Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the instructions inside the back cover.

The British Journal of Pharmacology is published monthly by Macmillan Journals Ltd, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633, ISSN 0007-1188.

Annual subscription UK £52.50; USA & Canada, US \$115; Rest of world, US \$105; Airmail, US \$140 (or equivalent in any other currency). (Orders must be accompanied by remittance. Prices correct at time of publication.)

Cheques should be made payable to Macmillan Journals Limited: Subscription Department, Brunel Road, Basingstoke, Hampshire RG21 2XS, England.

Enquiries concerning advertising space and rates should be addressed to: Advertisement Department, Macmillan Journals Limited, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633.

INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action, including chemotherapy. A recent issue of the Journal is a good guide to style.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh, EH8 9JZ, from whom copies of the full Instructions to Authors, published in *Br. J. Pharmac.* **50**, 3–23, may also be obtained. Specific points to note are:

1. **Manuscript** should be typed in double spacing on one side of paper not larger than A4 (206 × 294 mm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. One first name of each author may be included. A short title of not more than 50 letters should also be suggested.

2. **Statement** Papers are accepted only if accompanied by a statement that they have not been and will not be published in whole or in part in any other Journal.

3. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

4. **Abstract** (2 copies) An abstract of about 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

5. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction.

6. **Tables** These should not have more than 85 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 110 characters to a line, unless absolutely unavoidable. **Figure legends** and **tables** should be typed on separate sheets of paper.

7. **References** These should be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.

Short Communications These may be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement should be included.

British Journal of Pharmacology

VOLUME 62 NUMBER 2 FEBRUARY 1978

- 159 FIELD, ROGER C., GIBSON, BETSY R., HOLBROOK, DAVID J. JR. & McCALL, BARBARA M. Inhibition of precursor incorporation into nucleic acids of mammalian tissues by antimalarial aminoquinolines
- 165 COOK, D.A. & MACLEOD, K.M. Responses of rabbit portal vein to histamine
- 171 EVANS, R.H. The effects of amino acids and antagonists on the isolated hemisectioned spinal cord of the immature rat
- 177 MAULE WALKER, FELICITY M. & POYSER, N.L. The metabolism of prostaglandins by the guinea-pig uterus with particular reference to corpus luteal maintenance in early pregnancy
- 185 WALKER, M.J.A. Initial investigations into adrenaline accumulation and adrenergic responsiveness in cultured neonatal rat heart cells
- 195 DAS, M., GANGULY, D.K. & VEDASIROMONI, J.R. Enhancement by oxotremorine of acetylcholine release from the rat phrenic nerve
- 199 BERTHELOT, A. & GAIRARD, A. Effect of parathyroidectomy on cardiovascular reactivity in rats with mineralocorticoid-induced hypertension
- 207 GARCÍA, A.G., KIRPEKAR, S.M. & PASCUAL, R. Release of noradrenaline from cat spleen slices by potassium
- 213 AHTEE, LIISA & KAAKKOLA, SEPPO Effect of mecamlamine on the fate of dopamine in striatal and mesolimbic areas of rat brain; interaction with morphine and haloperidol
- 219 GORDON, J.L. & OLVERMAN, H.J. 5-Hydroxytryptamine and dopamine transport by rat and human blood platelets
- 227 O'DONNELL, STELLA R., PERSSON, C.G.A. & WANSTALL, JANET C. An *in vitro* comparison of β -adrenoceptor stimulants on potassium-depolarized uterine preparations from guinea pigs
- 235 O'DONNELL, STELLA R. & SAAR, NILI The uptake kinetics and metabolism of extraneuronal noradrenaline in guinea-pig trachea as studied with quantitative fluorescence microphotometry
- 241 BLATCHFORD, D., HOLZBAUER, MARGARETHE, INGRAM, D.L. & SHARMAN, D.F. Responses of the pituitary-adrenal system of the pig to environmental changes and drugs
- 255 FRICKE, U. & KLAUS, W. Sodium-dependent cardiac glycoside binding: experimental evidence and hypothesis
- 259 CLANACHAN, A.S. & MUIR, T.C. Effects of end-tidal concentrations of cyclopropane, halothane and diethyl ether on peripheral autonomic neuroeffector systems in the rat
- 267 GILLESPIE, J.S. & McKNIGHT, A.T. The actions of some vasoactive polypeptides and their antagonists on the anococcygeus muscle
- 275 BAHKLE, Y.S., JANCAR, SONIA & WHITTLE, B.J.R. Uptake and inactivation of prostaglandin E_2 methyl analogues in the rat pulmonary circulation
- 281 CLARK, WESLEY G. & ROBINS, JEAN A. The antipyretic effect of tilorone hydrochloride in the cat
- 289 GARTSIDE, I.B. The actions of diazepam and phenytoin on a low dose penicillin epileptiform focus in the anaesthetised rat
- 293 BURNSTOCK, G. & WONG, H. Comparison of the effects of ultraviolet light and purinergic nerve stimulation on the guinea-pig taenia coli
- 303 DAVIES, J.A. & WILLIAMS, J. The effect of baclofen on α -flupenthixol-induced catalepsy in the rat
- 307 FOSTER, R.W., SHAH D.S. & SMALL, R.C. A study of the sympathomimetic action of guanethidine on the isolated anococcygeus muscle of the rat
