Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the instructions inside the back cover.

The British Journal of Pharmacology is published monthly by Macmillan Journals Ltd, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633, ISSN 0007-1188.

Annual subscription UK £52.50; USA & Canada, US \$115; Rest of world, US \$105; Airmail, US \$140 (or equivalent in any other currency). (Orders must be accompanied by remittance. Prices correct at time of publication.)

Cheques should be made payable to Macmillan Journals Limited: Subscription Department, Brunel Road, Basingstoke, Hampshire RG21 2XS, England.

Enquiries concerning advertising space and rates should be addressed to: Advertisement Department, Macmillan Journals Limited, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633.

INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action, including chemotherapy. A recent issue of the Journal is a good guide to style.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh, EH8 9JZ, from whom copies of the full Instructions to Authors, published in *Br. J. Pharmac.* **50**, 3–23, may also be obtained. Specific points to note are:

1. **Manuscript** should be typed in double spacing on one side of paper not larger than A4 (206 × 294 mm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. One first name of each author may be included. A short title of not more than 50 letters should also be suggested.

2. **Statement** Papers are accepted only if accompanied by a statement that they have not been and will not be published in whole or in part in any other Journal.

3. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

4. **Abstract** (2 copies) An abstract of about 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

5. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

○ ● □ ■ △ ▲ ▽ ▼

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction.

6. **Tables** These should not have more than 85 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 110 characters to a line, unless absolutely unavoidable. **Figure legends and tables** should be typed on separate sheets of paper.

7. **References** These should be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.

Short Communications These may be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement should be included.

British Journal of Pharmacology

VOLUME 62 NUMBER 1 JANUARY 1978

- 3 The late GUPTA, R.S. & KELKAR, V.V. Characterization of the adrenoceptor in the isolated cremaster muscle of the guinea-pig
- 7 ANGUS, J.A., BOBIK, A., KORNER, P.I. & STONEHAM, M.T. Guanethidine-induced vasodilatation in the rabbit, mediated by endogenous histamine
- 19 FILE, SANDRA E. & HYDE, J.R.G. Can social interaction be used to measure anxiety?
- 25 FURUTA, Y., HASHIMOTO, K. & WASHIZAKI, M. β -Adrenoceptor stimulation of exocrine secretion from the rat pancreas
- 31 CERLETTI, CHIARA, COCCIA, P., MANARA, L., MENNINI, TIZIANA & RECCHIA, M. Sub-cellular distribution of etorphine in rat brain and evidence for *in vivo* stereospecific binding
- 39 BARLOW, R.B., BREMNER, J.B. & SOH, K.S. The effects of replacing ester by amide on the biological properties of compounds related to acetylcholine
- 51 COUPAR, K.M. & MCLENNAN, P.L. The influence of prostaglandins on noradrenaline-induced vasoconstriction in isolated perfused mesenteric blood vessels of the rat
- 61 ENGINEER, DINAZ M., NIEDERHAUSER, U., PIPER, PRISCILLA J. & SIROIS, P. Release of mediators of anaphylaxis: inhibition of prostaglandin synthesis and the modification of release of slow reacting substance of anaphylaxis and histamine
- 67 HUGHES R.L. & MACKENZIE, J.E. The cardiovascular effects of cyclopropane in the intact, decerebrate and pithed rabbit preparations
- 75 KIRPEKAR, MADHURI, KIRPEKAR, S.M. & PRAT, J.C. Reversal of guanethidine blockade of sympathetic nerve terminals by tetraethylammonium and 4-aminopyridine
- 79 BLACKWELL, G.J., FLOWER, R.J., NIJKAMP, F.P. & VANE, J.R. Phospholipase A₂ activity of guinea-pig isolated perfused lungs: stimulation and inhibition by anti-inflammatory steroids
- 91 ITO, S., NAKAZATO, Y. & OHGA, A. The effect of the ionophores X-537A and A23187 on the noradrenaline output from peripheral adrenergic neurones in the presence of various divalent cations
- 99 FELDBERG, W. & ROCHA E SILVA JR M. Vasopressin release produced in anaesthetized cats by antagonists of γ -aminobutyric acid and glycine
- 107 HALL, MOIRA T., MALEQUE, M.A. & WADSWORTH, R.M. The effects of glycerol detubulation, of manganese ions, of dantrolene and of nitrate ions on the responses of isolated chronically denervated soleus muscles of the mouse to acetylcholine
- 115 CHADWICK, D., GORROD, J.W., JENNER, P., MARSDEN, C.D. & REYNOLDS, E.H. Functional changes in cerebral 5-hydroxytryptamine metabolism in the mouse induced by anticonvulsant drugs
- 125 ARMSTRONG, J.M., LATTIMER, N., MONCADA, S. & VANE, J.R. Comparison of the vasodepressor effects of prostacyclin and 6-oxo-prostaglandin F_{1 α} with those of prostaglandin E₂ in rats and rabbits
- 131 RASTOGI, R.B. & SINGHAL, R.L. Evidence for the role of adrenocortical hormones in the regulation of noradrenaline and dopamine metabolism in certain brain areas
- 137 COLLARD, K.J. The effect of lithium on the increase in forebrain 5-hydroxyindoleacetic acid produced by raphe stimulation
- 143 ROBIE, N.W. Effects of minoxidil and nitroprusside on reflex increases in myocardial contractility
- 147 MARSHALL, I., NASMYTH, P.A., NICHOLL, CLAIRE G. & SHEPPERSON, N.B. α -Adrenoceptors in the mouse vas deferens and their effects on its response to electrical stimulation
- 153 GRAHAM, J.D.P., GREY, A.C., HENDERSON, A.H. & LEWIS, M.J. Effects of Δ^1 -trans-tetrahydrocannabinol on mechanical performance of isolated heart muscle preparations
