated rat colon. (DM2)
 411 ORMEROD, L. P. and WESTON, A. H. Adrenoceptors in the guinea-pig colon. (AP1, DM2)
