INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action, including chemotherapy. A recent issue of the Journal is a good guide to style.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh, EH8 9JZ, from whom copies of the full Instructions to Authors, published in *Br. J. Pharmac.*, 50, 3–23, may also be obtained. Specific points to note are:

1. **Manuscript** should be typed in double spacing on one side of paper not larger than A4 (206 × 294 mm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. A short title of not more than 50 letters should also be suggested.

2. **Statement Papers** are accepted only if accompanied by a statement that they have not been and will not be published in whole or in part in any other Journal.

3. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

4. **Abstract** (2 copies) An abstract of about 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

5. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction.

6. **Tables** These should not have more than 85 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 110 characters to a line, unless absolutely unavoidable. **Figure legends and tables** should be typed on separate sheets of paper.

7. **References** These should be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.

Short Communications These may be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement should be included.

British Journal of Pharmacology

VOLUME 60 NUMBER 2 JUNE 1977

- 165 FAMAHEY, J.P., FONTAINE, J. & REUSE, J. The effects of non-steroidal anti-inflammatory drugs on cholinergic and histamine-induced contractions of guinea-pig isolated ileum
- 173 JOHNSTON, BARBARA M. & OWEN, D.A.A. Tissue blood flow and distribution of cardiac output in cats: changes caused by intravenous infusions of histamine and histamine receptor agonists
- 181 BRAVO, MARÍA E., MONCKEBBERG, F. & URBINA, J. The effect of sulphamethoxypyridazine on liver and plasma levels of vitamin A in rats
- 185 HAAS, H.L. & RYALL, R.W. An excitatory action of iontophoretically administered lithium on mammalian central neurones
- 197 DOWD, H., KEH, G.S. & RAPER, C. Catechol-substituted phenoxypropanolamines: adrenoceptor activity in the anaesthetized cat
- 205 DEPORTER, D.A. Cyclic adenosine 3',5'-monophosphate and leucocyte chemotaxis *in vivo*
- 209 PARRATT, J.R. & STURGEES, R.M. The possible roles of histamine, 5-hydroxytryptamine and prostaglandin $F_{2\alpha}$ as mediators of the acute pulmonary effects of endotoxin
- 221 OHGA, A. & TANEIKE, T. Dissimilarity between the responses to adenosine triphosphate or its related compounds and non-adrenergic inhibitory nerve stimulation in the longitudinal smooth muscle of pig stomach
- 233 FERRY, C.B. & GEH, SOO LIN. An electrophysiological study of the action of crude *Enhydrina schistosa* venom
- 239 RICHARDSON, P.D.I. & WITHRINGTON, P.G. The role of β -adrenoceptors in the responses of the hepatic arterial vascular bed of the dog to phenylephrine, isoprenaline, noradrenaline and adrenaline
- 251 GRENNAN, D.M., MITCHELL, W., MILLER, W. & ZEITLIN, I.J. The effects of prostaglandin E_1 , bradykinin and histamine on canine synovial vascular permeability
- 255 O'DONNELL, STELLA R. & WANSTALL, JANET C. The use of functional antagonism to determine whether β -adrenoceptor agonists must have a lower efficacy than isoprenaline to be trachea-atria selective *in vitro* in guinea-pigs
