Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr H.M. Adam, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the instructions inside the back cover.

The British Journal of Pharmacology is published monthly by Macmillan Journals Ltd, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633.

Annual subscription £36.00 (\$90 USA and Canada). (Orders must be accompanied by remittance. Prices applicable only to orders received before 31st December 1975.)

Cheques should be made payable to Macmillan Journals Limited: Subscription Department, Brunel Road, Basingstoke, Hampshire RG21 2XS, England.

Enquiries concerning advertising space and rates should be addressed to: Advertisement Department, Macmillan Journals Limited, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633.

INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action, including chemotherapy. A recent issue of the Journal is a good guide to style.

Manuscripts (two copies) should be sent to Dr H.M. Adam, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh, EH8 9JZ, from whom copies of the full Instructions to Authors, published in *Br. J. Pharmac.* **50**, 3-23, may also be obtained. Specific points to note are:

1. **Manuscript** should be typed in double spacing on one side of paper not larger than A4 (206 x 294 mm). There should be a separate title page giving the names and addresses of the authors in **alphabetical order**. A short title of not more than 50 letters should also be suggested.

2. **Statement Papers** are accepted only if accompanied by a statement that they have not been and will not be published in whole or in part in any other Journal.

3. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

4. **Abstract** (2 copies) An abstract of about 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

5. **Figures** These should not be larger than A4 (206 x 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

○ ● □ ■ △ ▲ ▽ ▼

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction.

6. **Tables** These should not have more than 85 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 110 characters to a line, unless absolutely unavoidable. **Figure legends and tables** should be typed on separate sheets of paper.

7. **References** These should be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.

Short Communications These may be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement should be included.

British Journal of Pharmacology

VOLUME 55 NUMBER 1 SEPTEMBER 1975

page

Systematic Pharmacology

- 3 HARANATH, P.S.R.K., INDIRA-NARAYAN, G. & VENKATAKRISHNA-BHATT, H. Pressor response induced by local anaesthetics perfused through the cerebral ventricles of dogs
- 9 METCALF, G., MYERS, R.D. & REDGRAVE, P.C. Temperature and behavioural responses induced in the unanaesthetized cat by the central administration of RX72601, a new anticholinesterase
- 17 BEVAN, P., BRADSHAW, C.M. & SZABADI, E. Effects of iprindole on responses of single cortical and caudate neurones to monoamines and acetylcholine
- 27 NISHI, K. The action of 5-hydroxytryptamine on chemoreceptor discharges of the cat's carotid body

Autopharmacology

- 41 HOLLINGSWORTH, M. Mechanical responses of rat isolated uterine horns to transmural stimulation
- 47 FENIUK, W. & LARGE, B.J. The effects of prostaglandins E_1 , E_2 and $F_{2\alpha}$ on vagal bradycardia in the anaesthetized mouse
- 51 LEWIS, A.J., NELSON, D.J. & SUGRUE, M.F. On the ability of prostaglandin E_1 and arachidonic acid to modulate experimentally induced oedema in the rat paw
- 57 FARMER, J.B., RICHARDS, I.M., SHEARD, P. & WOODS, AUDREY M. Mediators of passive lung anaphylaxis in the rat
- 65 GARCIA LEME, J., MORATO, M. & SOUZA, MARIA ZENILDE A. Anti-inflammatory action of glucagon in rats
- 69 GIBSON, A. & POLLOCK, D. Reduction in the cholinesterase activity of the rat anococcygeus muscle produced by corticosterone

Pharmacokinetics

- 73 BOADLE-BIBER, MARGARET C. & ROTH, R.H. Formation of dopamine and noradrenaline in rat vas deferens: comparison with guinea-pig vas deferens

Drug Mechanisms

- 79 BENNETT, M.R. & MIDDLETON, J. An electrophysiological analysis of the effects of reserpine on adrenergic neuromuscular transmission
- 87 BENNETT, M.R. & MIDDLETON, J. An electrophysiological analysis of the effects of amine-uptake blockers and α -adrenoceptor blockers on adrenergic neuromuscular transmission
- 97 BENNETT, M.R. & FLORIN, T. An electrophysiological analysis of the effect of Ca ions on neuromuscular transmission in the mouse vas deferens
- 105 NORTHOVER, B.J. Interaction of mono- and divalent metallic cations and of indomethacin on the membrane potential of vascular endothelial cells *in vitro*
- 111 BOSE, D. Mechanism of mechanical inhibition of smooth muscle by ouabain
- 117 GILBERT, D., GOODFORD, P.J., NORRINGTON, F.E., WEATHERLEY, B.C. & WILLIAMS, S.G. Forecasting the antimalarial activities of arylamidinoureas from their measured physicochemical properties
- 125 HALL, MOIRA T., MALEQUE, M.A. & WADSWORTH, R.M. Desensitization in the innervated and in the chronically denervated soleus muscle of the mouse

Psychopharmacology

- 133 LUSH, I.E. A comparison of the effect of mescaline on activity and emotional defaecation in seven strains of mice
- 141 KRŚIAK, M. Timid singly-housed mice: their value in prediction of psychotropic activity of drugs

Chemotherapy

- 151 ALLEN, B.W., ELLARD, G.A., GAMMON, PATRICIA T., KING, R.C., McDOUGALL, A.C., REES, R.J.W. & WEDDELL, A.G.M. The penetration of dapsone, rifampicin, isoniazid and pyrazinamide into peripheral nerves
