

# Edited for the British Pharmacological Society by

W. D. M. Paton (*Chairman*)                      H. M. Adam (*Secretary*)  
Margaret Day (*Press Editor*)  
J. D. Stephenson (*Assistant Press Editor*)

R. B. Barlow	J. Maddox (co-opted)
J. M. Barnes	J. F. Mitchell
J. W. Black	P. A. Nasmyth
W. C. Bowman	M. W. Parkes
P. B. Bradley	Mary Pickford
A. W. Cuthbert	H. P. Rang
C. T. Dollery	H. O. Schild
W. S. Feldberg	D. F. Sharman
D. F. Hawkins	A. P. Silverman
F. Hobbiger	M. A. Simmonds
Margarethe Holzbauer	A. D. Smith (co-opted)
D. B. Hope	F. M. Sullivan
H. W. Kosterlitz	A. Ungar
G. P. Lewis	J. R. Vane

*Editorial assistance is provided by the staff of Nature*

---

Papers will be considered for publication on all aspects of drug action, including chemotherapy.

**Manuscripts** (two copies) should be sent to Dr. H. M. Adam, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the suggestions inside the back cover.

**Subscriptions.** Three volumes of the journal are published annually, each volume containing four numbers. The annual subscription rate is £26.50 in the United Kingdom and Republic of Ireland; \$77.00 U.S.A. and Canada (by air freight; second class postage paid at New York, N.Y.); £26.50 all other overseas countries. Subscriptions should be sent to: Subscriptions Department, Macmillan Journals Ltd., Brunel Road, Basingstoke, Hampshire, England. Alternatively, the journal can be ordered through a subscription agent or bookseller.

**Advertisements:** Applications for advertising space and rates should be sent to: *David Terry*, Advertisement Manager, *British Journal of Pharmacology*, Macmillan Journals Ltd., 4 Little Essex Street, London, WC2R 3LF, England. Tel: 01-836 6633. Direct line: 01-405 3013.

Smith & Nephew Research Limited

## INDUSTRIAL PHARMACOLOGIST

Smith & Nephew Research Ltd., the research and development organisation for Smith & Nephew Associated Companies Ltd. wish to appoint immediately a pharmacologist (male or female) who has graduated within the last three years, preferably with pharmaceutical qualification.

Work will be mainly concerned with drug therapies for ophthalmic use and there will be training for the successful candidate for this position in this new and expanding pharmaceutical field. Candidates should not be over 26 years.

There is a pleasant work environment in modern laboratories on a country estate where a wide range of scientific disciplines are practised. Fringe benefits conform to modern practice.

In the first instance send brief details of age, qualifications and experience to:

Administration Manager,  
Smith & Nephew Research Ltd.,  
Gilston Park, Harlow, Essex.

*One of the Smith & Nephew Associated Companies*

### BRITISH JOURNAL OF PHARMACOLOGY

## Short Communications

Papers for consideration should be marked "Short Communication", and be submitted in duplicate to the Secretary of the Editorial Board. **THEY MUST BE LESS THAN 1,200 WORDS IN LENGTH**, including a short summary, **AND MAY CONTAIN ONE FIGURE OR ONE TABLE**. To reduce publication delay to a minimum (about 6 weeks), correspondence between author and editor must be avoided. Manuscripts should therefore be prepared with great care and the customary form used in the Journal strictly observed (see instructions on the inside covers of a recent issue of the Journal.) Short Communications will be accepted on the understanding that if authors' proofs are not returned before the Journal goes to press, the Communication will be published with the Press Editor's corrections only.

# SUBJECT INDEX

- A
- Acetylcholine**, effect of benapryzine, benzhexol, atropine, and procaine on the excitatory responses induced by, 465
- , effects of on inhibition of uptake of  $^3\text{H}$ - $(\pm)$ -noradrenaline by guinea-pig atria, 179
- , effect of some anticonvulsant drugs on leptazol and bicuculline induced, efflux from rat cerebral cortex, 652P
- , increase in brain and spinal, levels without antinociceptive actions following morphine administration in the frog, 650P
- , injection of, into cerebral ventricles of unanaesthetized dogs, 196
- , release of, by parasympathetic ganglion stimulants and gastrin-like polypeptides, 765
- , response of muscularis mucosae to, 760
- Acetylcholine-like action of morantel**, 117
- $^3\text{H}$ -acetylcholine, preferential release of newly synthesized from rat cerebral cortex slices *in vitro*, 97
- ACh**, release of from rat cerebral cortex slices *in vitro*, 97
- Activity recording**, technique allowing, together with e.e.g. recording and intraventricular administration of drugs in the conscious rabbit, 663P
- Adenosine**, specificity of, on transmitter output at the neuromuscular junction, 637P
- Adenosine triphosphate**, effect of desensitization to, on the peristaltic reflex in guinea-pig ileum, 606
- Adrenalectomy**, effects of on morphine analgesia, tolerance, and physical dependence in the rat, 693
- Adrenaline**, effects inhibited by *E. coli* endotoxin, 12
- , effect on calcium storage, 377
- , response of muscularis mucosae to, 760
- Adrenergic control**, of tendon jerk reflexes in man, 595
- Adrenergic nerves**, histochemical localization of, in guinea-pig trachea, 707
- $\alpha$ -adrenoceptor, blocking activity of desacetylthymoxamine on human isolated smooth muscle, 677P
- , mechanism of potentiation by amines of non-equilibrium blockade of the, 386
- $\beta$ -adrenoceptor activity, effect of age on in tracheal smooth muscle, 181
- $\beta$ -adrenoceptor blockade, the effect of, on human sweating, 487
- $\beta$ -adrenoceptor blocking drugs, action of several in the pregnant sheep and foetus, 161
- , isoprenaline antagonism and duration of action in exercise induced tachycardia of three, 621P
- , the buccal absorption of some, 680P
- $\beta$ -adrenoceptors, selective blockade of, by 1-(p-allylphenolxy) - 3 isopropylamino - 2 - propanol hydroxychloride (H64/52) in the anaesthetized dog, 398
- Age**, effect of on  $\beta$ -adrenoceptor activity in tracheal smooth muscle, 181
- AH3474**, action of in the pregnant sheep and foetus, 161
- AH 5158**, effect of, on acute exercise tolerance in angina pectoris, 673P
- Albumin**, human serum, further studies of binding of bromosulphthalein sodium by: effects of albumin concentration and buffer composition, 133
- Alcohol**, interaction of, and drugs on psychomotor skills as demonstrated by a driving stimulator, 671P
- L-alanine**, effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- Alphaprodine**, effect of on the uptake of 5-HT and metaraminol, 808
- Alprenolol**, effects of on cats treated with *E. coli* endotoxin, 12
- , inhibition of action of oxyfedrine
- Amines**, mechanism of potentiation by, of non-equilibrium of the  $\alpha$ -adrenoceptor, 386
- Amino acids**, and inflammation, 662P
- Amino acid antagonists**, and the depression of cuneate neurones by  $\gamma$ -aminobutyric acid (GABA) and glycine, 642P
- Amino acids**, depressant, microiontophoretic study of, and the specificity of their antagonists, 663P
- , free, levels in the rabbit spinal cord, chronic dorsal root section on, 668P
- , kinetic analysis of, uptake by the rat retina *in vitro*, 656P
- 4-aminobutyrate aminotransferase**, some behavioural and anticonvulsant actions of ethanollamine O-sulphate, an inhibitor of, 681P
- $\gamma$ -aminobutyrate aminotransferase, effect of inhibitors of, on the accumulation of  $^3\text{H}$ - $\gamma$ -aminobutyric acid by the retina, 543
- $\gamma$ -aminobutyric acid, (GABA), action of, on rat sympathetic ganglion cells, 639P
- , amino acid antagonists and the depression of cuneate neurones by, and glycine, 642P
- , (GABA), effect of centrally acting drugs on the uptake of, by slices of rat cerebral cortex, 229
- $\gamma$ -aminobutyric acid metabolism, pharmacological interactions between  $\gamma$ -hydroxybutyric acid and agents which modify cerebral, 648P
- , (GABA), uptake of, by sensory root ganglia, 640P
- $^3\text{H}$ - $\gamma$ -aminobutyric acid, effect of amino-oxyacetic acid on the accumulation of, by the rat retina, 649P
- , ( $^3\text{H}$ -GABA), drug-induced changes in the electrically evoked release of, from spinal cord, 641P
- , effect of inhibitors of  $\gamma$ -aminobutyrate aminotransferase on the accumulation of, by the retina, 543
- , uptake of, by the retina, 529
- DL- $\gamma$ -amino-p-hydroxybutyrate**, effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- Amino-oxyacetic acid**, effect of on the accumulation of  $^3\text{H}$ - $\gamma$ -aminobutyric acid by the rat retina, 649P
- , effect on uptake of  $^3\text{H}$ -GABA in the retina, 543
- 1-(2, 6 dimethylphenoxy)-2-amino-propane**, a new antiarrhythmic agent, clinical pharmacological studies of, 622P

- Amphetamine**, dissociation of the anorexic effects of following intrahypothalamic injection, 183
- (+)-amphetamine**, reduction of stimulatory effects by 6-hydroxydopamine, 683
- Ampicillin**, effect of probenecid on the excretion of in the human bile, 782
- Anaphylaxis**, acute systemic, in the calf, 504
- Angiotensin**, effects of, on calcium storage in aortic microsomes, 377
- Angiotensin I**, inhibition of bradykinase activities, 799
- Angiotensin II**, non-inhibition of bradykinase activities, 799
- Anileridine**, effect of on the uptake of 5-HT and metaraminol, 808
- Anococcygeus**, rat, effect of immunosympathectomy and of 6-hydroxydopamine on the responses of, to nerve stimulation and to certain drugs, 261
- Anoxia**, effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- Anticonvulsant drugs**, the effect of some, on leptaizol and bicuculline induced acetylcholine efflux from rat cerebral cortex, 652P
- Antidiuretic response**, mechanism of histamine-induced, 700
- Antidiuretic hormone (ADH)**, abolition of effect of, by phospholipase C on epithelia, 778
- Antigen**, effect of, injected, on circulatory response in systemic anaphylaxis, 504
- Anti-inflammatory drugs**, delayed manifestation of ultraviolet reaction in the guinea-pig caused by, 240
- Anti-Parkinson drugs**, effect of, on catelepsy induced by  $\alpha$ -methyl-*p*-tyrosine in rats pretreated with intraventricular 6-hydroxydopamine, 658P
- , effects of, on cortical neurones, 465
- Antipyrine**, immediate decrease by hydrocortisone of the plasma half-life of, 434
- Apomorphine**, effect of on uptake of 5-HT, 808
- , effect of on the uptake of GABA, 229
- Arthritis**, mycoplasma, effect of salicylates on blood changes in rat, 272
- L-aspartate**, effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- Aspirin**, inhibition of functional vasodilatation and prostaglandin formation in rabbit adipose tissue, by, 305
- , suppression of ultraviolet reaction, 240
- Aspirin-like drugs**, experiments to prove that analgesic action depends on the inhibition of prostaglandin biosynthesis, 629P
- Atrial pacemaker activity** measured simultaneously with ventricular, 843
- Atropine**, antagonization of pharmacological effects of morantel, 117
- , effects of, on excitatory responses, 465
- , effect on human sweating, 487
- , effect of on the uptake of GABA, 229
- , inability to prevent histamine induced antidiuresis, 700
- Atropine sulphate**, absorption from an intramuscular injection of a mixture of the oxime P2S and atropine in exercising humans, 619P
- Australian Tiger Snake venom**, effects of on the mammalian neuromuscular junction, 141
- AY21011**, action of in the pregnant sheep and foetus, 161
- Barbiturates**, effect of on the uptake of GABA, 229
- Barbiturate metabolites**, mass spectrometry for the identification of, 665P
- Benapryzine**, effects of, as anti-Parkinson drug, on excitatory responses, 465
- , (BRL 1288), some initial animal and human pharmacological studies of, 476
- Benzhexol**, compared with benapryzine, 476
- , effects of, as an anti-Parkinson drug, on excitatory responses, 465
- Benzoquinonium**, prejunctional action of, 109
- 2-alkyl-1, 2, 3-benzotriazinium compounds**, structure-activity relationships in some series of, 819
- Bicuculline**, effect of some anticonvulsant drugs on, induced acetylcholine efflux from rat cerebral cortex, 652P
- , and frog spinal neurones, 637P
- Botulinum toxin**, action of, on transmission from sympathetic nerves to the vas deferens, 431
- Bradykinase** activities of extracts of dog lung, 799
- Bradykinin**, antinociceptive action of, and related kinins of larger molecular weights by the intraventricular route, 517
- Brain tissue**, technique for instantaneous fixation of, *in vivo*, 659P
- Bretylium**, interaction of, and guanethidine on the relaxation of the rat isolated fundal strip preparation, 268
- 2-bromo- $\alpha$ -ergokryptine**, evidence for physiological role of prolactin in osmoregulation in the rat after its inhibition by, 623P
- Bromosulphthalein sodium**, further studies of binding of by human serum albumin, 133
- BSP**, further studies of binding of by human serum albumin, 133
- $\alpha$ -Bungarotoxins**, *N,N*-di and *N,N,O*-tri ( $^3\text{H}$ ) acetyl, as specific labelling agents of cholinergic receptors, 147
- Bunolol**, action of in the pregnant sheep and foetus, 161
- $\gamma$ -butyrolactone**, inhibition of chlorpromazine-induced increase in homovanillic acid, 408
- Bumetanide**, some aspects of the clinical pharmacology of, a new potent diuretic, 618P
- Butidine**, action of in the pregnant sheep and foetus, 161
- Butyrophenones**, effect of on uptake of GABA in rat cortex slices, 229
- C
- Caerulein**, enhancement of acetylcholine release in the guinea-pig ileum by, 765
- Caffeine**, effects of on mammalian ventricular muscle, 1
- $\text{Ca}^{++}$** , requirements for extraneuronal uptake of noradrenaline, 556
- Calcium**, withdrawal of inhibiting release of acetylcholine induced by nicotine or DMPP, 765
- , effect of phospholipase C on release of, 778
- , effect of on release of noradrenaline from the cat spleen by sodium deprivation, 729
- , and inhibitory effect of manganese on transmitter release, 339
- , in rat body, replacement of by lithium, 586
- Cannabis extracts**, cardiovascular and respiratory effects of, 627P
- Carbachol**, sensitivity of rat anococcygeus to, with 6-hydroxydopamine, 261
- , influence of chloride ions on changes in membrane potential during prolonged application of, 363
- Carbenoxolone sodium**, effects of on stress-induced gastric damage in rats, 847

## B

- Cardiovascular actions**, of clonidine in the rabbit, 206
- Cardiovascular responses**, to injections of cholinomimetic drugs into the cerebral ventricles of unanaesthetized dogs, 196
- Catecholamines**, effect of on myocardial contractility, 12
- , effect of, on calcium storage in aortic microsomes, 377
- Catecholamine concentrations**, permanent alteration in, in discrete areas of brain in the offspring of rats treated with methylamphetamine and chlorpromazine, 425
- Catecholamine uptake**, structure-activity relations for the inhibition of, into synaptosomes from noradrenaline and dopaminergic neurones in rat brain homogenates, 332
- Catecholamine-O-methyl transferase activity**, effect of chronic L-DOPA administration on, 838
- , inhibition of, by pargyline, 719
- Chemical injury**, variation in the response of rats to, 625P
- Chloral hydrate**, and non-inhibition of chlorpromazine-induced increase of homovanillic acid, 408
- Chloralose**, and non-inhibition of chlorpromazine-induced increase of homovanillic acid, 408
- Chloride ion**, inhibition of bradykinase activities when containing angiotensins I and II, 799
- Chloride ions**, influence of, on changes in-membrane potential during prolonged application of carbachol to frog skeletal muscle, 363
- p-chloromercuriphenylsulphonate**, effect of on the uptake of GABA, 229
- Chlorothiazine**, increase of renin-like activity in the rat submaxillary gland by, 59
- Cholecystokinin**, octapeptide amide of, enhancement of acetylcholine release in guinea-pig ileum, 765
- Choline acetyltransferase**, stain for the detection of, 670P
- Cholinergic receptors**, *N,O*-di and *N,N,O*-tri (<sup>3</sup>H) acetyl  $\alpha$ -bungarotoxins as specific labelling agents of, 147
- Cholinomimetic drugs**, cardiovascular responses to the injection of, into the cerebral ventricles of unanaesthetized dogs, 196
- Chlorpromazine**, alteration of catecholamine concentrations in discrete areas of brain in the offspring of rats treated with, 425
- , inhibition by  $\gamma$ -hydroxybutyrate of increase in homovanillic acid, 408
- , effects of on neurotransmitter function in comparison with the central depressant effects of ouabain, 26
- , effect of, on hexose penetration in the human erythrocyte, 655P
- , effect of on the uptake of GABA, 229
- Clonidine**, effects of on peripheral sympathetic nerve function in the pithed rat, 850
- , central noradrenergic neurones and the cardiovascular actions of, in the rabbit, 206
- Cobra toxin**, binding of, by the rat diaphragm, 632P
- Cocaine**, behavioural studies of the actions of on central dopamine neurones, 39
- , blocking effect on uptake-retention of <sup>3</sup>H-noradrenaline in cat spleen following sodium deprivation, 729
- , effects of on neurotransmitter function, 26
- , effect of on the uptake of 5-HT, 808
- , inhibition of removal of noradrenaline in rat isolated lungs, 325
- Collagen**, uptake and ion requirements for extra-neuronal uptake of noradrenaline by, 556
- Corticosteroids**, and suppression of ultraviolet reaction, 240
- Cromoglycate**, inhibition by, of histamine release induced by dextran plus phosphatidyl serine, 627P
- Curare**, anti-, effect of hexamethonium at the mammalian neuromuscular junction, 353
- Cyclazocine**, effect of on the uptake of 5-HT and metaraminol, 808
- Cyclic AMP**, effect of, on calcium storage in aortic microsomes, 377

## D

- DDC**, pharmacological properties of and effects on neurotransmitter function in comparison with central depressant effects of ouabain, 26
- Debrisoquine**, interaction between phenylephrine and, in man, 675P
- Desacetylthymoxamine**,  $\alpha$ -adrenoceptor blocking activity of, on the human isolated smooth muscle, 677P
- Desmethylinipramine**, effects of on neurotransmitter function, 26
- , some characteristics of the uptake process in the isolated blood perfused cat spleen resistant to, 634P
- , effect of on the uptake of GABA, 229
- Dextran**, inhibition by cromoglycate of histamine release induced by, plus phosphatidyl serine, 627P
- Dextropropoxyphene**, effect of on the uptake of 5-HT and metaraminol, 808
- L-2,4-diaminobutyrate**, effect on uptake of <sup>3</sup>H-GABA by the retina, 529
- L-2,4-diaminobutyric acid**, effect of on the uptake of GABA, 229
- Diazoxide**, failure to increase renin-like activity in the rat submaxillary gland, 59
- , production of hyperglycaemia in mice when administered with frusemide, 124
- 2-diethylaminoethyl-2,2-diphenylvalerate hydrochloride (SKF 525-A)**, effect of on sulphacetamide distribution and excretion in rats, 69
- Diethylcarbamazine**, suppression of systemic anaphylaxis, 504
- Depolarization**, and neuromuscular block in the rat, 636P
- 3,4-dihydroxy-mandelic acid**, potentiation of accumulation of (-)-noradrenaline, 568
- 3,4-dihydroxy-phenylglycol**, potentiation of accumulation of (-)-noradrenaline by, 568
- Dimethothiazine**, effect of, on tonic vibration reflex in man, 613P
- 2:3-dimercaptopropanol**, inhibition of bradykinase activities in dog lung extracts, 799
- 1,1-dimethyl-4-phenylpiperazinium iodide**, release of acetylcholine in the guinea-pig ileum by, 765
- Dimethyltubocurarine**, prejunctional action of, 109
- Dinitrophenol**, effect on release of noradrenaline by sodium deprivation, 729
- , effect on uptake of <sup>3</sup>H-GABA by the retina, 529
- Diphenylhydantoin**, effects of on the biological activity of ouabain in the guinea-pig heart, 85
- Diphenylhydramine**, effect of on the uptake of GABA, 229
- Desipramine**, behavioural studies of the actions of on central dopamine neurones, 39
- Disodium cromoglycate**, and the release of prostaglandins from human chopped lung tissue, 291
- , inhibition of anaphylaxis, 504

- Diuretics**, effect of single dose administration of on the blood sugar of alloxan-diabetic mice or mice made hyperglycaemic by the acute administration of diazoxide, 124
- DMPP**, effects of on inhibition of uptake of  $^3\text{H}$ -( $\pm$ )-noradrenaline by guinea-pig atria, 179
- DOPA-decarboxylase**, effect of chronic L-DOPA administration on, 838
- , effects of inhibitors of on pancreatic secretion induced by L-DOPA and by dopamine in dogs, 77
- L-DOPA**, effect of chronic administration of on catecholamine metabolism in the rat, 838
- , induced pancreatic secretion in dogs affected by enzyme inhibitors of catecholamine metabolism and of haloperidol, 77
- , on the mechanism of, -induced postural hypotension in the cat, 437
- , effect of on brain self-stimulation and motor activity in rats, 609
- Dopamine**, effects of morphine and pentazocine on the turnover of, in various regions of the rat brain, 644P
- , cortical, only the precursor of noradrenaline, 648P
- , effect on postural hypotension and L-DOPA, 437
- , induced pancreatic secretion in dogs affected by enzyme inhibitors of catecholamine metabolism and of haloperidol, 77
- Dopamine  $\beta$ -hydroxylase**, effects of inhibitors of, on the pancreatic secretion induced by L-DOPA and by dopamine in dogs, 77
- $^3\text{H}$ -dopamine, effect of ovarian steroids on the uptake of, by hypothalamic tissue *in vitro*, 647P
- Dopamine neurones**, central, behavioural studies of the actions of cocaine, monoamine oxidase inhibitors and iminodibenzyl compounds on central dopamine neurones, 39
- Dopaminergic neurones**, structure-activity relations for the inhibition of catecholamine uptake into synaptosomes from, in rat brain homogenates, 332
- Dopaminergic systems**, interference with producing behavioural depression and hypothermia, 26
- Dopaminergic systems**, interference with producing, 26
- DPH**, effects of on the biological activity of ouabain in the guinea-pig heart, 85
- Drug-metabolizing enzymes**, in man, distribution and induction of some, 616P
- E**
- E. coli* endotoxin, myocardial and circulatory effects of; modification of responses to catecholamines, 12
- Endogenous prostaglandin formation**, some effects of on the responses of the cat spleen, 48
- Endotoxin**, *E. coli*, myocardial and circulatory effects of; modification of responses to catecholamines, 12
- Edrophonium**, potency compared with a new anticholinesterase drug RX 67668 on human tissues, 678P
- EDTA**, inhibition of bradykinase activities in dog lung extracts, 799
- Enzyme**, dose-dependant, induction, 616P
- Enzymes**, drug-metabolizing, distribution and induction of some, in man, 616P
- e.e.g. recording**, technique allowing, together with activity recording and intraventricular administration of drugs in the conscious rabbit, 663P
- Erythrocyte**, effect of chlorpromazine on hexose penetration in the human, 655P
- Eserine**, potency compared with a new anticholinesterase drug RX 67668 on human tissues, 678P
- Ethacrynic acid**, effect on blood sugar in mice when administered with diazoxide, 124
- Ethanol**, behavioural changes in mice following termination of administration, 667P
- , method for the induction of dependence to, in mice, 669P
- Ethanolamine O-sulphate**, an inhibitor of 4-aminobutyrate aminotransferase, some behavioural and anticonvulsant actions in mice of, 681P
- N-ethoxycarbonyl-2-ethoxy-1,2-dihydroquinoline**, blockade of the  $\alpha$ -adrenoceptor, mechanism of potentiation by amines, 386
- N-ethylmaleimide**, effect on release of noradrenaline by sodium deprivation, 729
- F**
- Fenfluramine**, dissociation of the anorexic effects of following intrahypothalamic injection, 183
- Frusemide**, production of hyperglycaemia in mice, 124
- Fundal strip preparation**, rat isolated, interaction of bretylium and guanethidine on the relaxations of, 268
- Fusaric acid**, effects of on pancreatic secretion induced by L-DOPA and by dopamine in dogs, 77
- G**
- Gastric acid secretion**, effect of indomethacin on, in the rat, 666P
- Gas chromatography**, mass spectrometry for the identification of barbiturate metabolites, 665P
- Ganglion stimulants**, parasympathetic, release of acetylcholine from the guinea-pig ileum by, 765
- Glucose uptake**, effects of metformin on, by isolated human skeletal muscle, 617P
- L-glutamate**, effect of benapryzine, benzhexol, atropine and procaine on the excitatory responses induced by, 465
- , effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- Glutethimide**, and non-inhibition of chlorpromazine-induced increase of homovanillic acid, 408
- Glycine**, amino acid antagonists and the depression of cuneate neurones by  $\gamma$ -aminobutyric acid and, 642P
- , effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- Guanethidine**, effects of on peripheral sympathetic nerve function in the pithed rat, 850
- , effect on release of noradrenaline by sodium deprivation, 729
- , interaction of bretylium and, on the relaxation of the rat isolated fundal strip preparation, 268
- $\beta$ -guanidinopropionate**, effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- H**
- Haemorrhage**, changes in plasma levels of vasopressin and renin in response to, in dogs, 315
- Haloperidol**, effects of on the pancreatic secretion induced by L-DOPA and by dopamine in dogs, 77

**Haloperidol (cont.)**

—, inhibition of increase in homovanillic acid induced by, 408

**Hallucinogens**, effect of on the uptake of GABA, 229

**Hepatic volume**, effects of histamine on in anaesthetized dogs, 282

**Hexamethonium**, antagonization of pharmacological effects of morantel, 117

—, anti-curare effect of, at the mammalian neuromuscular junction, 353

—, effect of on the uptake of GABA, 229

—, non-prevention of release of acetylcholine in the guinea-pig ileum by octapeptide amide of cholestykinin and caerulein, 765

—, prevention of release of acetylcholine in the guinea-pig ileum by DMPP, 765

**Hexose**, penetration, effect of chlorpromazine on, in the human erythrocyte, 655P

**Histamine**, effect of, injected, on circulatory responses in systemic anaphylaxis in the calf, 504

—, effects of on hepatic volume (outflow block) in anaesthetized dogs, 282

**Histamine-induced** antidiuretic response, 700

**Histamine release**, inhibition by cromoglycate of, induced by dextran plus phosphatidyl serine, 627P

**L-histidine**, effect on uptake of <sup>3</sup>H-GABA by the retina, 529

**Histochemical localization** of adrenergic nerves in the guinea-pig trachea, 707

**Homogenates**, uptake of noradrenalin and dopamine into, 332

**Homovanillic acid**, inhibition by  $\gamma$ -hydroxybutyrate of chlorpromazine-induced increase in, 408

**HSA**, further studies of binding of BSP by, 133

**Hydrazine**, effect on postural hypotension and L-DOPA, 437

**Hydrazinopropionic acid**, inhibiting of retinal GABA T, 543

**Hydrochlorothiazide**, effect on blood sugar in mice when administered with diazoxide, 124

**Hydrocortisone**, immediate decrease by, of the plasma half life of antipyrine, 434

$\pm$  1 - (2 - acetyl - 4 - n - butyramidophenoxy) - 2 - hydroxy - 3 - isopropylamino propane hydrochloride M&B 17803 A., pharmacokinetics of, in animals and man, 620P

$\gamma$ -hydroxybutyrate, inhibition by, of chlorpromazine-induced increase in homovanillic acid, 408

$\gamma$ -hydroxybutyric acid, pharmacological interactions between, and agents which modify cerebral  $\gamma$ -aminobutyric acid (GABA) metabolism, 648P

**6-hydroxydopamine**, attenuation of amphetamine-induced motor stimulation and stereotypy in the rat by, 683

—, comparison of the effects of chemical sympathectomy by, in newborn and adult rats, 249

—, effect of anti-Parkinson drugs on catalepsy induced by  $\alpha$ -methyl-p-tyrosine in rats pretreated with intraventricular, 658P

—, effect of, on the responses of the rat anococcygeus to nerve stimulation and to some drugs, 261

—, effect of on neurotransmitter function in comparison with the central depressant effects of ouabain, 26

—, effect on sympathetic function in isolated tissues, 748

**Hydroxyethyl starch**, structure of, 172

**Hydroxylamine**, effect on retinal accumulation of <sup>3</sup>H-GABA, 543

$\beta$ -hydroxylation, and catecholamine uptake in rat brain homogenates, 332

**5-hydroxytryptamine**, and non-equilibrium blockade of the  $\alpha$ -adrenoceptor, 386

—, effect of, injected, on circulatory response in systemic anaphylaxis in the calf, 504

—, effect of on the removal of noradrenaline by rat isolated lungs, 325

—, failure to prevent release of acetylcholine in the guinea-pig ileum induced by the octapeptide amide of cholecystokinin and caerulein, 765

—, the effect of narcotic analgesics on the uptake of, by blood platelets, 808

—, studies of, receptors of neurones from *Hirudo medicinalis*, 633P

—, uptake of, by rabbit heart *in vitro*, 661P

**<sup>3</sup>H-5-hydroxytryptamine**, effect of, on the uptake of, by hypothalamic tissue *in vitro*, 647P

**A.S.-hypertensive rats**, ionic composition of aortic smooth muscle from, 422

## I

**Iminodibenzyl compounds**, behavioural studies of the actions of on central dopamine neurones, 39

**Immunosympathectomy**, the effect of, on the responses of the rat anococcygeus to nerve stimulation and to some drugs, 261

**Intracellular potentials**, the effect of prolonged treatment with oxyfedrine on, 187

**Intravenous induction agents**, interaction of, with suxamethonium, 679P

**Intraventricular drug administration**, technique allowing e.g. and activity recording together with, in the conscious rabbit, 663P

**Indomethacin**, and the release of prostaglandins from human chopped lung tissue, 291

—, inhibition of functional vasodilatation and prostaglandin formation in rabbit adipose tissue, 305

—, effect of, on rat gastric acid secretion and mucosal blood flow, 666P

—, pretreatment of cat spleen by abolishing release of prostaglandins, 48

—, suppression of ultraviolet reaction, 240

**Iodacetic acid**, effect on release of noradrenaline by sodium deprivation, 729

**Ionic composition**, of aortic smooth muscle from A.S. hypertensive rats, 422

**Ion-movements**, a theoretical model of, in micropipettes occurring during the course of microelectrophoresis experiments, 657P

**Ion requirements**, for extraneuronal uptake of noradrenaline by arterial smooth muscle and collagen, 556

**Iprindole**, effect of on the uptake of GABA, 229

**Isethionate**, replacement of chloride ions in Ringers solution by, effect on membrane potential during prolonged application of cabachol, 363

**Isoprenaline**, antagonism and duration of action in exercise induced tachycardia of three  $\beta$ -adrenoceptor blocking drugs, 621P

—, effects of on mammalian ventricular muscle, 1

( $\pm$ )-isoprenaline, effects on renin-like activity of rat submaxillary gland, 59

**1-(p-allylphenolxy)-3-isopropylamino-2 pronanol hydrochloride**, selective blockade of  $\beta$ -adrenoceptors by, 398

**Isoproterenol**, increase in the renin-like activity in the rat submaxillary gland following administration of, 59

## J

**Jerk reflexes**, tendon, adrenergic control of, in man, 595

## K

**K<sup>+</sup>**, requirements for extraneuronal uptake of noradrenaline, 556

**KC1**, increase in the renin-like activity in the rat submaxillary gland by, 59

**Kinins**, bradykinin and related, antinociceptive action of, of larger molecular weights by the intraventricular route, 517

**Kö 1173**, a new antirhythmic agent, clinical pharmacological studies of, 622P

—, an antidysrhythmic, preliminary studies on the pharmacology of, in man, 674P

## L

**Labile brain constituents**, analysis of, using a technique for the instantaneous fixation of brain tissue *in vivo*, 659P

**Leptazol**, effect of some anticonvulsant drugs on, induced acetylcholine efflux from rat cerebral cortex, 652P

**<sup>3</sup>H-levorphanol**, cellular and metabolic tolerance to, 138

**LF 17-895**, isoprenaline antagonism and duration of action in exercise induced tachycardia, 621P

**Lignocaine**, metabolism in man, 672P

—, prejunctional action of, 109

**Lipolysis**, role of pre- and post-junctional inhibition by prostaglandin E<sub>2</sub> of, induced by sympathetic nerve stimulation in dog subcutaneous tissue, 711

**Lipolytic substances**, and functional vasodilatation, 305

**Lithium**, distribution of, and its effects on the distribution and excretion of other ions in the rat, 586

—, substitute for Na<sup>+</sup> as requirement for extraneuronal uptake of noradrenaline, 556

**Liver microsomal drug metabolism**, induction of, in newly-hatched chicks, 624P

**Local anaesthetics**, effect of on the uptake of GABA, 229

## M

**Magnesium**, effect on release of noradrenaline by sodium deprivation, 729

—, excess of inhibiting release of acetylcholine in the guinea-pig ileum induced by nicotine or DMPP, 765

—, in rat body, replacement of by lithium, 586

**Magnesium salt of adenosine triphosphate**, uptake of calcium, increase by, 377

**Manganese**, the inhibitory effect of, on transmitter release at the neuromuscular junction of the toad, 339

—, effect on release of noradrenaline by sodium deprivation, 729

**M/B 17,803A**, pharmacokinetics of, in animals and man, 620P

**McN-A-343**, effects of on inhibition of uptake of noradrenaline by guinea-pig atria, 179

**Membrane potential**, influence of chloride ions on changes in, during prolonged application of cabachol, 363

**Mepyramine**, effect of on the uptake of GABA, 229

—, prevention of histamine-induced anti-diuresis, 700

**Mepyramine (cont.)**

—, failure to suppress systemic anaphylaxis, 504

**Metaraminol**, effect of on removal of noradrenaline in rat isolated lungs, 325

**(-)-metaraminol**, the effect of narcotic analgesics on the uptake of, 808

**Metformin**, effects of, on glucose uptake by isolated human skeletal muscle, 617P

**Methacholine**, effects of on inhibition of uptake of <sup>3</sup>H-(±)-noradrenaline by guinea-pig atria, 179

—, injection of, into cerebral ventricles of unanaesthetized dogs, 196

**Methadone**, effect of on uptake of 5-HT and metaraminol, 808

**Methoxylation**, and catecholamine uptake in rat brain homogenates, 332

**Methylamphetamine**, effect on tendon jerk reflexes in man, 595

—, alteration of catecholamine concentrations in the discrete areas of the brain in the offspring of rats treated with, 425

—, behavioural studies of the actions of on central dopamine neurones, 39

**α-methylation**, and catecholamine uptake in rat brain homogenates, 332

**N-methylation**, and catecholamine uptake in rat brain homogenates, 332

**α-methyl-dopa**, effect on postural hypotension, 437

—, further evidence for a central hypotensive action of, in both the rat and the cat, 217

**α-methyl-p-tyrosine**, effect of, on brain self-stimulation and motor activity in rats, 609

—, effect of anti-Parkinson drugs on catalepsy induced by, in rats pretreated with intraventricular 6-hydroxydopamine, 658P

**α-methylnoradrenaline**, effect of in α-methyl-dopa preparations, 217

**Methysergide**, suppression of systemic anaphylaxis, 504

**Mg<sup>++</sup>**, requirements for extraneuronal uptake of noradrenaline, 556

**Microelectrophoresis experiments**, theoretical model of ion-movements in micropipettes occurring during the course of, 657P

**Microiontophoretic study**, of depressant amino acids and the specificity of their antagonists, 663P

**Monoamine**, brain concentrations of, effects of the acute and chronic administration of sex hormones on, 660P

**Monoamine oxidase activity**, effect of L-DOPA administration on, 838

—, inhibition of, by pargyline, 719

**Monoamine oxidase inhibitors**, effect of on the uptake of GABA, 229

—, behavioural studies of the actions of on central dopamine neurones, 39

**Monoamine oxidase**, effects of inhibitors of, on the pancreatic secretion induced by L-DOPA and by dopamine in dogs, 77

**Monoaminergic neurones**, and effect of clonidine, 206

**Monoamines**, in the guinea-pig intestine, 635P

**Morantel**, some pharmacological effects of, 117

**Morphine**, actions and interactions of microiontophoretically applied, with transmitter substances on brain stem neurones, 642P

—, actions of, on the segmental reflex of the decerebrate-spinal cat, 457

—, analgesia, tolerance and physical dependence in the adrenalectomized rat, 693

**Morphine (cont.)**

- , effect of, on the turnover of noradrenaline and dopamine in various regions of the rat brain, 644P
- , effect of on the uptake of 5-HT and metaraminol, 808
- , increase in brain and spinal acetylcholine levels without antinociceptive actions following, administration in the frog, 650P
- Motor stimulation**, amphetamine-induced, effects of 6-hydroxydopamine on, 683
- Mucosal blood flow**, effect of indomethacin on, in the rat, 666P
- Muscarinic receptors**, determination of the number of, in chick amnion muscle, 631P
- Muscularis mucosae**, effects of drugs and of electrical stimulation on, 760
- Mycoplasma arthritis**, effect of salicylates on blood changes in, in rats, 272
- Myocardium**, canine, drug induced changes in blood flow in normal and ischaemic regions of the, 626P

## N

- Na<sup>+</sup>**, requirements for extraneuronal uptake of noradrenaline, 556
- NaCl**, increase of renin-like activity in the rat submaxillary gland by, 59
- Naja nivea venom**, effects of, on nerve, cardiac and skeletal activity of the frog, 576
- Nalorphine**, effect of on the uptake of 5-HT, 808
- Naloxone**, action of morphine on the segmental reflex of the decerebrate-spinal cat by, 457
- , effect of on uptake of 5-HT and metaraminol, 808
- Nematocide**, some pharmacological effects of, 117
- Neostigmine**, potency compared with a new anticholinesterase drug RX 67668 on human tissues, 678P
- Nerve-growth factor antiserum (NGF-As)**, effect on sympathetic function in isolated tissues, 748
- Neuromuscular block**, depolarization and, in the rat, 636P
- Neuromuscular junction**, anti-curare effect of hexamethonium at the mammalian, 353
- Neuronal response**, kinetics of, relationship between, and the release of drugs from micropipettes: effects of retaining current, 653P
- Neuronal excitation and inhibition**, pharmacology of, induced by an acute seizure focus in feline cortex, 664P
- Neurones**, central noradrenergic, and the cardiovascular actions of clonidine in the rabbit, 206
- , dopaminergic nigro-striatal, stimulatory effects of amphetamine mediated by, 683
- Neurosis cuneate**, the depression of by  $\gamma$ -aminobutyric acid and glycine, 642P
- Neurotransmitters**, putative, *in vivo* method for studying release of, from rabbit olfactory bulbs, 667P
- NGF-As**, effect on sympathetic function in isolated tissues from mice, 748
- Nialamide**, behavioural studies of the actions of on central dopamine neurones, 39
- , effects of on pancreatic secretion induced by L-DOPA and by dopamine in dogs, 77
- Nickel ions**, inhibition of bradykinase activities in dog lung extracts, 799
- Nicotine**, effects of on inhibition of uptake of <sup>3</sup>H-( $\pm$ )-noradrenaline by guinea-pig atria, 179

**Nicotine (cont.)**

- , injection of, into cerebral ventricles of unanaesthetized dogs, 196
- , release of acetylcholine by in guinea-pig ileum, 765
- Nicotinic acid**, effect of on free fatty acid release and blood flow in fat tissue, 305
- Noradrenaline**, cortical dopamine only the precursor, 648P
- , differential labelling of intraneuronal stores, with different concentrations of (-)-<sup>3</sup>H-noradrenaline, 428
- , effects inhibited by *E. coli* endotoxin, 12
- , effects of morphine and pentazocine on the turnover of, in various regions of the rat brain, 644P
- , effect of on tendon jerk reflexes in man, 595
- , effects of pargyline on uptake of, in the cat spleen, 719
- , effect on postural hypotension and L-DOPA, 437
- , inhibition of the acetylcholine releasing action of peptides by, 765
- , inhibitory effect of on acetylcholine release induced by nicotine or DMPP
- , metabolism in cortex, intercranial self-stimulation and, 645P
- Noradrenaline metabolites**, potentiation of accumulation of (-)-noradrenaline, 568
- , removal of, in the pulmonary circulation of rat isolated lungs, 325
- , release of, by sodium deprivation from the cat spleen, 729
- , response of muscularis mucosae to, 780
- , restoration of anti-diuretic response to histamine, 700
- , sensitivity of anococcygeus of the rat to, with 6-hydroxydopamine, 261
- , structure-activity relations for the inhibition of catecholamine uptake into synaptosomes from, and dopaminergic neurones in rat brain homogenates, 332
- , supersensitivity to, in NGF-As and 6-OHDA pre-treated tissues, 748
- , uptake kinetics and ion requirements for extraneuronal uptake of, by arterial smooth muscle and collagen, 556
- (-)-<sup>3</sup>H-noradrenaline, differential labelling of intraneuronal noradrenaline stores with different concentrations of, 428
- <sup>3</sup>H-noradrenaline, effect of ovarian steroids on the uptake of, by hypothalamic tissue *in vitro*, 647P
- (-)-noradrenaline, accumulation and metabolism of, by cells in culture, 568
- , reduction of calcium storage in aortic microsomes, 377
- <sup>3</sup>H-noradrenaline overflow, effects of prostaglandin E<sub>2</sub> on, 711
- Noradrenergic neurones**, and the cardiovascular actions of clonidine in the rabbit, 206
- Normetanephrine**, effect of on removal of noradrenaline in rat isolated lungs, 325
- , inhibition of accumulation of (-)-noradrenaline, 568

## O

- 17- $\beta$ -oestradiol**, inhibition of accumulation of (-)-noradrenaline, 568
- , some characteristics of the uptake process in the isolated blood perfused cat spleen resistant to, 643P
- 6-OHDA**, attenuation of amphetamine induced motor stimulation and stereotypy by, 683

- 6-OHD**, intracisternal pre-treatment, control of hypotensive action of intravenous clonidine by, 206
- Ouabain**, comparison of central depressant effects of, with pharmacological properties of centrally-administered agents which interfere with neurotransmitter function, 26
- , effect of DPH and potassium on the biological activity of in the guinea-pig heart, 85
- , effect of release of noradrenaline by sodium deprivation, 729
- , effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- , increase of renin-like activity in the rat submaxillary gland by, 59
- Ovarian steroids**, effect of, on the uptake of  $^3\text{H}$ -noradrenaline,  $^3\text{H}$ -dopamine and  $^3\text{H}$ -5-hydroxytryptamine by hypothalamic tissue *in vitro*, 647P
- Oxyfedrine**, effects of on isolated portal vein and other smooth muscle, 827
- , the effect of prolonged treatment with, on intracellular potentials and on other features of cardiac function in rabbits and guinea-pigs, 187
- 2-oxoglutarate-4-aminobutyrate aminotransferase**, parallel inhibitory effect of AOAA in the retina, 543
- Oxprenolol**, action of in the pregnant sheep and foetus, 161
- P**
- Pacemaker activity**, simultaneous measurement of atrial and ventricular, 843
- Pancuronium**, prejunctional action of, 109
- Papaverine**, effect of on the uptake of 5-HT and metaraminol, 808
- Paracetamol**, the dependance of, absorption on the rate of gastric emptying, 415
- Pargyline**, behavioural studies of the actions of on central dopamine neurones, 39
- , effects of, on overflow of transmitter and uptake of noradrenaline in the cat spleen, 719
- Pentagastrin**, effect of prostaglandin  $\text{E}_1$  on, stimulated gastric acid, 498
- Pentazocine**, effects of, on the turnover of noradrenaline and dopamine in various regions of the rat brain, 644P
- , effect on the uptake of 5-HT and metaraminol, 808
- Peptides**, inhibition of bradykinase activities in dog lung extracts, 799
- Pethidine**, effect of on the uptake of 5-HT and metaraminol, 808
- Pheneturide**, as liver enzyme inducer in man compared with phenobarbitone, 615P
- Phenobarbitone**, compared with pheneturide as liver enzyme inducer in man, 615P
- Phenolic Hydroxyl groups**, and effect of inhibition of catecholamine uptake in rat brain homogenates, 332
- Phenothiazines**, effect of on uptake of GABA in rat cortex slices, 229
- Phentolamine**, effect of on uptake of GABA, 229
- , prevention or reversal of hypotensive effect of  $\alpha$ -methyl dopa, 217
- Phenoxybenzamine**, potentiation of EEDQ blockade of  $\alpha$ -adrenoceptors, 386
- , inhibition of reduced binding of calcium by (-)-Noradrenaline, 377
- , effects on  $^3\text{H}$ -noradrenaline overflow, 711
- , diuretic response to histamine obtained in animals pretreated with, 700
- Phenoxybenzamine (cont.)**
- , effect on release of noradrenaline by sodium deprivation, 729
- , effect of on removal of noradrenaline in rat isolated lungs, 325
- Phenylbutazone**, suppression of ultraviolet reaction, 240
- Phenylethylamine analogues**, effect of on inhibition of noradrenaline and dopamine uptake into homogenates of rat brain, 332
- Phenylephrine**, interaction between debrisoquine and, in man, 675P
- Phosphatidyl serine**, inhibition by cromoglycate of histamine release induced by dextran plus, 627P
- Phospholipase C**, effect of on calcium release from epithelia treated with antidiuretic hormone, 778
- Physostigmine**, compared in Parkinson's disease with benapryzine, 476
- Pilocarpine**, effects of on inhibition of uptake of  $^3\text{H}$ -( $\pm$ )-noradrenaline by guinea-pig atria, 179
- , failure of to increase renin-like activity in the rat submillary gland, 59
- Piminodine**, effect of on the uptake of 5-HT and metaraminol, 808
- Pindolol**, effect of on acute exercise tolerance in angina pectoris, 673P
- , isoprenaline antagonism and duration of action in exercise induced tachycardia, 621P
- , pharmacokinetics of unchanged, in patients with impaired renal function, 620P
- Placenta**, guinea-pig foetal, use of, perfused *in situ* as a model to study the placental transfer of pharmacological substances, 655P
- Polypeptides**, gastrin-like, release of acetylcholine from the guinea-pig ileum by, 765
- Potassium**, effects of on the biological activity of ouabain in the guinea-pig heart, 85
- Pralidoxime**, in mixture with atropine, as therapy for poisoning by anticholinesterase compounds, 619P
- Probenecid**, effect of on the excretion of ampicillin in the human bile, 782
- Procaine**, effects of, on excitatory responses, 465
- Prochlorperazine**, effect of on the uptake of GABA, 229
- Prolactin**, evidence for physiological role of, in osmoregulation in the rat after its inhibition by 2-bromo- $\alpha$ -ergokryptine, 623P
- L-proline**, effect on uptake of  $^3\text{H}$ -GABA by the retina, 529
- Propranolol**, effect of on acute exercise tolerance in angina pectoris, 673P
- , action of in the pregnant sheep and foetus, 161
- , blocking of diuretic response to histamine obtained in phenoxybenzamine pretreated animals by, 700
- , effect of on tendon jerk reflexes in man, 595
- , effect on thermal and emotional sweating in humans, 487
- , effect of on uptake of GABA, 229
- , isoprenaline antagonism and duration of action in exercise induced tachycardia, 621P
- D-propranolol**, effect of on acute exercise tolerance in angina pectoris, 673P
- Prostaglandin**, synthesis by the pregnant rat uterus at term, 628P
- Prostaglandins  $\text{A}_1$ ,  $\text{A}_2$** , actions of, on airway resistance and compliance in the cat, 630P
- Prostaglandin  $\text{E}_1$** , role of pre- and post-junctional inhibition by, of lipolysis induced by sympathetic nerve stimulation in dog subcutaneous adipose tissue *in situ*, 711

- Prostaglandins** E<sub>1</sub>, E<sub>2</sub>, and F<sub>2α</sub>, release of from human chopped lung tissue, 291
- Prostaglandin** E<sub>1</sub>, effects of, on acid secretion, mucosal histamine content and histidine decarboxylase activity in rat stomach, 498
- Prostaglandin biosynthesis**, experiments to prove that the analgesic action of aspirin-like drugs depends on inhibition of, 629P
- Prostaglandin formation**, inhibition of, in rabbit adipose tissue by indomethacin and aspirin, 305
- , inhibiting endogenous, some effects of on the responses of the cat spleen, 48
- Psychomotor skills**, interaction of alcohol and drugs on, as demonstrated by a driving stimulator, 671P
- Pulmonary vascular tissue**, human, the pharmacology of, 676P

## R

- Renin**, changes in the plasma levels of, in response to haemorrhage in dogs, 315
- Renin-like activity of the rat submaxillary gland**: characterization and the effect of several drugs and stimuli, 59
- Reserpine**, effects of on neurotransmitter function in comparison with the central depressant effects of ouabain, 26
- , treatment of cat spleen slices with affecting rate of <sup>3</sup>-noradrenaline following sodium deprivation, 729
- Ro 4-4602**, effect of on pancreatic secretion induced by L-DOPA and by dopamine in dogs, 77
- RX 67688**, a new anticholinesterase drug, potency compared with edrophonium, neostigmine and eserine, on human tissues, 678P

## S

- Salicylates**, effect of, on blood changes in mycoplasma arthritis in rats, 272
- Sex hormones**, effects of the acute and chronic administration of, on brain monoamine concentrations, 660P
- SKF 525-A**, effect of on sulphacetamide distribution and excretion in rats, 69
- Sodium**, in rat brain and bone, decrease of on substitution of lithium, 586
- , release of noradrenaline by deprivation of, 729
- Sodium diethyldithiocarbamate (DDC)**, pharmacological properties of and effects on neurotransmitter function in comparison with central depressant effects of ouabain, 26
- Sodium ions**, effect of <sup>3</sup>H-GABA by the retina, 529
- Sodium meclofenamate**, suppression of anaphylaxis by, 504
- Sotalol**, action of in the pregnant sheep and foetus, 161
- Spasmogenic substances**, the release of from human chopped lung tissue and its inhibition, 291
- Spectrometry**, mass, for the identification of barbiturate metabolites, 665P
- Stereotypy**, amphetamine-induced, effects of 6-hydroxydopamine in the rat, on, 683
- Sulphacetamide distribution and excretion in rats**, effects of SKF 525-A on, 69
- Suxamethonium**, interaction of, with intravenous induction agents, 679P
- Sympathectomy**, chemical, comparison of the effects of by 6-hydroxydopamine, in newborn and adult rats, 249

- Synaptosomes**, structure-activity relations for the inhibition of catecholamine uptake into, 332

## T

- Tetrabenazine**, effects of on neurotransmitter function in comparison with the central depressant effects of ouabain, 26
- Tetracaine**, effect on release of noradrenaline by sodium deprivation, 729
- Δ<sup>1</sup>-tetra-hydrocannabinol**, (Δ<sup>1</sup>-THC), cardiovascular and respiratory effects of, 627P
- Δ<sup>9</sup>-tetrahydrocannabinol**, tolerance to the hypothermic effects of, as a function of age in the chicken, 452
- Tetrodotoxin**, binding of labelled, by the rat diaphragm, 632P
- , effect on release of noradrenaline by sodium deprivation, 729
- , inhibition of acetylcholine release in guinea pig ileum, by, 765
- , prevention of release of acetylcholine in the guinea-pig ileum by DMPP, 765
- Tetrabenazine**, prevention of histamine-induced antidiuresis, 700
- Thebaine**, effect of on the uptake of 5-HT and metaraminol, 808
- Thermal injury**, variation in the response of rats to, 625P
- Thiopentone**, and non-inhibition of chlorpromazine-induced increase of homovanillic acid, 408
- Thiosemicarbazide**, effect on retinal accumulation of <sup>3</sup>H-GABA, 543
- Thymoxamine**, effect of on the uptake of GABA, 229
- , effect on tendon jerk reflexes in man, 595
- Tiger snake venom**, Australian, effects of on the mammalian neuromuscular junction, 141
- Tranquillizers**, a modified motor activity test to discriminate major and minor, 659P
- Transmitter release**, inhibitory effect of manganese on, at the neuromuscular junction of the toad, 339
- Transmitter substances**, actions and interactions of microiontophoretically applied morphine with, on brain stem neurones, 642P
- Tricyclic antidepressants**, effect of on uptake of GABA in rat cortex slices, 229
- Triglycerides** of the fat tissue, and functional vasodilatation mediation by prostaglandin E<sub>2</sub>, 305
- Tryptamine**, occurrence of, in rat brain and its pharmacological manipulation, 646P
- Tubocurarine**, effect on response of tissues to benzotriziniums, 819
- , passage of intravenously administered, into the liquor space in man and dog, 787
- , prejunctional action of, 109
- (+)-**tubocurarine**, effect of on the uptake of GABA, 229
- , protecting against binding and blocking effects of α-bungarotoxins, 147

## U

- Urethane**, and non-inhibition of chlorpromazine-induced increase of homovanillic acid, 408
- Ultraviolet reaction**, delayed manifestation of, in the guinea-pig caused by anti-inflammatory drugs, 240
- USVP65-24**, action of in the pregnant sheep and foetus, 161

## V

- Vas deferens**, action of botulinum on transmission from sympathetic nerves to the vas deferens, 431
- Vasodilatation**, functional, inhibition of, in rabbit adipose tissue by indomethacin and aspirin, 305
- Vasopressin**, changes in plasma levels of, in response to haemorrhage in dogs, 315
- Venom**, Australian Tiger snake, effects of on the mammalian neuromuscular junction, 141
- Ventricular** pacemaker activity measured simultaneously with atrial, 843

## Instructions to Authors

1. **Manuscripts** (2 copies) should be typed in double spacing on one side of paper not larger than foolscap ( $33 \times 20.5$  cm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. A short title containing not more than 40 letters should also be suggested.
2. A **short summary of results and conclusions** (arranged in numbered paragraphs), **tables and legends to figures** should be typed on separate sheets of paper.
3. **References** should be collected at the end of the paper. They should include the authors' names, year of publication, title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.
4. **Figures** should NOT BE LARGER THAN FOOLSCAP ( $33 \times 20.5$  cm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymography tracings (black on white) should be provided and both ordinates and abscissae should be calibrated.
5. **Lettering** on figures should be inserted in PENCIL. Symbols which are to appear in figures or legends should be chosen from the following:  

$\times$   $\div$   $\bullet$   $\blacksquare$   $\circ$   $\square$   $\triangle$   $\blacktriangle$   $\nabla$   $\blacktriangledown$   $\odot$   $\ominus$   $\diamond$
6. **Photographs and photomicrographs** should be printed on glossy paper and should be larger than the size required for reproduction.
7. **Tables** ideally should not have more than 84 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 130 characters to a line, unless absolutely unavoidable.
8. **An abstract** of about 100 words suitable for inclusion in *International Abstracts of Biological Sciences* should be typed on a separate sheet, giving the author's name and address and the title of the paper.

**General remarks.** A recent issue of the journal is a good guide to style. Papers are accepted only if accompanied by a statement that they have not and will not be published in whole or in part in any other Journal.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.
