Margarethe Holzbauer	F. M. Sullivan
J. R. Vane	

Editorial assistance is provided by the staff of Nature

Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr. H. M. Adam, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the suggestions inside the back cover.

Subscriptions. Three volumes of the journal are published annually, each volume containing four numbers. The annual subscription rate is £18.50 in the United Kingdom and Republic of Ireland; \$58.20 U.S.A. and Canada (by air freight; second class postage paid at New York, N.Y.); £18.50 all other overseas countries. Subscriptions should be sent to: Subscriptions Department, Macmillan Journals Ltd., Brunel Road, Basingstoke, Hampshire, England. Alternatively, the journal can be ordered through a subscription agent or bookseller.

Advertisements: Applications for advertising space and rates should be sent to: J. Ashley-Brown, Advertisement Manager, *British Journal of Pharmacology*, Macmillan Journals Ltd., 4 Little Essex Street, London, WC2R 3LF, England. Tel: 01-836 6633. Direct line: 01-405 3013.

CONNECTIVE TISSUE RESEARCH

An International Journal

EDITOR-IN-CHIEF: INES MANDL

College of Physicians & Surgeons, Columbia University

The aim of this new journal is to highlight the most significant and original contributions in the field of connective tissue research; to relate the many facets of the subject; and to afford easier communication amongst those who wish to remain informed of current developments in the entire field while actively engaged in more narrowly focused studies.

Interdisciplinary in approach, the journal will attempt to cover in most issues advances in basic knowledge of structure, biosynthesis and metabolism of collagen, elastin and proteoglycans as well as pertinent new applications in the laboratory and clinic.

In addition to original, full-length papers this journal will occasionally publish short communications of novel concepts or reports of papers presented at meetings.

Connective Tissue Research will be of interest to investigators in: biochemistry; biophysics; cell biology; immunology; microbiology; molecular biology; pathology; physiology; surgery; experimental research of aorta, bone, cartilage, cornea, lung, sclera, skin and teeth; formation, development and ageing of connective tissue elements; and wound healing.

A descriptive brochure and subscriptions information are available from Gordon and Breach Science Publishers Ltd. (Department BP), 42 William IV Street, London W.C.2, England.

BRITISH JOURNAL OF PHARMACOLOGY

Short Communications

Papers for consideration should be marked "Short Communication", and be submitted in duplicate to the Secretary of the Editorial Board. They must be less than 1,200 words in length and may contain one figure or one table. To reduce publication delay to a minimum (about 6 weeks), correspondence between author and editor must be avoided. Manuscripts should therefore be prepared with great care and the customary form used in the Journal strictly observed (see instructions on the inside covers of a recent issue of the Journal). Short Communications will be accepted on the understanding that if authors' proofs are not returned before the journal goes to press, the Communication will be published with the Press Editor's corrections only. Communications not accepted for publication will be returned in approximately 2 weeks.

INDEX TO VOLUME 44

SUBJECT INDEX

A

- Acetylcholine**, effect on rat ureter *in vivo*, 628
 —, responses of the isolated perfused human spleen to, compared with those of dog spleen, 17
- Actinomycin D**, effect on stress-induced changes of myocardial glycogen and blood glucose concentration in rats, 814
- Action potentials**, effect of 2,4-dinitrophenol on electrical and mechanical activity, metabolism and ion movements in guinea-pig ventricular muscle, 711
- Addiction**, comparison of the effects of dexamphetamine and 1-benzylpiperazine in former addicts, 369P
- Adenosine triphosphatase**, activities in cerebral cortex, effects of phenobarbitone on, 338P
 —, atropine resistant excitation of the urinary bladder: the possibility of transmission via nerves releasing a purine nucleotide, 451
 —, effect on the flat preparation of rabbit rectum, 366P
- Adrenaline**, effect of infusion on hepatic blood volume in the anaesthetized cat, 177
 —, effects on transsinusoidal fluid filtration in the cat liver, 185
 —, effect on rat ureter *in vivo*, 628
 —, effect compared with that of amphetamine on the transmission of repetitive impulses through the isolated superior cervical ganglion of the rat, 71
 —, inhibition of accumulation in arterial smooth muscle by steroids, 361P
 —, responses of the isolated perfused human spleen to, compared with those of dog spleen, 17
 —, use of cumulative dose-response curves to assess potency on the cat soleus muscle, 589
- Adrenergic innervation**, inhibitory nature of the, in the guinea-pig vas deferens, 359P
- Adrenergic mechanisms**, central, in the release of antidiuretic hormone, 617
- Adrenergic nerves**, recovery of vascular function in the rat after chemical sympathectomy with 6-hydroxydopamine, 357P
 —, uptake of desipramine by the rat vas deferens, 262
- Adrenergic nerve terminals**, *in vitro* effect of 6-hydroxydopamine on isolated rat atria, 583
- Adrenergic neurones**, modification by prostaglandin E_2 of the response of guinea-pig isolated vasa deferentia and atria to adrenergic stimuli, 689
- Adrenergic systems**, long-lasting peripheral and central effects of 6-hydroxydopamine in rats, 233
- Adrenoceptors**, clinical investigation of an antagonist, AH 5158A, 286
- α -Adrenoceptors**, action of amphetamine on, at presynaptic sites, 71
 —, comparison of blockade at, by thymoxamine and phentolamine in peripheral arteries and veins of man, 294
 —, role in regulating noradrenaline overflow by nerve stimulation, 672
- α -Adrenoceptor blocking agents**, abolition of the nerve-induced responses of the isolated vas deferens of the young rat by, 160
 —, inhibition from indoramin in man, 378P
 —, is thymoxamine specific, 362P
 —, quantitative analysis on isolated organs of the autonomic blocking properties of indoramin hydrochloride, 52
- β -Adrenoceptor antagonists**, comparative study on airway resistance and heart rate in the guinea-pig, 642
- β -Adrenoceptor blockade**, and stimulation, effect on the airways of normal subjects (T), 390P
- β -Adrenoceptor blocking agents**, effect on post-stimulatory atrial flutter in the dog, with observations on the participation of adrenergic mechanisms in this experimental arrhythmia, 109
 —, preliminary studies of Ro 3-3528 in man, 377P
- Aggressiveness**, factors influencing behaviour elicited by marihuana in food-deprived rats, 794
- AH 5158A**, clinical investigation of adrenoceptor blocking action of, 286
- Alprenolol**, effect of, on poststimulatory atrial flutter in the dog, with observations on the participation of adrenergic mechanisms in this experimental arrhythmia, 109
- Amantadine**, effect on the urinary excretion of some monoamines and metabolites in normal and parkinsonian subjects, 386P
- Amino-acids**, selective inhibition by glycine of some somatic reflexes in the cat, 404
- γ -Aminobutyric acid**, antagonism by picrotoxin in the feline cerebral cortex, 807
 —, effect of centrally acting drugs on uptake by the brain, 339P
- Amino-oxyacetic acid**, effects on the central nervous system and on skeletal muscle in the chicken, 31
- Amitriptyline**, cardiotoxicity of tricyclic antidepressants, 371P
 —, effect on drug metabolism, 372P
- Amnesia**, anterograde effects of pethidine, hyoscine and diazepam in adults, 140
- Amphetamine**, brain monoamines and the increase in motor activity in the rat after, 347P
 —, effect on the transmission of repetitive impulses through the isolated superior cervical ganglion of the rat, 71
 —, effects on the turnover rate of brain catecholamines and motor activity, 742
 —, inability to reverse reserpine-induced hypothermia in adrenalectomized mice, 353P
 —, toxicity and brain concentrations in adult and developing rats, 352P
- Amylobarbitone**, abolition of social dominance hierarchies in laboratory rats, 351P
 —, metabolism in patients with chronic liver disease, 549
- Amylobarbitone sodium**, effect of age on hydroxylation in man (T), 390P
- Anaesthesia**, biphasic response of limb blood flow to intravenous methoxamine in anaesthetized man, 375P

Anaesthesia (cont.)

—, induced by thiopentone, effects of chronic and acute cannabis treatment on, in rabbits, 346P

Anaesthetics, effects of γ -hydroxybutyrate on chick behaviour, electrocortical activity and crossed extensor reflexes, 593

Analgesics, effect of morphine on the cerebral contents of metabolites of dopamine in normal and tolerant mice, 45

Anaphylactic shock, bovine, production of kinins in, 311

Anaphylaxis, activation of anaphylactic histamine release by calcium and strontium ions, 326P

—, effect of phospholipids on histamine release, 327P

—, effects of calcium on dextran anaphylactoid oedema in the rat, 314

—, resistance of rats to carrageenan and to adjuvant-induced arthritis, 327P

Angiotensin, effect of infusion on hepatic blood volume in the anaesthetized cat, 177

—, effects of clonidine on its central action, 779

—, responses of the isolated perfused human spleen to, compared with those of dog spleen, 17

—, selective inhibition of pressor responses to, in the pithed rat, by tetraethylthiuram disulphide and sodium diethyldithiocarbamate, 192

¹⁴C-Aniline, effects of prostaglandin E_2 on rat gastric mucosal blood flow determined by a clearance technique with, 331P

Anorexia, central stimulant action of fenfluramine in the rat, 342P

—, effects of amphetamine on the turnover rate of brain catecholamines and motor activity, 742

Anoxia, effects on electrical and mechanical activity, metabolism and ion movements in guinea-pig ventricular muscle compared with those of 2,4-dinitrophenol, 711

Anthelmintics, some pharmacological properties of piperazine, 169

Antiarrhythmia, nature of the calcium dependent potassium leak induced by (+)-propranolol, and its possible relevance to the drug's antiarrhythmic effect, 271

Antibiotics, effect of tetracyclines and 4-epiderivatives on the isolated dog ureter, 788

Anticonvulsants, mode of action of a new antidyrrhythmic drug, K6 1173, 1

Antidepressants, inability to reverse reserpine-induced hypothermia in adrenalectomized mice, 353P

Antidiuretic hormone, central cholinergic and adrenergic mechanisms in the release of, 617

—, inhibition of action by lithium ions, in the rat kidney and toad bladder, 223

Anti-inflammatory component, of inflammation exudate, of irritancy from, 317

Anxiety, effect of oxypertine in baboons, 348P

Arthritis, adjuvant-induced, resistance of dextran-resistant rats to, 327P

Arrhythmia, experimental, observations on participation of adrenergic mechanisms in, 109

Arrhythmias, experimental cardiac, effect of physostigmine in dogs, 397

Ascorbic acid, effect on angiotensin pressor responses in the pithed rat, 192

—, effects of emetine on metabolism, 810

Atrial flutter, poststimulatory, effect of β -adrenoceptor blocking agents in the dog, with observations on the participation of adrenergic mechanisms in this experimental arrhythmia, 109

Atropine, effect on the nerve-induced responses of the isolated vas deferens of the young rat, 160

—, effect on rat ureter *in vivo*, 628

—, effect on ventricular fibrillation in hypothermic dogs, 391

—, effect on body temperature when injected into the cerebral ventricles of unanaesthetized cats, 634

—, modification of salivatory response induced by prostaglandin $F_{2\alpha}$, 527

—, resistant excitation of the urinary bladder: the possibility of transmission via nerves releasing a purine nucleotide, 451

Atropine-like drugs, interaction with dopamine-containing neurones in rat brain, 301

Autonomic blocking agent, quantitative analysis on isolated organs of the properties of indoramin hydrochloride as an, 52

Autonomic ganglia, rat, effect of amphetamine on the transmission of repetitive impulses through, 71

Autonomic nervous system, pharmacology of (T), 389P

B

Baboons, evaluation of anti-anxiety effect of oxypertine in, 348P

Barbiturates, metabolism of amylobarbitone in patients with chronic liver disease, 549

—, analysis of the inhibition of pethidine N-demethylase by, 89

Behaviour, amylobarbitone abolishes social dominance hierarchies in laboratory rats, 351P

—, effects of γ -hydroxybutyrate in chicks, 593

—, factors influencing the aggressiveness elicited by marihuana in food-deprived rats, 794

—, possible role of brain histamine, 462

Benzodiazepines, residual effects of flurazepam, 343P

1-Benzylpiperazine, comparison of effects with those of dexamphetamine in former addicts, 369P

Berberine, in toxin-induced experimental cholera, 153

Bethanidine, antagonism of the central action of clonidine, 779

Bile, role of the liver cell and the peribiliary vascular plexus in excretion of edrophonium and its metabolites in, 534

Bisquaternary compounds, action of some bisquaternary derivatives of phthalic acids and related substances on neuromuscular transmission, 765

Blood, hepatic volume, effects of infusions of catecholamines, angiotensin, vasopressin and histamine on, in the anaesthetized cat, 177

—, kinin activity in, during experimental anaphylaxis in calves, 311

—, nature of the calcium dependent potassium leak from human red cells induced by (+)-propranolol, and its possible relevance to the drug's antiarrhythmic effect, 271

—, peripheral, scintillometry in psychophysiological research, 388P

Blood flow, comparison of effects of oxyfedrin and carbochromen on, in experimental myocardial infarcts, 323P

Blood flow (cont.)

- , limb, biphasic response to intravenous methoxamine in anaesthetized man, 375P
- , liver, measurements by internal calorimetry in rats (T), 390P
- , mucosal, effects of isoprenaline on, during stimulation by pentagastrin or feeding, 332P
- , rat gastric mucosal, effect of prostaglandin E_2 , as determined by ^{14}C -aniline clearance, 331P
- Blood platelets**, relative activities on and uptake by, of 5-hydroxytryptamine and several analogues, 117
- Blood pressure**, of patients receiving levodopa, action of L- α -methyldopahydrazine, 162
- Blood vessels**, actions of prostaglandins E_2 and $F_{2\alpha}$ on the perfused vessels of the isolated rabbit ear, 699
- , resistance of noradrenaline in, to depletion by 6-hydroxydopamine or immunosympathectomy, 10
- BOL-148**, alterations in the sleep/wakefulness cycle in rats after administration, compared with (+)-LSD, 354P
- Bretylum**, antagonism of the central action of clonidine, 779
- British Pharmacological Society**, Proceedings of the, 323P
- BRL 1288**, iontophoretic study of the central anticholinergic properties of, 344P
- Bromosulphthalein sodium**, binding of, by human serum albumin using a continuous diafiltration technique, 80

C

- Calcium**, action of ions in the anaphylactic release of histamine, 326P
- , effects of, on dextran anaphylactoid oedema in the rat, 314
- , interaction with prostaglandin E_1 in the guinea-pig myometrium, 510
- Cannabidiol**, effect on pentobarbitone sleeping time and phenazone metabolism, 250
- Cannabinoid**, distribution of Δ^9 -tetrahydrocannabinol in the mouse, 244
- Cannabis**, and certain of its constituents, effect on pentobarbitone sleeping time and phenazone metabolism, 250
- , effects of chronic and acute treatment on thiopentone anaesthesia in rabbits, 346P
- , factors influencing the aggressiveness elicited by marihuana in food-deprived rats, 794
- Carbachol**, changes in body temperature produced by, injected into the cerebral ventricles of unanaesthetized cats, 634
- , origin of the after-hyperpolarization that follows removal of, from the isolated superior cervical ganglion of the rat, 651
- , supersensitivity to the negative chronotropic action of, in the rat, 586
- Carbochromen**, effects on blood flow and oxygen extraction in experimental myocardial infarcts, compared with those of oxyfedrin, 323P
- Cardiac glycosides**, effect of digoxin on human red blood cell electrolytes, 165
- Cardiac muscle**, guinea-pig, effect of 2,4-dinitrophenol on electrical and mechanical activity, metabolism and ion movements in, 711
- Cardiostimulation**, mechanism by which prostaglandin E_2 affects responses to adrenergic stimuli of guinea-pig atria, 689
- Cardiotoxicity**, of tricyclic antidepressants, 371P
- Cardiotoxin**, role in the blockade of nerve conduction and depolarization of skeletal muscle induced by cobra venom, 752
- Cardiovascular function**, a noninvasive technique for the cardiovascular evaluation of drugs, 387P
- Cardiovascular system**, effect of dehydroemetine on isolated guinea-pig atria, 723
- , resistance of noradrenaline in blood vessels to depletion by 6-hydroxydopamine or immunosympathectomy, 10
- Carrageenan**, resistance of dextran-resistant rats to, 327P
- Catecholamines**, brain, developmental characteristics in the rat and effects of 6-hydroxydopamine, 210
- , brain, effects of amphetamine on the turnover rate, 742
- , concentrations of, and activity of tyrosine hydroxylase, after an increase in the concentration of tyrosine in rat tissues, 307
- , effects of infusion on hepatic blood volume in the anaesthetized cat, 177
- , effects of dopamine on the conductance of perfused vascular beds of the chloralosed cat, 442
- , evaluation of mechanisms controlling the release and inactivation of the adrenergic transmitter in the rabbit portal vein and vas deferens, 472
- , resistance of noradrenaline in blood vessels to depletion by 6-hydroxydopamine or immunosympathectomy, 10
- , responses of the isolated perfused human spleen to, compared with those of dog spleen, 17
- Central nervous system**, iontophoretic study of the central anticholinergic properties of BRL 1288, 344P
- , stimulant action of fenfluramine in the rat, 342P
- Centrally acting drugs**, effects on the uptake of γ -aminobutyric acid by the brain, 339P
- , effects on the metabolism of pethidine, 89
- Cerebrospinal fluid**, respiratory responses to chemical pulses in, in cats, 605
- Chemical structure**, relationships with stereospecificity (T), 367P
- Chemosensitivity**, brain, respiratory responses to chemical pulses in the cerebrospinal fluid of cats, 605
- Chlorimipramine**, effect on drug metabolism, 372P
- Chlorisondamine**, induction of supersensitivity to the negative chronotropic action of carbachol and methacholine in the rat, 586
- o*-Chlorobenzylidene malononitrile**, pharmacology of, 561
- Chlorpromazine**, clinical pharmacology of, 370P
- Cholera**, toxin-induced experimental, berberine in, 153
- Choline**, effects of two hemicholiniums on concentrations in rabbit plasma, 324
- Choline acetyltransferase**, morphine-induced kinetic alterations of, in the rat caudate nucleus, 732
- Cholinergic mechanisms**, central, in the release of antidiuretic hormone, 617

- Cholinesterase**, plasma, determination of relationship between inhibition and tolerance to neostigmine in rat tissues, 336P
- Cholinergic substances**, changes in body temperature produced by, when injected into the cerebral ventricles of unanaesthetized cats, 634
- , effects of muscarine given into the brain of fowls, 413
- Clonidine**, central action and its antagonism, 779
- Cobra venom**, role of cardiotoxin and phospholipase A in the blockade of nerve conduction and depolarization of skeletal muscle induced by, 752
- Cocaine**, effects on the turnover rate of brain catecholamines and motor activity, 742
- Convulsants**, effects of amino-oxyacetic acid on the central nervous system and on skeletal muscle in the chicken, 31
- , effects of γ -hydroxybutyrate on chick behaviour, electrocortical activity and crossed extensor reflexes, 593
- Counter-transport**, nature of the calcium dependent potassium leak induced by (+)-propranolol, and its possible relevance to the drug's antiarrhythmic effect, 271
- CS**. See *o*-Chlorobenzylidene malononitrile, 561
- Cyanide**, tissue concentrations and cytochrome oxidase activities in experimental cyanide poisoning, 382P
- Cytochrome oxidase**, activities, and tissue cyanide concentrations in experimental cyanide poisoning, 382P

D

- Dehydroemetine**, effect on isolated guinea-pig atria, 723
- N-Demethylation**, of pethidine, analysis of inhibition by monoamine oxidase inhibitors and other drugs, 89
- Desipramine**, uptake by the rat vas deferens, 262
- Desmethylinipramine**, inability to reverse reserpine-induced hypothermia in adrenalectomized mice, 353P
- , effect on drug metabolism, 372P
- Dexamphetamine**, comparison of effects with those of 1-benzylpiperazine in former addicts, 369P
- Dextran**, effect of calcium on local anaphylactoid response to, in rat, 314
- Diafiltration**, study of the binding of bromosulphthalein sodium by human serum albumin using, 80
- Dialysis**, new technique for the continuous measurement of the concentration of vasoactive hormones, 383P
- Diarrhoea**, berberine in toxin-induced experimental cholera, 153
- Diazepam**, anterograde amnesic effects in adults, 140
- Digoxin**, dosage in patients with impaired kidney function, 373P
- , effect of, on human red blood cell electrolytes, 165
- , plasma concentrations in children with heart failure, 373P
- 1-(3,4-Dihydroxyphenyl)-1,2-ethanediol**, studied in mouse brain, 340P
- 3,4-Dihydroxyphenylacetic acid**, effect of morphine on the cerebral contents of, in normal and tolerant mice, 45
- 1-(2',6'-Dimethyl-phenoxy)-2-amino-propane**. See Kō 1173, 1

- Dimethylquinazolone**, muscle relaxant activity of, 805
- 2,4-Dinitrophenol**, effect on electrical and mechanical activity, metabolism and ion movements in guinea-pig ventricular muscle, 711
- Diphenylhydantoin**, potency as an antidysrhythmic drug compared with that of Kō 1173, 1
- Disulfiram**, effect on stress-induced changes of myocardial glycogen and blood glucose concentration in rats, 814
- Dopamine**, brain, developmental characteristics in the rat and effects of 6-hydroxydopamine, 210
- , effects of amphetamine on the turnover rate in brain and motor activity, 742
- , effects on the conductance of perfused vascular beds of the chloralosed cat, 442
- , effect of γ -hydroxybutyrate on release from rat striatum, 817
- , effect of γ -hydroxybutyric acid on metabolism in the brain, 341P
- , effect of morphine on cerebral contents of metabolites of, in normal and tolerant mice, 45
- Dopamine-containing neurones**, in rat brain, interaction of atropine-like drugs with, 301
- Dose-response curves**, can meaningful curves be obtained by measuring the firing rate responses of cells to iontophoretically applied substances? (T) 389P
- , cumulative, use to compare potency of sympathomimetic amines on the cat soleus muscle, 589
- Doxycycline**, effects on the isolated dog ureter, 788
- Drugs**, metabolism in the isolated perfused dog lung (T), 390P
- Dysrhythmia**, investigations of the mode of action of a new antidysrhythmic drug, Kō 1173, 1

E

- Edrophonium**, and its metabolites, excretion in bile: role of the liver cell and the peribiliary vascular plexus, 534
- , mechanism of the facilitatory action in cat skeletal muscle (T), 367P
- Emetine**, effects on the metabolism of ascorbic acid, 810
- Endocrine glands**, influence on central and peripheral monoamine oxidase activity, 355P
- Enzymes**, morphine-induced kinetic alterations of choline acetyltransferase of the rat caudate nucleus, 732
- , myocardial, effect of pituitary and thyroid hormones, 333P
- Epilepsy**, effects of a focal penicillin lesion on responses of rabbit cortical neurones to putative neurotransmitters, 435
- , effects of formyl tetrahydrofolic acid and noradrenaline on the oxygen consumption of rat brain synaptosome-mitochondrial preparations, 279

F

- Fenfluramine**, central stimulant action in the rat, 342P
- Flurazepam**, residual effects, 343P
- Formyl tetrahydrofolic acid**, effects on the oxygen consumption of rat brain synaptosome-mitochondrial preparations, 279

G

- Gastric acid**, effects of isoprenaline on secretion during stimulation by pentagastrin or feeding, 332P
- Glucose**, blood concentrations, effect of drugs on stress-induced changes in rats, 814
—, transport in cerebral cortex, effects of phenobarbitone on, 338P
- Glycine**, selective inhibition of some somatic reflexes in the cat, 404
- Glycogen**, cardiac, effect of drugs on stress-induced changes in rats, 814
—, myocardial, effect of physostigmine in hypothermic dogs, 391
- Guanethidine**, antagonism of the central action of clonidine, 779

H

- Haemolysis**, induced by streptolysin O, inhibition by theobromine sodium salicylate, 321
- Hemicholinium No. 3**, and its paraterphenyl analogue, effects on the concentrations of plasma choline in the rabbit, 324P
- Hepatic fluid**, effects of adrenaline, isoprenaline and histamine on transsinusoidal fluid filtration in the cat liver, 185
- Hexamethonium**, changes in body temperature produced by, when injected into the cerebral ventricles of unanaesthetized cats, 634
- Histamine**, activation of anaphylactic release by calcium and strontium ions, 326P
—, alterations in metabolism after injections of sex hormones in mice, 517
—, brain, possible role in behaviour, 462
—, effect on rat ureter *in vivo*, 628
—, effect of phospholipids on anaphylactic release, 327P
—, effects of infusion on hepatic blood volume in the anaesthetized cat, 177
—, effects on transsinusoidal fluid filtration in the cat liver, 185
- Homovanillic acid**, effect of morphine on cerebral contents of, in normal and tolerant mice, 45
- Hormones**, sex, alterations of histamine metabolism after injections in mice, 517
- Hunger**, factors influencing the aggressiveness elicited by marihuana in food-deprived rats, 794
- Hydrocortisone**, effect on changes in LDH isoenzymes in skin after thermal injury, 325P
- m-Hydroxybenzyltrimethylammonium ions**, N-[¹⁴C]-methyl labelled, distribution and excretion in mice, 577
- γ -Hydroxybutyrate**, effect on the release of monoamines from the rat striatum, 817
—, effects on chick behaviour, electrocortical activity and crossed extensor reflexes, 593
- γ -Hydroxybutyric acid**, effect on dopamine metabolism in the brain, 341P
- 6-Hydroxydopamine**, effects on developmental characteristics of brain catecholamines and tyrosine hydroxylase in rat, 210
—, failure to induce experimental hypertension in rats after intraventricular injection of, 356P
—, *in vitro* effect on isolated rat atria, 583
—, long-lasting peripheral and central effects of, in rats, 233
—, recovery of vascular adrenergic nerve function in the rat after chemical sympathectomy with, 357P

6-Hydroxydopamine (cont.)

- , or immunosympathectomy, resistance of noradrenaline in blood vessels to depletion by, 10
- 2-Hydroxyiminomethyl pyridinium methyl methanesulphonate**, concentrations after intramuscular injection in humans, 368P
- 1-(4-Hydroxy-3-methoxyphenyl)-1, 2-ethanediol**, studied in mouse brain, 340P
- 5-Hydroxytryptamine**, and its analogues, relative activities on and uptake by human blood platelets, 117
—, effect of γ -hydroxybutyrate on release from rat striatum, 817
—, effect on rat ureter *in vivo*, 628
—, effects on isolated strips of guinea-pig stomach, 100
—, in the brain, role in amphetamine-induced rotational motor activity, 347P
- Hyoscine**, anterograde amnesic effects in adults, 140
- Hyperactivity**, selective effects of lithium on two forms of spontaneous activity, 349P
- Hyperpolarization**, origin of the after-hyperpolarization that follows removal of depolarizing agents from the isolated superior cervical ganglion of the rat, 651
- Hypertension**, effect of sympathomimetic drugs in eliciting hypertensive responses to reserpine in the rat, after pretreatment with monoamine oxidase inhibitors, 203
—, experimental, failure to induce after intraventricular injection of 6-hydroxydopamine in rats, 356P
—, initial clinical experience with indoramin, a new antihypertensive agent, 379P
- Hyperthermia**, induced by morphine in the rat, attenuation by physostigmine, 544
- Hypertrophy**, cardiac, cardiac responses to pituitary and thyroid hormones, 333P
- Hypnotics**, residual effects of a new benzodiazepine, flurazepam, 343P
—, the muscle relaxant activity of methaqualone and its methyl congener, 805
- Hypogastric ganglion**, pharmacological studies in rat and guinea-pig, 492
- Hypotension**, central action of clonidine and its antagonism, 779
—, quantitative analysis on isolated organs of the autonomic blocking properties of indoramin hydrochloride, 52
- Hypothermia**, effect of physostigmine on ventricular fibrillation and myocardial glycogen in hypothermic dogs, 391
—, reserpine-induced, inability to antidepressants and morphine to reverse, in adrenalectomized mice, 353P

I

- Imipramine**, effect on drug metabolism, 372P
—, effect on unit activity in the midbrain raphe of rats, 345P
- Immunosympathectomy**, or 6-hydroxydopamine, resistance of noradrenaline in blood vessels to depletion by, 10
- Indomethacin**, action on the rabbit isolated jejunum preparation, 328P
—, effect on changes in LDH isoenzymes in skin after thermal injury, 325P
- Indoramin**, a new hypertensive agent, initial clinical experience with, 379P
—, α -adrenoceptor inhibition from, in man, 378P

Indoramin (cont.)

—, haemodynamic effects of—a non-invasive technique for the cardiovascular evaluation of drugs, 387P

Indoramin hydrochloride quantitative analysis on isolated organs of the autonomic blocking properties of, 52

Inflammation, inflammatory response produced by a factor released from lymphocytes, 384P

—, measurement in man and animals by radiometry, 145

—, mitogenic and inflammatory activities produced by antigen activation of guinea-pig lymphocytes, 334P

—, prostaglandin production by rabbit peritoneal polymorphonuclear leukocytes *in vitro*, 330P

Inflammation exudate, separation of irritancy from the anti-inflammatory component of, 317

Instruments, new method of recording responses of isolated tissues, organs and intact preparations, 384P

Ions, uptake kinetics and requirements for extra-neuronal uptake of noradrenaline by arterial smooth muscle, 359P

Iproniazid, effect of sympathomimetic drugs in eliciting hypertensive responses to reserpine in the rat after pretreatment with, 203

Irritancy, separation of, from the anti-inflammatory component of inflammation exudate, 317

Irritants, pharmacology of *o*-chlorobenzylidene malononitrile (CS), 561

Isoprenaline, effect compared with that of amphetamine on the transmission of repetitive impulses through the isolated superior cervical ganglion of the rat, 71

—, effect on rat ureter *in vivo*, 628

—, effects of transsinusoidal fluid filtration in the cat liver, 185

—, effects of, on gastric acid secretion and mucosal blood flow during stimulation by pentagastrin or feeding, 332P

—, responses of the isolated perfused human spleen to, compared with those of dog spleen, 17

—, use of cumulative dose-response curves to assess potency on the cat soleus muscle, 589

K

Kanamycin, computer-assisted prescribing of, for patients with renal insufficient (T), 380P

Kinins, production of, in bovine anaphylactic shock, 311

Kö 1173, a new antidysrhythmic drug, investigations of the mode of action of, 1

L

Lactic dehydrogenase isoenzymes, effect of hydrocortisone and indomethacin in changes in, in skin after thermal injury, 325P

Leptazol, effects of rat brain lysosomes, 337P

Leukocytes, rabbit peritoneal polymorphonuclear, prostaglandin production *in vitro* by, 330P

Levodopa, action of *L*- α -methyldopahydrazine on the blood pressure of patients receiving, 162

Lithium, selective effects on two forms of spontaneous activity, 349P

—, some aspects of the inhibition of the action of antidiuretic hormone by, in the rat kidney and toad bladder, 223

Liver, cat, effects of adrenaline, isoprenaline and histamine on transsinusoidal fluid filtration in, 185

—, effects of infusions of catecholamines, angiotensin, vasopressin, and histamine on hepatic blood volume in the anaesthetized cat, 177

—, metabolism of amylobarbitone in patients with chronic disease of, 549

(—)-**LSD**, alterations in the sleep/wakefulness cycle in rats after administration, compared with (+)-LSD, 354P

Lymphocytes, guinea-pig, mitogenic and inflammatory activities produced by antigen activation of, 334P

—, inflammatory response produced by a factor released from 384P

Lysosomes, rat brain, effects of phenobarbitone and leptazol, 337P

M

Marihuana, factors influencing the aggressiveness elicited by marihuana in food-deprived rats, 794

Marine snails, active factors in the venom duct of *Conus californicus*, 365P

Mebanazine, analysis of the inhibition of pethidine N-demethylase by, 89

Mecamylamine, changes in body temperature produced by, when injected into the cerebral ventricles of unanaesthetized cats, 634

Mepicycline, effects on the isolated dog ureter, 788

Methacholine, effects on the hypogastric ganglion of rat and guinea-pig, 492

—, supersensitivity to the negative chronotropic action of, in the rat, 586

Methaqualone, and its methyl congener, muscle relaxant activity of, 805

Methoxamine, biphasic response of limb blood flow to intravenous, in anaesthetized man, 375P

α -**Methyldopa**, effect on stress-induced changes of myocardial glycogen and blood glucose concentration in rats, 814

L- α -**Methyldopahydrazine**, action on the blood pressure of patients receiving levodopa, 162

Methylphenylhydrazine, analysis of the inhibition of pethidine N-demethylase by, 89

α -**Methyl-*p*-tyrosine**, effect on stress-induced changes of myocardial glycogen and blood glucose concentration in rats, 814

Mitogenic activity, and inflammatory activity, produced by antigen activation of guinea-pig lymphocytes, 334P

Monoamine oxidase, influence of endocrine glands on central and peripheral activity, 355P

Monoamine oxidase inhibitors, analysis of the inhibition of pethidine N-demethylation by, 89

—, effect of sympathomimetic drugs in eliciting hypertensive responses to reserpine in the rat after pretreatment with, 203

Monoamines, and metabolites, effect of amantadine on the urinary excretion of, in normal and parkinsonian patients, 386P

—, effect of γ -hydroxybutyrate on release from the rat striatum, 817

—, in the brain, role in amphetamine-induced rotational motor activity, 347P

Morphine, attenuation by physostigmine of hyperthermia induced by, in the rat, 544

Morphine (cont.)

- , effect of previous environment on responses to, 350P
- , effect on rat ureter *in vivo*, 628
- , effect on the cerebral contents of metabolites of dopamine in normal and tolerant mice: its possible relation to analgesic action, 45
- , inability to reverse reserpine-induced hypothermia in adrenalectomized mice, 353P
- , kinetic alterations of choline acetyltransferase of the rat caudate nucleus induced by, 732
- Motor activity**, brain, effects of amphetamine on, 742
- Muscarine**, effects when given into the brain of fowls, 413
- Myocardium**, comparison of effects of carbochromen and oxyfedrin on blood flow and oxygen extraction in experimental myocardial infarcts, 323P
- Myometrium**, interaction of prostaglandin E₁ and calcium in the guinea-pig myometrium, 510

N

- Nalorphine**, analysis of the inhibition of pethidine N-demethylase by, 89
- , effects on morphine hyperthermia in the rat, 544
- Narcotics**, morphine-induced kinetic alterations of choline acetyltransferase of the rat caudate nucleus, 732
- Neostigmine**, effects on morphine hyperthermia in the rat, 544
- , persistence of activity in tissues of the rat after prolonged oral administration, 336P
- Neuroleptic drugs**, interaction of atropine-like drugs with dopamine-containing neurones in rat brain, 301
- Neurones**, origin of the after-hyperpolarization that follows removal of depolarizing agents from the isolated superior cervical ganglion of the rat, 651
- Neuromuscular transmission**, action of some bisquaternary derivatives of phthalic acids and related substances on, 765
- Neurotransmission**, selective inhibition by glycine of some somatic reflexes in the cat, 404
- Neurotransmitters**, putative, effects of a focal penicillin lesion on responses of rabbit cortical neurones to, 435
- Nicotine**, changes in body temperature induced by, when injected into the cerebral ventricles of unanaesthetized cats, 634
- Nicotinic stimulants**, effects on the hypogastric ganglion of rat and guinea-pig, 492
- Noradrenaline**, brain, developmental characteristics in the rat and effects of 6-hydroxydopamine, 210
- , changes in body temperature produced by, when injected into the cerebral ventricles of unanaesthetized cats, 634
- , effect of infusion on hepatic blood volume in the anaesthetized cat, 177
- , effect compared with that of amphetamine on the transmission of repetitive impulses through the isolated superior cervical ganglion of the rat, 71
- , effects on the oxygen consumption of rat brain synaptosome-mitochondrial preparations, 279

Noradrenaline (cont.)

- , effects of amphetamine on the turnover rate in brain and motor activity, 742
- , effect on rat ureter *in vivo*, 628
- , evaluation of mechanisms controlling the release and inactivation of the adrenergic transmitter in the rabbit portal vein and vas deferens, 472
- , in blood vessels, resistance of, to depletion by 6-hydroxydopamine or immunosympathectomy, 10
- , in the brain, role in amphetamine-induced rotational motor activity, 347P
- , inhibition of accumulation in arterial smooth muscle by steroids, 361P
- , investigation of possible correlation between contraction induced by, in rat vas deferens, and uptake of desipramine, 262
- , modification by prostaglandin E₂ of the response of guinea-pig isolated vasa deferentia and atria, 689
- , peripheral and central effects of 6-hydroxydopamine in rats, 233
- , responses of the isolated perfused human spleen to, compared with those of dog spleen, 17
- , role of the α -adrenoceptor in regulating overflow by nerve stimulation, 672
- , studies on its glycol metabolites in mouse brain, 340P
- , uptake kinetics and ion requirements for extraneuronal uptake of, by arterial smooth muscle, 359P
- Nortriptyline**, effect on drug metabolism, 372P
- Nucleotides**, purine, atropine resistant excitation of the urinary bladder: the possibility of transmission via nerves releasing, 451

O

- Oestradiol**, alterations of histamine metabolism after injections in mice, 517
- Ouabain**, effect of K₀ 1173 on cardiac dysrhythmia produced by, 1
- Oxyfedrin**, effects on blood flow and oxygen extraction in experimental myocardial infarcts, compared with those of carbochromen, 323P
- Oxygen**, effects of formyl tetrahydrofolic acid and noradrenaline on consumption of rat brain synaptosome-mitochondrial preparations, 279
- Oxygen extraction**, comparison of effects of oxyfedrin and carbochromen on, in experimental myocardial infarcts, 323P
- Oximes**, concentrations of 2-hydroxyiminomethyl pyridinium methyl methane sulphonate after intramuscular injection in humans, 368P
- Oxypertine**, effect on anxiety-induced behaviour in baboons, 348P
- Oxytocin**, responses of the isolated perfused human spleen to, compared with those of dog spleen, 17

P

- Parkinsonism**, action of L- α -methyldopahydrazine on the blood pressure of patients receiving levodopa, 162
- , effect of amantadine on the urinary excretion of some monoamines and metabolites in normal and parkinsonian subjects, 386P
- , iontophoretic study of the central anticholinergic properties of BRL 1288, 344P

- Penicillamine**, effect on angiotensin pressor responses in the pithed rat, 192
- Penicillin**, effects of a focal lesion on responses of rabbit cortical neurones to putative neurotransmitters, 435
- Pentobarbitone**, effect of cannabis and certain of its constituents on sleeping time induced by, 250
- Pentolinium**, effect on ventricular fibrillation in hypothermic dogs, 391
- Pethidine**, analysis of the inhibition of N-demethylation of by monoamine oxidase inhibitors and some other drugs with special reference to drug interactions in man, 89
—, anterograde amnesic effects in adults, 140
- Phenazone**, metabolism of, effect of cannabis and certain of its constituents on, 250
- Phenelzine**, effect of sympathomimetic drugs in eliciting hypertensive responses to reserpine in the rat after pretreatment with, 203
- Phenobarbitone**, effects on glucose transport and membrane ATPase activities of cerebral cortex, 338P
—, effects on rat brain lysosomes, 337P
- Phenoxybenzamine**, abolition of the nerve-induced responses of the isolated vas deferens of the young rat by, 160
—, effects on transmitter overflow, noradrenaline uptake and α -adrenoceptor blockade in cat nictitating membrane preparation, 672
- Phentolamine**, abolition of the nerve-induced responses of the isolated vas deferens of the young rat by, 160
—, antagonism of the central action of clonidine, 779
—, comparison of blockade at α -adrenoceptors with that of thymoxamine, in peripheral arteries and veins of man, 294
- β -Phenylethylamine**, effect in eliciting hypertensive responses to reserpine in the rat, after pretreatment with monoamine oxidase inhibitors, 203
- Phenylhydrazine**, analysis of the inhibition of pethidine N-demethylase by, 89
- Phospholipase A**, role in the blockade of nerve conduction and depolarization of skeletal muscle induced by cobra venom, 752
- Phospholipids**, effect on histamine release, 327P
- Phthalic acids**, action of some bisquaternary derivatives and related substances on neuromuscular transmission, 765
- Physostigmine**, attenuation of morphine hyperthermia in the rat, 544
—, effect on experimental cardiac arrhythmias in dogs, 397
—, effect on ventricular fibrillation and myocardial glycogen in hypothermic dogs, 391
—, modification of salivary response induced by prostaglandin $F_{2\alpha}$, 527
- Picrotoxin**, antagonism of γ -aminobutyric acid by, in the feline cerebral cortex, 807
- Pindolol**, effects on airway resistance and heart rate in guinea-pig compared with those of other β -adrenoceptor antagonists, 642
- Piperazine**, some pharmacological properties of, 169
- Pituitary hormone**, cardiac responses to, 333P
- Plasma**, digoxin concentrations in children with heart failure, 373P
—, rabbit, effects of two hemicholiniums on choline concentrations in, 324
- Platelet aggregation**, relative activities on and uptake by human blood platelets of 5-hydroxytryptamine and several analogues, 171
- Platelets**, effects of sympathomimetic amines on aggregation in rabbits *in vitro*, 363P
- Poisoning**, rapid identification of drugs in cases of self poisoning by means of combined GC-MS-computer system (T), 390P
- Polypeptides**, responses of the isolated perfused human spleen to, compared with those of dog spleen, 17
- Potassium**, effect of digoxin on concentration in human red blood cells, 165
—, effect of 2,4-dinitrophenol on movements in guinea-pig ventricular muscle, 711
—, nature of the calcium dependent leak from red blood cells induced by (+)-propranolol, and its possible relevance to the drug's antiarrhythmic effect, 271
- Practolol**, effects on airway resistance and heart rate in guinea-pig compared with those of other β -adrenoceptor antagonists, 642
—, effect on poststimulatory atrial flutter in the dog, with observations on the participation of adrenergic mechanisms in this experimental arrhythmia, 109
- Premedicants**, anterograde amnesic effects of pethidine, hyoscine and diazepam in adults, 140
- Pressor responses**, to angiotensin, in the pithed rat selective inhibition by tetraethylthiuram disulphide and sodium diethyldithiocarbamate, 192
- Procinolol**, effects on airway resistance and heart rate in guinea-pig compared with those of other β -adrenoceptor antagonists, 642
- Progesterone**, alterations of histamine metabolism after injections in mice, 517
- Propranolol**, effects on airway resistance and heart rate in guinea-pig compared with those of other β -adrenoceptor antagonists, 642
—, effect on poststimulatory atrial flutter in the dog, with observations on the participation of adrenergic mechanisms in this experimental arrhythmia, 109
—, effect on rat ureter *in vivo*, 628
- (+)-**Propranolol**, nature of the calcium dependent potassium leak induced by, and its possible relevance to the antiarrhythmic effect of the drug, 271
- Prostaglandin E_1** , interaction with calcium in the guinea-pig myometrium, 510
- Prostaglandin E_1** , effect on rat gastric mucosal blood flow, as determined by 14 C-aniline clearance, 331P
—, modification of the response of guinea-pig isolated vasa deferentia and atria to adrenergic stimuli, 689
- Prostaglandin $F_{2\alpha}$** , salivation induced by, and modification of the response by atropine and physostigmine, 527
- Prostaglandins**, E_1 and $F_{2\alpha}$, actions on the perfused vessels of the isolated rabbit ear, 699
—, action of A_2 , B_1 , E_2 and $F_{2\alpha}$ on superficial hand veins of man, 374P
—, generation maintains the smooth muscle tone of the rabbit isolated jejunum, 328P
—, production by rabbit peritoneal polymorphonuclear leukocytes *in vitro*, 330P
—, relationship between the chemical structure of, and their vasoactivities in dogs, 63

Psychosis, some aspects of the inhibition of the action of antidiuretic hormone by lithium ions in the rat kidney and bladder of the toad *Bufo marinus*, 223

Psychotropic drugs, analysis of the inhibition of pethidine N-demethylase by, 89

Pteroyl glutamate, and its formyl tetrahydro-metabolite, effect on brain respiration *in vitro*, 279

Q

Quaternary amines, excretion of ^{14}C -edrophonium and its metabolites in bile: role of the liver cell and the peribiliary vascular plexus, 534

Quaternary compounds, distribution and excretion of N- ^{14}C -methyl labelled *m*-hydroxybenzyl-trimethylammonium ions in mice, 577

Quinterenol, use of cumulative dose-response curves to assess potency on the cat soleus muscle, 589

R

Radiometry, measurement of inflammation in man and animals by, 145

Receptors, central cholinergic and adrenergic mechanisms in the release of antidiuretic hormone, 617

—, for 5-hydroxytryptamine, on human blood platelets, 117

—, pharmacological, possible allosteric interaction between, in guinea-pig vas deferens, 364P

—, tryptamine, in smooth muscles of guinea-pig stomach, 100

Red blood cell electrolytes, effect of digoxin on, 165

Reflexes, somatic, selective inhibition by glycine in the cat, 404

Reserpine, effect of sympathomimetic drugs in eliciting hypertensive responses to, in the rat, after pretreatment with monoamine oxidase inhibitors, 203

—, effect on angiotensin pressor responses in the pithed rat, 192

—, effect on ventricular fibrillation in hypothermic dogs, 391

Respiration, comparative study of six β -adrenoceptor antagonists on airway resistance and heart rate in the guinea-pig, 642

—, device for cycle-by-cycle spirometry, applied to the continuous recording of air overflow, 381P

—, respiratory response to chemical pulses in the cerebrospinal fluid of cats, 605

Ro 3-3528, a β -adrenoceptor blocking agent, preliminary studies in man, 377P

Rolitetracycline, effects on the isolated dog ureter, 788

Roundworms, some pharmacological effects of piperazine, an anthelmintic agent, 169

S

Salivation, induced by prostaglandin $\text{F}_{2\alpha}$ and modification of the response by atropine and physostigmine, 527

Scintillometry, peripheral blood, in psychophysiological research, 388P

Serum albumin, human, binding of bromosulphathalein sodium by, using a continuous diafiltration technique, 80

Sex hormones, alterations of histamine metabolism after injections in mice, 517

SKF 525A, analysis of the inhibition of pethidine N-demethylase by, 89

Sleeping time, effect of cannabis and certain of its constituents on, 250

Sleep/wakefulness cycle, alteration in rats after administration of (–)-LSD or BOL-148; a comparison with (+)-LSD, 354P

Sodium, effect of digoxin on concentration in human red blood cells, 165

—, effect of 2,4-dinitrophenol on movements in guinea-pig ventricular muscle, 711

Sodium diethyldithiocarbamate, selective inhibition of angiotensin pressor responses in the pithed rat by, 192

Sodium ions, origin of the after-hyperpolarization that follows removal of depolarizing agents from the isolated superior cervical ganglion of the rat, 651

Sotalol, effects on airway resistance and heart rate in guinea-pig compared with those of other β -adrenoceptor antagonists, 642

Soterenol, use of cumulative dose-response curves to assess potency on the cat soleus muscle, 589

Spirometry, cycle-by-cycle, device for applied to the continuous recording of air overflow, 381P

Spleen, isolated perfused human, responses to sympathetic nerve stimulation, catecholamines and polypeptides, 17

Stereospecificity, relationships with chemical structure (T), 367P

Steroids, inhibition of accumulation of adrenaline and noradrenaline in arterial smooth muscle by, 361P

Streptolysin O, inhibition of haemolysis induced by, by theobromine sodium salicylate, 321

Strontium, actions of ions in the anaphylactic release of histamine, 326P

Subcutaneous fat, comparison of ultrasonic and caliper methods of measurement of thickness in man (T), 390P

Sympathetic nervous system, role in experimental atrial flutter in the dog, 109

—, responses of the isolated perfused human spleen to stimulation compared with those of dog spleen, 17

Sympathomimetic amines, effects on rabbit platelet aggregation *in vitro*, 363P

—, use of cumulative dose-response curves in potency comparisons of, on the cat soleus muscle, 589

Sympathomimetic drugs, effect in eliciting hypertensive responses to reserpine in the rat, after pretreatment with monoamine oxidase inhibitors, 203

T

Temperature, changes produced by cholinomimetic substances injected into the cerebral ventricles of unanaesthetized cats, 634

Testosterone, alterations of histamine metabolism after injections in mice, 517

Tetracyclines, and 4-epiderivatives, effects on the isolated dog ureter, 788

Tetraethylthiuram disulphide, selective inhibition of angiotensin pressor responses in the pithed rat by, 192

Tetrahydrocannabinol, factors influencing the aggressiveness elicited by marihuana in food-deprived rats, 794

Δ^1 -**Tetrahydrocannabinol**, effect on pentobarbitone sleeping time and phenazone metabolism, 250

- Δ^9 -Tetrahydrocannabinol, distribution in the mouse, 244
- Theobromine sodium salicylate, inhibition of streptolysin O-induced haemolysis by, 321
- Thermal injury, effect of hydrocortisone and indomethacin on changes in LDH isoenzymes in skin after, 325P
- Thermoregulation, changes in body temperature produced by cholinomimetic substances injected into the cerebral ventricles of unanaesthetized cats, 634
- Thiopentone, effects of chronic and acute cannabis treatment on anaesthesia induced by, in rabbits, 346P
- Thymoxamine, comparison of blockade at α -adrenoceptors with that of phentolamine, in peripheral arteries and veins of man, 294
- , is it a specific α -adrenoceptor blocking agent? 362P
- Thyroid hormones, cardiac responses to, 333P
- Toxicology, role of cardiotoxin and phospholipase A in the blockade of nerve conduction and depolarization of skeletal muscle induced by cobra venom, 752
- , tissue cyanide concentrations and cytochrome oxidase activities in experimental cyanide poisoning, 382P
- Tranquillizers, analysis of the inhibition of pethidine N-demethylase by, 89
- Transmission, possibility of, via nerves releasing a purine nucleotide during atropine resistant excitation of the urinary bladder, 451
- Transmitter, adrenergic, evaluation of mechanisms controlling release and inactivation of, in rabbit portal vein and vas deferens, 472
- , role of the α -adrenoceptor in regulating noradrenaline overflow by nerve stimulation, 672
- Tricyclic antidepressants, analysis of the inhibition of pethidine N-demethylase by, 89
- , cardiotoxicity of, 371P
- , effects on drug metabolism, 372P
- Tyramine, modification by prostaglandin E_2 of the response of guinea-pig isolated vasa deferentia and atria, 689
- , effect in eliciting hypertensive responses to reserpine in the rat, after pretreatment with monoamine oxidase inhibitors, 203
- Tyrosine, in rat tissues, catecholamine concentrations and activity of tyrosine hydroxylase after an increase in concentration of, 307
- Tyrosine hydroxylase, activity after an increase in the concentration of tyrosine in rat tissues, 307
- , developmental characteristics in the rat brain and effects of 6-hydroxydopamine, 210

U

- Uptake kinetics, and ion requirements for extra-neuronal uptake of noradrenaline by arterial smooth muscle, 359P
- Ureter, rat, pharmacology *in vivo*, 628
- USVC 6524, effect of, on poststimulatory atrial flutter in the dog, with observations on the participation of adrenergic mechanisms in this experimental arrhythmia, 109

V

- Vascular bed, cutaneous, actions of prostaglandins E_1 and $F_{2\alpha}$ on the perfused vessels of the isolated rabbit ear, 699
- , perfused, of the chloralosed cat, effects of dopamine on the conductance of, 442
- Vas deferens, isolated rat, abolition of the nerve-induced responses of, by α -adrenoceptor blocking agents, 160
- Vasoactive hormones, new dialysis technique for the continuous measurement of the concentration of, 383P
- Vasoactivity, relationship between the chemical structure of prostaglandins and their, in dogs, 63
- Vasodilatation, effects of dopamine on the conductance of perfused vascular beds of the chloralosed cat, 442
- Vasopressin, effect of infusion on hepatic blood volume in the anaesthetized cat, 177
- , effect on the flat preparation of rabbit rectum, 366P
- , responses of the isolated perfused human spleen to, compared with those of dog spleen, 17
- Venom, active factors in the duct of *Conas coliformicus*, 365P
- Ventricular fibrillation, effect of physostigmine in hypothermic dogs, 391

W

- Wy 21901. *See* indoramin hydrochloride

X

- Xanthine, derivatives of, effect on streptolysin O-induced haemolysis in rabbit red cells, 321

Instructions to Authors

1. **Manuscripts** (2 copies) should be typed in double spacing on one side of paper not larger than foolscap (33×20.5 cm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. A short title containing not more than 40 letters should also be suggested.
2. A **short summary of results and conclusions** (arranged in numbered paragraphs), **tables and legends to figures** should be typed on separate sheets of paper.
3. **References** should be collected at the end of the paper. They should include the authors' names, year of publication, title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.
4. **Figures** should NOT BE LARGER THAN FOOLSCAP (33×20.5 cm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided and both ordinates and abscissae should be calibrated.
5. **Lettering** on figures should be inserted in PENCIL. Symbols which are to appear in figures or legends should be chosen from the following:

\times $+$ \bullet \blacksquare \circ \square \triangle \blacktriangle ∇ \blacktriangledown \odot \ominus \diamond
6. **Photographs and photomicrographs** should be printed on glossy paper and should be larger than the size required for reproduction.
7. **Tables** ideally should not have more than 84 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 130 characters to a line, unless absolutely unavoidable.
8. An **abstract** of about 100 words suitable for inclusion in *International Abstracts of Biological Sciences* should be typed on a separate sheet, giving the author's name and address and the title of the paper.

General remarks. A recent issue of the journal is a good guide to style. Papers are accepted only if accompanied by a statement that they have not and will not be published in whole or in part in any other Journal.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.
